# **Using This Online Manual**

- ➡ Touch-enabled Device Users (Windows)

# Symbols Used in This Document

# **1** Warning

Instructions that, if ignored, could result in death, serious personal injury, or property damage caused by incorrect operation of the equipment. These must be observed for safe operation.

## Caution

Instructions that, if ignored, could result in personal injury or property damage caused by incorrect operation of the equipment. These must be observed for safe operation.

# Important

Instructions including important information that must be observed to avoid damage and injury or improper use of the product. Be sure to read these instructions.

## Note

Instructions including notes for operation and additional explanations.

## **W**Basics

Instructions explaining basic operations of your product.

### Note

· Icons may vary depending on your product.

# **Touch-enabled Device Users (Windows)**

For touch actions, you need to replace "right-click" in this document with the action set on the operating system. For example, if the action is set to "press and hold" on your operating system, replace "right-click" with "press and hold."

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists,

source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

- 2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
- 3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
- 4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - 1. You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - 2. You must cause any modified files to carry prominent notices stating that You changed the files; and
  - 3. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  - 4. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions

- of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
- 6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
- 7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
- 8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
- 9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

The FreeType Project LICENSE

2006-Jan-27 Copyright 1996-2002, 2006 by David Turner, Robert Wilhelm, and Werner Lemberg Introduction ======== The FreeType Project is distributed in several archive packages; some of them may contain, in addition to the FreeType font engine, various tools and contributions which rely on, or relate to, the FreeType Project. This license applies to all files found in such packages, and which do not fall under their own explicit license. The license affects thus the FreeType font engine, the test programs, documentation and makefiles, at the very least. This license was inspired by the BSD, Artistic, and IJG (Independent JPEG Group) licenses, which all encourage inclusion and use of free software in commercial and freeware products alike. As a consequence, its main points are that: o We don't promise that this software works. However, we will be interested in any kind of bug reports. (`as is' distribution) o You can use this software for whatever you want, in parts or full form, without having to pay us. (`royalty-free' usage) o You may not pretend that you wrote this software. If you use it, or only parts of it, in a program, you must acknowledge somewhere in your documentation that you have used the FreeType code. ('credits') We specifically permit and encourage the inclusion of this software, with or without modifications, in commercial products. We disclaim all warranties covering The FreeType Project and assume no liability related to The FreeType Project. Finally, many people asked us for a preferred form for a credit/disclaimer to use in compliance with this license. We thus encourage you to use the following text: Portions of this software are copyright © <year> The FreeType Project (www.freetype.org). All rights reserved. .....

Please replace <year> with the value from the FreeType version you actually use.

Legal Terms

========

0. Definitions

-----

Throughout this license, the terms `package', `FreeType Project', and `FreeType archive' refer to the set of files originally distributed by the authors (David Turner, Robert Wilhelm, and Werner Lemberg) as the `FreeType Project', be they named as alpha, beta or final release.

'You' refers to the licensee, or person using the project, where 'using' is a generic term including compiling the project's source code as well as linking it to form a 'program' or 'executable'.

This program is referred to as `a program using the FreeType engine'.

This license applies to all files distributed in the original FreeType Project, including all source code, binaries and documentation, unless otherwise stated in the file in its original, unmodified form as distributed in the original archive.

If you are unsure whether or not a particular file is covered by this license, you must contact us to verify this.

The FreeType Project is copyright (C) 1996-2000 by David Turner, Robert Wilhelm, and Werner Lemberg. All rights reserved except as specified below.

## 1. No Warranty

-----

THE FREETYPE PROJECT IS PROVIDED 'AS IS' WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT WILL ANY OF THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY DAMAGES CAUSED BY THE USE OR THE INABILITY TO USE, OF THE FREETYPE PROJECT.

#### 2. Redistribution

-----

This license grants a worldwide, royalty-free, perpetual and irrevocable right and license to use, execute, perform, compile, display, copy, create derivative works of, distribute and sublicense the FreeType Project (in both source and object code forms) and derivative works thereof for any purpose; and to authorize others to exercise some or all of the rights granted herein, subject to the following conditions:

- o Redistribution of source code must retain this license file (`FTL.TXT') unaltered; any additions, deletions or changes to the original files must be clearly indicated in accompanying documentation. The copyright notices of the unaltered, original files must be preserved in all copies of source files.
- o Redistribution in binary form must provide a disclaimer that states that the software is based in part of the work of the FreeType Team, in the distribution documentation. We also encourage you to put an URL to the FreeType web page in your documentation, though this isn't mandatory.

These conditions apply to any software derived from or based on the FreeType Project, not just the unmodified files. If you use our work, you must acknowledge us. However, no fee need be paid to us.

#### 3. Advertising

-----

Neither the FreeType authors and contributors nor you shall use the name of the other for commercial, advertising, or promotional purposes without specific prior written permission.

We suggest, but do not require, that you use one or more of the following phrases to refer to this software in your documentation or advertising materials: `FreeType Project', `FreeType Engine', `FreeType library', or `FreeType Distribution'.

As you have not signed this license, you are not required to accept it. However, as the FreeType Project is copyrighted material, only this license, or another one contracted with the authors, grants you the right to use, distribute, and modify it.

Therefore, by using, distributing, or modifying the FreeType Project, you indicate that you understand and accept all the terms of this license.

#### 4. Contacts

-----

There are two mailing lists related to FreeType:

o freetype@nongnu.org

Discusses general use and applications of FreeType, as well as future and wanted additions to the library and distribution.

If you are looking for support, start in this list if you haven't found anything to help you in the documentation.

o freetype-devel@nongnu.org

Discusses bugs, as well as engine internals, design issues, specific licenses, porting, etc.

Our home page can be found at

http://www.freetype.org

--- end of FTL.TXT ---

The TWAIN Toolkit is distributed as is. The developer and distributors of the TWAIN Toolkit expressly disclaim all implied, express or statutory warranties including, without limitation, the implied warranties of merchantability, noninfringement of third party rights and fitness for a particular purpose. Neither the developers nor the distributors will be liable for damages, whether direct, indirect, special, incidental, or consequential, as a result of the reproduction, modification, distribution or other use of the TWAIN Toolkit.

- Carriage
- Ink Tank Cover (Inside)
- Operation Panel

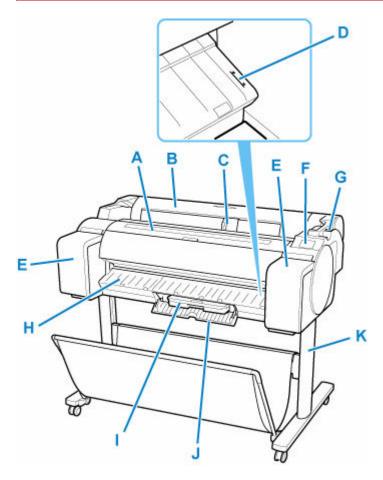

# Optional accessories

- Stand
- Roll Holder Set

# **Printer Parts**

- ▶ Front
- ➤ Side
- ➤ Top Cover (Inside)
- ➤ Roll Paper Cover (Inside)
- ➤ Carriage
- ➤ Ink Tank Cover (Inside)
- ➤ Operation Panel

# **Front**

### (A) Top Cover

Open this cover to install the print head and remove any jammed paper from inside the printer, as needed. (See "<u>Top Cover (Inside)</u>.")

### (B) Roll Paper Cover

Open this cover to load rolls. (See "Roll Paper Cover (Inside).")

### (C) Width Guide

When loading the sheets, move the guide to match the paper size.

### (D) Paper Alignment Line

A white line for alignment of paper.

### (E) Ink Tank Cover

Open this cover to replace the ink tank. (See "Ink Tank Cover (Inside).")

### (F) Operation Panel

Use this screen to operate the printer and check the printer status. (See "Operation Panel.")

#### (G) Release Lever

When releasing the Paper Retainer, push this lever back.

### (H) Output Guide

Supports output paper.

### (I) Maintenance Cartridge

Ink used for maintenance purposes such as head cleaning is absorbed. (Replace the cartridge when it is full.)

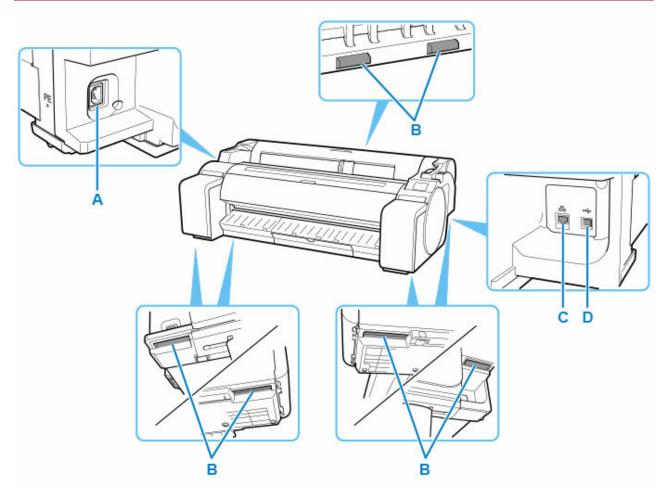

### (J) Maintenance Cartridge Cover

Open this cover to replace the maintenance cartridge.

# (K) Stand

A stand that holds the printer. Equipped with casters to facilitate moving it. (See "Stand.")

# Side

### (A) Power Cord Connector

Connect the power cord to this connector.

### (B) Carrying Grips

When carrying the printer, have three or more people hold it by these handles under both sides. Furthermore, hold the left and right of these parts when moving the printer with a stand.

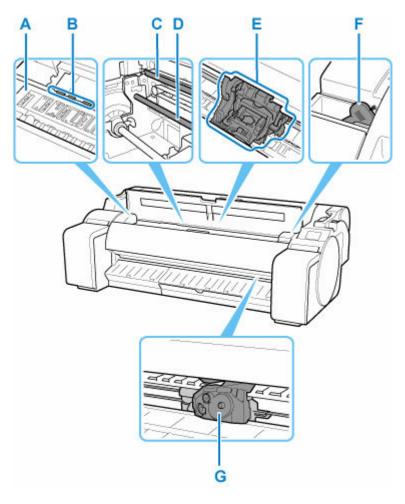

### (C) Wired LAN Connector

Connect an Ethernet cable to this port. The lamp is lit if the Ethernet cable is connected correctly and communication is possible between the computer and printer.

### (D) USB Port

Connect a USB cable to this port. The printer is compatible with Hi-Speed USB connections.

# **Top Cover (Inside)**

### (A) Platen

The print head moves across the platen to print.

### (B) Paper Retainer

Important in supplying the paper. This retainer holds paper as it is fed.

### (C) Linear Scale

The linear scale serves a key role in detecting the carriage position.

### (D) Carriage Shaft

The Carriage slides along this shaft.

## (E) Carriage

Moves the print head. The carriage serves a key role in printing. (See "Carriage.")

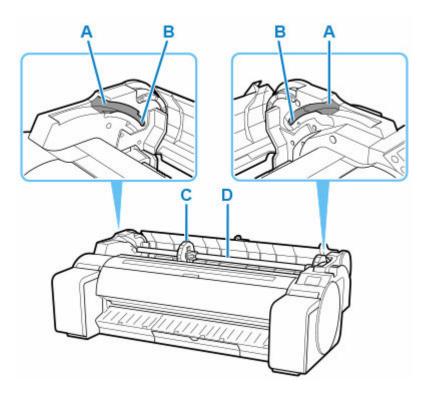

### (F) Cleaning Brush

When cleaning inside the printer under the top cover, use this brush to sweep away paper dust on the platen.

### (G) Cutter Blade

A round-bladed cutter for automatic paper cutting.

# **Roll Paper Cover (Inside)**

# (A) Slide Guide

Move the roll holder along this guide.

### (B) Roll Holder Slot

Slide the roll holder into this slot.

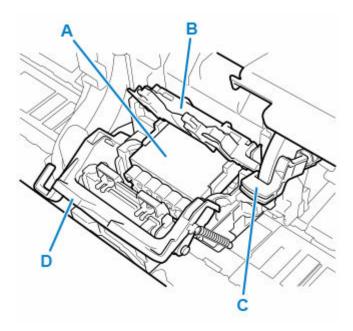

# (C) Holder Stopper

Secure the roll on the roll holder with this part.

# (D) Roll Holder

Load the roll on this holder.

# Carriage

# (A) Print Head

The print head is equipped with ink nozzles. The carriage serves a key role in printing.

# (B) Print Head Locking Cover

Secures the print head.

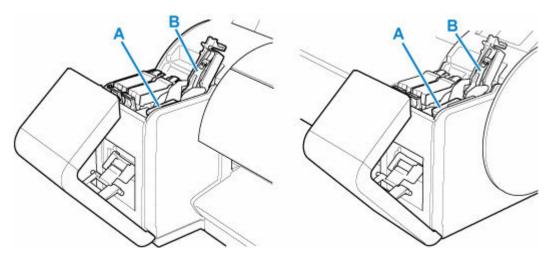

# (C) Angle Adjustment Lever

Fine-tunes the line misalignment when printing.

# (D) Print Head Lock Lever

Lock print head locking cover.

# Ink Tank Cover (Inside)

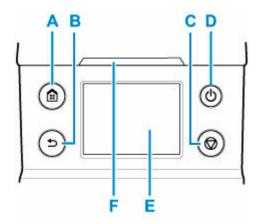

# (A) Ink Tank

Cartridges of ink in various colors.

# (B) Ink Tank Lock Lever

A lever that locks the ink tank in place and protects it. Lift and press down the lever when replacing an ink tank.

# **Operation Panel**

#### A: HOME button

The HOME screen appears.

➡ Home Screen Menu Composition

#### **B**: Back button

Displays the screen before the current screen.

#### C: Stop button

Cancels print jobs in progress and ends the ink drying period.

### D: ON button/ON lamp

Turns the printer on and off.

Turning the Printer On and Off

The **ON** lamp is lit when the printer is on or in Sleep mode.

#### E: Touch Screen

Shows printer menus, as well as the printer status and messages. You can select menu items and display buttons by gently touching the screen with your fingertip.

➡ Home Screen Menu Composition

#### F: Status lamp

• Flashing (white)

During printing, this lamp flashes when the printer is receiving or processing print jobs. Otherwise, this lamp flashes when the print job is paused or the printer is updating the firmware.

• Lit (orange)

A warning message is displayed.

• Flashing (orange)

An error message is displayed.

Off

There are no active print jobs, warnings, or errors.

# >>>> Note

- When the printer is in Sleep mode, to restore the display, press the buttons on the operation panel or touch the touch screen.
- When Operation panel lock is enabled, touch screen operations are invalid. For details on Operation panel lock, see <a href="Changeable Setting Items Using Remote UI">Changeable Setting Items Using Remote UI</a>.

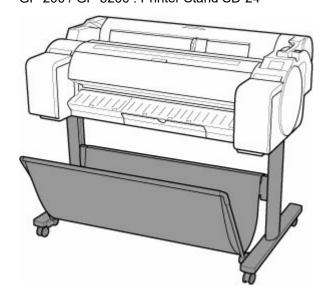

# **Optional accessories**

- ➤ Stand
- ➤ Roll Holder Set

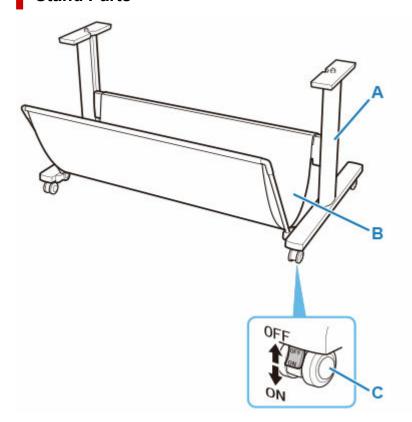

# Stand

The following Stand can be used with the printer.

GP-300 / GP-5300 : Printer Stand SD-33
 GP-200 / GP-5200 : Printer Stand SD-24

# **Stand Parts**

# (A) Stand

A stand that holds the printer. It is equipped with casters to facilitate movement.

### (B) Basket

Catches the ejected printed documents.

### (C) Locking Caster

The casters can be locked securely. When moving the printer, be sure to unlock the 4 casters. If you move it while the locking casters are locked, the floor may become scratched.

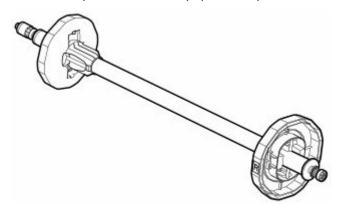

# >>> Note

- For instructions on how to use the basket, see "Using the Basket".
- Depending on the product, a stand may not be provided.

# **Roll Holder Set**

Load roll paper on the roll holder and then load the holder in the printer. You can use the roll holder with both 2-inch and 3-inch paper cores. However, if using 3-inch core roll paper, attach the 3-inch paper core attachment. (See "Loading Rolls on the Roll Holder.").

- GP-300 / GP-5300 : Roll Holder Set RH2-35
- GP-200 / GP-5200 : Roll Holder Set RH2-28
  - Roll Holder (for 2- and 3-inch paper cores)

· 3-Inch Paper Core Attachment (×2)

# **Printing procedure**

- ➤ Turning the Printer On and Off
- ➤ Loading and Printing on Rolls
- ► Loading and Printing on Sheets
- ➤ Printing in Windows
- ➤ Printing from macOS

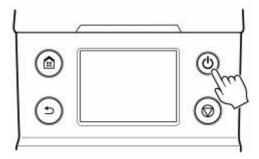

# **Turning the Printer On and Off**

# Turning the printer on

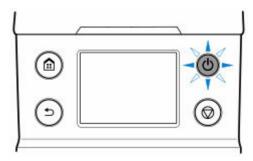

**1.** Press **ON** button to turn on printer.

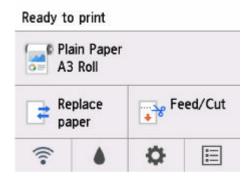

The **ON** button lights up and the printer will now start up.

The Canon logo appears on the operation panel, and then "Starting the system...Please wait momentarily" appears.

When startup is finished, the printer enters standby mode.

The printer will not enter standby mode in the following situations. Take action as necessary.

• The top cover is open

Close the top cover.

· The ink tank cover is open

Close the ink tank cover.

- · The print head is not installed
  - Replacing the Print Head

- · The ink tank is not installed
  - Replacing Ink Tanks
- If "Error" is shown on the operation panel

Check the message on the operation panel and take action as necessary.

 The ON button and Status lamp never light up, and nothing appears on the operation panel

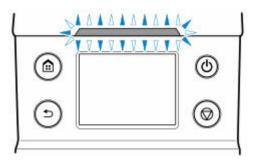

Check the connection at the plug and electrical outlet.

# Turning the printer off

## >>> Important

- Never disconnect the printer's power supply or unplug it during a print job. This may damage the printer.
- 1. Make sure no print jobs are in progress.

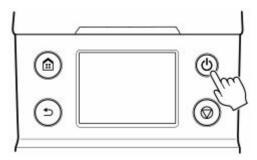

While the **Status** lamp is flashing, the printer is running. The color of the lamp indicates the following states.

If the **Status** lamp is flashing orange, check the message on the operation panel and take action as necessary.

If the **Status** lamp is flashing white, the printer is printing, receiving data, etc. Turn off the power after the **Status** lamp turns off.

2. Hold down the **ON** button for more than a second.

"Turning off... Please wait momentarily" appears on the operation panel, and the printer turns off.

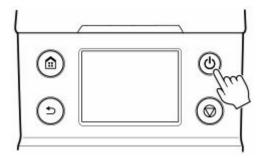

# **Loading and Printing on Rolls**

These are the basic steps for loading and printing on rolls.

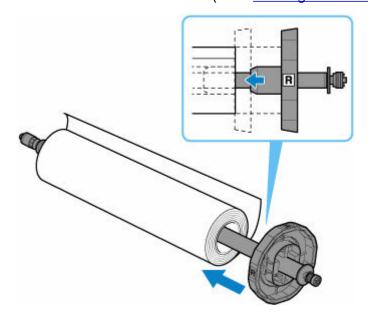

Follow these steps to load and print on rolls.

#### Note

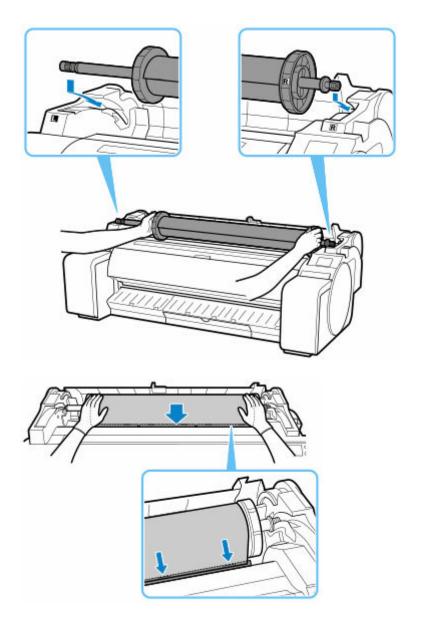

- For details on roll paper sizes and types that can be used, see "Paper Sizes" or "Paper Information List".
- To wait until the ink dries after printing before cutting the roll, set Drying Time in the printer driver. (See "Specifying the Ink Drying Time.")
- Once you have used all the paper on a roll, clean the platen. If the platen inside the top cover becomes dirty, it may soil the underside of paper. (See "Cleaning Inside the Top Cover.").
- 1. Turn the printer on. (See "Turning the Printer On and Off.")

2. Load a roll on the roll holder. (See "Loading Rolls on the Roll Holder.")

3. Load the Roll Media in the printer. (See "Loading Rolls in the Printer")

**4.** Select the type of paper. (See "Changing the Type of Paper.")

### Note

- If no barcode has been printed on the roll paper and you have set Manage remaining roll
  amount to Barcodes, specify the roll length after selecting the media type. (See "Specifying the
  Paper Length.")
- **5.** Complete settings in the printer driver for the type of paper and other details.
  - → How to Open the Printer Driver Setup Window (Windows)
  - → How to Open the Printer Driver Setup Window (macOS)
- **6.** Send the print job.
  - → Printing in Windows
  - ➡ Printing from macOS

# Start printing.

# >>> Important

• Do not move the release lever during printing.

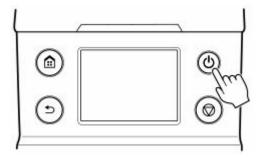

# **Loading and Printing on Sheets**

These are the basic steps for loading sheets and then printing.

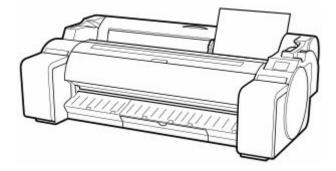

Follow the steps below to load and print on sheets.

#### Note

- For details on paper sizes and types that can be loaded, see "Paper Sizes" or "Paper Information List".
- Borderless printing is not supported on sheets.
- 1. Turn the printer on. (See "Turning the Printer On and Off.")

2. Load the sheet. (See "Loading Sheets in the Printer.")

- **3.** Complete settings in the printer driver for the type of paper and other details.
  - → How to Open the Printer Driver Setup Window (Windows)
  - ➡ How to Open the Printer Driver Setup Dialog (macOS)
- **4.** Send the print job.
  - Printing in Windows
  - Printing from macOS

Start printing.

# >>>> Important

• Do not move the release lever until instructions (guidance) for removing the paper are displayed. Moving the release lever during printing will cause printing to stop.

# **Printing in Windows**

Print from the application menu.

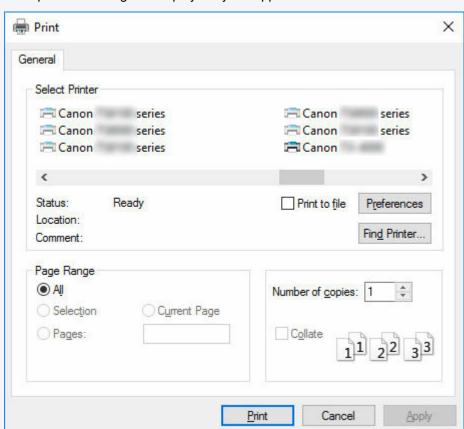

## >>> Important

- We recommend exiting unnecessary applications before printing. Running several applications while printing may interrupt the transfer of print data and affect printing quality.
- 1. In the source application, select **Print** from the **File** menu to display the dialog box for printing conditions.
- **2.** After confirming that the printer is selected in the dialog box, click **Print** or **OK** to start printing.

#### Note

• The appearance of the dialog box varies depending on the software application. In most cases, the dialog box includes basic printing options and enables you to choose the printer, specify the range of pages, number of copies, and so on.

Example: Print dialog box displayed by the application

• If another printer is selected, select the printer you want to use under **Select Printer** or in the dialog box displayed after clicking **Printer**.

You can use the printer driver dialog box to configure various printing settings such as for enlarged or reduced printing and borderless printing. You can open the printer driver dialog box from the application software or from the operating system menu. For details, see "How to Open the Printer Driver Setup Window" (Windows) or "How to Open the Printer Driver Setup Dialog" (macOS).

# **Printing from macOS**

Print from the application menu after registering the printer.

## >>> Important

We recommend exiting unnecessary applications before printing. Running several applications while
printing may interrupt the transfer of print data and affect printing quality.

# Registering the printer

The printer needs to be registered in **Print & Scan** (identified as Printers & Scanners or **Print & Fax** in other versions of macOS X) in **System Preferences** before printing.

For instructions on registering printers, see "Sharing the Printer on a Network (macOS)."

## >>> Important

 During this setup process, the printer will not be listed among available printers if it is off or disconnected.

# Printing from the application software

**1.** In the application software, select **Print** from the **File** menu to display the dialog box for printing conditions.

#### Note

- This dialog box includes basic printing options and enables you to choose the printer, specify the range of pages, number of copies, and so on.
  - ➡ Print Dialog (macOS)
- 2. Select the printer in the Printer list.
- 3. Click **Print** to start printing.

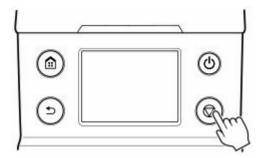

You can make various settings from the print dialog box pop-up menu to change the printing method, including enlarged and reduced printing, and borderless printing.

# **Canceling print jobs**

- ➤ Canceling Print Jobs from the Control Panel
- Canceling Print Jobs from Windows
- ➤ Canceling Print Jobs from macOS

# **Canceling Print Jobs from the Control Panel**

To cancel printing or reception of print jobs, press the **Stop** button on the operation panel.

When you press the **Stop** button during printing, the printer operation varies depending on the current status.

### You press the Stop button before printing starts

Pressing the **Stop** button before printing starts displays a confirmation message. To cancel the print job, select **Yes**.

### · You press the Stop button during printing

Pressing the **Stop** button during printing displays a confirmation message. To cancel the print job immediately, select **Yes**.

# **Canceling Print Jobs from Windows**

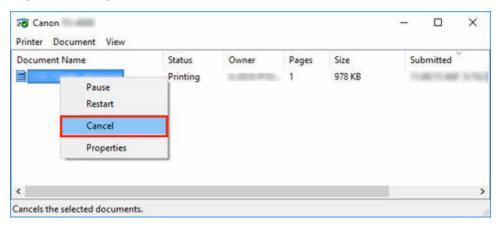

In the printer window, you can cancel jobs that are being sent to the printer.

Using Canon IJ Status Monitor, you can cancel print jobs that have already been received by the printer or that are currently being printed.

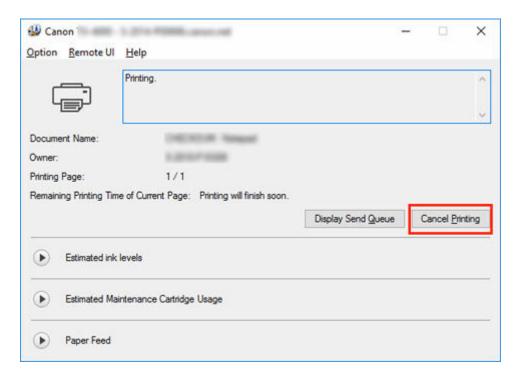

1. Click the printer icon in the taskbar to display the printer window.

### >>>> Note

- You can proceed from the folder for configuring the printer settings in the OS you are using.
   For example, in Windows 7, open the **Devices and Printers** window from the **start** menu and double-click the printer icon.
- 2. Right-click the job to cancel and select Cancel.

