Just connect your camera to your printer and print

PictBridge   Exif Print   DPOF   DIRECT PRINT   BUBBLE JET DIRECT

Introduction

—Confirm Your Printer Model and the Section that Applies to You

Operations differ according to your printer model.
According to the procedure below, confirm the section and page you should read in this user guide.

1 Connect the camera to the printer and confirm the icon displayed in the camera's LCD monitor.

• For instructions on camera and printer connection methods, please refer to page 8.

	Icons displayed in the camera's LCD monitor	
Confirming the section that applies to you	⌇/凸	
	✅	

• If one of the aforementioned icons does not appear, the connected printer cannot be used.
• When the printer is ready for printing, the 凸∼ button lights in blue. The 凸∼ button blinks during printing.

2 Confirm your printer model.

3 Read the page below.

Printer model		Refer to the sections indicated
SELPHY CP series		Page 12 " 🖼 / 🖨 Printing with SELPHY CP Series Printers using *PictBridge*/Wireless"
PIXMA/ SELPHY DS series		Page 31 " 🖼 / 🖨 Printing with Bubble Jet Printers (PIXMA series/ SELPHY DS series) using *PictBridge*/Wireless"
Non-Canon printers*		Page 50 " 🖼 Printing with Non-Canon, *PictBridge* Compliant Printers"
SELPHY CP series		Page 51 " 🖼 Printing with SELPHY CP Series Printers using *Canon Direct Print*"
Bubble Jet printers		Page 67 " 🖼 Printing with Bubble Jet Printers using *Bubble Jet Direct*"

* Please also refer to the user guide that came with your printer.

For the latest information regarding connections between Canon printers and cameras, please refer to the following URL:
http://web.canon.jp/Imaging/BeBit-e.html
http://www.canon.com/pictbridge/

PictBridge **Compliance**
This camera complies with the industry standard "PictBridge"*. This allows you to also connect your camera to non-Canon *PictBridge* compliant printers and print images with simple operations using the camera buttons.

* PictBridge: *PictBridge* is an industry standard for direct printing that allows you to print images without using a computer by directly connecting digital cameras and digital camcorders (hereafter "camera") to a printer, regardless of the devices' brand and model.

Table of Contents

Direct Print

Allows for Printing without the Use of a Computer

Connect the camera to the printer wirelessly* or with the appropriate cable.
Image selection and printing is operated from the camera.

Connecting wirelessly is only possible with Canon PictBridge compliant printers.
Various Printing Operations Can Be Performed*

Prints to cover the entire surface of the paper.
Or, prints with a border.

Adds the date.

Specifies which portion of the image to print. (Trimming)

Multiple pictures can be printed at once. (DPOF print setting)

Some settings may not be selectable for Non-Canon printers.

You Can Also Perform the Following Printing Operations

Printing Movies (Movie Print)
Movie frames can be extracted at fairly regular intervals and printed on a single sheet of paper (p. 25 or p. 61).

• Capable printers: Canon SELPHY CP Series Printers (With a wireless connection, only the CP600 can be used.)

Printing Multiple Images on a Sheet of Paper

Compositions of multiple images you specify of the same dimensions can be printed on a single sheet of paper (p. 21 or p. 42).

Moreover, the DPOF print setting* function allows you to separately print different images by specifying the number of frames to be printed per image.
• Capable printers: Printers using *PictBridge* (Including non-Canon Printers) (This function is not available on some printers.)

ID Photo Print

An image can be trimmed, laid out and printed as ID photos (p. 22 or p. 58).

• Capable printers: Canon SELPHY CP Series Printers (With a wireless connection, only the CP600 can be used.)

Depending on the printer model, an additional printing operation is available as follow:
• Printing images in a fixed size (p. 24)

DPOF print settings
This function allows you to preset the images and the number of copies using the camera button controls. The settings are recorded to a memory card. Please refer to the Camera User Guide for instructions on setting procedure. This guide explains how to print images with DPOF print settings. DPOF=Digital Print Order Format

Connecting the Camera to the Printer

Connect the camera to the printer. If you use a Canon *PictBridge* compliant printer, you can connect it to the camera wirelessly by using the wireless print adapter supplied with the camera. If you use the appropriate interface cable supplied with the camera, you can connect it to, and print using, Canon *PictBridge* compliant printers, *Canon Direct Print* compatible printers, and Non-Canon *PictBridge* compliant printers. For instructions on printer and camera operation methods, refer to their respective user guides.

Connecting the Camera to the Printer Wirelessly

The camera can only be connected wirelessly to Canon *PictBridge* compliant printers.

1 **Set one of the following into the camera.**
- Compact Power Adapter CA-DC10 (supplied with the AC Adapter Kit ACK-DC10 (sold separately))
- Fully charged battery

2 **Place paper, ink cassette/cartridge, etc. into the printer.**

3 **Connect the Compact Power Adapter CA-DC20/CA-DC20E to the wireless print adapter supplied with the camera and attach it to the printer*.**

* If you are using a Compact Photo Printer SELPHY CP710/CP510, you do not need to attach the compact power adapter to the wireless print adapter.

Attach the Compact Power Adapter CA-DC20/CA-DC20E
4 **Turn the printer's power on.**

5 **Set the camera to Playback mode, turn the power on and press the △∿ button.**

6 **After confirming that [Target Device] is set to [1.WA-1], use the ◆/◆ button to select [Connect] and press the ⬭ button.**

Connect/Disconnect	
Target Device	◀ 1.WA-1 ▶
Connect	Cancel

- The camera will attempt to establish a wireless connection to the printer.
- After the attempt has started, the wireless lamp on the camera and the lamp on the wireless print adapter will be blinking in blue. Once a connection is made, the blinking will cease and the lamps will light in blue.

7 **Confirm that 🖪 has appeared in the upper left corner of the LCD monitor.**

- A wireless connection has been established and printing is now possible.
- The 𝖸ıl icon will appear on the LCD monitor showing the strength of the wireless connection.