- **3.** If job to be canceled is not shown in printer window (that is, if print data has already been received by printer), click taskbar icon to display Canon IJ Status Monitor.
- 4. Click Cancel Printing.

### >>> Note

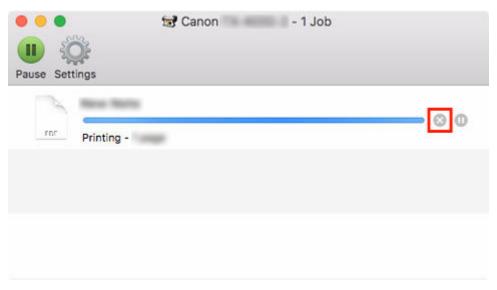

• The screen may differ slightly depending on the model you are using.

# **Canceling Print Jobs from macOS**

In the printer window, you can cancel jobs that are being sent to the printer.

### Note

- Print jobs are shown in the printer window while they are being sent from the computer. After transmission, jobs are not displayed even during printing.
- **1.** Click the printer icon in the **Dock** to display the printer window.
- 2. Either click × for the job to cancel printing or select the job to cancel printing and then click **Delete** to delete the job.

### >>> Note

 If the job to be canceled is not shown in the printer window (that is, if the print data has already been received by the printer), you can cancel printing from the operation panel on the printer or from Remote UI. For details, "<u>Canceling Print Jobs from the Control Panel</u>" or see "<u>Deleting Print Jobs</u>."

# **Pausing Printing**

➤ Pausing Printing

# **Pausing Printing**

During printing, if you set **Pause printing** to **Enable**, the printer enters a state in which printing is paused, after the completion of the printing process when this setting was made.

In this state, all printing is not executed.

To restore normal operation after pausing printing, set Pause printing to Disable.

### Note

- In the following cases, the status is cleared even if you do not set Pause printing to Disable.
  - When paper is advanced
  - If you changed the media type from the paper settings display area
- 1. Tap (Jobs) on Home screen during printing.

#### Note

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap Pause printing.
- 3. Tap Enable or Disable.

- Using Paper Other Than Genuine Paper and feed confirmed Paper
  - Printing on Paper Other Than Genuine Paper and feed confirmed Paper Using Existing Settings
  - Printing on Paper Other Than Genuine Paper and feed confirmed Paper by Adding a Media Type
- Paper Information List
- Updating paper information

# **Types of Paper**

The following media types are supported by the printer. For details on the media types supported by the printer, see "Paper Information List."

- · Plain Paper
- · Coated Paper
- · Photo Paper
- · Glossy Paper
- · Proofing Paper
- · CAD-dedicated Paper Etc.

The Paper Information List includes the following information.

- · Types of paper
- · Paper handling
- · Paper product specifications
- · Use precautions
- Setting of printer driver, operation panel etc.

#### Note

 For instructions on using paper not included in the Paper Information List, see "<u>Using Paper Other Than</u> Genuine Paper and feed confirmed Paper."

#### Method of Updating Supported Paper

Paper that is supported by the printer may be newly released on the Canon website.

To use newly released paper, register the latest paper information on the printer with the Media Configuration Tool. (See "<u>Updating paper information</u>.")

#### >>>> Important

• Even if you are not using the printer driver, you should install the Media Configuration Tool in order to register the media types for your region in the printer.

(See "Media Configuration Tool Guide" .)

# **Paper Sizes**

## Rolls

Rolls that meet the following conditions are supported.

- Outer diameter is 5.9 inches (150 mm) or less
- Inner diameter of paper core: 2 or 3 inches
- · Printing side out

Roll Paper Width	GP-300 / GP-5300 : 36.11 in. (917.0 mm) to 8.00 in. (203.2 mm)
	GP-200 / GP-5200 : 24.02 in. (610.0 mm) to 8.00 in. (203.2 mm)
Roll paper width recommended	36 in Roll (914.4mm)
for borderless printing(*1,*2)	A0/A1 Roll (841.0mm)
	B1/B2 Roll (728.0mm)
	24 in Roll (609.6mm)
	A1/A2 Roll (594.0mm)
	B2/B3 Roll (515.0mm)
	17 in Roll (431.8mm)
	14 in Roll (355.6mm)
	10 in Roll (254.0mm)
Minimum Paper Length	8.00 in. (203.2 mm)
	Excludes cloth/canvas paper.
Maximum Printable Length	59 feet (18 m)
	depends on the OS and application.
Thickness	3 mil (0.07 mm) to 31 mil (0.8 mm)

<sup>\*1:</sup>Borderless printing may not be available depending on the media type. For details on media types that can be used for borderless printing, see "Paper Information List."

## **Sheets**

Sheets of the following sizes are supported.

Sheet Width	GP-300 / GP-5300 : 36.11 in. (917.0 mm) to 8.00 in. (203.2 mm) GP-200 / GP-5200 : 24.02 in. (610.0 mm) to 8.00 in. (203.2 mm)
Minimum Paper Length	11.00 in. (279.4 mm)
Maximum Printable Length	5.2 feet (1.6 m)

<sup>\*2:</sup>You can perform borderless printing without specifying Roll paper width recommended for it. As opposed to standard borderless printing, there will be a small margin on the left and right because the paper width is set a little bit smaller than the width of the document.

Thickness	3 mil (0.07 mm) to 31 mil (0.8 mm)

## >>> Note

- For details on non-standard sizes, see "Setting Paper Dimensions (Custom Size)" (Windows) or "Setting Paper Dimensions (Custom Size)" (macOS).
- Borderless printing is not supported on sheets.

# Using Paper Other Than Genuine Paper and feed confirmed Paper

When using this printer to print on paper other than genuine Canon paper and feed confirmed paper, use paper that meets the following conditions.

#### Note

- For Canon genuine paper/feed confirmed paper, see "Paper Information List."
- Paper where the size is described in "Paper Sizes" (See "Paper Sizes.")
- · Paper where bleeding and ink overflow does not occur when printing
- · Paper that does not warp severely when loading the paper or printing

## >>>> Important

If you use paper other than Canon genuine paper and feed confirmed paper, Canon provides
absolutely no guarantees regarding print quality or paper feed properties. For Canon genuine paper/
feed confirmed paper, see "Paper Information List."

After loading the paper in the printer, select the media type in the operation panel and printer driver and then perform the printing. For the media type, you can select easily from existing settings or you can create and use settings for the paper you are using.

# **Printing Using Existing Settings**

You can print easily by selecting from existing settings provided in the operation panel and printer driver. (See "Printing on Paper Other Than Genuine Paper and feed confirmed Paper Using Existing Settings.")

# **Printing Using Additional Settings**

You can use the Media Configuration Tool function for adding custom paper to create settings suitable for non-Canon genuine paper/feed confirmed paper and add as a new media type to the printer's operation panel and the printer driver for printing. (See "Printing on Paper Other Than Genuine Paper and feed confirmed Paper by Adding a Media Type.")

# Printing on Paper Other Than Genuine Paper and feed confirmed Paper Using Existing Settings

You can easily print on paper other than genuine Canon paper and feed confirmed paper without making complicated settings by selecting the existing settings provided in the operation panel and printer driver depending on the media type you are using. The existing settings consist of general-purpose paper settings provided for different media types.

## >>> Important

 The Canon genuine paper settings provided in the operation panel and printer driver are optimized for Canon genuine paper. If these settings are selected for printing on paper other than Canon genuine paper, the ink may bleed or the print head may rub against the paper. To easily print on paper other than Canon genuine paper and feed confirmed paper, we recommend that you select one of the following general-purpose paper settings.

#### Note

- For an overview of the media types, see "Types of Paper."
- For instructions on selecting the media type with the operation panel, see "<u>Types of Paper</u>". For
  instructions on selecting the media type with the printer driver, see "How to Open the Printer Driver
  Setup Window" (Windows) or "<u>How to Open the Printer Driver Setup Dialog</u>" (macOS).

## **Choosing General-Purpose Paper Settings**

These settings anticipate a wide variety of paper other than Canon genuine paper and feed confirmed paper, and, therefore, these settings make it difficult for bleeding ink and print head rubbing to occur. For details on the relationships between the conditions of paper other than Canon genuine paper and feed confirmed paper and the media type to select, see "Paper Information List."

#### Note

• If you cannot obtain the desired results by selecting the general-purpose paper settings, use the custom paper adding function in Media Configuration Tool to create settings suitable for the paper you are using. For details, see "Printing on Paper Other Than Genuine Paper and feed confirmed Paper by Adding a Media Type."

# Printing on Paper Other Than Genuine Paper and feed confirmed Paper by Adding a Media Type

Media Configuration Tool provides a function for adding custom paper for better print quality and improved paper feed properties when printing on paper other than Canon genuine paper/feed confirmed paper than when printing with general-purpose settings. You can use this function to configure settings such as the amount of ink used and the height of the print head according to the characteristics of the paper being used, and thereby realize higher print quality. Also, you can add the settings created with this function as a new media type to the operation panel and printer driver.

For details on Media Configuration Tool, refer as follows.

Media Configuration Tool Guide

## >>> Important

- For details on how to select the added media type in the operation panel, see "Changing the Type of Paper."
- You can select the media type to be used in printing from Media Type in the Main sheet (Windows) or Quality & Media (macOS) in the printer driver. For details, see "Main Tab Description" (Windows) or "Quality & Media" (macOS).
- We recommend that you use an ICC profile created using commercially available profile creation software to perform color management accurately on paper other than Canon genuine paper and feed confirmed paper. You can register the ICC profile you created when creating a custom paper with Media Configuration Tool. See "Adding Custom Paper" in Media Configuration Tool Guide.

# **Updating paper information**

You can update the printer's media information to the latest information by applying the latest version of the Media Information File.

For details on the procedure for applying the Media Information File, refer to the following.

Media Configuration Tool Guide

## >>> Important

• If you are using the Media Configuration Tool, the new Media Information File is downloaded automatically when released on the Canon website. A computer connected to the Internet is required to download the Media Information File.

# **Handling rolls**

- Loading Rolls on the Roll Holder
- Loading Rolls in the Printer
- Changing the Type of Paper
- Specifying the Paper Length
- ➤ Removing the Roll from the Printer
- Removing Rolls From the Roll Holder
- ▶ Remove Jammed Roll Paper
- Feeding Roll Paper Manually
- Keeping Track of the Amount of Roll Paper Left
- Specifying the Amount of Extension for Borderless Printing
- Specifying the Ink Drying Time
- Specifying the Cutting Method for Rolls
- Cutting the Leading Edge of Roll Paper Automatically
- ➤ Reducing Dust from Cutting Rolls
- Detecting Roll Paper was Replaced While the Power was Off

# Loading Rolls on the Roll Holder

When printing on roll paper, attach the roll paper to the roll holder.

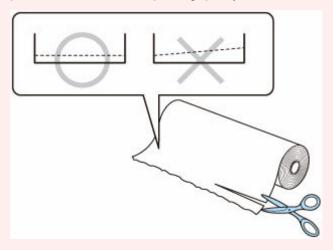

Roll paper comes in two types: 2-inch and 3-inch cores. If using 3-inch core roll paper, attach the 3-inch paper core attachment to the roll holder and holder stopper.

## ⚠ Caution

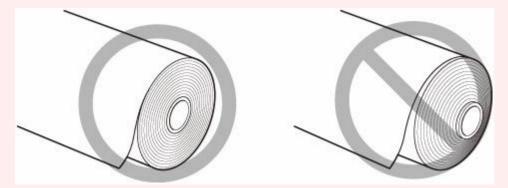

• Set the roll on its side on a table or other flat surface so that it does not roll or fall. Rolls are heavy, and dropping a roll may cause injury.

## >>> Important

- When handling the roll, be careful not to soil the printing surface. This may affect the printing quality. We recommend wearing clean cloth gloves when handling rolls to protect the printing surface.
- Cut the edge of the roll paper if it is uneven, dirty, or has tape residue. Otherwise, it may cause feeding problems and affect the printing quality. Be careful not to cut through any barcodes printed on the roll.

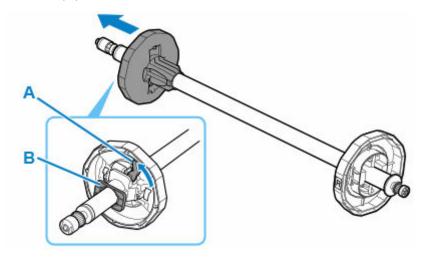

• Align the edges of the paper on both ends of the roll. This may cause feeding problems.

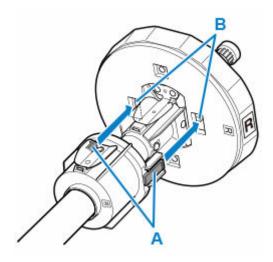

• If a feeding problem occurs, release the release lever and reload the roll paper.

#### >>> Note

 For details on roll paper sizes and types that can be used, see "<u>Paper Sizes</u>" or "Paper Information List". 1. Rotate the holder stopper lever (A) towards to release the lock, and while holding it in position (B), remove holder stopper from the roll holder.

**2.** If using 3-inch core paper, align 3-inch paper core attachment tabs (A) with roll holder holes (B) and insert firmly.

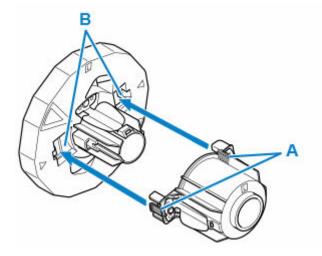

**3.** With leading edge of roll paper facing forward as shown, insert Roll Holder from right side of roll. Insert firmly until roll paper touches flange (A) of roll holder.

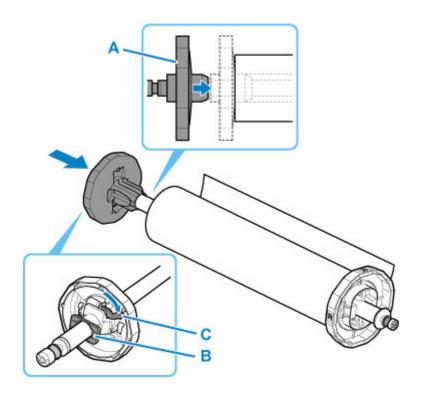

## >>> Important

- When loading a roll, be careful to avoid hitting the printer hard with the roll. This may damage the roll holder.
- If you stand the roll holder vertically and set the roll paper by dropping, the roll holder may be damaged.
- **4.** If using 3-inch core paper, align 3-inch paper core attachment tabs (A) with holder stopper holes (B) and insert firmly.

**5.** Insert holder stopper from left into roll holder as shown, and then while holding in position (B), push firmly until holder stopper flange (A) touches roll paper. Lock the holder stopper lever (C) by rotating it towards .

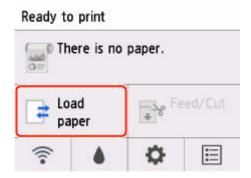

# **Loading Rolls in the Printer**

Follow these steps to load rolls in the printer.

## >>>> Important

- Before loading a roll, confirm whether the inside of the top cover or the output guide is soiled. If these areas are dirty, we recommend cleaning them in advance. (See "Cleaning Inside the Top Cover.")
- **1.** Tap **Load paper** or **Replace paper** on the Home screen of the operation panel.

#### Note

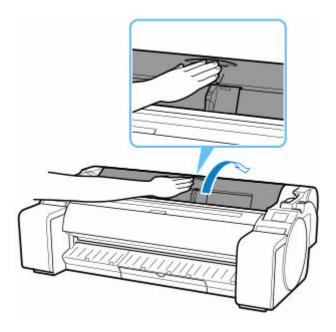

- If the Home screen does not appear, tap the **HOME** button.
- 2. Tap Load roll paper.

#### >>> Note

• If any paper has been advanced that will not be used, a message is shown requesting you to remove it.

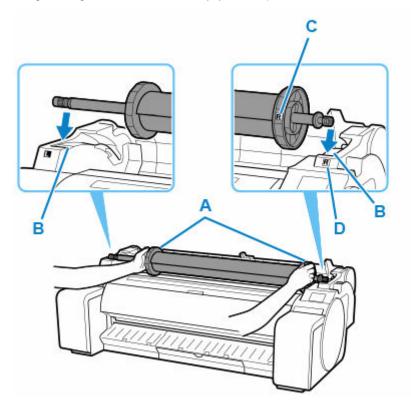

After following the instructions on the screen to remove the paper, go to the next step.

**3.** Positioning your hands as shown, open the roll paper cover.

**4.** Holding the roll holder flange (A), rest the roll holder shaft on the roll holder resting ledge (B).

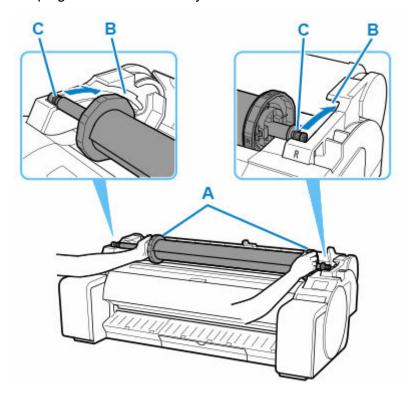

At this time, position the holder as shown in the illustration so that the R label (C) on the roll holder flange is aligned with the R label (D) on the printer.

### Note

• For the procedure for attaching the roll paper to the Roll Holder, see "Loading Rolls on the Roll Holder."

**5.** Holding the roll holder flange (A), guide the holder along the slide guides (B) on both ends, keeping the holder level as you load it in the roll holder slot.

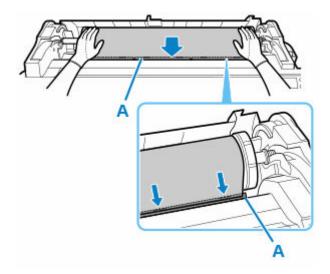

## **A** Caution

- Do not force the roll holder into the printer with the right and left ends reversed. This may damage the printer and roll holder.
- Do not release the flanges until the holder is loaded in the roll holder slot.
- Be careful not to pinch your fingers between the slide guides (B) and the roll holder shaft (C) when loading rolls.

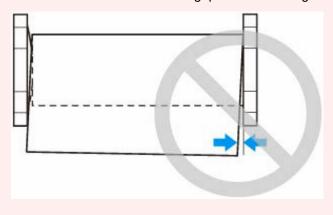

# >>> Important

- If the leading edge of the roll paper is cut crooked or folded, it may not be fed correctly. Cut the leading edge of the roll paper with scissors or the like and straighten it.
- · Load the roll paper so that it is not loaded in the opposite direction.
- **6.** Insert the edge of the roll in the feed slot (A) and advance the roll until you hear the feed tone.

## >>>> Important

- If the roll paper has become unwound, remove the slack before loading the roll paper.
- Be careful not to soil the printing surface of roll paper as you insert it in the slot. This may affect
  the printing quality. We recommend wearing clean cloth gloves when handling rolls to protect the
  printing surface.
- If the paper is wrinkled or warped, straighten it out before loading it.
- Load the roll so that there is no gap between the right edge of the paper and the roll holder.

- 7. After paper feeding has started, do the following operations based on the Manage remaining roll amount setting and the barcode printed on the roll paper (see "Keeping Track of the Amount of Roll Paper Left").
  - When selecting Disable or Warning message only in Manage remaining roll amount.
     A menu for selecting the media type appears on the operation panel. Operate the operation panel and select the media type to be used.
  - When selecting Barcodes in Manage remaining roll amount and if the barcode is printed.

    The type and amount of paper left is automatically detected based on the barcode printed on the roll. There is no need to specify the type and length of the paper.

 When selecting Barcodes in Manage remaining roll amount and if the barcode is not printed.

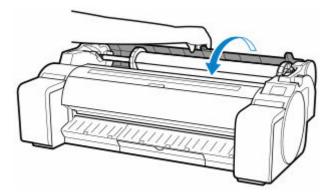

A menu for selection of the media type and length is shown on the operation panel. Operate the operation panel, select the media type to be used, and enter its length.

## >>> Important

- When selecting **Enable** in **Keep media type**, there is no need to specify the type of the paper.
- Cut the edge of the roll using the **Cut paper** function if the edge is creased or soiled. (See "Specifying the Cutting Method for Rolls.")
- When selecting the media type on the operation panel, make sure the media type set in the printer driver and the media type loaded on the printer match.

#### Note

- For details on media types that you can select, see "Paper Information List."
- **8.** Holding it at the positions indicated, close the roll paper cover.

- Cut the edge of the roll after the paper is advanced if it is soiled or if there are cuts from scissors
  or the blade after removing creased edges. (See "Specifying the Cutting Method for Rolls.")
- Adjusting the print head alignment with the type of paper to be used in printing may enhance printing quality. (See "<u>Automatic Adjustment to Straighten Lines and Colors</u>.")

# **Changing the Type of Paper**

Follow these steps to change the type of paper specified on the printer after you have loaded paper.

If you continue using the same type of paper and set **Keep media type** to **Enable**, when you load paper, the media type selected before **Enable** was set is selected automatically, eliminating the need to set the media type. (See "<u>Using the Same Type of Paper Regularly</u>.")

## >>> Important

- For best printing results, the printer fine-tunes the print head height and the feed amount for each type of paper. Be sure to select the type of paper to use correctly before printing.
- Because the printer fine-tunes the feed amount for each type of paper, the margins and the size of
  printed images may vary depending on the type of paper used. If margins and the size of images are
  not as you expected, adjust the paper feed amount.

(See "Adjusting Feed Amount.")

Rolls and sheets have different printing areas, and sheets having a larger bottom margin than rolls.
 (See "Print Area.")

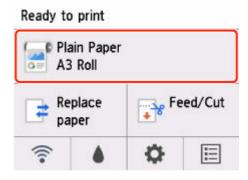

## **Changing the Type of Paper**

#### Note

• When you load roll paper, a menu for selecting the media type appears on the operation panel. Tap the media type.

If no barcode has been printed on the roll paper and you have set **Manage remaining roll amount** to **Barcodes**, specify the roll length after selecting the media type. (See "Specifying the Paper Length.")

1. Tap paper settings display area on Home screen of operation panel.

- If the Home screen does not appear, press the HOME button.
- 2. Tap Paper settings.
- 3. Tap Type.

**4.** Tap media type of roll paper loaded in printer.

### 5. Tap Register.

## Important

• Be sure to select the correct paper type. If this setting does not match the loaded paper, it may cause feed errors and affect printing quality.

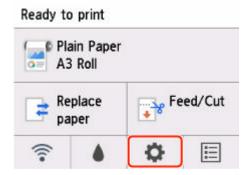

## >>>> Note

- For details on media types, see "Paper Information List." At the factory default settings, **Plain Paper** is selected for the media type.
- When the release lever is operated, the settings automatically return to the last selected media type.

# **Using the Same Type of Paper Regularly**

Configure this setting so that current media type settings will be automatically selected when you load the same type of paper later.

1. Tap (Setup) on Home screen of operation panel.

#### Note

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap Printer settings.
- 3. Tap Paper-related settings.
- 4. Tap Keep media type.
- 5. Tap Enable.

## Note

• The specified media type setting is updated in the following situations.

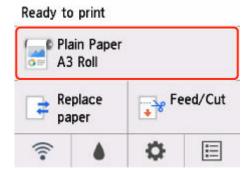

- When using sheets, if you send a print job before loading a sheet, the media type setting is updated to match the type of paper specified by the print job.
- If a barcode is printed on the roll paper and you have set Manage remaining roll amount to
  Barcodes in the operation panel menu, the media type setting is updated to match the media
  type specified by the barcode.
- To change the media type setting, see "Changing the Type of Paper."

# **Specifying the Paper Length**

When changing the length of paper after the paper has been advanced, specify the length as follows.

#### Note

- Specify the roll paper length when you have set **Manage remaining roll amount** to **Barcodes**. (See "Keeping Track of the Amount of Roll Paper Left.")
- **1.** Tap paper settings display area on Home screen of operation panel.

#### Note

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap Paper settings.
- 3. Tap Advanced.
- 4. Tap Roll length (change default).
- 5. Enter roll paper length.

Specify the roll length as follows.

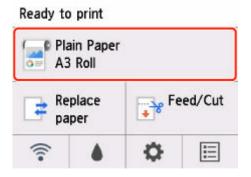

- **1.** Tap the numerical input field.
- 2. Tap the keypad appearing on the operation panel, enter the roll paper length, and then tap OK.
- 3. Check the entered length and tap OK.

# Removing the Roll from the Printer

Remove rolls from the printer as follows.

#### Note

- If you need to cut a printed roll, select **Feed/Cut** in the printer menu and cut the roll paper at the desired position. (See "Specifying the Cutting Method for Rolls.")
- **1.** Tap paper settings display area on Home screen of operation panel.

#### Note

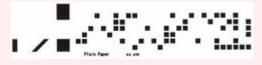

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap Remove paper.
- 3. Tap Yes.

The roll is rewound.

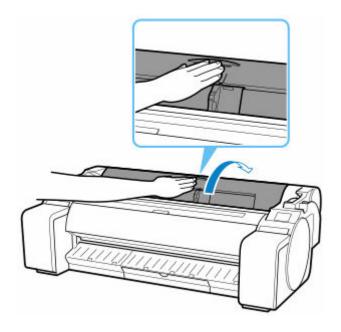

## >>> Important

• If **Manage remaining roll amount** is set to **Barcodes** in the operation panel menu, a barcode is printed on the leading edge of the roll paper.

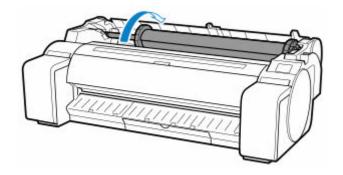

Do not remove the roll before the barcode is printed. You will be unable to keep track of the amount of roll paper left. (See "Keeping Track of the Amount of Roll Paper Left.")

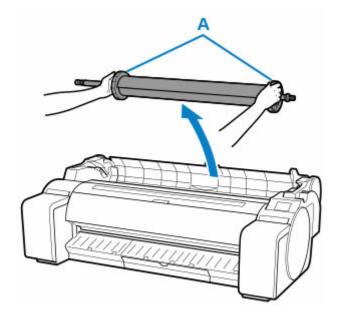

**4.** Positioning your hands as shown, open the roll paper cover.

**5.** Using both hands, rotate the roll holder toward the back to rewind the roll.

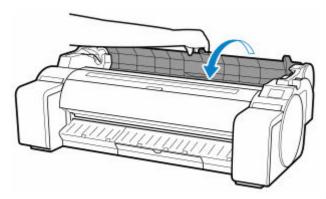

**6.** Hold roll holder by its flanges (A) and remove from roll holder slot.

## >>> Note

- For instructions on removing the roll holder from rolls, see "Removing Rolls From the Roll Holder."
- **7.** Holding it at the positions indicated, close the roll paper cover.

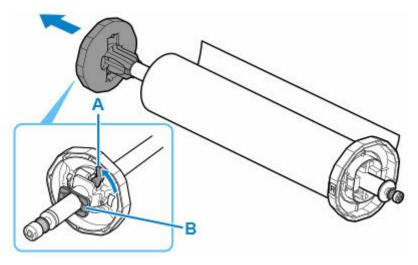

## >>> Note

- To load new roll paper in the printer at this point, see "Loading Rolls in the Printer."
- Clean inside the top cover before loading paper.

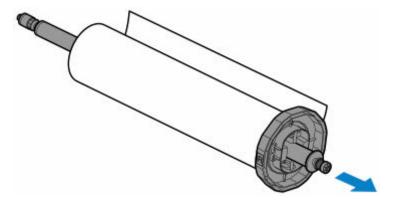

(See "Cleaning Inside the Top Cover.").

# Removing Rolls From the Roll Holder

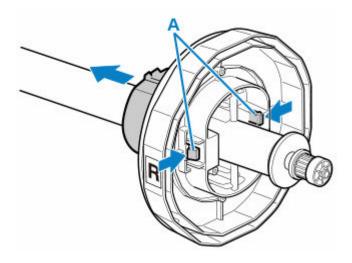

1. Rotate the holder stopper lever (A) towards to release the lock, and while holding it in position (B), remove holder stopper from the roll holder.

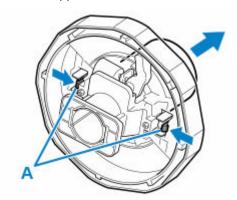

2. Remove roll holder from roll paper.

- 3. To remove 3-inch paper core attachment, press tabs (A) inward and remove attachment.
  - roll holder Side

• holder stopper Side

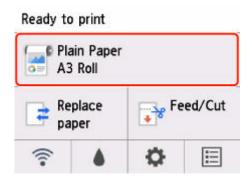

## >>> Important

• Store the roll in the original bag or box, away from high temperature, humidity, and direct sunlight. If paper is not stored properly, the printing surface may become scratched, which may affect the printing quality when you use it again.

# **Feeding Roll Paper Manually**

After feeding the roll paper, you can move it forward and back.

1. Tap paper settings display area on Home screen of operation panel.

### >>> Note

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap Feed/Cut.
- 3. Tap or touch Advance and Rewind to move roll paper forward or back.

- Tapping Advance or Rewind moves the roll paper approximately 0.04 inch (1 mm).
   Touching Advance or Rewind moves the roll paper until you release the key. If "Cannot advance the paper any further." appears on the operation panel, release the key.
- **4.** Tap **OK** when you have determined position of roll paper.

# **Keeping Track of the Amount of Roll Paper Left**

There are two methods of managing the amount of roll paper left: by using the barcode and by estimating the amount of roll paper left.

# Managing by the Barcode for the Amount of Roll Paper Left

When you set **Manage remaining roll amount** to **Barcodes** in **Printer settings** on the Home screen, the amount of remaining roll paper and the media type information are printed as a barcode and text when the paper is removed. When **Manage remaining roll amount** is set to **Barcodes** and you load roll paper with a printed barcode, the media type and remaining amount are automatically detected after the roll paper is loaded. The barcode will be cut off after it has been read.

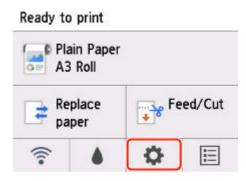

## Important

- If the barcode on the roll is not detected, enter the type and length of paper on the operation panel.

  The length of the paper at this time can be set in **Roll length (change default)**.
  - ⇒ Setting the Default Value of the Amount of Roll Paper Left when Managing by the Barcode

Follow the steps below when setting Manage remaining roll amount to Barcodes.

1. Tap (Setup) on Home screen of operation panel.

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap Printer settings.
- 3. Tap Paper-related settings.
- 4. Tap Manage remaining roll amount.
- 5. Tap Barcodes.

**6.** Check the length of the roll paper and tap **OK**.

#### >>> Note

- The length of the roll paper to be displayed can be set in Roll length (change default).
  - ➡ Setting the Default Value of the Amount of Roll Paper Left when Managing by the Barcode
- If the length of the roll paper to be displayed is different from the length of the roll paper actually used, set the actual length.
- **7.** Select the timing when the warning message appears.

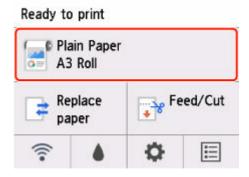

# Setting the Default Value of the Amount of Roll Paper Left when Managing by the Barcode

When you select **Barcodes** in **Manage remaining roll amount** and if you feed roll paper on which no barcode is printed, such as new roll paper, the screen to enter the roll paper length (remaining amount) appears.

In this screen, the length (remaining amount) of default value appears. If the length is not correct, tap the screen and enter a correct length.

When you want to change the length (remaining amount) of default value, follow the steps below.

**1.** Tap paper settings display area on Home screen of operation panel.

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap Paper settings.
- 3. Tap Advanced.
- 4. Tap Roll length (change default).
- **5.** Specify the length of the roll paper and tap **OK**.

## Managing by Estimating the Amount of Roll Paper Left

When you set **Manage remaining roll amount** to **Warning message only** in **Printer settings** on the Home screen, if the amount of roll paper left decreases, the **Status** lamp on the operation panel lights up orange and the warning message is displayed. The barcode is not printed.

The time to display warning message can be set in **Roll amount warning settings**. If you increase the level in **Roll amount warning settings**, the warning message appears sooner.

#### >>>> Important

- If the type of paper is not selected correctly, the amount of roll paper left may not be estimated correctly.
- When using the types of paper which are not displayed on "Paper Information List," set the paper thickness and the size of paper core with Media Configuration Tool.
  - → Media Configuration Tool Guide

# Specifying the Amount of Extension for Borderless Printing

Borderless printing may leave margins on the left and right sides of the paper or soil the back of the paper. Adjusting the amount of extension may improve these problems.

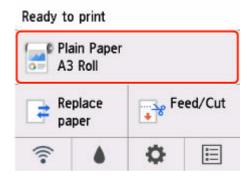

Each paper width is shown as being a recommended width for borderless printing ( Paper with recommended width ), or as having sufficient width for borderless printing ( Paper of sufficient width ). The procedure for specifying the amount of extension differs depending on Paper with recommended width and Paper of sufficient width.

- Specifying Amount of Extension for Paper with recommended width.
- ➡ Specifying Amount of Extension for Paper of sufficient width.

For more information on a paper width recommended for borderless printing, see Paper Sizes.

# Specifying Amount of Extension for Paper with recommended width.

1. Tap paper settings display area on Home screen of operation panel.

- 2. Tap Paper settings.
- 3. Tap Advanced.
- 4. Tap Extension for borderless printing.
- 5. Tap Paper with recommended width.
- 6. Select amount of extension.

Select Large, Standard, or Small.

#### >>> Note

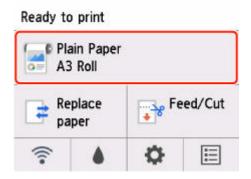

- When selecting Large, the printed area will be wider. Select this if there are margins.
- When selecting **Small**, the printed area will be narrower. Select this if there are stains.

# Specifying Amount of Extension for Paper of sufficient width.

In case of **Paper of sufficient width**, the width of the original is set to be slightly smaller than the paper, and there are margins on the left and right. You can reduce the margins by increasing the amount of extension.

On the other hand, if the amount of extension is too large, the back side of the paper will be easily soiled with the overflowed ink. When performing borderless printing with specifying the amount of extension for **Paper of sufficient width**, clean the platen regularly.

- ➡ Cleaning Inside the Top Cover
  - 1. Tap paper settings display area on Home screen of operation panel.

- 2. Tap Paper settings.
- 3. Tap Advanced setup.
- 4. Tap Extension for borderless printing.
- 5. Tap Paper of sufficient width.
- **6.** Select the adjustment value.

#### >>> Note

- The larger the set adjustment value, the wider the printed range.
- After setting, we recommend to perform borderless printing to check the margin status.
   If the margin remains, set a larger adjustment value. If the back of the paper is soiled, set a smaller adjustment value.
- After borderless printing for confirmation, we recommend to clean the platen.
  - Cleaning Inside the Top Cover

# **Specifying the Ink Drying Time**

When you are using paper that takes longer for ink to adhere, ink may be transferred onto the paper surface during ejection, soiling it. In that case, you may be able to improve the condition by setting the time to wait for the ink to dry after printing.

## >>> Important

• Printer settings are applied when the ink drying time is not set in the printer driver. If the ink drying time is set in the printer driver, that setting has priority.

### >>> Note

 If the cutter touches the print surface on which the ink is not dry, the paper surface may become scratched or soiled, or the paper surface may rub when the paper falls and the surface may become soiled.

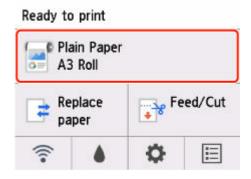

To wait for the ink to dry without allowing printed materials to fall after printing, set **Cutting mode** on the printer menu to **Eject cut**. (See "Specifying the Cutting Method for Rolls.")

• The ink drying time for sheets can also be set using this procedure.

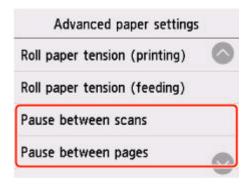

# Set on the Printer

Set with the operation panel of the printer.

1. Tap paper settings display area on Home screen of operation panel.

- 2. Tap Paper settings.
- 3. Tap Advanced.
- 4. Scroll the screen, tap Pause between scans or Pause between pages.

#### Pause between scans

Specify the waiting time between printing one scan on a page and printing the next one.

#### Pause between pages

Specify the waiting time between printing one page and ejecting the paper. If there is a next page, it will be printed after the ink drying time has elapsed.

# Set on your Computer

Refer to the followings for how to set from your computer.

- → Main Tab Description (Windows)
- → <u>Advanced Paper Settings</u> (macOS)

# **Specifying the Cutting Method for Rolls**

How rolls are cut after ejection varies depending on printer settings.

#### Automatic cut

The roll is automatically cut by the cutter blade according to the printer driver settings.

Printer Setting

Tap paper settings display area >Paper settings>Advanced>Cutting mode>Automatic cut

Driver Setting

### **Automatic Cutting>Yes**

- See "Cutting Roll Paper after Printing" (Windows).
- ⇒ See "Cutting Roll Paper after Printing" (macOS).

### • Eject (when the paper surface is being scratched / to wait for ink to dry)

Select this to move the cutter by operation panel operation and cut paper. With **Automatic cut**, the paper drops and may rub against the basket, resulting in damage to the print surface, but you can cut using this method and supporting the paper so that it does not drop to avoid damage to the paper. Also, you can prevent paper that has not dried from dropping by visually checking the ink has dried, and then cutting the paper.

After printing, tap **Cut paper** and cut the roll paper on the cutter blade.

Printer Setting

Tap paper settings display area >Paper settings>Advanced>Cutting mode>Eject cut

· Driver Setting

### **Automatic Cutting>Yes**

- See "Cutting Roll Paper after Printing" (Windows).
- See "Cutting Roll Paper after Printing" (macOS).

## • Manual (when using media that cannot be cut with the cutter blade)

Select this if the paper cannot be cut on the cutter blade.

Cut each page from the roll using scissors. For continuous printing (if you will cut each page later), select **Automatic Cutting>Yes** or select **Print Cut Guideline**.

Printer Setting

Tap paper settings display area >Paper settings>Advanced>Cutting mode>User cut

Driver Setting

## Automatic Cutting>No, Yes, Print Cut Guideline

- See "Cutting Roll Paper after Printing" (Windows).
- See "Cutting Roll Paper after Printing" (macOS).

#### Paper cutting (to have the roll cut at your specified position)

Select this when you want to cut the roll paper by operating the cutter blade using the operation panel after printing with **No** or **Print Cut Guideline** selected in **Automatic Cutting** in the printer driver.

Otherwise choose this option if you want to cut the roll edge after loading a roll.

Printer Setting

Tap paper settings display area >Feed/Cut>Cut paper>Yes

Driver Setting

#### Automatic Cutting>No, Yes, Print Cut Guideline

- See "Cutting Roll Paper after Printing" (Windows).
- ⇒ See "Cutting Roll Paper after Printing" (macOS).

#### Note

- Automatic and Eject are valid only when you have selected Automatic Cutting>Yes in the printer driver.
- With Eject, printing does not resume after a series of jobs have been printed continuously until the roll is cut.
- **Eject cut** or **User cut** is the preset selection in **Cutting mode** for some types of paper. For this paper, we recommend keeping the preset cutting mode.
- If documents printed using Automatic, Eject, or manual cutting are short, rolls are advanced a specific amount before cutting to prevent problems with cutting and paper ejection. This may create a wider bottom margin, in some cases.

Cut rolls manually in the following cases:

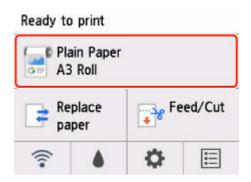

# Eject (when the paper surface is being scratched / to wait for ink to dry)

#### >>>> Important

- When cutting wide printed documents after ejection, have two people support the documents. If the paper drops, printed documents may be damaged.
- Do not lift the paper when holding printed documents before cutting. If the paper rises, it may affect the printing quality or cause rough cut edges.

### Note

- Once the following step has been performed, the procedure can be started from step 7 the next time.
  - Printing the second and subsequent times
  - Printing after replacing with the same type of paper
- **1.** Tap paper settings display area on Home screen of operation panel.

### Note

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap Paper settings.
- 3. Tap Advanced.
- 4. Tap Cutting mode.
- 5. Tap Eject cut.
- 6. Print the job.

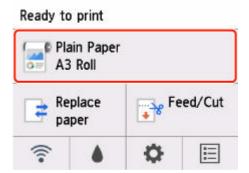

When printing is finished, the printer will stop without cutting.

**7.** While holding the printed document from the bottom edge to prevent it from dropping, tap **Cut paper** to cut the roll paper.

# Manual (when using media that cannot be cut with the cutter blade)

#### Note

- Once the following step has been performed, the procedure can be started from step 8 the next time.
  - Printing the second and subsequent times
  - Printing after replacing with the same type of paper
- 1. Tap paper settings display area on Home screen of operation panel.

### Note

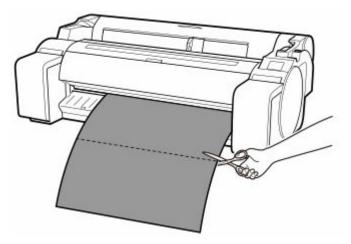

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap Paper settings.
- 3. Tap Advanced.
- 4. Tap Cutting mode.
- 5. Tap User cut.
- 6. When **Do you want to set to detect the leading edge of the paper?** is displayed, select **Detect (recommended)**.
- 7. Print the job.

The printer stops advancing the paper after printing.

8. Tap Advance paper.

Roll paper is fed to the specified cut position and then automatically stopped.

**9.** Cut the roll paper manually with scissors or the like.

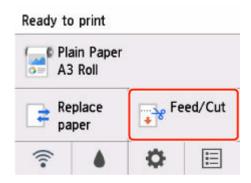

# **10.** Tap **OK**.

After the roll is rewound, it stops automatically.

# Paper cutting (to have the roll cut at your specified position)

1. Tap Feed/Cut on Home screen of operation panel.

# >>> Note

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap or touch Advance or Rewind to feed roll paper to desired cutting position.
- 3. Tap Cut paper.
- 4. Tap Yes.

After the roll paper is cut, it is rewound automatically.

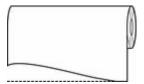

# **Cutting the Leading Edge of Roll Paper Automatically**

If the leading edge of the paper is cut crooked or is not cut straight when roll paper is loaded, it will not print correctly. If this happens, you can cut the leading edge of the paper straight when loading a paper roll by using **Trim edge first** in the operation panel menu.

The following settings are available for Trim edge first.

#### Auto

If the leading edge of the paper is cut crooked and is not cut straight when loading roll paper, cut the leading edge straight and eject the fragment of paper to prevent printing on the platen and soiling the printer.

### On(Preset Length)

The amount to cut from the leading edge of the paper varies depending on the media type and is cut to a prescribed length. For the leading edge precut length, see "Paper Information List".

### On(Input Length)

The amount to cut from the leading edge of paper is specified in the operation panel. The amount to cut from the leading edge can be specified in the range of lengths displayed in the operation panel. The range of lengths differs according to the media type.

#### >>> Note

• The amount to cut from the leading edge of paper cannot be set shorter than the length displayed in the operation panel.

#### Manual

The amount to cut from the leading edge of paper can be adjusted by using the operation panel.

To cut the paper after adjusting, tap Cut paper and select Yes.

After cutting the paper, tap Complete paper loading.

### Note

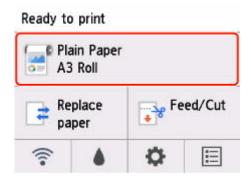

• If you do not tap Complete paper loading after cutting the paper, you cannot print the next job.

#### Off

The edge is not cut and scraps are not removed.

Follow these steps to change the **Trim edge first** setting.

1. Tap paper settings display area on Home screen of operation panel.

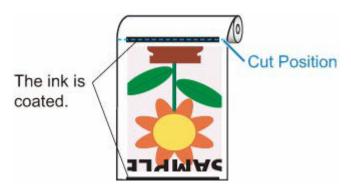

# >>> Note

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap Paper settings.
- 3. Tap Advanced.
- 4. Tap Trim edge first.
- 5. Tap desired Trim edge first settings.

This setting takes effect the next time you load a roll.

# **Reducing Dust from Cutting Rolls**

If the paper tends to generate dust when cut, such as with Backlit Film, you can reduce flying dust by setting **Cut-dust reduction** to **ON** from the operation panel menu, which will coat the leading and trailing edges of the printed document with ink. As a result, you can reduce problems with the print head. You can set **Cut-dust reduction** according to the media type.

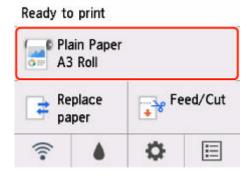

## >>>> Important

- Do not set **Cut-dust reduction** to **ON** for paper that wrinkles easily, such as **Plain Paper** or lightweight paper. If not cut properly, the paper may jam.
- Borderless printing is not available when **Cut-dust reduction** is set to **ON**. When performing borderless printing, set **Cut-dust reduction** to **OFF**.

Follow these steps to set Cut-dust reduction to ON.

**1.** Tap paper settings display area on Home screen of operation panel.

### Note

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap Paper settings.
- 3. Tap Advanced.
- 4. Tap Cut-dust reduction.

**5.** Tap **ON**.

# **Detecting Roll Paper was Replaced While the Power was Off**

When you turn the printer on, it can confirm whether the roll paper was replaced while the power was off.

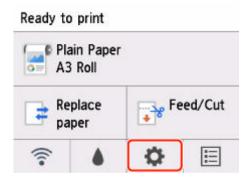

From **Printer settings** on the Home screen, set **Auto feed at power on** to **Enable** to detect the position of the roll paper's leading edge when the power is turned on. If the position of the roll paper's leading edge is over 1 mm since the last time the power was turned off, the printer determines that the roll paper has been replaced, and then starts feeding paper automatically to detect the paper width and the barcode for the management of unused roll paper.

### Note

- Setting Auto feed at power on to Enable causes the operations that can be done after turning on the
  power to take longer since the printer must detect the leading edge of the roll paper.
- Auto feed at power on is set to Disable when you buy the printer.

Follow these steps to set Auto feed at power on to Enable as follows.

1. Tap (Setup) on Home screen of operation panel.

## Note

- If the Home screen does not appear, press the HOME button.
- 2. Tap Printer settings.
- 3. Tap Paper-related settings.
- 4. Tap Auto feed at power on.
- 5. Tap Enable.

# **Handling sheets**

- ► Loading Sheets in the Printer
- ➤ Changing the Type of Paper
- ➤ Printing From a Desired Starting Point
- ➤ Removing Sheets
- ➤ Remove a Jammed Sheet
- ➤ Specifying the Ink Drying Time

# **Loading Sheets in the Printer**

Follow these steps to load sheets in the printer.

## >>> Important

- One sheet of paper can be loaded in the feed slot at a time. Do not load more than one sheet at a time. This may cause paper jams.
- Before feeding paper or printing, make sure the sheet is flat against the roll paper cover. The sheet may jam if it curls before feeding or printing and the trailing edge drops toward the front.
- Paper that is wrinkled or warped may jam. If necessary, straighten the paper and reload it.
- Load the paper straight. Loading paper askew will cause an error. (See "1317.")

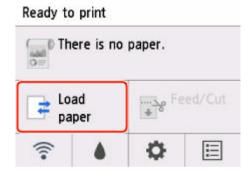

#### Note

- Before loading cut sheets, check whether or not the inside of the top cover or the output guide is soiled. If these areas are dirty, we recommend cleaning them in advance. (See "<u>Cleaning Inside the</u> <u>Top Cover</u>.").
- · Store unused paper in the original package, away from high temperature, humidity, and direct sunlight.
- 1. Select sheets as the paper source.
  - · If a print job was received

Sheets are automatically selected, and the media type and size specified by the print job are shown on the operation panel.

Tap OK and Load paper.

- · If no print job was received
  - 1. Tap **Load paper** or **Replace paper**.

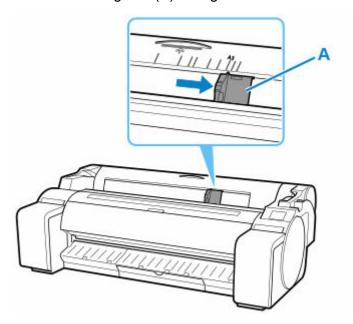

2. Tap Load cut sheet or Replace cut sheet.

### Note

If the Home screen does not appear, press the HOME button.

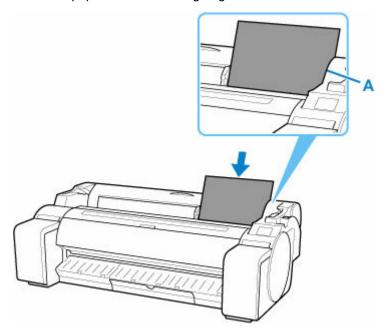

## Note

 If any paper has been advanced that will not be used, a message is shown requesting you to remove it. 2. Slide the width guide (A) to align it with the mark for the size of paper you will load.

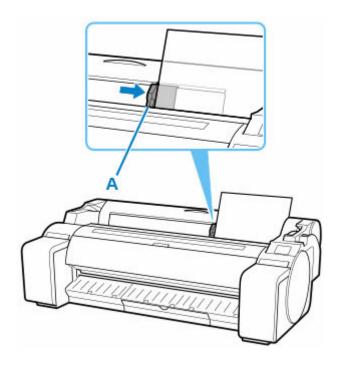

**3.** Load a single sheet printing-side up in the feed slot, with the right edge aligned with the paper alignment line (A) to the right of the roll paper cover.

Insert the paper until the leading edge makes contact.

**4.** Move the width guide (A) carefully to match the size of paper loaded.

Set the width guide against the edge of the paper to prevent the paper from becoming crooked or wrinkled.

# 5. Tap Start feeding.

· If a print job was received

Tap **Start feeding** to feed the paper and begin printing.

• If no print job was received

A menu for selecting the media type appears.

Select the media type loaded and tap  $\mathbf{OK}$ .

The printer now starts feeding the paper.

## Note

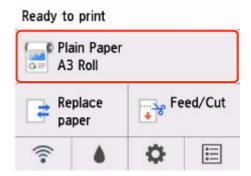

• For details on media types that you can select, see "Paper Information List."

# **Printing From a Desired Starting Point**

Print on sheets from a desired starting point as follows.

# **Setting Detect paper width to Disable**

1. Tap paper settings display area on Home screen of operation panel.

## Note

- If the Home screen does not appear, press the HOME button.
- 2. Tap Paper settings.
- 3. Tap Advanced.
- 4. Select Detect paper width and tap Disable.

# Load paper in the desired position to start printing from

Follow these instructions to load paper at the desired starting position for printing when **Detect paper** width is set to **Disable**.

**1.** If you did not send a print job in advance, a menu for selection of the type of paper is displayed.

Tap media type loaded.

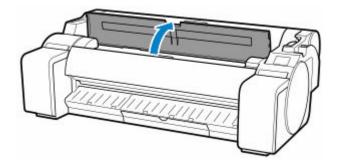

## Note

• If a print job was received before the paper was fed, the media type and size specified by the job are shown on the operation panel.

Go to step 2.

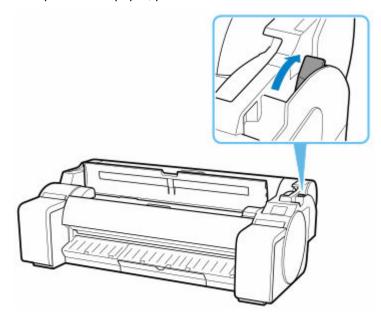

2. When "[Detect paper width] is disabled. Do you want to keep it disabled and continue?" appears on operation panel, tap Keep it disabled and continue.

**3.** Open top cover and check position where paper is loaded.

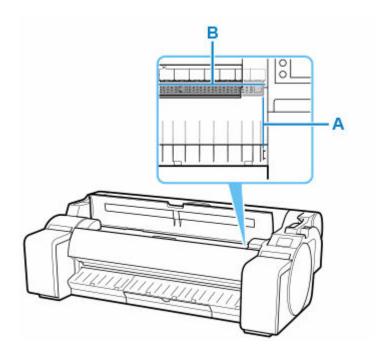

To start printing from the current position, close the top cover.

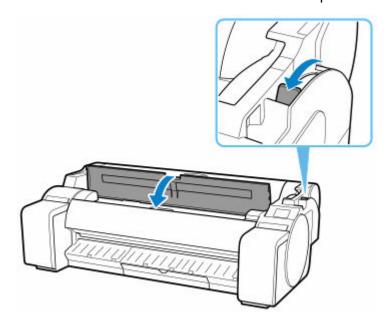

To reposition the paper, push the release lever back.

**4.** Load paper keeping right edge of paper aligned with extended line of paper alignment line (A) on right side of printer and position from which to start printing aligned with groove (B) at far end of platen.

**5.** Pull the release lever forward and close the top cover.

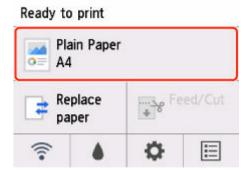

**6.** When screen for selecting paper size appears, select size of paper loaded.

# **Removing Sheets**

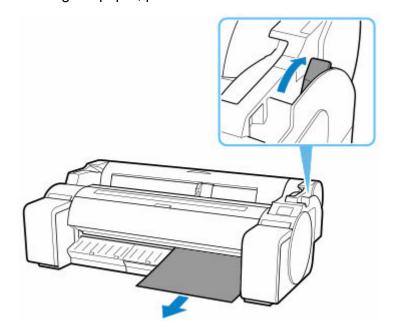

Remove sheets from the printer as follows.

1. Tap paper settings display area on Home screen of operation panel.

# >>> Note

- If the Home screen does not appear, press the **HOME** button.
- 2. Tap Remove paper.
- Check operation panel message and tap Yes.The paper is ejected from the front of the printer.
- 4. Holding the paper, push the release lever back and remove the sheet.

**5.** Pull the release lever forward.

# **Basket**

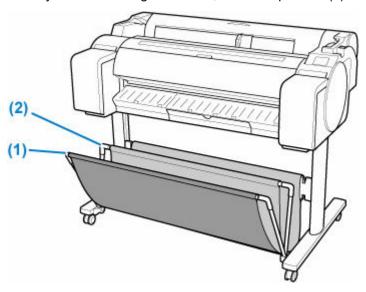

Using the Basket

# **Using the Basket**

You can store printed documents in the basket.

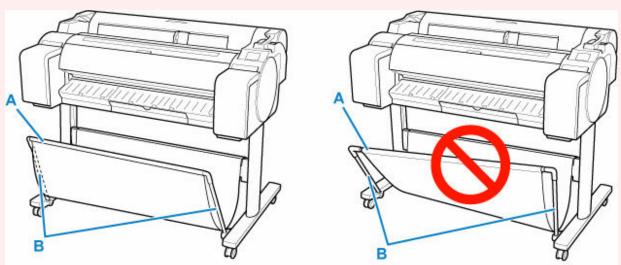

When storing printed documents in the basket, use the basket in position (1).

When you are not using the basket, store it in position (2).

# >>> Important

- When storing printed documents on the basket, always use it in position (1). If you do not, printed documents may not be dropped into the basket, and the printed surface may become soiled.
- To store printed documents in the basket, first pull down the side rod (B) evenly so that the front rod (A) is not askew, and then use the basket.

- The number of sheets that can be collected in the basket is one. If printing multiple pages, print after removing each sheet.
- The basket can hold printed documents from paper up to 48 inches (1219.2 mm) long.
- When moving the stand, make sure that the basket does not graze the floor and that all four of the
  casters are unlocked before moving the stand. Not doing so may damage the basket, scratch the floor,
  or cause injuries.

<ul> <li>If the cloth part of the basket becomes dirty, wipe off the dirt without washing performance of the basket.</li> </ul>	. Washing it may affect the

# **Home Screen Menu Composition**

After the printer starts up, the HOME screen appears on the touch screen.

From the HOME screen, you can check the printer status and select the maintenance, paper operations, settings, and other menus.

### 

#### A: Printer Information Display Area

Displays the printer status, messages, and other information. Tap this item when a message appears to view the message on the list screen and to jump to the screen with detailed information and operations.

→ Notification Messages

#### **B: Paper Setting Display Area**

Displays the information on loaded paper on the upper area. Tapping this option displays the menu relating paper and allows the paper settings. **Replace paper** and **Feed/Cut** frequently used in the menu appears on the lower area, and you can directly select.

#### C: Network

Displays the current network status. Select to display the basic network information or to change the network settings.