9

- For more information on how to attach the wireless print adapter and connecting the camera to the printer wirelessly, please refer to the *Advanced Camera User Guide*.
- In Step 5, if you continue to press the ⬠⤳ button, wireless connection will start and the screen from Step 7 will be displayed.
- The following operations are not available during a camera/printer connection.
  - Language settings that use the **SET** button and the **MENU** button.
  - Resetting the camera's settings to default.

Terminating the Wireless Connection

1. **Press the camera's ⬠ button and use the ◆/→ button to select the ⚡ (Wireless) menu.**

▶	⚡	↑↑	🔊

   Connect/Disconnect…
   Reg. Target Device…
   Delete Registration…
   Auto Transfer   On Off
2. **Use the ◆/◆ button to select [Connect/Disconnect] and press ⬠.**

▶	⚡	↑↑	🔊

   Connect/Disconnect…
   Reg. Target Device…
   Delete Registration…
   Auto Transfer   On Off
3. **Use the ◆/→ button to select [Disconnect] and press ⬠.**
   - The wireless connection will be terminated.
   - The wireless connection will also be terminated when the camera mode is changed using the mode switch.

Connecting the Camera to the Printer with an Appropriate Cable

1 **Set one of the following into the camera.**

- Compact Power Adapter CA-DC10 (supplied with the AC Adapter Kit ACK-DC10 (sold separately))
- Fully charged battery

2 **Place paper, ink cassette/cartridge, etc. into the printer.**

3 **Connect the camera to the printer with the appropriate interface cable supplied with the camera.**

DIGITAL terminal

Camera: Connect the cable to the **DIGITAL** terminal.
Printer: Refer to the printer's user guide.
Some printers require specific connection cables which differ from the above cable. Please refer to the printer's user guide.

4 **Turn the printer's power on.**

5 **Set the camera to Playback mode and turn the power on.**

The following operations are not available during a camera/printer connection.
• Language settings that use the **SET** button and the **MENU** button.
• Resetting the camera's settings to default.

Disconnecting the Camera and the Printer

1. Detach the cable from the printer.

Pull out the cable while holding the connector plug. Do not pull out by the cable.

2. Turn the camera's power off.

3. Detach the cable from the camera.

Pull out the cable while holding the connector plug. Do not pull out by the cable.

11

⚡/🖨 Printing with SELPHY CP Series Printers using *PictBridge*/Wireless

Printing

Easy Print

You can print images by pressing only one button after connecting the camera to the printer.

1		**Make sure that ⚡ or 🖨 displays in the upper left corner of the LCD monitor.**
2	**Display the images you wish to print and press the 凸∿ button.** If you wish to change the print settings, see *Print after Changing the Print Settings* (p. 13).	

Print after Changing the Print Settings

You can change the print settings before printing.

1	**Make sure that ☑ or ☐ displays in the upper left corner of the LCD monitor.** If ☑ displays on the LCD monitor, please refer to ☑ *Printing with SELPHY CP Series Printers using Canon Direct Print* (p. 51).
2	**Display the images you wish to print and press the SET button.** The print order screen appears. **Depending on the printer model, some setting options may not display.**

(Print Order Screen with labels)

Sets the print effect (p. 16)

Sets the date and the file number for printing (p. 15)

Sets the number of copies (p. 16)
Sets the trimming portion (p. 17)
Sets the paper size, type and layout (p. 19)

Starts the printing process

Print Order Screen

3	**Select print settings as needed.**
4	**Select [Print] and press the SET button.** • The image will start to print and, when it is completely finished, the display will revert to the standard playback mode. • If you press the **MENU** button, the display will revert to the standard playback mode and printing will not take place.

13

- You cannot print the RAW images.
- It may not be possible to play back or print images shot with a different camera.
- You may not be able to print if the memory card holds a large number of images (about 1000).

Cancel Printing
- To cancel printing between images, press the **SET** button. A confirmation dialog will display. Select [OK] and press the **SET** button. The printer will stop printing the current image and eject the paper.

Printing Errors
- An error message appears if an error occurs for some reason during the printing process. When the error is resolved, printing will automatically resume. If printing does not resume, select [Continue] and press the **SET** button. If [Continue] cannot be selected, select [Stop], press the **SET** button and restart the print job. See *List of Messages* (p. 30) for details.

Selecting Print Settings

Depending on the camera model, the screens that will be displayed will vary. Please also refer to the user guide that came with your printer.

Default Setting
• The Default option is a fixed setting of the printer.
• The [Date/File No.], [Print Effect], paper setting [Paper Size], [Paper Type] and [Page Layout] options are available.

Setting the Date and the File Number Printing Option

<table>
<tr>
<td rowspan="2">

1

</td>
<td colspan="2">

Select [🞲], then select the date and the file number printing option.
You can set the date and the file number printing as follows:

</td>
</tr>
<tr>
<td>

Date	Prints only the date.
File No.	Prints only the file number.
Both	Prints both the date and the file number.
Off	Prints neither date nor file number.
Default	Prints using the default setting.

</td>
</tr>
</table>

If you select an image which has had the shooting date embedded in it using a camera with the Postcard Date Imprint mode, [🞲] will be set to [Off]. If you select [Date], [File No.] or [Both], the date/file number will be printed on the embedded information which is also printed.

15

Setting the Print Effect

This function uses the camera's shooting information to optimize the image data, yielding high quality prints. You can select the following print effects.

On	Uses the camera's shooting information to deliver optimum prints.
Off	Prints without any effects.
Default	Print settings differ according to your printer model.

1

Select [ ] and choose a print effect option.

Setting the Number of Copies

1

Select [ ] and set the number of prints.
1 to 99 copies can be set.

Setting the Printing Area (Trimming)

You can specify a portion of the image for printing.
Please set [Paper Settings] (p. 19) before setting the trimming settings. If [Paper Settings] is changed after having made the trimming settings, you must select the settings again.

1

Select [Trimming] and press the SET button.
The trimming frame will appear at the center of the image. If a trimming setting has already been selected for the image, the frame will appear around the previously selected portion.

The trimming setting screen differs depending on the camera model. Ensure that the screen appears before selecting settings.