The icon differs depending on the network of use or the network status.

Wi-Fi is enabled and the printer is connected to the wireless router.

#### Note

• Depending on the signal state, the icon will change.

(Signal strength: 81 % or more): You can use the printer over a Wi-Fi without any problems.

(Signal strength: 51 % or more): The problem such as the printer cannot print may occur according to the network status. We recommends placing the printer near the wireless router.

(Signal strength: 50 % or less): The problem such as the printer cannot print may occur. Place the printer near the wireless router.

Wi-Fi is enabled but the printer is not connected to the wireless router.

Wired LAN is enabled.

Wireless Direct is enabled.

Wi-Fi and Wired LAN are disabled.

#### D: Ink information

Selects when checking current estimated ink levels or replacing ink tanks.

#### E: Setup

Selects when changing the printer settings, performing maintenance, or checking printer information.

#### F: Job management

Select when setting up print job managements or printing data on a USB flash drive.

### >>> Note

• By default, menu settings apply to all print jobs. However, for settings that are also available in the printer driver, the values specified in the printer driver take priority.

# **Basic Touch Screen Operations**

You can select various functions and settings by gently touching and swiping the touch screen with your fingertip.

## Important

- Take the following precautions when operating the touch screen. Otherwise, the touch screen may malfunction or become damaged.
  - Do not forcibly press the touch screen with your finger.
  - Do not press the touch screen with an object other than your finger (such as a ballpoint pen, pencil, fingernail, or other object with a sharp tip).
  - Do not operate the touch screen with wet or dirty hands.
  - Do not place objects on top of the touch screen.
- · Do not place a protective film over the touch screen. Removing it can damage the touch screen.

#### Tap

Gently touch with your fingertip and then release.

Use this when selecting an item on the screen.

## Touch

Gently touch with your fingertip.

To go (or return) to a menu or list, touch the directional mark.

## **Flick**

Drag and release your finger up, down, left, or right.

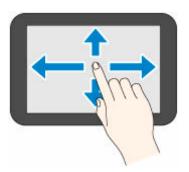

Use this to quickly scroll through a menu or list.

## Drag

Move your finger up, down, left, or right while gently keeping it in contact with the touch screen.

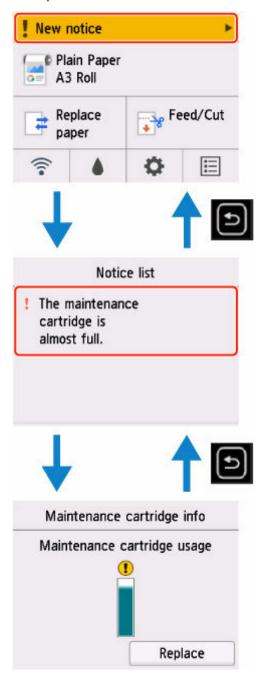

Use this to move a menu or list while viewing it.

# **Notification Messages**

When the ink is low or there is another notification, **New notice** appears in the printer information display area. Tap this to display the **Notice list** screen to view messages with the newest one appearing first. Tap a message to display the message details screen to view the details and take action.

Example: Notices on the maintenance cartridge

# **Menu Structure**

The \* on the right side of an item indicates the default value.

Values may vary depending on your model and firmware version.

- Maintenance
- Printer information

## **Maintenance**

It will be displayed when you tap

(Setup) on HOME screen.

## Nozzle Check

Prints out the nozzle check pattern.

Checking for Nozzle Clogging

## · Print Head Cleaning

Select this to clean the print head.

Cleaning the Print Head

## Print Head Alignment

Adjusts the alignment of print head.

- → Automatic Adjustment to Straighten Lines and Colors
- Manual Adjustment to Straighten Lines and Colors

## · Print head angle adjustment

Adjusts the print head angle.

➡ Adjusting Line Misalignment

## · Paper feed adjustment

Adjusts the paper feed amount.

Adjusting Feed Amount

## · Maintenance cartridge info

Displays the estimated usage of maintenance cartridge. Select **Replace** to replace the maintenance cartridge.

Replacing the Maintenance Cartridge

## Head Replacement

Select this to replace the print head.

Replacing the Print Head

## · Replace cutter blade unit

Select this to replace the cutter blade.

→ Replacing the Cutter Blade

## · Platen cleaning

Select this to clean inside the top cover.

➡ Cleaning Inside the Top Cover

## • Prepare to move

Select this to prepare for transporting the printer.

➡ Preparing to Transfer the Printer

## Job management

It will be displayed when you tap (

☑(**Jobs**) on HOME screen.

## • Print job

Displays the print job list. Tapping a job displays the details. You can also delete or preempt jobs on this menu.

## Saved job

Displays the saved print job list. You can print / delete saved jobs and print job list on each job box.

## >>> Note

• Enter the password if it is enabled for a personal job box using Remote UI.

#### · Print from USB flash drive

Displays a list of the data saved on the USB flash drive. You can set the print settings and print the data from this menu.

## Job history

## >>> Important

 The administrator password is required to display the job history if it is enabled for changing settings using the operation panel.

## Display job history

Displays the print job history. Tapping a print job displays the details.

## Print job history

Prints out the print job history.

## Pause printing

Selecting **Enable** while a print job is in progress pauses the print job after the current job is completed.

## · Delete all print jobs

Deletes all jobs in the job queue.

# LAN settings

This setting item is displayed by tapping **Printer settings** after tapping screen.

(Setup) on the HOME

## >>>> Important

 The administrator password is required to change settings if it is enabled for changing settings using the operation panel.

## >>> Note

• You can also enter LAN settings by tapping

(Network) on the HOME screen.

## • Wi-Fi

The following setting information on the Wi-Fi connection is displayed. (Some items are not displayed depending on printer settings.)

Items	Setting
Connection	Enabled (connected) / Enabled (disconnected) / Disable
Network name (SSID)	XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX
Communication mode	Infrastructure
Channel	1 - 13
Wi-Fi security	Disable / WEP (64 bit) / WEP (128 bit) / WPA-PSK (TKIP) / WPA-PSK (AES) / WPA2-PSK (TKIP) / WPA2-PSK (AES)
IPv4 address	XXX. XXX. XXX (12 characters)
IPv4 subnet mask	XXX. XXX. XXX (12 characters)
IPv4 default gateway	XXX. XXX. XXX (12 characters)
IPv4 DNS dynamic settings	Enable / Disable
IPv4 DNS host name	xxxxxxxxxx
IPv4 DNS domain name	xxxxxxxxxx
IPv6 link-local address	XXXX:
IPv6 link-local prefix length	XXX (up to 3 digits)
IPv6 manual address	XXXX:
IPv6 manual prefix length	XXX (up to 3 digits)
IPv6 stateless address 1	XXXX:

IPv6 stateless prefix length 1	XXX (up to 3 digits)
IPv6 stateless address 2	XXXX: XXXX (32 characters)
IPv6 stateless prefix length 2	XXX (up to 3 digits)
IPv6 stateless address 3	XXXX: XXXX (32 characters)
IPv6 stateless prefix length 3	XXX (up to 3 digits)
IPv6 stateless address 4	XXXX: XXXX (32 characters)
IPv6 stateless prefix length 4	XXX (up to 3 digits)
DHCPv6	Enable / Disable
DHCPv6 stateful address	xxxxxxxxxx
DHCPv6 stateful prefix length	XXX (up to 3 digits)
IPv6 default gateway 1	XXXX: XXXX (32 characters)
IPv6 default gateway 2	XXXX: XXXX (32 characters)
IPv6 default gateway 3	XXXX: XXXX (32 characters)
IPv6 default gateway 4	XXXX: XXXX (32 characters)
IPv6 primary DNS server address	xxxxxxxxxx
IPv6 secondary DNS server add.	xxxxxxxxxx
IPv6 DNS dyn. update: manual	Enable / Disable
IPv6 DNS dyn. update: stateless	Enable / Disable
IPv6 DNS dyn. update: stateful	Enable / Disable
IPv6 Use IPv4 host/domain name	Enable / Disable
IPv6 DNS host name	xxxxxxxxxx
IPv6 DNS domain name	XXXXXXXXXX
MAC address	XX:XX:XX:XX:XX (12 characters)
IPsec settings	Enable (ESP) / Enable (ESP & AH) / Enable (AH) / Disable
Printer name	XXXXXXXXXXXXXXX (up to 15 characters)
Bonjour service name	XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX
I	

("XX" represents alphanumeric characters.)

To change the setting, tap **Settings**.

#### • Enable/disable Wi-Fi

Select **Enable** to wirelessly connect via wireless router.

## Wi-Fi setup

Select how to setup Wi-Fi.

## Easy wireless connect

Select if you specify the settings of the access point information to the printer directly from a device (e.g. smartphone, or tablet) without operating the wireless router. Follow the on-screen instructions of the connecting device for the setup procedure.

#### Manual connect

Select when you perform settings for Wi-Fi manually using the operation panel of the printer.

## WPS (Push button method)

Select when you perform settings for Wi-Fi using a wireless router supporting a Wi-Fi Protected Setup (WPS) push button method. Follow the on-screen instructions during setup.

## Other connection types

## Manual connect (adv.)

Select when you perform settings for Wi-Fi manually. You can specify multiple WEP keys.

## WPS (PIN code method)

Select when you perform settings for Wi-Fi using a wireless router supporting a Wi-Fi Protected Setup (WPS) PIN code method. Follow the on-screen instructions during setup.

## Note

• By tapping Advanced, you can set LAN in detail.

For the items that can be set, see the following.

→ Advanced

#### Wireless Direct

The following setting information on the Wireless Direct connection is displayed. (Some items are not displayed depending on printer settings.)

Items	Setting
Connection	Enable / Disable
Network name (SSID)	DIRECT-XXXX-GP-NNNN*1
Password	XXXXXXXXX (10 characters)
Communication mode	Wireless Direct
Channel	3
Wi-Fi security	WPA2-PSK (AES)
IPv4 address	XXX. XXX. XXX. XXX (12 characters)
IPv4 subnet mask	XXX. XXX. XXX. XXX (12 characters)
IPv4 default gateway	XXX. XXX. XXX (12 characters)

IPv4 DNS dynamic settings	Enable / Disable
IPv4 DNS host name	xxxxxxxxxx
IPv4 DNS domain name	xxxxxxxxxx
IPv6 link-local address	XXXX: XXXX: XXXX: XXXX: XXXX: XXXX: XXXX: XXXX: XXXX: XXXX (32 characters)
IPv6 link-local prefix length	XXX (up to 3 digits)
MAC address	XX:XX:XX:XX:XX (12 characters)
IPsec settings	Disable
Printer name	XXXXXXXXXXXXXXX (up to 15 characters)
Bonjour service name	XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX

<sup>\*1</sup> means printer's model name

("XX" represents alphanumeric characters.)

To change the setting, tap **Settings**.

#### Enable/disable Wireless Direct

Select **Enable** to wirelessly connect without wireless router.

## Update SSID/password

Updates the identifier (SSID) and password.

## Wireless Direct network (SSID)

Changes the name (device name) of the printer displayed on Wi-Fi Direct compatible device.

## Connection request confirmation

Changes the display / non-display of the confirmation screen when Wi-Fi Direct compatible devices are connected to the printer.

## >>> Note

• By tapping Advanced, you can set LAN in detail.

For the items that can be set, see the following.

→ Advanced

## Wired LAN

The following setting information on the Wired LAN connection is displayed. (Some items are not displayed depending on printer settings.)

Items	Setting
Connection	Enabled (connected) / Enabled (disconnected) / Disable
IPv4 address	XXX. XXX. XXX (12 characters)
IPv4 subnet mask	XXX. XXX. XXX (12 characters)

IPv4 default gateway	XXX. XXX. XXX (12 characters)
IPv4 DNS dynamic settings	Enable / Disable
IPv4 DNS host name	xxxxxxxxxx
IPv4 DNS domain name	xxxxxxxxxx
IPv6 link-local address	XXXX: XXXX (32 characters)
IPv6 link-local prefix length	XXX (up to 3 digits)
IPv6 manual address	XXXX: XXXX (32 characters)
IPv6 manual prefix length	XXX (up to 3 digits)
IPv6 stateless address 1	XXXX: XXXX (32 characters)
IPv6 stateless prefix length 1	XXX (up to 3 digits)
IPv6 stateless address 2	XXXX: XXXX (32 characters)
IPv6 stateless prefix length 2	XXX (up to 3 digits)
IPv6 stateless address 3	XXXX: XXXX (32 characters)
IPv6 stateless prefix length 3	XXX (up to 3 digits)
IPv6 stateless address 4	XXXX: XXXX (32 characters)
IPv6 stateless prefix length 4	XXX (up to 3 digits)
DHCPv6	Enable / Disable
DHCPv6 stateful address	xxxxxxxxxx
DHCPv6 stateful prefix length	XXX (up to 3 digits)
IPv6 default gateway 1	XXXX: XXXX (32 characters)
IPv6 default gateway 2	XXXX: XXXX (32 characters)
IPv6 default gateway 3	XXXX: XXXX (32 characters)
IPv6 default gateway 4	XXXX: XXXX (32 characters)
IPv6 primary DNS server address	xxxxxxxxxx
IPv6 secondary DNS server add.	XXXXXXXXXXX
IPv6 DNS dyn. update: manual	Enable / Disable
IPv6 DNS dyn. update: stateless	Enable / Disable
IPv6 DNS dyn. update: stateful	Enable / Disable
IPv6 Use IPv4 host/domain name	Enable / Disable

IPv6 DNS host name	xxxxxxxxxx
IPv6 DNS domain name	xxxxxxxxxx
MAC address	XX:XX:XX:XX:XX (12 characters)
IPsec settings	Enable (ESP) / Enable (ESP & AH) / Enable (AH) / Disable
Printer name	XXXXXXXXXXXXXXX (up to 15 characters)
Bonjour service name	XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX

("XX" represents alphanumeric characters.)

To change the setting, tap **Settings**.

Enable/disable Wired LAN

Select **Enable** when connecting to wired LAN.

## >>> Note

• By tapping Advanced, you can set LAN in detail.

For the items that can be set, see the following.

Advanced

#### Print details

Prints out the LAN setting information of the printer with Wi-Fi connection, wired LAN connection, wireless direct connection.

For the items that can be checked, see the following.

➡ Printing Network Settings

## >>>> Important

• Important information on your computer is stated on the paper on which the LAN setting information is printed. Please handle with care enough.

## >>> Note

• You can also print out the LAN setting information by tapping in the following order.

(Setup) > Printer settings > Test print > Print LAN details

## Advanced

By tapping **Advanced** on each setting screen of Wi-Fi connection, wired LAN connection, wireless direct connection, LAN information can be set in detail.

## >>>> Important

• If the LAN is disabled, the following items can not be selected.

## Set printer name

Specifies the printer name. You can use up to 15 characters for the name.

## >>> Note

- You cannot use the same printer name as that already used for other LAN connected devices.
- You cannot use a hyphen for the initial or last character of the printer name.

## TCP/IP settings

Performs IPv4 or IPv6 setting.

#### WSD settings

Setting items when you use WSD (one of the network protocols supported in Windows 10, Windows 8.1, and Windows 7).

#### Enable/disable WSD

Selects whether WSD is enabled or disabled.

## >>> Note

 When this setting is enabled, the printer icon is displayed on the Network Explorer in Windows 10, Windows 8.1, and Windows 7.

## Optimize inbound WSD

Selecting **Enable** allows you to receive the WSD printing data faster.

## Timeout settings

Specifies the timeout length.

#### Bonjour settings

Setting items for LAN using Bonjour.

#### Enable/disable Bonjour

Selecting **Enable** allows you to use Bonjour to perform the network settings.

#### Service name

Specifies the Bonjour service name. You can use up to 48 characters for the name.

## >>>> Note

 You cannot use the same service name as that already used for other LAN connected devices.

## SNTP settings

Performs various settings for SNTP (Simple Network Time Protocol).

## Spanning tree settings

Enables/Disables spanning tree. Selecting **Enable** avoids circulating data on a network.

#### LPR protocol settings

Enables/Disables the LPR setting.

## RAW protocol

Enables/Disables RAW printing.

#### • LLMNR

Specifies ON/OFF of LLMNR (Link-Local Multicast Name Resolution). Selecting **ON** allows the printer to detect printer's IP address from the printer name without a DNS server.

## Gigabit Ethernet settings

Specifies the communication speed and communication method when using Gigabit Ethernet.

#### Use Dedicated Port

Selects whether to use a dedicated port for a command sent from a Canon application to the printer. Selecting **ON** allows you to use the dedicated port.

## IPP settings

Selecting **Enable** allows you to print via the network with the IPP protocol.

If you use the security print function when printing using IPP protocol in AirPrint etc., select **Enable** for **Security Print**.

## Wi-Fi DRX settings

Selecting Enable allows you to activate discontinuous reception when using Wi-Fi.

## Wired LAN DRX settings

Selecting **Enable** allows you to activate discontinuous reception when the printer is connected to a device compatible with wired LAN.

## Reset SSL certificates

Initializes SSL certificate information.

#### Reset LAN settings

Initializes the network settings on the printer.

After resetting, perform setup again as necessary.

## Test print

**\$** 

This setting item is displayed by tapping **Printer settings** after tapping screen.

(Setup) on the HOME

#### Nozzle Check

Prints out the nozzle check pattern.

➡ Checking for Nozzle Clogging

## Status print

Prints out the printer status and setting value information.

## >>> Note

- Status print (administrator) is also displayed if the administrator password is enabled for changing settings using the operation panel.
- → Status Print

#### · Print LAN details

Prints out the network setting information.

Printing Network Settings

## Print the print settings

Prints out the print settings list.

## Print advanced paper settings

Prints out the setting values specified by Advanced paper settings.

## Print job history

Prints out a record of print jobs, including the paper type and size, amount of ink consumed, and so on. Ink consumption indicates a rough estimate of the amount of ink consumed per print job.

→ Job management

## · Print menu map

Prints out the menu list.

#### · Print the color chart

Prints out the color chart.

## **Print settings**

**O** 

(Setup) on the HOME

This setting item is displayed by tapping **Printer settings** after tapping screen.

## · Print head movable width setting

Adjusts the print head movable width.

#### · Prioritize paper size

This is a setting item for roll paper.

Select **Enable** to use the paper size setting as the basis for printing instead of other settings. The text or images in the margin are not printed.

Select **Disable** to give priority to printing text or images.

#### Note

 The printed paper length is longer than the actual paper length. This is because the printed paper includes the upper/lower margins specified by Roll Paper Safety Margin and Near End Margin in the printer driver and excludes the paper margins.

## Magnification level for borderless

Sets magnification level when performing borderless printing in the following print method.

Normally, the image is enlarged slightly and printed so that there is no border. If the border remains, change this setting.

- Printing JPEG file
- Printing using AirPrint
- Printing PDF file
- Printing data saved on the USB flash drive directly
- Printing directly from FTP

## PDF print settings

Performs PDF print settings.

## · JPEG print settings

Performs JPEG print settings.

## · Print from USB flash settings

Performs settings for printing data saved on the USB flash drive.

#### · AirPrint print settings

Performs AirPrint print settings when printing with AirPrint.

## · Direct print settings from FTP

Performs print settings when printing directly from FTP. You can perform four settings individually.

## • Default print settings

Prints out the default values of print settings.

## • Print the print settings

Prints out the print settings list.

# Web service setup

(Setup) o

This setting item is displayed by tapping **Printer settings** after tapping screen.

(Setup) on the HOME

## >>> Important

• The administrator password is required to change settings if it is enabled for changing settings using the operation panel.

## · Web service usage registration/Web service usage cancellation

Registers/Deletes Web service usage to use the printer device information to/from PIXMA/MAXIFY Cloud Link.

## · Issue registration code

In order to link the web service and printer, obtain the registration code from the service origin.

## DNS server setup

Performs settings for a DNS server. Select **Auto setup** or **Manual setup**. If you select **Manual setup**, follow the display on the touch screen to perform settings.

## · Proxy server setup

Performs settings for a proxy server. Follow the display on the touch screen to perform settings.

## Paper-related settings

**\$** 

(Setup) on the HOME

This setting item is displayed by tapping **Printer settings** after tapping screen.

#### · Keep media type

Select Enable to keep using the same type of paper.

#### · Manage remaining roll amount

Selects the method to manage remaining roll amount and that to display warning when the roll is running short.

#### Barcodes

Manages remaining roll amount by using a barcode.

By using the barcode every time you replace a roll, you can manage remaining roll amount properly. Specify the roll length properly when you load a new roll.

## Warning message only

Estimates remaining roll amount by using media type and roll diameter information. A warning appears when remaining roll amount comes closer to the specified value.

Depending on the environment you are using the printer, selecting this setting may not manage remaining roll amount as precisely as you expected. We recommend you select a higher value for this setting item.

## Disable

Select to disable managing remaining roll amount.

#### Roll amount warning settings

Specifies when to warn the remaining roll paper amount.

#### Detect paper setting mismatch

Selects printer action when you start printing with the paper size, the media type, and print settings different from those registered.

#### Advanced paper settings

Specifies advanced paper settings for each paper type.

## Paper size recognition settings

Selects which size is preferred when paper size detection is enabled.

## · Roll paper setting 1

Select whether B4 or 10 inch is applied when a roll of an intermediate size is detected.

#### Roll paper setting 2

Select whether A3 or 300 mm is applied when a roll of an intermediate size is detected.

#### Roll paper setting 3

Select whether 300 mm or 12 inch is applied when a roll of an intermediate size is detected.

## · Roll paper setting 4

Select whether 500 mm or 20 inch is applied when a roll of an intermediate size is detected.

#### Roll paper setting 5

Select whether B2 or 20 inch is applied when a roll of an intermediate size is detected.

## · Roll paper setting 6

Select whether A1 or 600 mm is applied when a roll of an intermediate size is detected.

## Roll paper setting 7

Select whether 600 mm or 24 inch is applied when a sheet of an intermediate size is detected.

## · Keep margin at cut sheet end

When printing on the sheet using AirPrint, selecting **Enable** sets the trailing edge of the paper to 20 mm. Select **Enable** if printing on the trailing edge of the paper is disturbed.

## Auto feed at power on

When **Enable** is selected, the printer judges the existence of paper exchange when starting up, and if paper has been exchanged, paper feeding operation is performed.

It may take time to judge paper exchange.

When **Disable** is selected, the printer does not judge whether or not to change the paper when starting up, and waits with the current paper feed setting.

## · Add priority roll paper width

When paper size is detected, set the width of the roll paper to be recognized first. Judge in order from 1 in the list.

## Print advanced paper settings

Tapping Yes prints out each setting specified in Advanced paper settings.

## Reset paper settings for all paper

Tapping **Yes** initializes each setting specified in **Advanced paper settings**.

Entering the administrator password is required if it is enabled.

## >>> Important

 When you set the paper settings back to the factory default, added or updated paper information using Media Configuration Tool is erased.

## **Auto maintenance settings**

(Set

This setting item is displayed by tapping **Printer settings** after tapping screen.

(Setup) on the HOME

## >>> Important

• The administrator password is required to change settings if it is enabled for changing settings using the operation panel.

## Auto nozzle check

Enables/Disables automatic nozzle checking. You can also select the page interval to perform automatic nozzle checking.

## · Nozzle check error display

Enables/Disables displaying the nozzle check error.

## System Cleaning frequency

Specifies the frequency of automatic system cleaning.

## >>> Note

• To maintain print quality, we recommend you select **Short** if you use the printer at a higher place.

## · Print pattern after new head

Selects whether you print an adjustment pattern after replacing the Print head.

# Hard disk settings

(Setu

This setting item is displayed by tapping **Printer settings** after tapping screen.

(Setup) on the HOME

#### >>> Important

 The administrator password is required to change settings if it is enabled for changing settings using the operation panel.

#### Output method

Selects the printing method for jobs received from software other than the printer driver. When using the printer driver, configure settings on the printer driver.

#### Print

Performs printing as usual.

#### Print (auto delete)

Deletes the data from the printer's hard disk after printing is completed.

#### Save to job box

Only saves the print job in job box without printing it.

#### · Save first and print

A setting for jobs received from software other than the printer driver. When using the printer driver, configure settings on the printer driver. Select **ON** to print the job after it has been saved.

#### Common job box settings

Select Print (auto delete) to print without saving jobs in common job box.

#### File deletion settings

Selects the data erasing method when deleting a **Print job** or **Saved job**, or when **Print (auto delete)** is selected in **Output method** or **Common job box settings**.

#### Fast

Erases file management data for print job data stored on the printer's hard disk. Choose this method for relatively fast erasure. Because only the file management data is erased, the print job data itself is not erased.

#### Fast secure

Erases the data encryption key specified for the hard disk drive. Specifying the encryption key again does not allow you to read and use data saved in the past safely and fast. Select to erase highly confidential data.

#### Secure

Overwrites the entire hard disk with 00, FF, and random data (one time each) after the data encryption key specified for the hard disk drive is erased. Verification is performed to check if the data was correctly written. Choose this method to erase especially confidential data. It is virtually

impossible to recover the overwritten data. Conforms to the DoD5220.22-M standard of the U.S. Department of Defense.

#### ∘ Secure (VSITR)

Overwrites the entire hard disk with 00 next overwrites with FF after the data encryption key specified for the hard disk drive is erased. After repeating this process three times, the entire hard disk is overwritten with AA. It is virtually impossible to recover the overwritten data. Conforms to the guidelines of German Federal Government (VS-ITR).

#### Data deletion

Selects the method to delete data on printer's hard disk.

➡ Erasing Data on Printer's Hard Disk

# **Monitoring service settings**

**O** 

(Setup) on the HOME

This setting item is displayed by tapping **Printer settings** after tapping screen.

#### >>>> Important

• The administrator password is required to change settings if it is enabled for changing settings using the operation panel.

#### · Enable/disable monitoring service

Selecting **Enable** allows the printer to send error details to the service center.

When selecting **Enable**, perform a communication test.

#### Communication test

Performs a communication test with the service center.

#### Communication log

Displays the list of error numbers (up to 30), error code, and time the error occurs. Tapping an item displays the error details.

Main errors and countermeasures

Error code	Error detail	Countermeasure	
0xxx0003	Communication test is not performed.	Perform the communication test.	
8xxx0003	E-RDS switch is setting OFF.	Enable monitoring service.	
8xxx2003	Network is not ready, try later.	Check the network settings.	
8xxx200A	Server connection error	Check the network settings.	
8xxx2014	Proxy connection error	Check the proxy server address etc.	
8xxx201E	Proxy authentication error	Check the user name and password to log in to the proxy server.	
8xxx2046	Server certificate expired	The server certificate has expired.Set the correct date and time on the printer.	
8xxx2047	Server response time out	Check the network settings. Check the proxy server address. Make sure that the correct date and time is set on the printer.	
8xxx2058	Unknown error	Wait a while, and then try the communication test again.	

#### · Timing for ink level notification

Sets the timing to notify the service center of remaining ink amount.

# • Warning notification settings

Displays a message on the touch screen selecting **Enable** when communication with the service center fails.

# Other printer settings

**O** 

This setting item is displayed by tapping **Printer settings** after tapping screen.

(Setup) on the HOME

#### >>> Important

• The administrator password is required to change settings if it is enabled for changing settings using the operation panel.

#### Energy saving settings

To save electricity, enable this setting to turn off the printer automatically or to enter sleep mode when specified length of time has elapsed.

#### Auto power off

Sets the time until the printer turns off automatically. If no operations are performed on the printer for the specified duration of the time after entering Sleep mode, the printer automatically turns off.

#### · Sleep timer

Specifies the length of time to enter sleep mode automatically when no operation is made.

#### Note

If the print job contains a pending job or a security print job, the printer does not enter sleep mode.

#### Use USB connection

Use / Do not use USB connection.

#### · Date/time settings

Sets the current date and time.

#### Date display format

Sets the format of dates displayed on the touch screen and printed on photos.

#### • Time zone (GMT)

Specifies the time zone according to a country or region you live in.

Specifying the time zone allows you to display the correct time and date an e-mail was sent on your mail software.

Select the time difference from GMT (Greenwich mean time) according to a country or region you live in.

#### Sound control

Select whether to sound / not sound for key touch sound and alarm sound.

#### Length unit settings

Selects the length unit (meter or feet/inch).

## • EOP timer settings

Specify the timeout period before cancellation of print jobs that cannot be received by the printer.

## • Job history sending settings

Select **Send** to send the information to the printer management and job management systems.

# Language selection

>>> Important

(Setup) on the HOME

This setting item is displayed by tapping **Printer settings** after tapping

# screen.

• The administrator password is required to change settings if it is enabled for changing settings using the operation panel.

Changes the language for the messages and menus on the touch screen.

# Firmware update

**\$** 

This setting item is displayed by tapping **Printer settings** after tapping screen.

(Setup) on the HOME

#### >>> Important

• The administrator password is required to change settings if it is enabled for changing settings using the operation panel.

You can update the firmware of the printer, check the firmware version, or perform settings of a notification screen, a DNS server and a proxy server.

#### Note

• If LAN is disabled, you can not use Install update, DNS server setup, Proxy server setup.

#### · Install update

Performs the firmware update of the printer.

Firmware update

#### · Check current version

You can check the current firmware version.

#### Update notification settings

When **Yes** is selected and the firmware update is available, the screen to inform you of the firmware update is displayed on the touch screen.

#### · DNS server setup

Performs settings for a DNS server. Select **Auto setup** or **Manual setup**. If you select **Manual setup**, follow the display on the touch screen to perform settings.

#### · Proxy server setup

Performs settings for a proxy server. Follow the display on the touch screen to perform settings.

# **Security settings**

•

This setting item is displayed by tapping **Printer settings** after tapping screen.

(Setup) on the HOME

#### >>> Important

• The administrator password is required to change settings if it is enabled for changing settings using the operation panel.

#### Administrator password settings

You can specify or disable the administrator password.

If you specify the administrator password, select the range and specify the administrator password.

#### Remote UI and other tools

Entering the administrator password is required to change the setting items using Remote UI or some software.

#### LCD, Remote UI, and other tools

Entering the administrator password is required to change the setting items using the operation panel of the printer, Remote UI, or some software.

#### For details:

Setting Administrator Password on Operation Panel

#### · Operation restrictions

Restricts the following operations.

#### Job history

Restricts to display or print the print job history.

#### • Remote UI

Restricts to use Remote UI.

#### Print from USB flash drive

Restricts to print data on USB flash drive.

#### • IEEE802.1X settings

Performs various settings for IEEE802.1X.

## **Printer information**

It will be displayed when you tap

(Setup) on HOME screen.

#### System information

Displays printer's system information.

#### · Hard disk information

Displays the total or free space of the printer hard disk.

#### Error history

Displays the error history.

#### Hardware error

Displays the hardware error codes (up to 5).

#### Recoverable error

Displays the recoverable error (e.g. paper or ink related error) codes (up to 5).

#### • Paper feed/transfer error

Displays the error codes for errors which occur during paper feed/transfer (up to 5).

Tapping an error code displays the error details.

For more on the error code, refer to List of Support Code for Error.

#### Usage

Displays the printer's record of use such as total print area or the amount of ink consumption.

#### · Head information

Displays the Print head serial number, elapsed days since the current Print head was installed, and dot count.

#### Head alignment performance log

Displays the Print head alignment performance log (up to 5).

#### · Values applied with auto settings

Displays the print settings applied the last print job.

# **Setting Administrator Password on Operation Panel**

You can specify or disable the administrator password.

Specifying the administrator password requires you to enter the password to use the items or change the settings below.

- LAN settings
- · Web service setup
- Auto maintenance settings
- · Hard disk settings
- · Monitoring service settings
- · Other printer settings
- · Language selection
- · Firmware update
- · Security settings
- · Import/export settings
- · Initialize printer settings
- Status print (administrator)

Follow the procedure below to specify the administrator password.

## >>> Important

 The administrator password is set at the time of purchase. The printer's serial number is used as the password.

- ➡ Home Screen Menu Composition
- 2. Tap Printer settings.
- 3. Tap Security settings.

If you specify the administrator password, enter the password.

4. Tap Administrator password settings.

If you specify the administrator password, enter the password.

- 5. Tap Change administrator password.
- **6.** Select range where administrator password is valid.

#### Remote UI and other tools

Entering the administrator password is required to change the setting items using Remote UI or some software.

#### LCD, Remote UI, and other tools

Entering the administrator password is required to change the setting items using the operation panel of the printer, Remote UI, or some software.

#### **7.** Enter new administrator password.

## >>> Important

- · The following character restrictions apply to the password:
  - Set the password by using 4 to 32 characters.
  - The allowed characters are single-byte alphanumeric characters, blank space, umlaut characters, and the below characters.
    - -!@#\$%^&\*\_;:,./`=+'"(){}[]<>|
  - For security reasons, we recommend you use 8 and more alphanumeric characters.
- 8. Tap Apply.
- 9. Enter administrator password you specified again.

#### 10. Tap Apply.

The administrator password is enabled.

# When You Want to Disable the Administrator Password:

After tapping (Setup) on HOME screen, select Printer settings > Security settings > Administrator password settings > Remove administrator password. Select either item and follow the on-screen instructions to perform settings.

# **Erasing Data on Printer's Hard Disk**

#### >>> Important

- The administrator password is required to change settings if it is enabled for changing settings using the operation panel.
- For a more secure method of preventing data recovery, we recommend physically or magnetically destroying the hard disk. In this case, the hard disk can no longer be used.
- You cannot erase HDD data if there is a job queue. Additionally, print jobs are not processed while data erasing is in progress.
- 1. Tap (Setup) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Printer settings.
- 3. Tap Hard disk settings.

If an administrator password is set, enter the password.

- 4. Tap Data deletion.
- 5. Tap erasing method.

#### Fast

Erases file management data for print job data stored on the printer's hard disk. Choose this method for relatively fast erasure. Because only the file management data is erased, the print job data itself is not erased.

#### **Fast secure**

Erases the data encryption key specified for the hard disk drive. Specifying the encryption key again does not allow you to read and use data saved in the past safely and fast. Select to erase highly confidential data.

#### Secure

Overwrites the entire hard disk with 00, FF, and random data (one time each) after the data encryption key specified for the hard disk drive is erased. Verification is performed to check if the data was correctly written. Choose this method to erase especially confidential data. It is virtually impossible to recover the overwritten data. Conforms to the DoD5220.22-M standard of the U.S. Department of Defense.

#### Secure (VSITR)

Overwrites the entire hard disk with 00 next overwrites with FF after the data encryption key specified for the hard disk drive is erased. After repeating this process three times, the entire hard disk is overwritten with AA. It is virtually impossible to recover the overwritten data. Conforms to the guidelines of German Federal Government (VS-ITR).

**6.** Confirm displayed message and tap **Yes**.

Data on the hard disk are erased.

## **Status Print**

You can print a "Status Print" report indicating the current status of the printer.

With "Status Print", information is printed regarding the printer firmware version, various settings, and the status of consumables.

Follow the procedure below to print.

- 1. On the HOME screen, tap (Setup).
  - ➡ Home Screen Menu Composition
- 2. Tap Printer settings.
- 3. Tap Test print.
- 4. Tap Status print.

#### Note

- If you specify the administrator password, tap Status print (administrator).
- 5. Tap Yes.

The printer starts printing.

The following information is included.

Canon xxxxxxxxxxxxxxxxx Status Print	Printer model	
S/N	Printer serial number	
Firm	Firmware version	
Boot	Boot ROM version	
Date	Date and time when the status print was output	

Paper Info			
		Roll Media	Type of roll paper
		Cut Sheet	Type of cut sheet

# **Changing Printer's Setting Using Web Browser**

- Start up Remote UI
- ➤ Changeable Setting Items Using Remote UI
- Setting Passwords using Remote UI
- ➤ Registering Printer's Root Certificate to Web Browser for SSL Communication
- ➤ Registering Printer's Root Certificate to Local Computer for SSL Communication
- Generating Server Certificate
- Setting Mail Server
- ➤ Receiving Printer Status by E-mail

# Start up Remote UI

You can check the printer status and change the printer settings using the web browser on your smartphone, tablet, or computer.

To check the printer status and to change the printer settings, display "Remote UI" on the web browser.

#### Note

• Remote UI is a software that enables you to perform operations, which are usually performed on the printer's operation panel, using a Web browser over a network.

LAN connection with the printer is required to use Remote UI.

- You can use Remote UI on the following OS and the web browser.
  - iOS device

OS: iOS 12.0 or later

Web browser: iOS standard Web browser (Mobile Safari)

- iPadOS device

OS: iPadOS 13.0 or later

Web browser: iPadOS standard Web browser (Mobile Safari)

- Android device

OS: Android 5.1 or later

Web browser: Android standard Web browser (Browser or Chrome)

- macOS device

OS: macOS Sierra 10.12 or later

Web browser: Safari 10.0 or later

Windows device

OS: Windows 7 SP1 or later

Web browser: Microsoft Edge, Internet Explorer 11, Mozilla Firefox, Google Chrome

- Enable JavaScript and cookies in the web browser.
- 1. Check printer's IP address.

- ➡ Home Screen Menu Composition
- 2. Tap the enabled LAN.

Diagonal lines are displayed for disabled LAN icons.

3. Check IPv4 address.

2. Open web browser on your smartphone, tablet, or computer and enter IP address.

Enter as following in the URL field of the web browser.

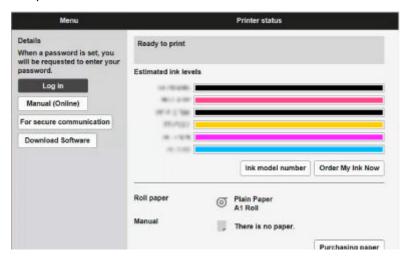

http://XXX.XX.XXXX

Enter the IP address of the printer in "XXX.XX.XXXX".

#### Note

• If you have set a DNS host name, you can also enter this.

When you access, "Remote UI" will be displayed on the web browser on your smartphone, tablet, or computer.

#### Note

- If you display Remote UI for the first time on your smartphone, tablet, or computer, download the root certificate, and then register it.
  - Registering Printer's Root Certificate to Web Browser for SSL Communication
- If the root certificate is not registered, a message to warn you that the secure connection is not guaranteed may appear.

#### 3. Select Log in.

The password authentication screen appears.

#### >>> Note

• When the standard user mode is enabled, choose either administrator mode or standard user mode to log on.

After choosing a mode and selecting **Log in**, the password authentication screen of each mode appears.

#### 4. Enter password.

When the password authentication is complete, the menus that can be utilized are displayed on the web browser.

## >>> Important

• The password is set at the time of purchase. The password is the printer serial number. The printer serial number is printed on the sticker attached on the printer. It consists of 9 alphanumeric characters (four alphabets followed by five numbers).

For details on setting password, see Setting Passwords Using Remote UI.

5. Confirm that the main screen of Remote UI is displayed.

For changeable setting items, see below.

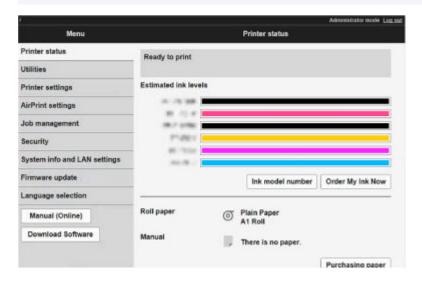

➡ Changeable Setting Items Using Remote UI

When you finish checking printer status and changing printer settings, select Log out.

# Changeable Setting Items Using Remote UI

#### Note

• The item which can be used is different in administrator mode or in standard user mode.

#### **Printer status**

This function displays printer information such as the remaining ink amount, the status, and detailed error information.

You can also connect to the ink purchase site or support page, and use Web Services.

#### **Utilities**

This function allows you to set and perform maintenance such as cleaning.

#### **Printer settings**

This function allows you to change the printer settings such as the energy saving settings and the print settings.

Additionally, this function allows you to receive the printer status information such as the remaining ink level and the error.

- Setting Mail Server
- ➡ Receiving Printer Status by E-mail

You can disable any operations using the operation panel from **Operation panel lock** on **Custom settings**.

#### Note

• Some of the menu is available only when you logged on in administrator mode.

#### AirPrint settings

This function allows you to specify the AirPrint settings when printing with AirPrint.

#### Job management

This function allows you to display the job history and print it.

In addition, you can delete jobs from this item.

#### Note

• When you are logging on in administrator mode, you can restrict this function in standard user mode.

## **Security** (Item for administrator)

This function allows you to specify the password, the standard user mode settings, the operation restrictions, and SSL/TLS settings of certificate for encrypted communication.

#### System info and LAN settings

- Confirm system information
- LAN settings(Item for administrator)

#### Firmware update

You can update the firmware of the printer, check the firmware version, or perform settings of a DNS server and a proxy server.

➡ Firmware update

#### Language selection (Item for administrator)

This function allows you to change the language on the display.

#### Manual (Online)

This function displays the Online Manual.

# **Security**

#### · Administrator password setting

➡ Setting Passwords Using Remote UI

#### Operation restrictions

Restricts the following operations.

#### Job history

Restricts to display or print the print job history.

#### Print from USB flash drive

Restricts to print data on USB flash drive.

#### SSL/TLS settings

Perform settings of a certificate for encrypted communication.

**Available TLS settings** enables you to specify the range of the version used for SSL/TLS communication.

#### • IEEE802.1X settings

#### Authentication

Enables/Disables IEEE802.1X certificate.

#### >>> Note

- In the case of using IEEE802.1X certificate, **Security** > **IEEE802.1X settings** > **CA certificate**, and register the CA certificate.
- · Supported authentication method
  - EAP-TLS(Extensible Authentication Protocol-Transport Level Security)
  - EAP-TTLS(EAP-Tunneled TLS)
  - PEAP(Protected EAP)

#### Weak encryption restriction

Selecting **Do not restrict** enables communication using the 3DES or RC4 encryption algorithm.

#### Weak certificate restriction

Selecting **Do not restrict** enables certificate authentication using the public key algorithm of RSA (512 bit) or RSA (1024 bit).

#### · Key and certificate settings

Perform settings for key and client certificate.

#### CA certificate

Perform settings for the CA certificate that verifies a server certificate.

# LAN settings

#### Wi-Fi

Enables/Disables Wi-Fi.

#### Wireless Direct

Enables/Disables Wireless Direct.

#### Wired LAN

Enables/Disables Wired LAN.

#### Confirm LAN settings

The LAN setting information is displayed.

#### Advanced setup

#### Set printer name

Specifies the printer name. You can use 2 to 15 characters for the name.

#### >>> Note

- · You cannot use the same printer name as that already used for other LAN connected devices.
- You cannot use a hyphen for the initial or last character of the printer name.

#### TCP/IP settings

Performs IPv4 or IPv6 setting.

#### WSD settings

Perform settings to use WSD.

#### Bonjour settings

Perform settings to use Bonjour.

#### LPD print

Perform settings for printing with LPD.

#### SNMP settings

Perform settings for using SNMP to manage and control the printer.

#### SNTP settings

Perform settings for using SNTP to adjust the time on the printer.

#### FTP settings

Perform settings for printing with FTP.

#### IPP Settings

Perform settings for printing with IPP.

#### CHMP settings

Perform settings for communication at the time when printer drivers or applications acquire the information on status, paper, and job log, from the printer.

Selecting **Enable HTTPS redirection** redirects the communication using CHMP to encrypted communication.

#### >>> Note

- To use CHMP for encrypted communication, you need to register the printer's root certificate to your computer.
  - Registering Printer's Root Certificate to Local Computer for SSL Communication
- CHMP is a Canon proprietary protocol.

#### Network interface settings

To connect to a hub that supports STP, select **Enable**.

Selecting **Enable** perform the intermittent data reception when connecting to the network.

#### DRX settings

Selecting **Enable** perform the intermittent data reception when connecting to the network.

#### IP filtering

Allows or denies access for specific IP addresses.

Settings for both IPv4 and IPv6 addresses can be specified.

#### >>>> Important

If the device address for administrator has been set to rejection by mistake, tap
 (Network) on the HOME screen of the operation panel, and then tap LAN settings > Wi-Fi /
 Wireless Direct / Wired LAN > Settings > Advanced setup > Reset LAN settings, and
 initialize network information of the printer.

After resetting, perform setup again as necessary.

#### MAC address filtering settings

Allows or denies access for specific MAC addresses.

#### >>> Important

If the device address for administrator has been set to rejection by mistake, tap
 (Network) on the HOME screen of the operation panel, and then tap LAN settings > Wi-Fi /
 Wireless Direct / Wired LAN > Settings > Advanced setup > Reset LAN settings, and
 initialize network information of the printer.

After resetting, perform setup again as necessary.

#### Reset LAN settings

Initializes the network settings on the printer.

After resetting, perform setup again as necessary.

# **Setting Passwords using Remote UI**

Each of passwords for administrator and standard user can be set.

When logging on with password for administrator, all settings can be changed.

When logging on with password for standard user, some of the settings can be changed.

When logging on with password for administrator, you can restrict the function for standard user.

- Setting Administrator Password
- Setting Standard User Password

#### Note

· Password can be set only when you are logged in administrator mode.

## **Setting Administrator Password**

Change the administrator password by following the steps below.

## >>>> Important

- The password is set at the time of purchase. The password is the printer serial number. The printer serial number is printed on the sticker attached on the printer. It consists of 9 alphanumeric characters (four alphabets followed by five numbers).
- 1. Start up Remote UI.
  - ➡ Start up Remote UI
- 2. Select Security.
- 3. Select Administrator password setting.
- 4. Select Change administrator password.

If an administrator password is not specified, the confirmation message appears. Confirm the message and select **Yes**. When message appears again, confirm it and select **OK**.

5. Select range where administrator password is valid and select **OK**.

#### Remote UI and other tools

Entering the administrator password is required to change the setting items using the Remote UI or some software.

#### Operation panel/Remote UI/other tools

Entering the administrator password is required to change the setting items using the operation panel of the printer, the Remote UI, or some software.

**6.** Enter password and select **OK**.

#### >>>> Important

· The following character restrictions apply to the password:

- Set the password by using 4 to 32 characters.
- The allowed characters are single-byte alphanumeric characters, blank space, umlaut characters, and the below characters.

- For security reasons, we recommend you use 8 and more alphanumeric characters.
- 7. When completion message appears, select **OK**.

# **Setting Standard User Password**

For restricting the function for standard user, enable the standard user mode and set a standard user password by following the steps below.

- 1. Start up Remote UI.
  - **➡** Start up Remote UI
- 2. Select Security.

The menus appear.

- 3. Select Standard user mode settings.
- **4.** When confirmation message appears, select **Yes**.
- **5.** Enter password and select **OK**.

#### >>> Important

- The following character restrictions apply to the password:
  - Set the password by using 4 to 32 characters.
  - The allowed characters are single-byte alphanumeric characters, blank space, umlaut characters, and the below characters.

- For security reasons, we recommend you use 8 and more alphanumeric characters.
- **6.** When completion message appears, select **OK**.

# Registering Printer's Root Certificate to Web Browser for SSL Communication

If the printer's root certificate has not been registered to the web browser, a message to warn you that the secure connection is not guaranteed may appear.

When you display Remote UI for the first time on your smartphone, tablet, or computer, download the root certificate, and then register it to the web browser. The secure connection will be confirmed and a message will not appear. However, the message may appear depending on a web browser even after you have registered the root certificate.

How to register the root certificate varies depending on the web browser.

- ➡ For Microsoft Edge
- ➡ For Safari
- For Chrome on Android
- ➡ For Mobile Safari on iOS

Operating procedure may differ depending on the version of your web browser. For other web browser, refer to each help.

#### >>>> Important

- Make sure that you have accessed to the printer IP address correctly by checking the URL field of the web browser before registering the root certificate.
- If the printer is connected via IPv6 using Windows, you need to generate a server certificate using Remote UI.

For details, see **Generating Server Certificate**.

# For Microsoft Edge

- 1. Select For secure communication on Remote UI.
- 2. Select Download.

Downloading the root certificate is started.

3. If confirmation screen appears, select Open.

Certificate screen is displayed.

#### Note

- To save the certificate file and register it, select Save. To register, select Control Panel >
   Network and Internet > Internet Options, and register the root certificate from Certificates on
   Content sheet.
- 4. Select Install Certificate.

Certificate Import Wizard screen is displayed.

- 5. Select Next.
- 6. Select Place all certificates in the following store.
- 7. Select Browse.

Select Certificate Store screen is displayed.

- 8. Select Trusted Root Certification Authorities and OK.
- 9. Select Next on Certificate Import Wizard screen.
- 10. If Completing the Certificate Import Wizard appears, select Finish.

Security Warning screen is displayed.

11. Make sure that thumbprint on Security Warning screen matches printer's thumbprint.

To display the printer's root certificate thumbprint in Root cert. thumbprint (SHA-1) or Root cert.

thumbprint (SHA-256), tap (Setup) on HOME screen of the operation panel, and then tap Printer information > System information.

- **12.** If thumbprint on **Security Warning** screen matches printer's thumbprint, select **Yes**.
- 13. Select OK on Certificate Import Wizard screen.

The root certificate registration is completed.

# For Safari

- 1. Select For secure communication on Remote UI.
- 2. Select Download.

Downloading the root certificate is started.

**3.** Open the downloaded file.

Keychain access starts up and Add Certificates screen is displayed.

4. Select Add.

Information on the certificate is displayed.

#### Note

 You can also add the certificate by selecting Show Certificate, checking certificate name to add, and then selecting the same certificate on Keychain access. **5.** Make sure that fingerprint of certificate detail information matches printer's thumbprint.

To display the printer's root certificate thumbprint in Root cert. thumbprint (SHA-1) or Root cert.

thumbprint (SHA-256), tap (Setup) on HOME screen of the operation panel, and then tap Printer information > System information.

**6.** If fingerprint of certificate detail information matches printer's thumbprint, display information on certificate from the menu or by double-clicking the certificate, and select **Always Trust** on **Trust**.

The root certificate registration is completed.

#### Note

· If a password is set on your device, entering a password may be required.

# For Chrome on Android

- 1. Select For secure communication on Remote UI.
- 2. Select Download.

Downloading the root certificate is started and then Name the certificate screen is displayed.

**3.** As entering the root certificate name is required, enter an arbitrary certificate name and select **OK**.

The root certificate registration is completed.

#### >>> Note

• If PIN or password is not set as security type, the attention screen may appear. Select **OK**, and then set the security type to PIN or password.

#### After Root Certificate Registration

We recommend that you make sure that the correct root certificate has been registered.

To make sure that the correct root certificate has been registered, make sure that thumbprint of certificate information matches printer's thumbprint. Follow the steps below.

#### >>>> Note

- Some Android devices cannot be checked the thumbprint of a registered route certificate.
- From Settings menu on your device, select Security, Trust credentials, and USER.
   The list of downloaded certificates appears.
- 2. Select downloaded certificate.

The certificate information appears.

**3.** Make sure that thumbprint of certificate information matches printer's thumbprint.

To display the printer's root certificate thumbprint in Root cert. thumbprint (SHA-1) or Root cert.

thumbprint (SHA-256), tap (Setup) on HOME screen of the operation panel, and then tap Printer information > System information.

**4.** If thumbprint of certificate information screen matches printer's thumbprint, select **OK**.

The root certificate registration is completed.

If the message to warn you that the secure connection is not guaranteed appears when you select **Log in** on Remote UI after registering the root certificate, restart the web browser. The message will not appear on the web browser.

#### >>> Note

 Depending on the Android device, a warning may appear even after registering the proper root certificate.

## For Mobile Safari on iOS

- 1. Select For secure communication on Remote UI.
- 2. Select Download.

Downloading the root certificate is started and then **Install Profile** screen is displayed.

3. Select Install.

Warning screen is displayed.

#### >>>> Note

- If a password is set on your device, entering a password may be required.
- 4. Select Install.
- **5.** Select **Install** on displayed dialog.

The root certificate registration is completed.

# Registering Printer's Root Certificate to Local Computer for SSL Communication

To use Device Management Console or Accounting Manager, etc. when you connect the printer to a computer using SSL encrypted communication, you need to register (import) the printer's root certificate to your computer.

Procedure to register the certificate varies depending on your operation environment.

#### >>> Important

 If the printer is connected via IPv6 using Windows, you need to generate a server certificate using Remote UI.

For details, see **Generating Server Certificate**.

- **→** For Windows 10/Windows 8.1
- ➡ For Windows 7
- ➡ For macOS

Operation procedure may differ depending on your OS version.

## For Windows 10/Windows 8.1

The procedure below describes how to import a root certificate in Windows 10/Windows 8.1.

- 1. Start up Remote UI.
  - → Start up Remote UI
- 2. Select For secure communication.

#### Note

- · You can download a certificate from Status Monitor.
  - **1.** Open status monitor.

Open the **Printing preferences**, and select **Status Monitor...** on **Main**.

2. Download a certificate.

Select Download Security Certificate from the Remote UI menu.

#### 3. Select Download.

The root certificate will be downloaded.

4. When download confirmation screen is displayed, select Open.

The **Certificate** screen appears.

5. Select Install Certificate.

The Certificate Import Wizard screen appears.

#### 6. Select Local Machine.

1. Select Local Machine on the startup screen of Certificate Import Wizard.

- 2. Select Next.
- **3.** Select **Yes** on the displayed screen.

The Certificate Store screen appears.

- 7. Select Place all certificates in the following store.
- 8. Select Trusted Root Certificate Authorities.
  - 1. Select Browse to open the Select Certificate Store screen.
  - 2. Select Trusted Root Certificate Authorities from the list and select OK.
  - 3. Select Next on the Certificate Store screen.
- 9. Select Finish.

When the **Completing the Certificate Import Wizard** screen appears, check the settings and select **Finish**.

# For Windows 7

The procedure below describes how to import a root certificate in Windows 7.

## >>> Important

• Be sure to create a certificate snap-in before importing a root certificate.

The root certificate will be registered to the local user if you import it without creating a certificate snap-in.

#### **Creating Certificate Snap-in**

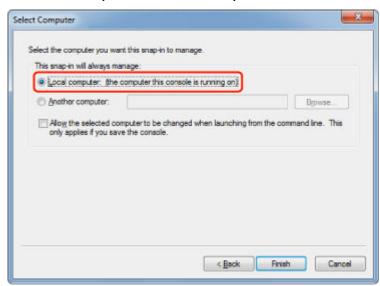

1. Start up Microsoft Management Console.

Enter MMC on Search programs and files in the Start menu and press the Enter key.

- 2. Select Yes on displayed screen.
- 3. Select Add/Remove Snap-in from File menu.

The Add or Remove Snap-ins screen appears.

- 4. Add Certificate snap-in.
  - 1. Select Certificates from Available snap-ins list and select Add.
  - 2. Select Computer account for This snap-in will always manage certificates for on the Certificates snap-in screen and select Next.
  - 3. Select Local computer on the Select computer screen and select Finish.

4. Select **OK** on the **Add or Remove Snap-ins** screen.

#### **Downloading Certificate**

- 1. Start up Remote UI.
  - ➡ Start up Remote UI

#### 2. Select For secure communication.

#### Note

- · You can download a certificate from Status Monitor.
  - **1.** Open status monitor.

Open the **Printing preferences**, and select **Status Monitor...** on **Main**.

2. Download a certificate.

Select Download Security Certificate from the Remote UI menu.

- 3. Select Download.
- 4. Select Save.

#### **Importing Certificate**

- 1. Open Certificate Import Wizard.
  - 1. On the left window, open Trusted Root Certificate from Certificate on Console Root.
  - 2. Right-click Certificates and select Import from All tasks.
- 2. Specify certificate file to import.
  - 1. Select Next.
  - 2. Specify the certificate file to import on File name and select Next.
- 3. Specify certificate store.
  - 1. Select Place all certificates in the following store.
  - 2. Select Trusted Root Certificate Authorities for Certificates Store.
- **4.** Finish certificate import wizard.
  - 1. Select Next and check the specified settings.
  - 2. Select Finish to finish the wizard.
  - **3.** Select **OK** on the displayed screen.

#### **Checking Imported Certificate**

Make sure the imported certificate has been registered to your computer.

1. Display certificate list.

On the left window of Microsoft Management Console, select **Console Root** > **Certificates** (**Local Computer**) > **Trusted Root Certificate Authorities** in this order, and Select **Certificates** to display the certificate list.

2. Check registered certificate.

Make sure the imported certificate name is displayed on the list.

#### Note

 Make sure you can see the registered certificate from Current user by creating the Current user snap-in.