Trimming Frame

17

	Trim the image.
	Changing the Size of the Trimming Frame • Press the zoom lever to adjust the size of the trimming frame. • The trimming frame can be changed to a minimum selection of approximately half the displayed image (in width and height) or a maximum selection that is virtually the same size as the image. • Expanding the trimming frame beyond its maximum size cancels the trimming setting. • When printing an image that has been magnified using the trimming option, the image quality may become coarser and grainier depending on the level of magnification.
2	**Moving the Trimming Frame** • Move the trimming frame using the up, down, right and left buttons.
	Rotating the Trimming Frame • You can rotate the trimming frame by pressing the **DISP.** button.
3	**Press the SET button to close the setting menu.** Pressing the **MENU** button cancels the settings.

• The trimming setting only applies to one image.
• The trimming setting is canceled with the following operations.
  • When you set the trimming settings for another image.
  • When you close the Print mode (when you turn the camera power off, change the camera mode,terminate a wireless connection to the printer or detach the connection cable).
• The shooting date or part of the date which has been embedded in images using a camera with the Postcard Date Imprint mode may not be printed properly depending on the trimming setting.

• The paper size and page layout settings determine the shape of the trimming frame.
• Please use the LCD monitor to set the trimming settings. The trimming frame may not display correctly on a TV screen.

18

Selecting the Paper Settings

1	⊘ Date On 1 copies Trimming ⬚ Default **Paper Settings** ⬚ Default Print ⬚ Borderless **MENU** ↰	**Select [Paper Settings] and press the SET button.** The paper size setting screen appears.
2	⬚ ⬚ ⬚ Paper Size **Default** 9x13cm **MENU** Cancel **SET** Next	**Select a paper size and press the SET button.** The default settings and specified paper cassette size are displayed. The paper type setting screen appears. ** Paper sizes vary according to region.*
3	⬚ ⬚ ⬚ Paper Type **Default** **MENU** Previous **SET** Next	**Press the SET button.** The page layout screen appears.
Select a layout.
The following layout can be selected.

Default	Print settings differ according to your printer model.
Bordered	Prints with a border.
Borderless	Prints right to the edges of the paper.
N-up	Prints 2, 4 or (8*) images on a single sheet of paper (p. 21).
ID Photo	Specifies the print size and print portion of an image or a whole image as an ID photo (p. 22).
Fixed Size	Prints by specifying the print size of the image on a sheet of paper (p. 24).

* Credit card size paper only

Printing Multiple Images on a Sheet of Paper

Selecting [N-up] in the layout setting (p. 20) will allow you to specify the following layout settings.

2	2 images (height 2 x width 1) of the same dimensions are arranged on a single sheet of paper.
4	4 images (height 2 x width 2) of the same dimensions are arranged on a single sheet of paper.
8*	8 images (height 4 x width 2) of the same dimensions are arranged on a single sheet of paper or a label sheet.
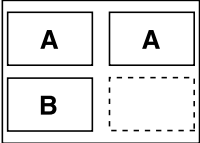

* This option can only be selected when printing on credit card size paper.

[Printing example 1] Printing 3 copies of image A in 2-up

Number of copies (p. 16)	Image A: [3] copies	
Layout	2	

DPOF print setting (p. 27) allows you to separately print different images by specifying the number of frames to be printed per image.
[Printing example 2] Printing 2 copies of image A and 1 copy of image B in 4-up

DPOF print settings* (p. 27)	Image A: [2] copies Image B: [1] copies	
Layout	4	

* Please refer to the *Camera User Guide* for instructions on DPOF print setting method.

Printing by Specifying the Print Size (ID Photo Print)

Selecting [ID Photo] in the layout setting (p. 20) will allow you to specify the print size and print portion of an image or a whole image as an ID photo*.

* *Images printed with the ID Photo Print function may not be allowed as a formal certificate photo. Refer to the party (organization) or administration requiring the photo.*

- The print size can be specified for only L (Large) resolution images in the camera connected to the printer.
- With a wireless connection, the SELPHY CP600 is the only printer with which this function can be used.

Trimming Frame

Trim the image to specify the print area.
See Step 2 of *Setting the Printing Area (Trimming)* (p. 18) on how to trim the image.

The trimming setting screen differs depending on the camera model. Follow the steps according to the screen that displays on your camera.

- The shape of the trimming frame varies depending on the specified print size.
- Use the LCD monitor to specify the print size settings. The trimming frame may not display correctly on a TV screen.

23

Printing Images in the Fixed Size

Selecting [Fixed Size] in the layout setting (p. 20) will allow you to print by specifying the print size of the image on a sheet of paper.
Select the fixed print size required.
Depending on the paper size, you can select print sizes as follows:

Paper size	Print size
Credit Card	You cannot select the print size.
9 × 13 cm (L size)	89 mm × 55 mm Default
10 × 14.8 cm (Postcard size)	7 cm × 10 cm Default
4 in. × 8 in./ 10 × 20 cm (Wide size)	4 in. × 6 in. 7 cm × 10 cm Default

5 **Select a layout and press the SET button. This ends the paper settings operations.**
The display returns to the print order screen.

Printing Movies (Movie Print)

You can print movie frames selected automatically at fairly regular intervals laid out in index style on a single sheet of paper.

<table>
<tr>
<td>1</td>
<td></td>
<td>Select the movie you want to print, then press the SET button.
The movie control panel appears.</td>
</tr>
<tr>
<td>2</td>
<td>
Movie Control Panel</td>
<td>Select ⊡ (Print) and press the SET button.</td>
</tr>
<tr>
<td>3</td>
<td></td>
<td>If necessary, select [On], [Off] or [Default] in 🖫 (Caption).
If you set 🖫 (Caption) to [On], you can print the file number and the elapsed time of the frame at the same time.</td>
</tr>
<tr>
<td>4</td>
<td colspan="2">Select [Print] and press the SET button.</td>
</tr>
</table>
- It may not be possible to play back or print movies shot with a different camera.
- With a wireless connection, the SELPHY CP600 is the only printer with which this function can be used.

25

- If you press the $\mathbb{D}_{\sim}$ button instead of the **SET** button in Step 1, movie print begins.
- The number of printed movie frames per sheet of paper is determined by the paper size shown as follows:
  (Depending on the number of seconds in the movie, there are cases when the number of frames indicated below will not be printed.)
  - Credit card size: 20 frames
  - L size: 42 frames
  - Postcard size: 63 frames
  - Wide size: 84 frames
- Selecting [Paper Settings] and pressing the **SET** button in Step 3 will allow [Paper Size] and [Paper Type] to be selected. However, [Page Layout] cannot be set (p. 20).

Printing with DPOF Print Settings

For instructions on how to set DPOF print settings, please refer to the _DPOF print settings_ section of the _Camera User Guide_.

In this section, we will explain how to print several images already specified with DPOF print settings.
1	**In the [▶ (Play)] menu, select [Print Order] and press the SET button.**
2	**Select [Print] and press the SET button.**
3	**Set the print effect and paper settings as required.** Sets the Print Effect (p. 16) Selects the Paper Settings* (p. 19) *[Page Layout] cannot be set in the [Paper Settings] when [Index] is selected in the [Set up] option in Step 2.*
27

<table>
<tr>
<td>4</td>
<td>
Print all marked images

□ 1   Off

<td>
Select [Print] and press the SET button.

The image will start to print and, when it is completely finished, the display will revert to the standard playback mode.
If the MENU button is pressed, the display will revert to the print order screen in Step 2 and printing will not take place.

</td>
</tr>
</table>
- To print the date, set the [Date] setting in [Set up] on the screen in Step 2 to [On]. You cannot set the date to print in Step 3.
- When the print type is set to [Index], the [Date] and [File No.] cannot be printed at the same time.
- The ID photo print function cannot be used.
- You cannot print movies.

- The maximum number of images printed on one page in the Index print type depends on the selected paper size.
  - Credit card size: 20 images
  - L size: 42 images
  - Postcard size: 63 images
  - Wide size: 84 images

Cancel Printing
• To cancel printing between images printed, press the **SET** button. A confirmation dialog appears. Select [OK] and press the **SET** button. The printer will stop printing the current image and eject the paper.

Restarting Printing
• Select [Resume] and press the **SET** button. The remaining images can be printed.
• Printing cannot be restarted under the following circumstances.
  • If the print settings have been changed before restarting.
  • If the image for which the print settings were set has been deleted before restarting.
  • If the wireless connection has been interrupted.
  • If the camera battery has been depleted. (In such a case, replace the battery with a fully charged one, then turn on the camera power again. If the camera is to be used for an extended period, we recommend using the compact power adapter (sold separately).)
  If these circumstances apply, you can select [Print] and reprint starting from the first image.
• Printing cannot be restarted if there is little free space on the memory card when the printing is interrupted.

Printing Errors
• An error message appears if an error occurs for some reason during the printing process. When the error is resolved, printing will automatically resume. If printing does not resume, select [Continue] and press the **SET** button. If [Continue] cannot be selected, select [Stop], press the **SET** button and restart the print job. See *List of Messages* (p. 30) for details.

List of Messages

The following messages may appear on the camera's LCD monitor when an error occurs during a camera and printer connection. (Depending on the printer model, some messages may not display.)
Please refer to the printer's user guide for solutions.

No Paper	Paper cassette is incorrectly inserted or out of paper. Or the paper feed is not operating correctly.
No Ink	The ink cassette has not been inserted or has run out of ink.
Paper and ink do not match	The paper and ink are from different sets.
Paper Jam	The paper jammed during printing.
Paper Error	The paper is not correctly set in the printer.
Ink Error	The ink casette is experiencing a problem.
Recharge the printer battery	The printer's battery pack is depleted.
Readjust trimming	You attempted to print the image with a different style than the one used when the trimming settings were set.
Hardware Error	Check whether or not an error other than a paper or ink error has occurred.
File Error	You tried to print an image that is not compatible with *PictBridge*. Some images that have been recorded with another camera or modified using a computer cannot be printed.
Print error	There is an error in the settings. Turn off the printer and turn it on again, then set the print settings correctly.
Connection failed	A wireless connection has not been successfully established or an established connection has been cut. In such a case, first take whichever of the following steps is or are appropriate: shorten the distance between the camera and the wireless print adapter; change the direction of the camera and the angle of the adapter; change the channel settings. Then establish a wireless connection again. For the setting method, please see the *Advanced Camera User Guide*.
Disconnected

Printing

Easy Print

You can print images by pressing only one button after connecting the camera to the printer.

1	**Make sure that ☑ or 🅑 displays in the upper left corner of the LCD monitor.**
2	**Display the images you wish to print and press the 凸∿ button.** If you wish to change the print settings, see *Print after Changing the Print Settings* (p. 32).

Print after Changing the Print Settings

You can change the print settings before printing.

1		**Make sure that 🖩 or 🖎 displays in the upper left corner of the LCD monitor.** If 🖺 displays on the LCD monitor, please refer to 🖺 *Printing with Bubble Jet Printers using Bubble Jet Direct* (p. 67).
2	Sets the print effect (p. 35) Sets the date for printing (p. 34) Starts the printing process Print Order Screen	**Display the images you wish to print and press the SET button.** The print order screen appears. **Depending on the printer model, some setting options may not display.** Sets the number of copies (p. 36) Sets the trimming portion (p. 37) Sets the paper size, type and layout (p. 40)
3	**Select print settings as needed.**	
4	**Select [Print] and press the SET button.** • The image will start to print and, when it is completely finished, the display will revert to the standard playback mode. • If you press the **MENU** button, the display will revert to the standard playback mode and printing will not take place.	
32

- You cannot print RAW images and movies.
- It may not be possible to play back or print images shot with a different camera.
- You may not be able to print if the memory card holds a large number of images (about 1000).

Cancel Printing
- To cancel printing between images, press the **SET** button. A confirmation dialog will display. Select [OK] and press the **SET** button. The printer will stop printing the current image and eject the paper.