#### Note

• When you finish Microsoft Management Console, a message asking you whether to save the console setting. If you continue to apply the same settings next, select **Yes** to save.

## For macOS

The procedure below describes how to import a root certificate in macOS.

- 1. Start up Remote UI.
  - → Start up Remote UI
- 2. Select For secure communication.
- 3. Select Download.

The root certificate will be downloaded.

**4.** Open downloaded certificate file.

When the download procedure is completed, a downloaded item pops up on the right of the screen.

Double-click the downloaded certificate on the list starts up **Keychain Access** and the **Add Certificates** screen appears.

#### >>> Note

- If the downloaded item does not pop up, select the Show Downloads button on t right.
- Selecting the magnifying glass icon on the right of download list displays the folder containing the certificate.

#### 5. Select Add.

Select the destination for the certificate on Keychain.

Selecting Add displays information on the certificate.

### Note

 You can add the certificate by selecting the same certificate on Keychain Access. Check the name of certification to add after selecting View Certificates.

### 6. Check certificate.

Make sure the fingerprint of certificate shown on **Details** corresponds with the root certificate thumbprint of the printer.

To display the printer's root certificate thumbprint in Root cert. thumbprint (SHA-1) or Root cert.

thumbprint (SHA-256), tap (Setup) on HOME screen of the operation panel, and then tap Printer information > System information.

# 7. Select Always Trust.

If the fingerprint of certificate detail information matches printer's thumbprint, display information on certificate from the menu or by double-clicking the certificate, and select **Always Trust** on **Trust**.

The root certificate has been registered.

# Note

• Entering the password may be required if you specify it for your printer.

# **Generating Server Certificate**

When you use SSL connection via IPv6 network, you need to generate an IPv6 server certificate using the printer.

Generate the server certificate from Remote UI.

Follow the procedure below.

- 1. Checking Printer's IP Address
- 2. Generating Server Certificate
- 3. Checking Generated Server Certificate

# >>> Important

• To reset the IPv6 server certificate, tap and then tap in the following order.

LAN settings > Wi-Fi / Wireless Direct / Wired LAN > Settings > Advanced > Reset SSL certificates > Yes

# **Checking Printer's IP Address**

- 1. Tap (Network) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap the enabled LAN.

Diagonal lines are displayed for disabled LAN icons.

3. Check the value on IPv6 link-local address.

Write down the value on **IPv6 link-local address** for your reference when you open Remote UI and generate a server certificate.

# **Generating Server Certificate**

**1.** Open web browser on your smartphone, tablet, or computer and enter the printer IP address.

Enter as following in the URL field of the web browser.

http://[XXXX::XXXX:XXXX:XXXX]

On "XXXX::XXXX:XXXX:XXXX", enter the IPv6 link-local address in abbreviated form.

The top screen of Remote UI appears.

2. Select Log in on Remote UI.

### >>> Note

- If you specify the administrator password, enter the password.
- 3. Select Security.
- 4. Select SSL/TLS settings.
- 5. Select Generate key and certificate.
- 6. Select Generate self-signed cert.
- **7.** Specify each setting item.
  - Signature algorithm

Select SHA256.

• Public key length (bits)

Select 2048 bits.

• Specify the expiration date.

Enter the date you generated the server certificate on **Valid from**.

Enter the date the server certificate expires on Valid to.

· Enter the common name.

On **Common name**, enter the **IPv6 link-local address** you checked in abbreviated form.

### >>> Note

- When you enter the common name, add [] to each end of the abbreviation value of the printer's IPv6 address.
- Do not use a comma or make a space for the common name.

### 8. Select Next.

You need not enter anything on Country, State or province, Locality, Organization, or Organizational unit.

## 9. Select Generate.

The server certificate starts to be generated.

When the server certificate has been generated, **Generated a self-signed certificate.** appears.

# 10. Select Restart LAN.

LAN will be restarted.

When LAN has been restarted, Printer status on Remote UI appears.

### >>> Note

• If you cannot access to Remote UI after you restart LAN, reload your web browser.

# Checking Generated Server Certificate

- 1. Select Security on Remote UI.
- 2. Select SSL/TLS settings.
- 3. Select Check key and certificate.

Make sure the issuer of the root certificate is displayed on **Issued by**, and the value you entered is displayed on **Common name** on **Subject**.

# **Setting Mail Server**

To use mail function, specify the mail server settings.

\*This function may not be available depending on the country or region of purchase.

### Note

• If you did not specify the time zone setting using the printer's operation panel, a message to inform you that the correct time may not be reflected on the sent e-mail appears. We recommended that you set the time zone setting using the printer's operation panel.

For the time zone setting, see Other printer settings.

- These functions can be set only when you are logged in administrator mode.
- **1.** Start up Remote UI.
  - Start up Remote UI
- 2. Select Printer settings.
- 3. Select Set mail server.

The setting items for mail server appear.

4. Specify mail server settings.

Specify the following items.

### Sender address

Enter the e-mail address of the sender (this printer).

#### Outgoing mail server (SMTP)

Enter the address of your SMTP server.

### Port number (SMTP)

Enter the port number of your SMTP server.

#### Secure connection (SSL)

Select if you use the secure connection (SSL).

### Don't verify certificates

Select if you do not verify the certificate.

### Authentication

Select one of the following authentication methods.

#### **SMTP** authentication

Select if you send e-mail with SMTP authentication.

Then select **OK**, and then make the following settings.

### **Outgoing account**

Enter the account name for sending to perform the authentication.

### **Outgoing password**

To set / change the password for sending in order to perform the authentication, check the **Set/change password** and then enter the password.

#### **POP before SMTP**

Select if you send e-mail with POP before SMTP authentication.

Then select **OK**, and then make the following settings.

## Incoming mail server (POP3)

Enter the address of your POP3 server.

### Port number (POP3)

Enter the port number of your POP3 server.

### Incoming account

Enter the account name for receiving to perform the authentication.

### Incoming password

To set / change the password for receiving in order to perform the authentication, check the **Set/change password** and then enter the password.

#### **Use APOP authentication**

Select if you send the password by the encryption transmission.

#### Clear mailbox

Select if you delete the e-mails that remain in the POP3 server.

# >>> Important

 When this setting is enabled, e-mail in the Inbox on the server will have all been removed. If you specify the e-mail address of your everyday, be sure to disable this setting as unread e-mail is not deleted. We recommended that you prepare this printer dedicated e-mail account not to accidentally delete the unread e-mail.

## 5. Select OK.

The setting operation is completed.

# **Receiving Printer Status by E-mail**

You receive the printer status information such as the remaining ink level and the error from the printer.

\*This function may not be available depending on the country or region of purchase.

### Note

- · Specify the mail server settings in advance.
  - Setting Mail Server
- If you did not specify the date and time setting using the printer's operation panel, the date and time may not be reflected on the sent e-mail. We recommended that you set the date and time setting using the printer's operation panel.

For the date and time setting, see Other printer settings.

- These functions can be set only when you are logged in administrator mode.
- 1. Start up Remote UI.
  - → Start up Remote UI
- 2. Select Printer settings.
- 3. Select Status notification email.
- 4. Select Notification recipients.
- 5. Specify destination settings.

Up to 5 destinations can be registered by following the steps below.

- 1. Select number of destination.
- 2. Select Add.
- **3.** Enter e-mail address, and then select printer status to send information.
- 4. Select OK.

The registration for destination is completed.

- 6. Select Printer settings > Status notification email > Retry settings.
- 7. Specify resending settings.

The number of resending can be specified by following the steps below.

- 1. Specify number of resending.
- 2. Specify interval of resending.

# 3. Select OK.

The resending setting is completed.

# **Migrating Printer's Setting**

Migrates the printer settings to another one of the same model.

This operation is available using Remote UI or USB flash drive.

- ➡ Using Remote UI
- Using USB Flash Drive

# Note

• The printers must be running the same firmware version. The target data to be migrated is fixed.

# **Using Remote UI**

- 1. Exporting settings
  - 1. Start up Remote UI.
    - → Start up Remote UI
  - 2. Select Printer settings.
  - 3. Select Import/Export printer settings.
  - 4. Select Export printer settings.
  - 5. Enter password and select OK.
- 2. Importing settings
  - 1. Start up Remote UI
    - ➡ Start up Remote UI
  - 2. Select Printer settings.
  - 3. Select Import/Export printer settings.
  - 4. Select Import printer settings.
  - **5.** Select a file to import.
  - 6. Enter password and select OK.

# **Using USB Flash Drive**

- 1. Exporting settings
  - 1. Insert a USB flash drive to USB flash drive port.

- ➡ Home Screen Menu Composition
- 3. Tap Printer settings.
- 4. Tap Import/export settings.

If you specify the administrator password, enter the password.

- 5. Tap Export.
- **6.** Enter password and Tap **OK**.
- 7. Enter password again.

# 2. Importing settings

- 1. Insert a USB flash drive to USB flash drive port.
- 2. Tap (Setup) on HOME screen.
  - ➡ Home Screen Menu Composition
- 3. Tap Printer settings.
- 4. Tap Import/export settings.

If you specify the administrator password, enter the password.

- 5. Tap Import.
- **6.** Enter password and Tap **OK**.

# **Initializing Printer's Setting**

Initializes the following settings.

- · Paper setting information
- · Detection priority data of paper
- · SSL certificate
- · LAN setting
- · Administrator password
- · Hard drive data
- Job history
- · Operation panel lock

This operation is available using the operation panel or Remote UI.

- Using operation panel
- → Using Remote UI

# **Using operation panel**

- 1. Tap (Setup) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Printer settings.
- 3. Tap Initialize printer settings.

If you specify the administrator password, enter the password.

4. Confirm displayed message and tap Yes.

# **Using Remote UI**

- 1. Start up Remote UI.
  - ➡ Start up Remote UI.
- 2. Select Printer settings.
- 3. Select Initialize printer settings.
- 4. Confirm displayed message and select Yes.

The Remote UI is disconnected.

# **Network Setting**

# **Printer Connection Methods**

4 connection methods are available on the printer.

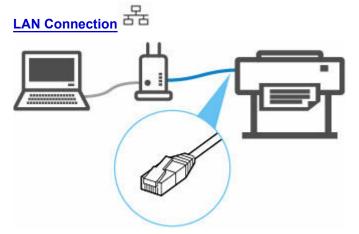

# Wi-Fi Connection ((۲))

• Using Wi-Fi Router

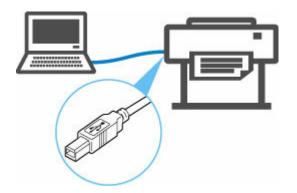

• Without Using Wi-Fi Router (Wireless Direct)

USB Connection

Different types of network connections cannot be used at the same time.

When connecting another device while the devices are already connected to the printer, connect it using the same connection method as the connected device or connect via USB connection.

If you connect using a different connection method, the connection to the devices in use will be disabled.

Restrictions

# **Wi-Fi Connection**

There are two methods for connecting the printer to your device (e.g. smartphone or tablet). One method is to connect using a wireless router, and the other method is to connect without using a wireless router.

The two connection methods cannot be used at the same time.

If you have a wireless router, we recommend you use the method using a wireless Router.

## Connection Using a Wireless Router

- · Connect the printer and the devices using a wireless router.
- · Connection methods vary depending on the wireless router type.
- · You can change network settings such as the SSID and security protocol on the printer.
- When the connection between a device and a wireless router is completed and (Wi-Fi icon) is displayed in the device's screen, you can connect the device to the printer using the wireless router.
  - Connecting Smartphone/Tablet to Printer via Wireless Router

#### Note

- If you connect using a wireless router, the printer and the device must be connected to the same network.
  - Advantages of Connecting Printer over Wi-Fi

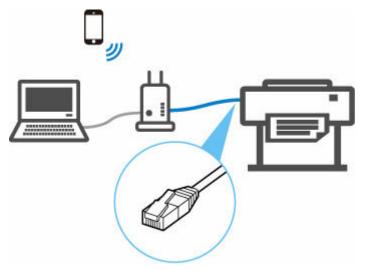

Connection without Using a Wireless Router (Wireless Direct)

- Connect the printer and a device without using a wireless router. Connect the device and the printer directly using the printer's wireless direct.
- In the wireless direct, you can connect up to five devices at the same time. If you try to connect
  another device while five devices are already connected, disconnect a device you do not use and
  configure settings again.
- Network settings such as the SSID and security protocol are specified automatically.
- Connecting Smartphone/Tablet to Printer Directly (Wireless Direct)

# **LAN Connection**

Connect the printer and a computer or a router with an Ethernet cable. If your router supports wireless connection, you can connect the device via wireless connection.

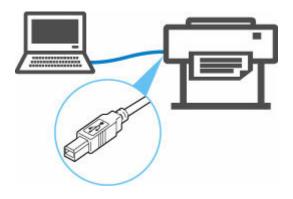

# Note

- Devices connected to the router must be connected to the same network.
- → What Is Ethernet Cable?
- Advantages of Connecting Printer via Wired LAN

# **USB** Connection

Connect the printer to a computer using a USB cable.

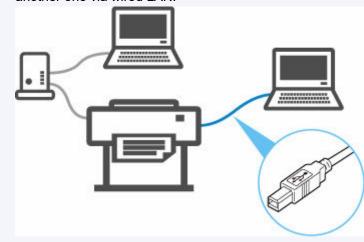

### → What Is USB Cable?

In USB connection, the printer is connected one-on-one to the computer.

If your computer is connected to LAN, you can use the printer with other devices by enabling the sharing setting on your computer.

# >>> Note

• You can connect the printer to a computer via USB even when the printer is already connected to another one via wired LAN.

# >>> Important

• If you connect a device connected to the Internet via a wireless router to the printer that is in the wireless direct, the connection between the device and wireless router will be disabled. In that case, the connection of the device may switch to a mobile data connection automatically depending on your device. Transmission fees for connecting to the Internet using a mobile data connection apply.

# Connecting Smartphone/Tablet to Printer via Wireless Router

You can connect devices (e.g. smartphone, or tablet) to the printer by two methods below.

- · Wi-Fi connection (connecting devices via a wireless router)
- Wireless Direct connection (connecting devices without using a wireless router)

This section describes Wi-Fi connection via a wireless router.

Follow the procedure below to connect via a wireless router.

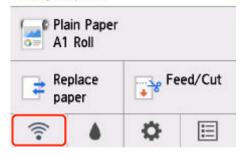

- 1. Confirm the Printer's Wi-Fi Connection is Enabled
- 2. Connect Smartphones and Tablets to the Printer

# >>> Important

- · Check the usage restrictions and change the printer LAN setting.
  - Restrictions
- The administrator password is required to change settings if it is enabled for changing settings using the operation panel.

# **Enable Printer's Wi-Fi connection**

### Ready to print

If a different network icon is displayed on the HOME screen, follow the procedure below to enable Wi-Fi connection.

- 1. On the HOME screen, tap the **Network** icon.
  - ➡ Home Screen Menu Composition
- 2. Tap Wi-Fi.
- 3. Tap Settings.
- 4. Tap Enable/disable Wi-Fi.
- 5. Tap Enable.

The printer's Wi-Fi is enabled and you can connect the Wi-Fi you connected previously.

# **Connect Smartphones and Tablets to the Printer**

- ➡ For Android device
- ➡ For iOS device

# For Android device

- 1. Open "Settings" menu on your device.
- 2. Enable "Wi-Fi".
- 3. Select wireless router SSID you use from detected device list.

4. Enter wireless LAN router password.

Your device is connected to the printer.

**5.** Start printing from application.

# For iOS device

- 1. Open "Settings" menu on your device.
- 2. Enable "Wi-Fi".
- 3. Select wireless router SSID you use from detected device list.

**4.** Enter wireless LAN router password.

Your device is connected to the printer.

**5.** Start printing from application.

# Connecting Smartphone/Tablet to Printer Directly (Wireless Direct)

You can connect devices (e.g. smartphone, or tablet) to the printer by two methods below.

- · Wi-Fi connection (connecting devices using a wireless router)
- · Wireless Direct connection (connecting devices without using a wireless router)

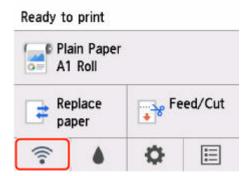

This section describes wireless direct, which allows you to print by connecting the devices to the printer directly.

# >>> Important

- · Check the usage restrictions and switch the printer to the wireless direct.
  - Restrictions
- The administrator password is required to change settings if it is enabled for changing settings using the operation panel.
- If a device has already been connected to the printer directly and you want to add a device to connect, connect it to the printer directly. You can connect up to 5 devices to the printer at the same time.

# **Connect with Wireless Direct**

- 1. Make sure printer is turned on.
- 2. On the HOME screen, tap the Network icon.

Depending on the current LAN status, the icon displayed on the button may differ.

- ➡ Home Screen Menu Composition
- 3. Tap Wireless Direct.
- 4. Tap Settings.
- 5. Tap Enable/disable Wireless Direct and tap Yes.
- **6.** Confirm displayed message and tap **OK**.

After Wireless Direct is enabled, the identifier (SSID) etc. when using the printer with wireless direct connection are displayed.

By flicking the touch screen, you can check various settings of wireless direct.

#### Note

- The identifier (SSID) and password are specified automatically.
- By tapping Show password, you can check the password. The password is required when connecting a device to the printer. (Depending on the device you are using, no password is required.)
- By tapping **Settings**, you can change the following settings.
  - Enable/disable Wireless Direct
  - Update SSID/password
  - Wireless Direct network (SSID)
  - Connection request confirmation

For updating the SSID / password or changing the name of the printer displayed on Wi-Fi Direct compatible device, see <u>Change Wireless Direct Connection Setting</u>.

# **Connecting Smartphone/Tablet to Printer**

**1.** Turn on Wi-Fi communication on Wi-Fi Direct compatible device.

For more on turning on Wi-Fi communication, see your device's instruction manual.

2. Select "DIRECT-XXXX-GP-NNNN" ("X" represents alphanumeric characters, NNNN means your printer model name.) from list displayed on device.

### >>> Note

- If "DIRECT-XXXX-GP-NNNN" does not appear on the list, wireless direct is not enabled.
   See Connect with Wireless Direct to enable wireless direct.
- You can change the name of the printer displayed on Wi-Fi Direct compatible devices.
   See <u>Change Wireless Direct Connection Setting</u> as necessary.
- 3. Enter password on Wi-Fi Direct compatible device.

The device is connected to the printer.

#### >>> Note

- You can check the password set for the printer by the following method.
  - 1. On the HOME screen, tap (Network).
  - 2. Tap Wireless Direct.
  - 3. Tap Show password.
- If your Wi-Fi Direct compatible device is set to prioritize using Wi-Fi Direct and it is connecting to the printer, the printer displays a confirmation screen asking if you allow the device to connect to the printer.

Make sure the name on the touch screen is the same as that of your Wi-Fi Direct compatible device and tap **Yes**.

# **Change Wireless Direct Connection Setting**

1. Make sure printer is turned on.

- 2. On the HOME screen, tap (Network).
  - ➡ Home Screen Menu Composition
- 3. Tap Wireless Direct.
- 4. Tap Settings.
- **5.** Change settings as necessary.
  - To update the identifier (SSID) and the password for wireless direct

Tap **Update SSID/password** to display the confirmation screen.

To update the identifier (SSID) and the password, tap Yes.

To check the updated password, tap **Show password**.

• To change the printer's name displayed on the Wi-Fi Direct compatible device

Tap **Wireless Direct network (SSID)** to display the printer's name (the initial value is "DIRECT-XXXX-GP-NNNN") displayed on a Wi-Fi Direct compatible device.

Follow the procedure below to change the name.

- 1. Tap the device name entry field on the touch screen.
- 2. Enter device name (up to 32 characters).
- 3. Tap **OK** and confirm the entered device name.
- Tap **OK**
- To change the confirmation screen setting when a Wi-Fi Direct compatible device is connecting to the printer

Tap **Connection request confirmation** to display the confirmation screen.

If you want the printer to display the screen to inform you a Wi-Fi Direct compatible device is connecting to the printer, tap **Yes**.

## Important

• To prevent an unauthorized access, we recommend you should not change the setting from the default.

When you finished performing the settings, the printer returns to the **Wireless Direct settings** screen.

# >>> Note

• If you change the wireless direct setting on the printer, also change the setting on the device.

# **Change the Printer Setting to Wi-Fi Connection**

1. Make sure printer is turned on.

- → Home Screen Menu Composition
- 3. Tap Wi-Fi.
- 4. Tap Settings.
- **5.** Tap **Enable/disable Wi-Fi** and tap **Enable**.
- **6.** Confirm displayed message and tap **OK**.

# **Default Network Settings**

# LAN Connection Defaults

Item	Default
Enable/Disable LAN	Wired LAN enabled
Network name (SSID)	BJNPSETUP
Communication mode	Infrastructure
Wi-Fi security	Disable
IP address (IPv4)	DHCP
IP address (IPv6)	Auto setup
Set printer name *1	xxxxxxxxxx
Enable/disable IPv6	Enable
Enable/disable WSD	Disable
Timeout settings	15 minutes
Enable/disable Bonjour	Enable
Service name	Canon GP-NNNN *2
LPR protocol settings	Enable
Wi-Fi DRX settings	Enable
Wired LAN DRX settings	Enable

("XX" represents alphanumeric characters.)

# **► LAN settings**

# **Wireless Direct Defaults**

Item	Default
Network name (SSID)	DIRECT-abXX-GP-NNNN *1
Password	YYYYYYYYY *2
Wi-Fi security	WPA2-PSK (AES)
Connection request confirmation	Displayed

<sup>\*1</sup> Default value depends on printer. To check value, use operation panel.

<sup>\*2</sup> NNNN means your printer model name.

<sup>\*1 &</sup>quot;ab" is specified at random and "XX" represents last two digits of printer's wireless MAC address. NNNN means your printer model.

<sup>\*2</sup> The password is specified automatically when the printer is turned on for the first time.

# **Another Printer Found with Same Name**

When the printer is found during setup, other printers with the same name may appear on the results screen.

Select a printer with checking the printer settings against those on detection result screen.

Check the printer's MAC address or serial to select the correct printer from the results.

### Note

· Serial number may not appear on result screen.

Check the printer's MAC address and the serial number by one of the following methods.

- · Display on the touch screen.
  - · MAC address
    - **▶** LAN settings
  - Serial number

Refer to **Printer information > System information**.

- Printer information
- Print the network settings.
  - Printing Network Settings

# **Connecting to Another Computer via LAN/Changing from USB to LAN Connection**

# For Windows:

To add a computer to connect to the printer on a LAN or to change from USB to LAN connection, perform setup using the Setup CD-ROM or from Setup Guide.

# For macOS:

To connect an additional computer to the printer via LAN, or to change from USB to LAN connection, perform setup from Setup Guide.

# **Printing Network Settings**

Use the operation panel to print the printer's current network settings.

# >>> Important

- The network settings printout contains important information about your network. Handle it with care.
- 1. Check that printer is turned on.
- 2. Load plain paper.
  - ▶ Loading Rolls on the Roll Holder
  - ▶ Loading Rolls in the Printer

If you use sheets, prepare at least 10 sheets (A4 or Letter-sized).

★ Loading Sheets in the Printer

- 4. Select Printer settings.
- 5. Select LAN settings.
- 6. Select Print details.
- 7. Select **Yes** on displayed screen.
- 8. Select Yes or No on displayed screen.

The printer starts printing network settings information.

### Note

You can also print the printer's network settings. Select the (Setup) icon > Printer settings > Test print > Print LAN details > Yes > Yes.

The printed network settings information is as follows: (Some setting values are not displayed depending on the printer settings.)

Item	Description	Setting
LAN Setting	Basic setting information	-
Basic Info	IPv4 setting information (Wired LAN)	-
LAN Interface Mode	Current interface	Wired LAN/Wireless LAN(Infra)/Wireless LAN(AP)/Wireless(Wireless direct)/Disabled

Link Active	Operation status	Active/Inactive
IP Address	IPv4 IP address	XXX.XXX.XXX
Gateway Address	IPv4 default gateway	XXX.XXX.XXX
Subnet Mask	IPv4 subnet mask	XXX.XXX.XXXX
IP Mode	Acquiring method of IPv4 IP address	Auto IP/DHCP/Manual
Use DNS Auto Mode	Acquiring DNS server automatically	On/Off
Primary DNS Server Address	Primary DNS server address	XXX.XXX.XXX
Secondary DNS Server Address	Secondary DNS server address	XXX.XXX.XXX
Control Filtering	SNMP filtering setting information	-
Use IP Filtering	Operation status of IP filtering	On/Off
IP Filtering Select	IP filtering method	Disabled/Enabled
IP Filtering Permission Address	IP filtering permission address	-
Start Address 1	Start address 1	XXX.XXX.XXX
End Address 1	End address 1	XXX.XXX.XXXX
Use Single On 1	Use single on 1	On/Off
Start Address 2	Start address 2	XXX.XXX.XXXX
End Address 2	End address 2	XXX.XXX.XXX
Use Single On 2	Use single on 2	On/Off
Start Address 3	Start address 3	XXX.XXX.XXX
End Address 3	End address 3	XXX.XXX.XXX
Use Single On 3	Use single on 3	On/Off
Start Address 4	Start address 4	XXX.XXX.XXX
End Address 4	End address 4	XXX.XXX.XXXX
Use Single On 4	Use single on 4	On/Off
Start Address 5	Start address 5	XXX.XXX.XXXX
End Address 5	End address 5	XXX.XXX.XXXX
Use Single On 5	Use single on 5	On/Off
IP Filtering Prohibit Address	IP filtering prohibit address	-
Start Address 1	Start address 1	XXX.XXX.XXX

Use Single On 1	End Address 1	End address 1	XXX.XXX.XXX
Start Address 2         Start address 2         XXX.XXX.XXXX           End Address 2         End address 2         XXX.XXX.XXXX           Use Single On 2         Use single on 2         On/Off           Start Address 3         Start address 3         XXX.XXX.XXXX           End Address 3         End address 3         XXX.XXX.XXXX           Use Single On 3         Use single on 3         On/Off           Start Address 4         Start address 4         XXX.XXXX.XXXX           End Address 4         End address 4         XXX.XXXX.XXXX           Use Single On 4         Use single on 4         On/Off           LAN Setting         Basic setting information         -           Basic Info         IPv4 setting information (Wired LAN)         -           Control Filtering         SNMP filtering setting information         -           IP Filtering Prohibit Address         -         -           Start Address 5         Start address 5         XXX.XXXX.XXXX           Use Single On 5         Use single on 5         On/Off           Print Filtering         Print filtering setting information         -           Use IP Filtering         Operation status of IP filtering         On/Off           IP Filtering Permission Address         IP filtering permission address<

# Reconfiguration Method of LAN Connection/Reconfiguration Method of Wi-Fi Connection

- ➡ Changing LAN Connection Method
- Changing Wi-Fi Connection Method

## **Changing LAN Connection Method**

Follow either procedure below to change LAN connection method (wired or wireless).

#### • For Windows:

- Redo setup using the Setup CD-ROM or from Setup Guide.
- Select Enable for Enable/disable Wired LAN or Enable/disable Wi-Fi in the touch screen menu.

After that, perform settings on the Network Settings screen on IJ Network Device Setup Utility.

For details, refer to "Performing/Changing Network Settings" > "Performing Network Settings" in IJ Network Device Setup Utility Guide.

➡ IJ Network Device Setup Utility Guide

#### For macOS:

Redo setup from Setup Guide.

## **Changing Wi-Fi Connection Method**

Follow either procedure below to change Wi-Fi connection method (infrastructure or wireless direct).

#### · For Windows:

- Redo setup using the Setup CD-ROM or from Setup Guide.
- Perform settings on the Network Settings screen on IJ Network Device Setup Utility.

#### >>>> Important

- Before you perform settings using IJ Network Device Setup Utility, change the printer settings following the procedure below.
  - 1. Select LAN settings on HOME screen.
    - ➡ Home Screen Menu Composition

If you specify the administrator password, enter the password.

- 2. Select Wi-Fi.
- 3. Select Settings.
- Select Wi-Fi setup.

- **5.** Select Easy wireless connect.
- **6.** Check message and select **OK**.

Follow instructions on your smartphone or tablet.

- **7.** If message saying setup is completed appears, select **OK**.
- For macOS:

Redo setup from Setup Guide.

## **Countermeasures against Unauthorized Access**

This section describes countermeasures against an unauthorized access to the printer from outside. When you use the printer via a network or you are an administrator, we recommend you read this section before using the printer.

Four countermeasures below can be helpful against an unauthorized access.

- Specify a Private IP Address
- Restrict Communication Using Firewall or Wi-Fi Router
- Specify a Password for the Printer
- Apply higher security level for Wi-Fi connection

#### Note

• As the setting procedure described below is an example, it may be different from that of your printer. For details, refer to your printer's manual.

### **Specify a Private IP Address**

An IP address is a numeric label assigned to each device on the network. There are two types of IP address. One is used for internet connection ("global IP address"), and the other is used for a local area network such as an inhouse LAN ("private IP address").

If a global IP address is specified for the printer, many and unspecified users on internet can access to the printer. As a result, you will face an increased risk of information leakage caused by an unauthorized access from outside. On the other hand, if a private IP address is specified for the printer, users who can access to the printer are confined to those on a local area network such as an inhouse LAN. Therefore, we recommend you specify a private IP address for the printer.

The range of addresses used as a private IP address is shown below. Make sure whether a private IP address is specified for your printer.

#### Range of private IP address

- 10.0.0.0 to 10.255.255.255
- 172.16.0.0 to 172.31.255.255
- 192.168.0.0 to 192.168.255.255

#### Procedure to check the IP address

Select **Setup > Device settings > LAN settings** on your printer to select a network connection method and check the IP address. For the procedure to check and specify the IP address, refer to your printer's manual.

#### Note

• Establishing an environment to protect an access from outside using a firewall can reduce a risk of an unauthorized access even though a global IP address is specified for your printer.

### **Restrict Communication Using Firewall or Wi-Fi Router**

Firewall is a system which prevents an unauthorized access from an external network user to protect an inhouse network against attack or intrusion.

Firewall enables your network to be protected against an unauthorized access by restricting a communication from the specific external IP address which seems to have a risk.

A home use Wi-Fi router has a similar function. Be careful when you change the settings.

## **Specify a Password for the Printer**

Even if a malicious third party accesses to your printer by any chance, you can reduce a risk of information leakage drastically by specifying a password to protect various information on your printer.

In addition, though the printer can be protected by specifying a password, it is important to manage the specified password for security. Manage your password referring to the four points below. For details, refer to your printer's manual.

- · Be sure to change the default password.
- · Change the password periodically.
- Do not use a password easy to guess for a third party.
- · Do not tell a third party about the specified password casually.

#### Note

- A password is not specified for some printers at the time of purchase. In this case, specify the password for the printer.
- · A password cannot be specified for some printers.

#### Password management using Remote UI (User Interface)

Remote UI is a software to access to the printer via a network by using a web browser. You can check the printer status or settings on Remote UI, which allows you to perform operations almost the same as those you can on the operation panel of the printer.

Entering the printer's IP address or host name on the web browser displays the portal page of Remote UI.

For the procedure to start up or operations of Remote UI, refer to your printer's manual.

#### >>> Important

· Do not access to a website while you are using Remote UI on the web browser.

In addition, be sure to close the web browser when you leave your seat before you finish performing settings, or when you have finished performing settings.

## Apply higher security level for Wi-Fi connection

When you use the printer via Wi-Fi, we recommend you apply a security method with higher security level (e.g. WPA/WPA2).

For more on operations, refer to your printer's manual.

## **Network Status and Troubleshooting**

Check the network status referring to LAN setting information on the touch screen.

### ➡ Printing Network Settings

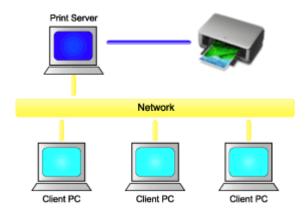

Network Status	What to Do
Connected normally.	If you are unable to print, check the items below:
If you are unable to print, see 1 on What to Do.	<ul> <li>whether the computer is connected to Wi-Fi</li> <li>whether the firewall of your security software is enabled</li> <li>whether a privacy separator, SSID separator, or Network separation function is enabled on your wireless router</li> </ul>
	If one of the above is enabled, disable it before setup.
	whether the network name (SSID) of the printer (see "3-2-6" of network setting information printout) matches that of the router to connect
	To change the network connection method (wired/wireless), change it on the printer's network setting screen.
Wi-Fi is disabled on the printer.	Perform printer setup following the instructions of the manual.
Wired LAN connec-	Make sure the printer is connected to the router with the LAN cable.
tion is disabled.	If the LAN cable is loose, connect the cable properly.
	If the LAN cable is connected to the WAN side of the router, connect the cable to the LAN side of the router.
	Make sure the network devices (e.g. hub or router) are turned on.
IP address is not as-	If you specify the printer's IP address automatically, enable DHCP on the router.
signed.	If you specify the printer's IP address manually, the address is disabled because it is out of the valid range. You specified (0.0.0.0) as the IP address, for example.
	Specify the valid IP address.
The default gateway	Check the items below to communicate by hopping routers (e.g. using a cloud application).
is not specified.	Make sure the device specified as the default gateway is turned on.
	Specify the default gateway address correctly.
	To check the default gateway, print out the network settings information.
	>>> Note
	For some printers, you can check the default gateway on the operation panel.
Cannot connect to	Check the status of the printer, network devices (e.g. wireless router), or smartphone/tablet.
the specified net- work.	If they are turned off, turn them on.     Make sure wireless signal is strong.
	Monitor signal status and move the printer and wireless router as necessary.
	The security key specified for the wireless router may not match that you entered.
	The security key is case-sensitive.

	Enter the correct security key.
Make sure wireless signal is strong.	<ul> <li>Make sure the printer is not placed too far away from the wireless router.</li> <li>Monitor signal status and move the printer and wireless router as necessary.</li> </ul>
The number of connected clients reaches the upper limit.	Wireless Direct does not allow more than 5 devices to be connected.  If you add a device to connect, disconnect a device you do not use before adding the device.
The signal to noise ratio (S/N ratio) is low.	There is a lot of noise from other devices.  Move the printer apart from other devices.
A link local address is assigned.	<ul> <li>Perform printer setup again.</li> <li>The security key specified for the wireless router may not match that you entered.</li> <li>The security key is case-sensitive.</li> <li>Enter the correct security key.</li> </ul>
The specified net- work name (SSID) is left default value.	The network name (SSID) is not specified.  Enter the network name (SSID) specified for the destination.

## **Sharing the Printer on a Network (macOS)**

When multiple computers are being used in the network environment, you can share the printer connected to one computer with the other computers.

Before carrying out the setup for printer sharing, select **Network** from **System Preferences**, and check whether the network settings have been set.

This section describes the procedure for sharing a printer among Mac.

• Settings on Print Server

This section describes how to set up a computer that connects with this printer.

• Settings on Client PC

This section describes the procedure for setting a computer that uses this printer though a network. When you execute print, the data is sent to the printer through the print server system.

## Related Topic

Restrictions on Printer Sharing

## **Settings on Print Server**

When you use the printer on a network, set up the printer driver for sharing on the print server system.

The procedure for setting up the print server systems is as follows:

- 1. <u>Install the printer driver</u> on the print server system
- 2. Check that the printer to be used has been added

Open System Preferences, and select Printers & Scanners.

The printer list displays the printers that are connected to the computer.

3. Set sharing

Check the Share this printer on the network check box.

#### Note

• Depending on the environment you are using, a message prompting you to restart the computer may be displayed. To complete the installation properly, restart the computer.

The setup on the print server system is complete. Next, set up the client systems.

## **Settings on Client PC**

After setting up the print server system, set up the client system.

The procedure for setting up the client systems is as follows:

- 1. Install the printer driver on the client systems
- **2.** Display the printer list

Open System Preferences, and select Printers & Scanners.

Click + to display the printer list.

3. Add a printer to be shared

Select a shared printer displayed in the printer list, and then click **Add**.

The setup on the client systems is now completed.

#### >>> Note

• The print procedures are the same as when the computer is connected directly to the printer with a USB cable

At the Page Setup dialog, select the printer that is connected to the print server to be used.

## **Restrictions on Printer Sharing**

These are restrictions that apply when you are using a printer in a network environment.

- Install the same version of the printer driver in the print server system and the client systems. You can download the latest printer driver from our web site.
- Use printer sharing with users who have the administrator privilege.
- Depending on how the computer is connected with the printer, the computer may not be able to access the function information that was set on the printer and display the correct settings.
- Media information on the printer driver cannot be changed when using a client machine.
- When using on the client side, you cannot configure Accounting settings.
- When using on the client side, you cannot use Remote UI.

## **Adjustments for Better Print Quality**

## Adjusting the Print Head

- Adjusting the Print Head
- Troubleshooting Paper Abrasion and Blurry Images

## ➤ Adjusting Feed Amount

- Adjusting Feed Amount
- Adjusting Vacuum Strength

## **Adjusting the Print Head**

- ➤ Adjusting the Print Head
- Troubleshooting Paper Abrasion and Blurry Images

## **Adjusting the Print Head**

If printed documents are affected by the following problems, try adjusting the print head.

· If printing is faint or affected by banding in different colors

Execute Nozzle Check in the touch screen menu to check for print head nozzle clogging.

- Checking for Nozzle Clogging
- · If printed lines are misaligned

Execute Print head angle adjustment in the touch screen menu to adjust the print head angle.

Always adjust the print head angle after replacing the print head.

Adjusting Line Misalignment

After executing Print head angle adjustment, adjust the print head position.

- → Automatic Adjustment to Straighten Lines and Colors
- Manual Adjustment to Straighten Lines and Colors

#### If printed vertical lines are warped or colors are out of alignment

Execute Print Head Alignment in the touch screen menu to adjust the print head position.

First, execute **Auto (standard)** of **Print Head Alignment**. If the print result is not improved, execute **Auto (advanced)** or **Manual**.

- → Automatic Adjustment to Straighten Lines and Colors
- Manual Adjustment to Straighten Lines and Colors
- · If paper rubs against the print head, or image edges are blurred

Setting **Paper thickness (head height)** in the touch screen menu and changing the height of the print head may improve the situation.

Troubleshooting Paper Abrasion and Blurry Images

## **Adjusting Line Misalignment**

If printed lines are misaligned, execute **Print head angle adjustment** to adjust the print head angle. **Print head angle adjustment** requires you to examine a printed test pattern and adjust the angle using the angle adjustment lever.

Always adjust the print head angle after replacing the print head.

#### >>> Important

- Because the results of adjustment vary depending on the type of paper used for adjustment, use the same type of paper as you will use for printing.
- When using cut sheets, do not move the release lever until instructions (guidance) for removing the paper are displayed.

Moving the release lever during printing or maintenance operations will cause the printer to stop.

#### **Paper to Prepare**

#### When using rolls

An unused roll at least 10.00 in. (254.0 mm) wide

#### When using sheets

1 sheet of unused paper of at least A4/Letter size

Perform adjustment as follows.

#### 1. Load paper.

- → Loading Rolls in the Printer
- ★ Loading Sheets in the Printer

#### >>> Important

Always make sure the loaded paper matches the type of paper specified on the printer.
 Adjustment cannot be completed correctly unless the loaded paper matches the settings.

2. Tap (Setup) > Maintenance on HOME screen.

➡ Home Screen Menu Composition

The Maintenance screen appears.

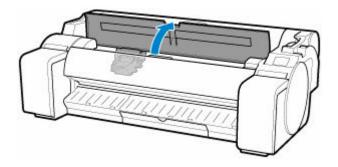

#### 3. Tap Print head angle adjustment.

A confirmation message appears.

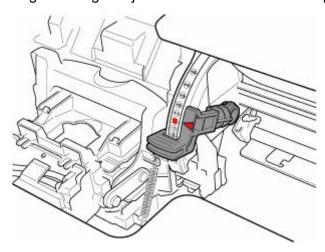

#### **4.** Tap **Yes**.

The carriage moves and instructions for the print head angle adjustment procedure are displayed on the touch screen.

#### **5.** Open the top cover.

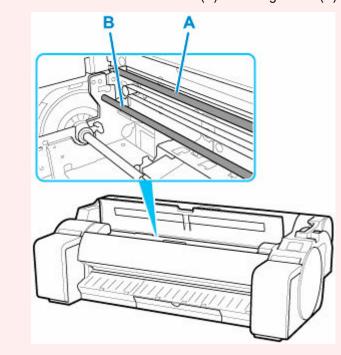

**6.** Align the angle adjustment lever with the red square and close the top cover.

A test pattern is printed for adjustment.

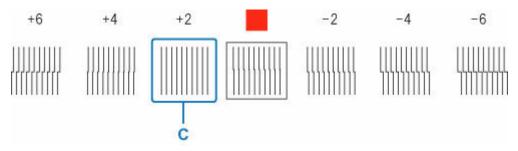

### >>> Important

• Do not touch the linear scale (A) or carriage shaft (B). Touching these may cause malfunction.

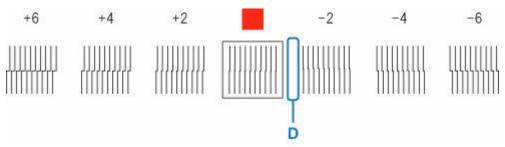

7. Examine the test pattern for adjustment. Determine the straightest set of lines.

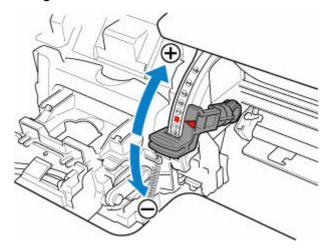

Example 1: Select "+2" in pattern (C).

Example 2: Move the angle adjustment lever to a position between the numbers or between the number and the square (D) of the two sets of lines that are least misaligned. In this case, select -1.

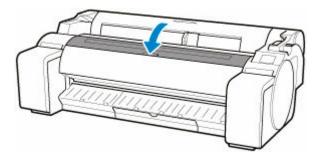

**8.** Open top cover and move angle adjustment lever to match number (or square) of straightest set of lines.

**9.** Close the top cover.

The print head is now straight, and adjustment is complete.

### >>>> Note

• If the problem, such as misaligned lines or color unevenness, is not solved after adjustment, execute **Print head angle adjustment** and move the angle adjustment lever in the front or the rear of the last position. When finished, execute **Print Head Alignment** again.

## **Automatic Adjustment to Straighten Lines and Colors**

If printed vertical lines are warped or colors are out of alignment, execute **Print Head Alignment** and adjust the print head position.

Choose from Auto (standard) or Auto (advanced) for automatically adjusting the print head.

Minor warping and misaligned colors can usually be improved by executing **Auto (standard)**. If there is no improvement, perform **Auto (advanced)** or **Manual**.

→ Manual Adjustment to Straighten Lines and Colors

When you execute **Auto (standard)** or **Auto (advanced)**, the adjustment pattern is printed, and the print head position is adjusted based on the printing result automatically.

#### Important

- If the problem, such as misaligned lines, is conspicuous, or other problem, such as color unevenness, is not solved after executing **Print Head Alignment**, execute **Print head angle adjustment** and then execute **Print Head Alignment** again.
  - Adjusting Line Misalignment
- Because the results of adjustment vary depending on the type of paper used for adjustment, use the same type of paper as you will use for printing.
- This function is not available with Tracing Paper, Translucent Matte Film, or Clear Film.
- When using cut sheets, do not move the release lever until instructions (guidance) for removing the paper are displayed.

Moving the release lever during printing or maintenance operations will cause the printer to stop.

#### >>> Note

- After print head replacement, we recommend executing Print Head Alignment. When Print pattern
  after new head is set to ON, print head position adjustment is automatically executed after print head
  replacement.
- To change the paper type or for more beautiful color borders, perform Auto (standard).
- To ensure clear quality and when replacing the print head, perform Auto (advanced) to fine-tune the
  position between nozzles and colors. To ensure high-quality printing, we recommend that you execute
  Auto (advanced).
- If adjustment is not possible as expected using special paper, try another type of paper or try **Manual** adjustment.
  - ➡ Manual Adjustment to Straighten Lines and Colors

#### **Paper to Prepare**

#### When using rolls

An unused roll at least 10.00 in. (254.0 mm) wide

#### When using sheets

**Auto (standard)**: 2 sheets of unused paper, A4/Letter size or larger (or 1 sheet when using A2 or larger)

**Auto (advanced)**: 3 sheets of unused paper, A4/Letter size or larger (or 1 sheet when using A2 or larger)

Perform adjustment as follows.

#### 1. Load paper.

- ★ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

#### >>> Important

Always make sure the loaded paper matches the type of paper specified on the printer.
 Adjustment cannot be completed correctly unless the loaded paper matches the settings.

2. Tap (Setup) > Maintenance on HOME screen.

➡ Home Screen Menu Composition

The **Maintenance** screen appears.

- 3. Tap Print Head Alignment.
- 4. Tap Auto (standard) or Auto (advanced).

A confirmation message appears.

5. Tap Yes.

The paper source setting screen appears.

6. Tap Roll paper or Manual.

A test pattern is printed for adjustment.

#### >>> Note

• If you are printing on sheets smaller than A2 size, a confirmation message prompting you to continue printing appears on the touch screen. Tap **Yes** and follow the instructions on the touch screen.

## Manual Adjustment to Straighten Lines and Colors

If printed vertical lines are warped or colors are out of alignment, execute **Print Head Alignment** and adjust the print head position.

Normally, execute Auto (standard).

→ Automatic Adjustment to Straighten Lines and Colors

However, when printing on special paper or if printing is not improved after Auto (advanced), try Manual.

Manual adjustment requires you to examine the printed test pattern and enter an adjustment value.

#### Important

- Because the results of adjustment vary depending on the type of paper used for adjustment, use the same type of paper as you will use for printing.
- When using cut sheets, do not move the release lever until instructions (guidance) for removing the paper are displayed.

Moving the release lever during printing or maintenance operations will cause the printer to stop.

#### Paper to Prepare

#### When using rolls

An unused roll at least 10.00 in. (254.0 mm) wide

#### When using sheets

1 sheet of unused paper, A4/Letter size or larger (or 1 sheet when using A2 or larger)

Perform adjustment as follows.

- 1. Load paper.
  - Loading Rolls in the Printer
  - ▶ Loading Sheets in the Printer

#### >>> Important

Always make sure the loaded paper matches the type of paper specified on the printer.
 Adjustment cannot be completed correctly unless the loaded paper matches the settings.

(Setup) > Maintenance on HOME screen.

➡ Home Screen Menu Composition

The Maintenance screen appears.

#### 3. Tap Print Head Alignment.

#### 4. Tap Manual.

A confirmation message appears.

#### Note

• If you do not perform **Auto (advanced)**, a confirmation message prompting you to perform **Auto (advanced)** appears. In this case, tap **Yes** and perform **Auto (advanced)**.

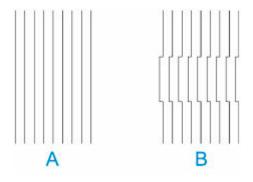

#### **5.** Tap **Yes**.

The paper source setting screen appears.

#### 6. Tap Roll paper or Manual.

A test pattern is printed for adjustment.

- **7.** Tap D-1.
- **8.** Examine adjustment test pattern D-1 and determine the number with straight lines.

A: Example with straight lines

B: Example with misaligned lines

#### Note

- If two patterns seem equally good and you cannot decide which one is better, choose an intermediate value. For example, choose 11 if you cannot decide whether pattern 10 or 12 is better.
- **9.** Repeat steps 7-8 to specify adjustment values for D-2 and other remaining patterns.

Specify all the items displayed on the touch screen.

#### **10.** Tap **OK**.

The adjustment value is now registered, and adjustment is complete.

## **Troubleshooting Paper Abrasion and Blurry Images**

The print head height setting affects printing quality.

Specifying a low print head height makes images clearer and enhances printing quality but may cause paper to rub against the print head.

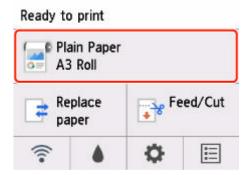

On the other hand, specifying a high print head height will prevent paper from rubbing against the print head but may reduce the printing quality.

#### >>> Important

 Paper rubbing against or becoming caught on the print head may jam or result in printed documents that are soiled.

#### Note

- Raise or lower print head, depending on nature of the problem.
  - ▶ Paper rubs against the Print Head
  - ➡ The edges of the paper are dirty
  - ➡ Image edges are blurred or white banding occurs
- 1. Tap paper setting display area on HOME screen.
  - ➡ Home Screen Menu Composition

The Paper menu screen appears.

2. Tap Paper settings.

The Paper settings screen appears.

3. Tap Advanced.

The **Advanced paper settings** screen appears.

- 4. Tap Paper thickness (head height).
- 5. Drag slider to set paper thickness (head height) and tap **OK**.

#### >>> Note

- When **Auto** is set to **ON**, before printing, the printer automatically adjusts the print head height to the level optimal for the ambient temperature and humidity. You can check the setting for the previous print job in **Values applied with auto settings**.
  - Printer information
- When **Auto** is set to **OFF**, the setting selected during this procedure is applied.
- Depending on the type of paper, some setting values may not be available.

## **Adjusting Feed Amount**

- ➤ Adjusting Feed Amount
- ➤ Adjusting Vacuum Strength

## **Adjusting Feed Amount**

- Selecting Feed Amount Adjustment Method
- ➤ Automatic Banding Adjustment
- ➤ Manual Banding Adjustment
- ➤ Fine-Tuning Paper Feed Amount
- ➤ Adjusting Line Length

## **Selecting Feed Amount Adjustment Method**

There are two methods of adjusting the paper feed amount, **Prioritize print quality** and **Prioritize length accuracy**, either of which will be applied during printing.

Since the method that is applied during printing is determined from the value of the **Set priority** setting, configure **Set priority** to match the print target.

Follow the procedure below to perform settings.

- 1. Tap (Setup) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Maintenance.
- 3. Tap Paper feed adjustment.
- 4. Tap Set priority.
- **5.** Tap paper to adjust.
- 6. Tap setting.

#### **Auto**

Prioritize print quality will be selected when Print Target is set from the printer driver.

#### Prioritize print quality

Adjusts the feed amount to reduce banding across the sheet in printed documents. **Adjust print quality** settings are applied.

When Paper feed fine adjustment is executed, the Paper feed fine adjustment settings are applied in addition to the Adjust print quality settings.

#### Prioritize length accuracy

Adjusts the feed amount for better accuracy of lines in printed documents. The value of **Change adjustment values** in **Adjust feed length** is applied.

#### **7.** Tap **OK**.

## **Automatic Banding Adjustment**

If printed images are affected by banding in different colors across the sheet, execute **Adjust print quality** for automatic adjustment of the paper feed amount.

The printer prints and reads a test pattern for automatic adjustment of the feed amount.

#### >>> Important

- · When using highly transparent media, use manual adjustment.

#### Note

- We recommend executing the adjustment if you have changed the paper type or paper size.
- Always check the **Set priority** values.
  - ➡ Selecting Feed Amount Adjustment Method
- · If additional fine-tuning is necessary, execute Paper feed fine adjustment.
  - Fine-Tuning Paper Feed Amount
- Use Adjust feed length to ensure that lines in CAD drawings are printed at exactly the right length.
  - Adjusting Line Length
- This may take some time, depending on the type of paper.

#### **Items to Prepare**

#### When Using Rolls

An unused roll at least 254.0 mm (10.00 in.) wide

#### When Using Sheets

One sheet of unused paper of at least A4/Letter size

Follow the procedure below to adjust.

- 1. Load paper.
  - ➡ Loading Rolls in the Printer
  - ★ Loading Sheets in the Printer
- 2. Tap (Setup) on HOME screen.
  - ➡ Home Screen Menu Composition
- 3. Tap Maintenance.
- 4. Tap Paper feed adjustment.
- 5. Tap Adjust print quality.

## 6. Tap Auto.

## 7. Tap paper to adjust.

A test pattern is printed for adjustment and adjustment is finished.

## **Manual Banding Adjustment**

If printed images are affected by banding in different colors, execute **Adjust print quality** for adjustment of the paper feed amount.

Use manual adjustment with highly transparent media.

Manual adjustment requires you to enter an adjustment value after a test pattern is printed.

#### >>> Note

- · We recommend executing the adjustment if you have changed the paper type or paper size.
- · Always check the Set priority values.
  - Selecting Feed Amount Adjustment Method
- If additional fine-tuning is necessary, execute Paper feed fine adjustment.
  - Fine-Tuning Paper Feed Amount
- Use Adjust feed length to ensure that lines in CAD drawings are printed at exactly the right length.
  - → Adjusting Line Length

#### **Items to Prepare**

#### When Using Rolls

An unused roll at least 254.0 mm (10.00 in.) wide

#### When Using Sheets

Two sheets of unused paper of at least A4/Letter size

Follow the procedure below to adjust.

- 1. Load paper.
  - Loading Rolls in the Printer
  - ★ Loading Sheets in the Printer

## Important

 Always make sure the loaded paper matches the type of paper specified. Adjustment cannot be completed correctly unless the loaded paper matches the settings.

(Setup) on HOME screen.

- ➡ Home Screen Menu Composition
- 3. Tap Maintenance.
- 4. Tap Paper feed adjustment.
- 5. Tap Adjust print quality.
- 6. Tap Manual.

## 7. Tap paper to adjust.

Test pattern A is printed for manual adjustment.

#### >>> Note

- · When printing on sheets, follow the instructions on the screen and remove the sheet.
- 8. Examine test pattern A for adjustment.

Determine pattern in which banding is least noticeable.

#### >>>> Note

- If banding seems least noticeable in two patterns but you cannot decide which one is better, choose an intermediate value. For example, choose 11 if you cannot decide whether pattern 10 or 12 is better.
- 9. Tap number you decided.

Test pattern B is printed for manual adjustment.

#### Note

- If you printed test pattern A on a sheet, follow the instructions on the screen and use another sheet of the same type of paper. Additionally, after test pattern B is printed, follow the instructions on the screen and remove the sheet.
- **10.** Examine test pattern B for adjustment. Determine pattern in which banding is least noticeable.
- 11. Tap number you decided.

The adjustment value is now registered, and adjustment is complete.

# **Fine-Tuning Paper Feed Amount**

If the contrast is uneven or banding in different colors appears at 30 mm (1.2 in) intervals in printed documents, try executing **Paper feed fine adjustment** during printing to fine-tune the feed amount.

#### Note

- The Paper feed fine adjustment menu is only displayed during printing. Additionally, it is displayed when you have selected Auto or Prioritize print quality in Set priority in Paper feed adjustment.
- Always execute **Adjust print quality** before **Paper feed fine adjustment**. Once you execute **Adjust print quality**, the **Paper feed fine adjustment** value will revert to 0.
  - → Automatic Banding Adjustment
  - Manual Banding Adjustment

Follow the procedure below to adjust.

- 1. Tap (Setup) on HOME screen during printing .
  - ➡ Home Screen Menu Composition
- 2. Tap Maintenance.
- 3. Tap Paper feed fine adjustment.
- 4. Tap value.

At this time, if banding in dark colors appears, select a setting value in the range 1 to 5, and if banding in light colors appears, select a setting value in the range -1 to -5.

# **Adjusting Line Length**

To ensure that lines in CAD drawings are printed at exactly the right length, use **Adjust feed length** to adjust the amount that paper is advanced.

There are two options in Adjust feed length: Print alignment pattern and Change adjustment values.

#### Note

- · We recommend executing the adjustment if you have changed the paper type or paper size.
- Always check the **Set priority** values before adjustment.
  - ➡ Selecting Feed Amount Adjustment Method

#### **Items to Prepare**

#### When Using Rolls

- · An unused roll at least 254.0 mm (10.00 in.) wide
- · High-precision ruler

#### When Using Sheets

- · One sheet of unused paper of at least A4/Letter size
- High-precision ruler

Follow the procedure below to adjust.

- 1. Load paper.
  - Loading Rolls in the Printer
  - ▶ Loading Sheets in the Printer

## >>> Important

Always make sure the loaded paper matches the type of paper specified.
 Adjustment cannot be completed correctly unless the loaded paper matches the settings.

(Setup) on HOME screen.

- ➡ Home Screen Menu Composition
- 3. Tap Maintenance.
- 4. Tap Paper feed adjustment.
- 5. Tap Adjust feed length.
- 6. Tap Print alignment pattern or Change adjustment values.
  - If you tap Print alignment pattern:

The test pattern is printed for you to measure the scale and calculate the discrepancy.