Printing Errors
- An error message appears if an error occurs for some reason during the printing process. When the error is resolved, printing will automatically resume. If printing does not resume, select [Continue] and press the **SET** button. If [Continue] cannot be selected, select [Stop], press the **SET** button and restart the print job. See *List of Messages* (p. 47) for details.
- On printers equipped with an operation panel, an error number or message displays on the panel. Please refer to the printer user guide for the remedies corresponding to the error numbers or messages.

Selecting Print Settings

Depending on the camera model, the screens that will be displayed will vary. Moreover, available settings differ depending on the printer model (unavailable settings will not appear in the menu). For details, refer to the user guide that came with your printer.

Default Setting
- The Default option is a fixed setting of the printer.
- The [Date], [Print Effect], paper setting [Paper Size], [Paper Type] and [Page Layout] options are available.
- On printers equipped with an operation panel, you can change the settings for those items set to [Default] using the printer's operation panel.
- The setting contents of the Default option differ depending on the printer model. For details, please refer to the printer user guide.

Setting the Date Printing Option

1	**Select [ ], then select the date printing option.** You can set the date printing as follows:

Date	Prints the date.
Off	The date is not printed.
Default	Prints using the default setting.

If you select an image which has had the shooting date embedded in it using a camera with the Postcard Date Imprint mode, [🖼] will be set to [Off]. If you select [Date], dates will appear twice on the printed image.

Setting the Print Effect

This function uses the camera's shooting information to optimize the image data, yielding high quality prints. You can select the following print effects.

On	Uses the camera's shooting information to deliver optimum prints.
Off	Prints without any effects.
Vivid	Prints more vibrant colors, such as the green of trees or the blue of the sea or sky, than the [On] option.
NR	Prints with a noise reduction effect.
Vivid+NR	Prints using both the [Vivid] and [NR] options.
Default	Print settings differ according to your printer model.

Setting the Printing Area (Trimming)

You can specify a portion of the image for printing.
Please set [Paper Settings] (p. 40) before setting the trimming settings. If [Paper Settings] is changed after having made the trimming settings, you must select the settings again.

Select [Trimming] and press the SET button.

The trimming frame will appear at the center of the image. If a trimming setting has already been selected for the image, the frame will appear around the previously selected portion.

The trimming setting screen differs depending on the camera model. Ensure that the screen appears before selecting settings.

Trimming Frame

Trim the image.

Changing the Size of the Trimming Frame
- Press the zoom lever to adjust the size of the trimming frame.
- The trimming frame can be changed to a minimum selection of approximately half the displayed image (in width and height) or a maximum selection that is virtually the same size as the image.
- Expanding the trimming frame beyond its maximum size cancels the trimming setting.
- When printing an image that has been magnified using the trimming option, the image quality may become coarser and grainier depending on the level of magnification.

Moving the Trimming Frame
- Move the trimming frame using the up, down, right and left buttons.

Rotating the Trimming Frame
- You can rotate the trimming frame by pressing the **DISP.** button.

Press the SET button to close the setting menu.
Pressing the **MENU** button cancels the settings.

38

- The trimming setting only applies to one image.
- The trimming setting is canceled with the following operations.
  - When you set the trimming settings for another image.
  - When you close the Print mode (when you turn the camera power off, change the camera mode, terminate a wireless connection to the printer or detach the connection cable).
- The shooting date or part of the date which has been embedded in images using a camera with the Postcard Date Imprint mode may not be printed properly depending on the trimming setting.

- The paper size and page layout settings determine the shape of the trimming frame.
- Please use the LCD monitor to set the trimming settings. The trimming frame may not display correctly on a TV screen.

41

Printing Multiple Images on a Sheet of Paper

• Selecting [4" x 6"] in the paper size setting (p. 40) will allow you to specify the following layout settings.
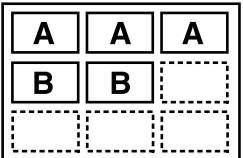

2	2 images (height 2 x width 1) of the same dimensions are arranged on a single sheet of paper.
4	4 images (height 2 x width 2) of the same dimensions are arranged on a single sheet of paper.
9	9 images (height 3 x width 3) of the same dimensions are arranged on a single sheet of paper.
16	16 images (height 4 x width 4) of the same dimensions are arranged on a single sheet of paper.

[Printing example 1] Printing 3 copies of image A in 2-up

Number of copies (p. 36)	Image A: [3] copies	
Layout	2	

DPOF print setting (p. 44) allows you to separately print different images by specifying the number of frames to be printed per image.
[Printing example 2] Printing 3 copies of image A and 2 copies of image B in 9-up

DPOF print settings* (p. 44)	Image A: [3] copies Image B: [2] copies	
Layout	9	

* Please refer to the *Camera User Guide* for instructions on DPOF print setting method.

_5_ **Select a layout and press the SET button. This ends the paper settings operations.**
The display returns to the print order screen.

• Images will print with borders, even if [Borderless] was selected with the camera in the following cases:
  •*When [Plain] is selected in the camera's [Paper Type] (cannot be selected depending on the connected printer model)*
  •*With printers equipped with an operation panel, when [Plain] is selected with the printer and [Default] is selected in the camera's [Paper Type].*

Printing with DPOF Print Settings

For instructions on how to set DPOF print settings, please refer to the *DPOF print settings* section of the *Camera User Guide*.

In this section, we will explain how to print several images already specified with DPOF print settings.

- The image will start to print and, when it is completely finished, the display will revert to the standard playback mode.
- If the **MENU** button is pressed, the display will revert to the print order screen in Step 2 and printing will not take place.

- To print the date, set the [Date] setting in [Set up] on the screen in Step 2 to [On]. You cannot set the date in Step 3.
- When the print type is set to [Index], both the [Date] and [File No.] cannot be printed depending on the printer.
- When the print type is set to [Standard], the [File No.] cannot be printed.

Cancel Printing
• To cancel printing between images printed, press the **SET** button. A confirmation dialog appears. Select [OK] and press the **SET** button. The printer will stop printing the current image and eject the paper.

Restarting Printing
• Select [Resume] and press the **SET** button. The remaining images can be printed.
• Printing cannot be restarted under the following circumstances.
  • If the print settings have been changed before restarting.
  • If the image for which the print settings were set has been deleted before restarting.
  • If the wireless connection has been interrupted.
  • If the camera battery has been depleted. (In such a case, replace the battery with a fully charged one, then turn on the camera power again. If the camera is to be used for an extended period, we recommend using the compact power adapter (sold separately).)
  If these circumstances apply, you can select [Print] and reprint starting from the first image.
• Printing cannot be restarted if there is little free space on the memory card when the printing is interrupted.

Printing Errors
• An error message appears if an error occurs for some reason during the printing process. When the error is resolved, printing will automatically resume. If printing does not resume, select [Continue] and press the **SET** button. If [Continue] cannot be selected, select [Stop], press the **SET** button and restart the print job. See *List of Messages* (p. 47) for details.
• On printers equipped with an operation panel, an error number or message displays on the panel. Please refer to the printer user guide for the remedies corresponding to the error numbers or messages.

List of Messages

The following messages may appear on the camera LCD monitor if an error occurs during a camera and printer connection.
(Depending on the printer, some messages may not appear.)

• Please refer to the printer's user guide for the appropriate remedies.

    ▢ : Printing restarts if you select [Continue] and press the **SET** button. For the remedies to other messages that might appear, refer to your printer's user guide.

No Paper	There is no paper set in the printer. If you are using a printer equipped with a photo paper cassette, specify the paper feed location using the Paper Feed switch.
Paper Jam	The paper jammed during printing. Select [Stop] to cancel printing. After removing the paper, set some paper again and press the **RESUME**/**CANCEL** button on the printer.
Paper Error	The paper is not correctly set in the printer. Also open the paper output tray if it is closed.
No Ink	The ink tank has run out of ink or there is no ink tank in the printer.
Low ink level	The ink tank needs to be replaced soon. Prepare a new ink tank. If you select [Continue] in the error screen, you can restart printing.
Waste tank full	You can restart printing if you select [Continue] in the error screen. Please request replacement of the waste tank (waste ink absorber) from the shop where you purchased the printer or your nearest Canon Customer Support center listed in the Contact List provided with the printer or in the user guide.
Ink Error	Check the level of the printer's ink and the condition of the waste tank (waste ink absorber).

Printer error	Disconnect the cable from the printer and turn off the printer power. Then reconnect the cable and turn on the printer. If the error persists, please consult the dealer where you purchased your printer or your nearest Canon Customer Support center (listed in the Contact List provided with the printer).
Printer in use	The printer is in use now. The printer automatically starts printing the images from the camera after completing the current printing.
Paper lever error	Adjust the paper thickness lever to the proper position.
Printer cover open	Close the printer cover securely.
No print head	No print head is installed in the printer.
Hardware Error	Check whether or not an error other than a paper or ink error has occurred. Or check the printer's battery level when using a battery-operated printer.
File Error	You tried to print an image that is not compatible with *PictBridge*. Some images that have been recorded with another camera or modified using a computer cannot be printed.
Incompatible paper size	Paper of a different size than the specified paper size is set to the printer. Select [Continue] on the error screen to display the paper size setting screen. Correct the paper size using the screen (only the selectable paper sizes appear on the screen).
Print error	Check that the correct paper size is selected. If this error message appears even when the correct paper size is set, turn off the printer, then turn it on again. If the error persists, please consult the dealer where you purchased your printer or your nearest Canon Customer Support center (listed in the Contact List provided with the printer).
Check print settings	Unprintable settings are included. Select [Continue] on the error screen to display the print order screen. Check the print settings (only the printable settings appear on the screen), change the settings if necessary, then print again.

Connection failed	A wireless connection has not been successfully established or an established connection has been cut. In such a case, first take whichever of the following steps is or are appropriate: shorten the distance between the camera and the wireless print adapter; change the direction of the camera and the angle of the adapter; change the channel settings. Then establish a wireless connection again. For the setting method, please see the *Advanced Camera User Guide*.
Disconnected	

⚠ Printing with Non-Canon, *PictBridge* Compliant Printers

Printing

1

Make sure that ⚠ displays in the upper left corner of the LCD monitor.

After this step, follow the procedures in the section ⚠/🖾 *Printing with Bubble Jet Printers (PIXMA series/SELPHY DS series) using PictBridge/Wireless* (p. 31) to print your images.

However, the following menu options cannot be set.
• Print Effect (p. 35): [Vivid], [NR], [Vivid+NR]
• Paper Size (p. 40): [13" x 19"/A3⁺] and [5" x 7"/13 x 18cm]

Please also refer to the user guide that came with your printer.

☑ Printing with SELPHY CP Series Printers using *Canon Direct Print*

Printing

Easy Print

You can print images by pressing only one button after connecting the camera to the printer.

	1	**Make sure that ☑ displays in the upper left corner of the LCD monitor.**

2	**Display the images you wish to print and press the ⎙∿ button.** If you wish to change the print settings, see *Print after Changing the Print Settings* below.

Print after Changing the Print Settings

You can change the print settings before printing.

	1	**Make sure that ☑ displays in the upper left corner of the LCD monitor.** If ☑ or ☑ displays on the LCD monitor, please refer to ☑/☑ *Printing with SELPHY CP Series Printers using PictBridge / Wireless* (p. 12).

3	**Select print settings as required.**
4	**Select [Print] and press the SET button.** If you press the **MENU** button, the display will revert to the standard playback mode and printing will not take place.

• You cannot print the RAW images.
• It may not be possible to play back or print images shot with a different camera.

Cancel Printing
• You cannot stop printing when printing only one copy of an image. If you are printing more than one copy or more than one image, you can cancel the rest of the printing by pressing the **SET** button. Once the current print is finished, a confirmation dialog appears. Select [OK] and press the **SET** button.

Printing Errors
• An error message appears if an error occurs for some reason during the printing process. Select [Stop] or [Resume] and press the **SET** button. See *List of Messages* (p. 66) for details. The [Resume] option may not appear with some types of errors. In that case, select [Stop].

52

Selecting Print Settings

Setting the Number of Copies

1 **In the print order screen, select [🔘] and set the number of prints.**
1 to 99 copies can be set.

Setting the Print Style (Image, Borders and Date)

You can select from among the following print styles.

Image	Standard	Prints one image per page.
	Multiple*	Prints eight copies of the same image on one page.
	ID Photo	Prints a specified print size (p. 58).
Borders	Borderless	Prints right to the edges of the paper.
	Bordered	Prints with a border.
Date	On	Adds the date to the print.
	Off	Prints without the date.

* This option can only be selected when printing on credit card size paper.

1 **In the print order screen, select [Style] and press the SET button.**

2

🖺 Style	
	Set up
Image	◄Standard ►
Borders	◄Borderless ►
Date	On Off
	MENU ⇆

Select [Image], [Borders], or [Date].

3	Style Set up Image ◄Multiple ► Borders ◄Borderless ► Date On Off MENU ↰	**Select settings as needed.**
4	🗗 1 copies Style Trimming Print MENU ↰ Multiple Print Area Frame	**Press the MENU button to end the setting selection process.** With borderless or multiple prints, the top, bottom and sides of the image may be cropped slightly. If you have not specified a trimming setting, a frame will appear around the area of the image that will be printed, allowing you to check the portion that will be cropped.

If you select an image which has had the shooting date embedded in it using a camera with the Postcard Date Imprint mode, [Date] in the [Style] menu will be set to [Off]. If you set [Date] to [On], dates will appear twice on the printed image.

- When printing multiple prints, the [Borders] and the [Date] cannot be set. (Images are printed without any date or borders.)
- Practically all of the image area displayed on the LCD monitor is printed on bordered prints.

Setting the Printing Area (Trimming)

You can specify which portion of an image gets printed.
Please set the Print Style (Image, Borders and Date) before setting the trimming settings. If print style is changed after having made the trimming settings, you must select the settings again.

1

Select [Trimming] and press the SET button.
The trimming frame will appear at the center of the image. If a trimming setting has already been selected for the image, the frame will appear around the previously selected portion.

The trimming setting screen differs depending on the camera model. Ensure that the screen appears before selecting settings.

Trimming Frame

55

Trim the image.

Changing the Size of the Trimming Frame
- Press the zoom lever to adjust the size of the trimming frame.
- The trimming frame can be changed to a minimum selection of approximately half the displayed image (in width and height) or a maximum selection that is virtually the same size as the image.
- Expanding the trimming frame beyond its maximum size cancels the trimming setting.
- When printing an image that has been magnified using the trimming option, the image quality may become coarser and grainier depending on the level of magnification. If this happens, the trimming frame displays in red.

Moving the Trimming Frame
- Move the trimming frame using the up, down, right and left buttons.

Rotating the Trimming Frame
- You can rotate the trimming frame by pressing the **DISP.** button.

3 **Press the SET button to close the setting menu.**
Pressing the **MENU** button cancels the settings.

- The trimming setting only applies to one image.
- The trimming setting is canceled with the following operations.
  - When you set the trimming settings for another image.
  - When you close the Print mode (when you turn the camera power off, change the camera mode, or detach the connection cable).
- The shooting date or part of the date which has been embedded in images using a camera with the Postcard Date Imprint mode may not be printed properly depending on the trimming setting.

- The selected image and border settings determine the shape of the trimming frame.
- Please use the LCD monitor to set the trimming settings. The trimming frame may not display correctly on a TV screen.

Printing by Specifying the Print Size (ID Photo Print)

You can specify the print size and print portion of an image or a whole image as an ID photo*.

* Images printed with the ID Photo Print function may not be allowed as a formal certificate photo. Refer to the party (organization) or administration requiring the photo.

The print size can be specified for only L (Large) resolution images in the camera connected to the printer.

1		**In the print order screen, select [Style] and press the SET button.**
2		**Select [Image], then select [ID Photo]. Specify the print size by selecting the length of the long side and the short side, then press the SET button.** Specify the size by selecting the length of the long side first, then the short side. See the next table for selectable combinations of the long side length and the short side length.

● Selectable combination
�: Available print size

2.0 inch			■	■

3

Trimming Frame

Trim the image to specify the print area.
See Step 2 of *Setting the Printing Area (Trimming)* (p. 56) on how to trim the image.

The trimming setting screen differs depending on the camera model. Follow the steps according to the screen that displays on your camera.

4 **Press the SET button to close the setting menu.**

59

- The print size setting only applies to one image.
- The print size setting is canceled with the following operations:
  - When you set the print size settings for another image.
  - When you close the Print mode (when you turn the camera power off, change the camera mode, or detach the connection cable).

- The shape of the trimming frame varies depending on the specified print size.
- Use the LCD monitor to specify the print size settings. The trimming frame may not display correctly on a TV screen.

Printing Movies (Movie Print)

You can print movie frames selected automatically at fairly regular intervals laid out in index style on a single sheet of paper.

<table>
<tr>
<td>1</td>
<td>

Select the movie you want to print, then press the SET button.

The movie control panel appears.
</td>
</tr>
<tr>
<td>2</td>
<td>

Select 🖶 (Print) and press the SET button.

Movie Control Panel
</td>
</tr>
<tr>
<td>3</td>
<td>

If necessary, select [On] or [Off] in 🖳 (Caption).

If you set 🖳 (Caption) to [On], you can print the file number and the elapsed time of the frame at the same time.
</td>
</tr>
<tr>
<td>4</td>
<td colspan="2">

Select [Print] and press the SET button.
</td>
</tr>
</table>

It may not be possible to play back or print movies shot with a different camera.

61

- If you press the 🔲〜 button instead of the **SET** button in Step 1, movie print begins.
- The number of printed movie frames per sheet of paper is determined by the paper size shown as follows: (Depending on the number of seconds in the movie, there are cases when the number of frames indicated below will not be printed.)
  - Credit card size: 20 frames
  - L size: 42 frames
  - Postcard size: 63 frames
  - Wide size: 63 frames

Printing with DPOF Print Settings

For instructions on how to set DPOF print settings, please refer to the *DPOF print settings* section of the *Camera User Guide*.
In this section, we will explain how to print several images already specified with DPOF print settings.
1	Rotate… Sound Memo… Erase all… Slide Show… Print Order… Transfer Order…	**In the [(Play)] menu, select [Print Order] and press the SET button.**
2	Print Order (DPOF) Standard 1 prints Date Off File No. Off Order Mark all Set up Reset Print MENU	**Select [Print] and press the SET button.**
3	Change print style Style Standard Print Borderless Resume MENU	**Set the print style settings as required.** • See *Setting the Print Style (Image, Borders and Date)* (p. 53). • A print style cannot be set if [Set up] on the screen in Step 2 is set to [Index].

Select [Print] and press the SET button.

Print all marked images

☐ 1
⊙ Off   Style
▦ Standard   Print

MENU ↰

- The image will start to print and, when it is completely finished, the display will revert to the standard playback mode.
- If the **MENU** button is pressed, the display will revert to the print order screen in Step 2 and printing will not take place.

- To print the date, set the [Date] setting in [Set up] on the screen in Step 2 to [On]. You cannot set the date to print with the [Style] menu in Step 3.
- When the print type is set to [Index], the [Date] cannot be printed.
- When the print type is set to [Standard], the [File No.] cannot be printed.
- The ID photo print function cannot be used.
- You cannot print movies.

- The maximum number of images printed on one page in the Index print type depends on the selected paper size.
  - Credit card size: 20 images
  - L size: 42 images
  - Postcard size: 63 images
  - Wide size: 63 images

Cancel Printing
- To cancel printing between images printed, press the **SET** button.
  Once the current print is completed, a confirmation dialog appears. Select [OK] and press the **SET** button.

64

Restarting Printing
- Select [Resume] and press the **SET** button. The remaining images can be printed.
- Printing cannot be restarted under the following circumstances.
  - If the print settings have been changed before restarting.
  - If the image for which the print settings were set has been deleted before restarting.
  - If the camera battery has been depleted. (In such a case, replace the battery with a fully charged one, then turn on the camera power again. If the camera is to be used for an extended period, we recommend using the compact power adapter (sold separately).)

  If these circumstances apply, you can select [Print] and reprint starting from the first image.
- Printing cannot be restarted if there is little free space on the memory card when the printing is interrupted.

Printing Errors
- An error message appears if an error occurs for some reason during the printing process. Select [Stop] or [Resume] and press the **SET** button.
  * The [Resume] option may not appear with some types of errors. In that case, select [Stop].

List of Messages

The following messages may appear on the camera's LCD monitor when an error occurs during a camera and printer connection. (Depending on the printer model, some messages may not display.)

• Please refer to the printer's user guide for solutions.

No Paper	Paper cassette is incorrectly inserted or out of paper. Or the paper feed is not operating correctly.
No Ink	The ink cassette has not been inserted or has run out of ink.
Incompatible paper size	Wrong paper size is loaded in the printer.
Incompatible ink size	Wrong ink cassette size is loaded in the printer.
Ink Cassette Error	The ink cassette is experiencing a problem.
Paper and ink do not match	The paper and ink are from different sets.
Paper Jam	The paper jammed during printing.
Paper has been changed	Paper was changed after the print style was displayed.
Recharge the printer battery	The printer's battery pack is depleted.
Communication Error	The printer is experiencing a data transmission error.
Readjust trimming	You attempted to print the image with a different style than the one used when the trimming settings were set.
Cannot Print!	You attempted to print an image that was photographed with another camera, one recorded in a different data type, or one that has been edited on a computer.
Could not print xx images	You attempted to use the DPOF print settings to print xx images that were photographed with another camera, that have been recorded in a different data type, or that have been edited on a computer.

▶ Printing with Bubble Jet Printers using *Bubble Jet Direct*

Printing

Make sure that ▶ displays in the upper left corner of the LCD monitor.
If ⊿ displays, refer to ⊿/▣ *Printing with Bubble Jet Printers (PIXMA series/ SELPHY DS series) using PictBridge / Wireless* (p. 31).

After this step, follow the procedures in the section ▣ *Printing with SELPHY CP Series Printers using Canon Direct Print* (p. 51) to print your images.
However, please note that some menus and precautions differ, as listed below.

See pages 52 and 64.

• You cannot print movies or RAW images.

> **Cancel Printing**
> • To cancel printing between images printed, press the **SET** button. A confirmation dialog appears. Select [OK] and press the **SET** button.
>   The printer will stop printing the current image and eject the paper.
>
> **Printing Errors**
> • An error message appears if an error occurs for some reason during the printing process. When the error is resolved, printing will automatically resume. If printing does not resume, select [Continue] and press the **SET** button. If [Continue] cannot be selected, select [Stop], press the **SET** button and restart the print job.
> • With printers equipped with an operation panel, the error number displays on the panel. Please refer to the printer user guide for the remedies corresponding to the error numbers.

Setting the Print Style

You can select from among the following print styles.

Paper		Select the paper size from the following: [Card #1], [Card #2], [Card #3], [LTR] or [A4]. For the usable paper type, please refer to the printer user guide.
Borders	Borderless	Prints right to the edges of the paper.
	Bordered	Prints with a border.
Date	On	Adds the date to the print.
	Off	Prints without the date.

- The ID photo print function cannot be used.
- If you select an image which has had the shooting date embedded in it using a camera with the Postcard Date Imprint mode, [Date] in the [Style] menu will be set to [Off]. If you set [Date] to [On], dates will appear twice on the printed image.

See page 64.

- To print the date, set the [Date] setting in [Set up] on the screen in Step 2 to [On]. You cannot set the date to print with the [Style] menu in Step 3.
- When the print type is set to [Index], the [Date] and [File No.] cannot be printed at the same time.
- When the print type is set to [Standard], the [File No.] cannot be printed.
- The ID photo print function cannot be used.