The scale bar prints "Millimeter" in 50 mm increments and "Inch" in 1-inch increments.

## • If you tap Change adjustment values:

No test pattern is printed.

Instead, you will measure a document already printed to determine the discrepancy.

## **7.** Tap amount of discrepancy.

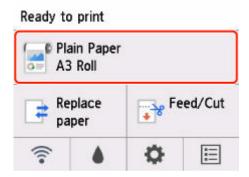

If the scale is shorter than the actual size, use a positive setting value. If it is longer, use a negative value. The feed amount can be adjusted in 0.02% increments.

# **Adjusting Vacuum Strength**

When printing on heavyweight paper or paper that curls or wrinkles easily, if the Print head rubs against paper, adjusting the level of suction against paper on the platen may improve results.

## >>> Important

- Paper rubbing against or becoming caught on the Print head may jam or result in printed documents that are soiled.
- **1.** On the HOME screen, tap paper information area.

- 2. Tap Paper settings.
- 3. Tap Advanced.
- 4. Tap Transport unit vacuum strength.
- **5.** Tap vacuum strength.

## **Maintenance and Consumables**

# **Ink Tanks**

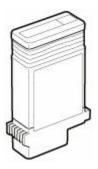

- ▶ Ink Tanks
- ➤ Replacing Ink Tanks
- ➤ Checking Ink Tank Levels
- ➤ When to Replace Ink Tanks

## **Ink Tanks**

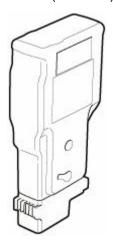

The printer supports the following ink tanks.

When purchasing, check the Model number.

• 130 ml (4.4 fl oz)

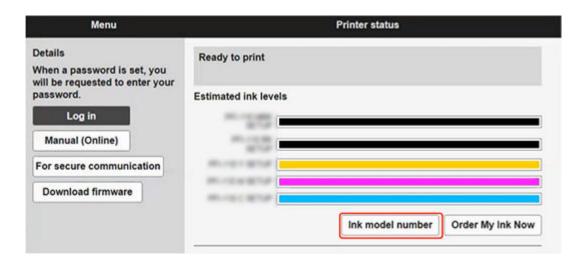

• 300 ml (10.1 fl oz)

# **Checking Ink Model Number**

## **Checking Using Web Browser**

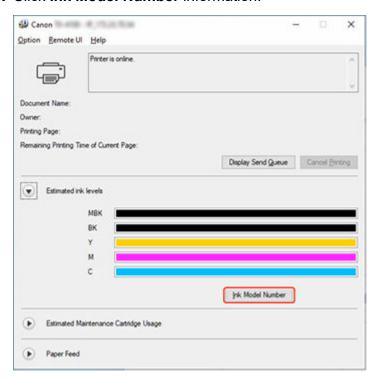

- 1. Start up Remote UI.
  - → Start up Remote UI
- 2. Select Ink model number.

The type and number of inks displayed will vary depending on the printer you are using.

## **Checking Using Canon IJ Status Monitor (Windows)**

- 1. Start up Canon IJ Status Monitor.
  - Canon IJ Status Monitor
- 2. Click Estimated ink levels.
- 3. Click Ink Model Number information.

The type and number of inks displayed will vary depending on the printer you are using.

# >>> Note

• For instructions on replacing the ink tanks, see Replacing Ink Tanks.

# **Replacing Ink Tanks**

## **Compatible Ink Tanks**

For details on compatible ink tanks, see Ink Tanks.

You can replace ink tanks in 4.4 fl oz (130 ml) and 10.1 fl oz (300 ml).

#### Note

· Depending on the color, you can also use an ink tank with a different capacity.

# **Precautions When Handling Ink Tanks**

Take the following precautions when handling ink tanks.

#### Caution

- For safety, keep ink tanks out of the reach of children.
- · If ink is accidentally ingested, contact a physician immediately.

## Important

- There may be ink around the ink holes of an ink tank you removed. Handle the ink tanks carefully
  during replacement. The ink may stain clothing.
- Do not install ink tanks used in this printer in another printer. This will prevent correct ink level detection, which may damage the printer or cause other problems.
- We recommend using up an ink tank in the course of printing within six months after breaking the seal. Printing quality may be affected if you use older ink tanks.
- Do not leave the printer without ink tanks installed for extended periods (a month or more). Residual ink may become clogged inside the printer and affect printing quality.

## How to Replace an Ink Tank

If a message indicates you should replace an ink tank, check the message details and go to step 2.

- 1. Selecting Ink Tank Replacement from Menu
- 2. Removing Ink Tanks
  - Removing ink tank
- 3. Loading New Ink Tanks
  - **▶** Loading ink tank

## >>> Important

• Do not remove an ink tank during initialization immediately after turning on the printer, or during print head cleaning. Ink may leak out.

#### Note

Ink tank replacement is possible even during printing, when print jobs are being canceled, or when
paper is being advanced.

# **Selecting Ink Tank Replacement from Menu**

- 1. Tap (Ink information) on HOME screen.
  - → Home Screen Menu Composition

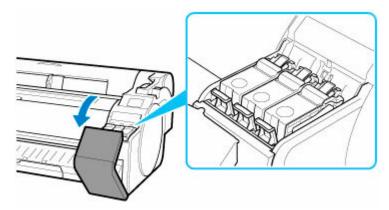

The Current estimated ink levels screen appears.

## 2. Tap Replace.

Instructions for the ink tank replacement procedure appear on the touch screen.

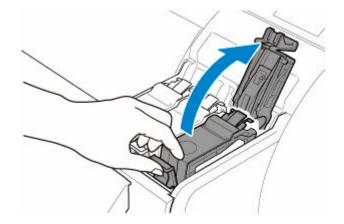

# Removing ink tank

1. Open ink tank cover.

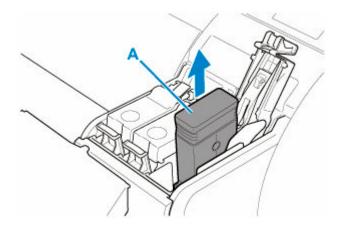

## >>>> Important

- Avoid jarring the printer a lot when replacing an ink tank. Handle the printer gently when replacing tanks. Jarring the printer during printing may affect printing quality.
- **2.** Press tip of ink tank lock lever of color for replacement horizontally and pull ink tank lock lever up to open it.

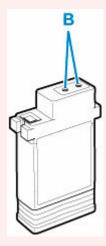

**3.** Remove ink tank by grips (A), and then tap **OK**.

## >>>> Important

- Do not turn off the printer, except for transportation, while the ink tank is removed. It may cause the interior of the ink tank cover to become soiled.
- Store the removed ink tank with ink remaining with the ink holes (B) facing up. Otherwise, ink may leak and cause stains. Put the removed ink tank in a plastic bag and close the bag.

## >>> Note

• Dispose of the used ink tank in accordance with local regulations.

# Loading ink tank

**1.** Before opening the pouch, tilt the ink tank to the left and right gently one or two times.

Agitate the ink in the ink tank by slowly rotating the ink tank upside-down and right side up repeatedly.

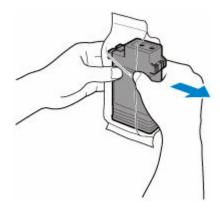

## >>> Important

- Do not remove and agitate an ink tank that has already been installed in the printer. Ink may leak out
- Failure to agitate the ink tank may cause the ink components to precipitate and may affect printing quality.

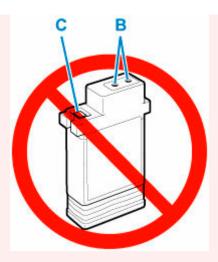

#### Note

- If the ink tank is at a low temperature, allow it to warm up to room temperature before installing.
- **2.** Open the pouch and remove the ink tank.

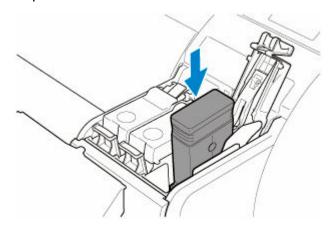

## >>>> Important

• Never touch the ink holes (B) or the metal contacts (C). This may cause stains, damage the ink tank, and affect printing quality.

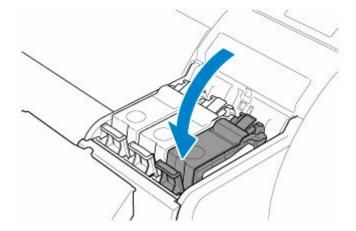

- Avoid dropping the ink tank after removing it from the pouch. Otherwise, ink may leak and cause stains.
- 3. Tap **OK** and insert ink tank into holder with ink holes down and metal contacts in front.

## >>> Important

- An ink tank cannot be loaded in the holder if the color or orientation is incorrect.
   If the ink tank does not fit in the holder, do not force it into the holder. Reinstall while checking the label color display, ink tank color, and ink tank orientation.
- **4.** Push the ink tank lock lever closed until it clicks into place.

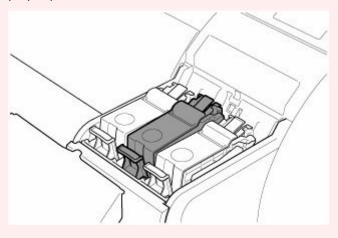

## >>> Important

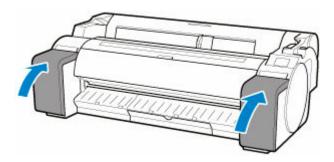

• Do not push the ink tank in by hand. Forcing the ink tank into the holder may damage the printer.

• If a 4.4 fl oz (130 ml) ink tank is installed facing the wrong direction, the rotating part of the ink tank lock lever come out of place. If this happens, open the ink tank lock lever to return it to the proper position.

5. Close ink tank cover.

# **Checking Ink Tank Levels**

On the touch screen, you can check how much ink is left in the ink tank.

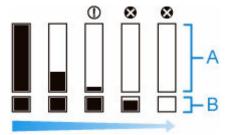

➡ Home Screen Menu Composition

The Current estimated ink levels screen appears.

This printer has ink tanks (A) and sub-ink tanks (B). Even if ink runs out, printing can continue with ink in the sub-ink tanks.

When the remaining ink is low, will appear on the remaining ink level. When ink runs out, will appear. See the figure below.

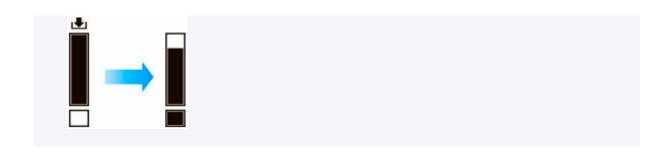

If the touch screen indicates to replace the ink tank, replace the ink tank. If a message is displayed indicating to check the remaining ink levels, or after tasks that consume a lot of ink such as large-format printing or head cleaning, check the remaining levels and replace ink tank as needed.

Replacing Ink Tanks

#### >>> Note

- Tap Order ink now to view the ink supplier information.
- When the ink tank is replaced, the sub-ink tank will be filled with ink.

During this time, is displayed above the ink level.

# When to Replace Ink Tanks

Replace or prepare to replace ink tanks in the following situations.

#### • If ink confirmation message appears on touch screen

If ink is low, the **Status** lamp lights orange and a notification message will appear on the touch screen. You can continue to print, but prepare the ink tanks.

- ➡ Checking Ink Tank Levels
- · Before print jobs and maintenance that consume a lot of ink

If little ink is left, there may not be enough for large-format printing, head cleaning, and maintenance, which require a lot of ink. Replace or prepare to replace the ink tanks in the following situations.

- ➡ Checking Ink Tank Levels
- · If message for ink replacement appears on touch screen

When the ink runs out, the **Status** lamp flashes orange, a message regarding ink tanks replacement appears on the touch screen, and printing is disabled. Replace the ink tank.

Replacing Ink Tanks

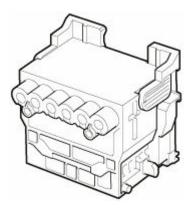

# **Print Head**

- Print Head
- ➤ Checking for Nozzle Clogging
- ➤ Cleaning the Print Head
- ➤ Replacing the Print Head

# **Print Head**

When purchasing, check the Model number.

## Model number: PF-07

## >>>> Note

• For instructions on replacing the print head, see Replacing the Print Head.

# **Checking for Nozzle Clogging**

If printing is faint or affected by banding in different colors, make sure the print head nozzles are clear by printing a test pattern to check the nozzles.

## >>>> Important

 When using cut sheets, do not move the release lever until instructions (guidance) for removing the paper are displayed.

Moving the release lever during printing or maintenance operations will cause the printer to stop.

#### Note

- · By default, nozzles are checked at fixed intervals.
  - → Auto maintenance settings

#### **Paper to Prepare**

#### When using rolls

An unused roll at least 10.00 in. (254.0 mm) wide

#### When using sheets

1 sheet of unused paper of at least A4/Letter size

- 1. Load paper.
  - ➡ Loading Rolls in the Printer
  - ➡ Loading Sheets in the Printer

Tap (Setup) > Maintenance on HOME screen.

➡ Home Screen Menu Composition

The Maintenance screen appears.

#### 3. Tap Nozzle Check.

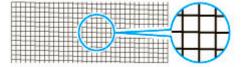

A confirmation message appears.

#### **4.** Tap **Yes**.

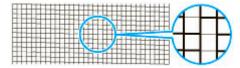

The printer now prints a test pattern for checking the nozzles.

#### **5.** Check the printing results.

If the horizontal lines are not faint or incomplete, the nozzles are clear.

If some sections of the horizontal lines are faint or incomplete, the nozzles for those colors are clogged.

If horizontal lines are faint or incomplete, execute print head cleaning.

# **Cleaning the Print Head**

If printing is faint, cleaning the print head may improve results.

Choose one of three print head cleaning modes (**Cleaning**, **Deep Cleaning**, or **System Cleaning**), depending on the problem to resolve.

#### Cleaning

Use this mode if printing is faint or contains foreign substances. This method of cleaning consumes the least amount of ink.

It takes about 2 to 3 minutes.

#### Deep Cleaning

Use this mode if no ink is ejected at all or if Cleaning does not solve the problem.

It takes about 3 minutes.

#### System Cleaning

Use this mode if printing is not improved after **Deep Cleaning**. **System Cleaning** consumes a very large amount of ink. Performing this frequently consumes the ink faster. Perform this only when needed.

It takes about 4 minutes.

## >>> Important

• Do not remove the maintenance cartridge or ink tanks during Cleaning, Deep Cleaning, or System Cleaning.

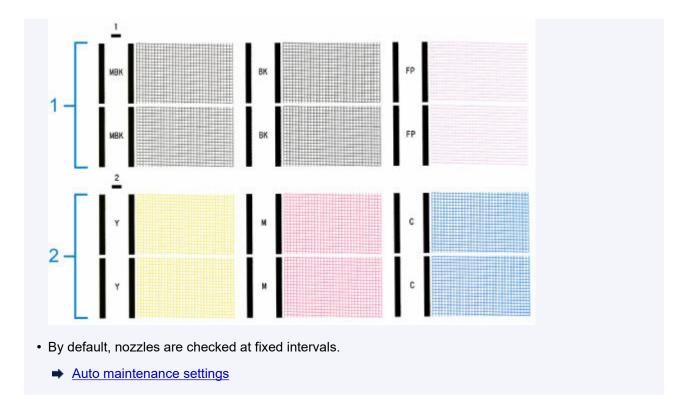

Ink may leak or an error may occur.

- If printing is not improved after **System Cleaning**, the print head may be at the end of its service life. Contact your Canon dealer for assistance.
- When using cut sheets, do not move the release lever until instructions (guidance) for removing the paper are displayed.

Moving the release lever during printing or maintenance operations will cause the printer to stop.

#### Note

• Check the nozzle check pattern and select an ink group for which to perform cleaning as needed. You can clean all print head or select the pattern below to clean the print head with a clogged nozzle.

Perform cleaning as follows.

- 1. Tap (Setup) > Maintenance on HOME screen.
  - → Home Screen Menu Composition

The Maintenance screen appears.

- 2. Tap Print Head Cleaning.
- 3. Tap Cleaning, Deep Cleaning, or System Cleaning.
- **4.** Tap ink group to be cleaned.
  - · All colors
  - Pattern 1: MBK / BK / FP
  - Pattern 2: Y / M / C

A confirmation message appears.

5. Tap Yes.

Head cleaning is now executed.

- **6.** Print a test pattern to check the nozzles and determine whether cleaning has cleared the nozzles.
  - ➡ Checking for Nozzle Clogging

# **Replacing the Print Head**

If the touch screen indicates to replace the print head or if instructed to do so by your Canon dealer, replace the print head.

# **Compatible Print Head**

For details on compatible print head, see Print Head.

## **Precautions When Handling Print Head**

Take the following precautions when handling the print head.

### Caution

- For safety, keep print head out of the reach of children.
- If ink is accidentally ingested, contact a physician immediately.
- Do not touch the print head immediately after printing. The print head becomes extremely hot, and there is a risk of burns.

## >>> Important

- There may be ink around the nozzles of the print head you remove. Handle the print head carefully during replacement. The ink may stain clothing.
- Do not open the print head pouch until immediately before installation. After removing the print head from the pouch, install it right away. If the print head is left as is after the pouch is opened, the nozzles may dry out, which may affect printing quality.

# **How to Replace Print Head**

#### Caution

When replacing the print head immediately after printing, wait a few minutes before replacing it. The
metal parts of the print head become hot during printing, and there is a risk of burns from touching
these parts.

#### >>> Important

 Your hands may become dirty during print head replacement. Use the gloves provided in the box with the new print head for replacement.

#### Note

- · Prepare a new ink tank when ink levels are low.
- Prepare a new maintenance cartridge when the remaining capacity of the maintenance cartridge is low.
- 1. Tap (Setup) > Maintenance on HOME screen.
  - ➡ Home Screen Menu Composition

The **Maintenance** screen appears.

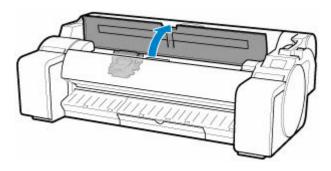

## 2. Tap Head Replacement.

## 3. Tap Start head replacement.

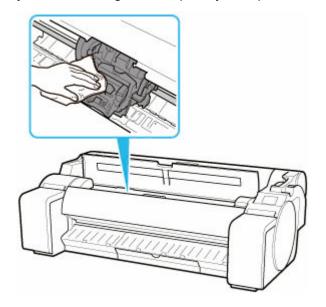

Ink begins being drawn in. When it finishes, instructions for the print head replacement procedure appear on the touch screen.

It takes about 1 to 2 minutes for ink to be drawn into the system and remove ink from the print head.

## 4. Open top cover.

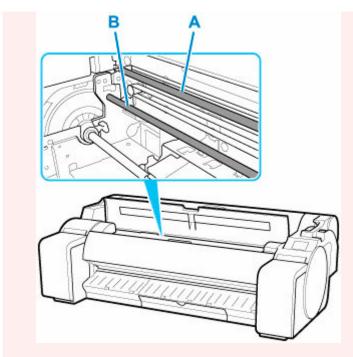

**5.** If the print head locking cover and print head lock lever are dirty, use a damp cloth that you have wrung out completely to wipe them clean.

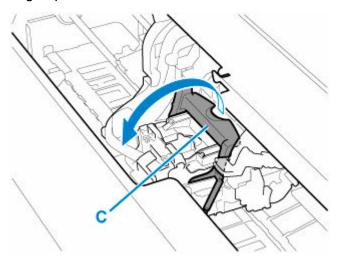

## >>>> Important

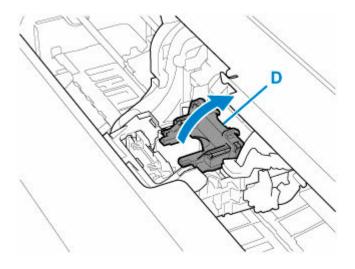

• Do not touch the linear scale (A) or carriage shaft (B). Touching these may cause malfunction.

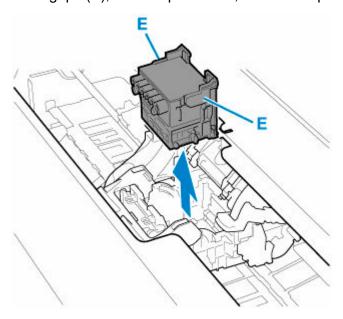

- Do not use tissue paper, paper towels, rough-textured cloth, or similar materials for cleaning so as not to scratch the surface.
- **6.** Pull down print head lock lever toward the front while holding its center (C) with your fingertip.

7. Grab grip (D) and open print head locking cover.

**8.** Grab grips (E), remove print head, and then tap **OK**.

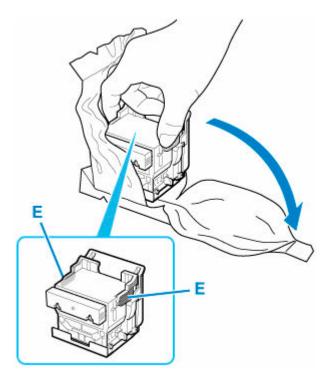

## >>> Important

• Never touch the metal contacts of the carriage. Furthermore, do not allow any dirt or debris to become adhered to the metal contacts of the carriage. These may damage the printer.

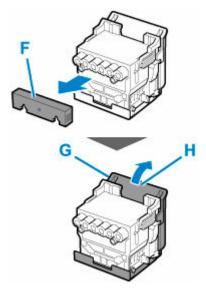

## >>> Note

- Dispose of the used print head in accordance with local regulations.
- **9.** Take new print head out of its pouch by grabbing grips (E).

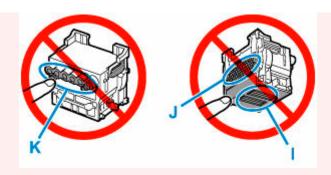

## **10.** Remove orange protective caps (F, G).

Grab grip (H) to remove protective cap (G).

## >>> Important

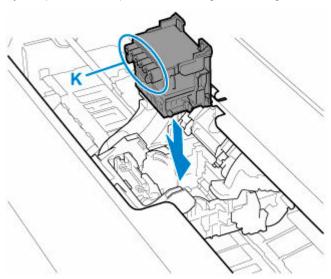

- Always carry the print head by holding its right and left grips. Never touch nozzle (I) or metal contacts (J). This may damage the print head and affect printing quality.
- Never touch the ink holes (K). This may affect printing quality.

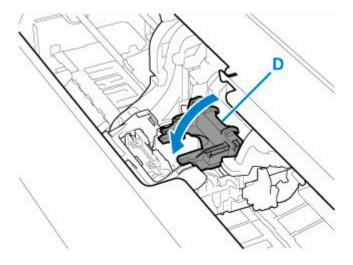

- The inside surface of the protective cap is coated with ink to protect the nozzle. Be careful not to touch these surfaces when removing the caps.
- The print head contains ink to protect the nozzle. We recommend removing the protective cap while holding it over the pouch that contained the print head or otherwise safely out of the way to avoid spilling ink and staining your clothes or the surrounding area. If ink accidentally spills, wipe off the ink with a dry cloth.
- If you need to put a print head somewhere temporarily before installation, do not set it down with the nozzles and metal contacts facing down. If the nozzles or metal contacts are damaged, it may affect the printing quality.
- Do not reattach the removed protective part. Dispose of these materials in accordance with local regulations.

#### **11.** Turn ink holes (K) toward the front and insert print head into carriage.

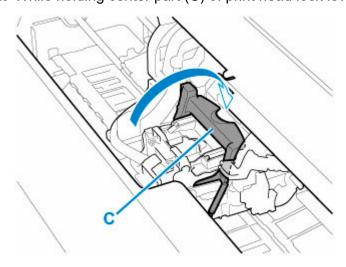

Insert the print head all the way into the carriage, while taking care to keep parts that were protected by the protective caps from touching the carriage.

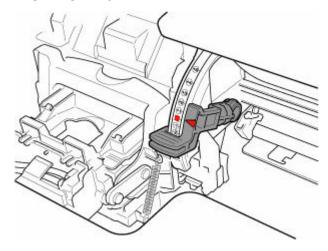

**12.** Grasp tab (D) of print head locking cover and lower it to front to lock print head.

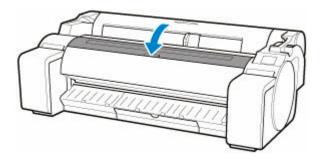

**13.** While holding center part (C) of print head lock lever, lower it toward back.

**14.** Align angle adjustment lever with the red square position.

**15.** Close top cover.

Ink now fills the print head. It takes about 10 minutes.

## >>> Important

• While ink is being filled, definitely do not remove the ink tank or maintenance cartridge. Ink may leak out.

## >>> Note

- Print head position adjustment is executed when **Print pattern after new head** is set to **ON**.

  Follow the instructions on the touch screen to load paper.
  - ➡ Auto maintenance settings

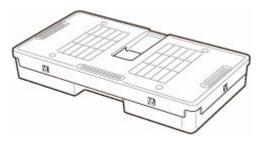

# **Maintenance Cartridge**

- ➤ Maintenance Cartridge
- ➤ Replacing the Maintenance Cartridge
- ➤ Checking the Remaining Maintenance Cartridge Capacity
- ➤ When to Replace the Maintenance Cartridge

## **Maintenance Cartridge**

When purchasing, check the Model number.

### Model number: MC-31

## >>>> Note

• For instructions on replacing the maintenance cartridge, see Replacing the Maintenance Cartridge.

## **Replacing the Maintenance Cartridge**

## **Compatible Maintenance Cartridges**

For details on compatible maintenance cartridge, see Maintenance Cartridge.

## **Precautions When Handling Maintenance Cartridge**

Take the following precautions when handling the maintenance cartridge.

## **⚠** Caution

- For safety, keep maintenance cartridge out of the reach of children.
- · If ink is accidentally ingested, contact a physician immediately.

#### >>> Important

- Do not remove the maintenance cartridge except to replace it. Ink may leak out.
- Do not remove a maintenance cartridge during initialization immediately after turning on the printer, during print head cleaning, while ink is being drawn out, or during initialization immediately after replacing the maintenance cartridge.

The maintenance cartridge may become damaged or ink may leak out.

- To prevent ink from leaking from a used maintenance cartridge, avoid dropping the cartridge or storing it at an angle. Otherwise, ink may leak and cause stains.
- Ink adheres to the top of the maintenance cartridge after it has been used. Handle the maintenance cartridge carefully during replacement. The ink may stain clothing.

## How to Replace a Maintenance Cartridge

If a message indicates you should replace a maintenance cartridge, check the message details and go to step 4.

- 1. Tap (Setup) > Maintenance on HOME screen.
  - ➡ Home Screen Menu Composition

The **Maintenance** screen appears.

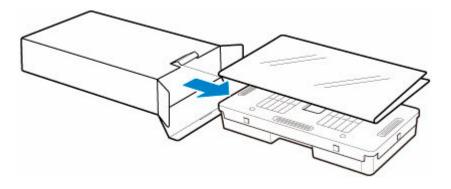

2. Tap Maintenance cartridge info.

The Maintenance cartridge info screen appears.

3. Tap Replace.

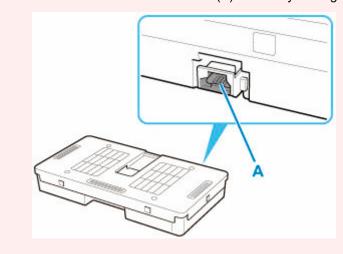

Instructions for the maintenance cartridge replacement procedure appear on the touch screen.

**4.** Open box, and remove plastic bag and maintenance cartridge.

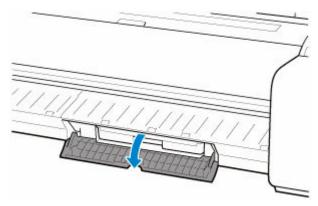

## >>> Important

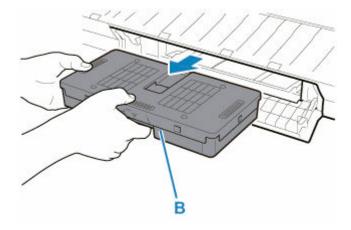

• Never touch the metal contacts (A). This may damage the maintenance cartridge.

5. Open maintenance cartridge cover.

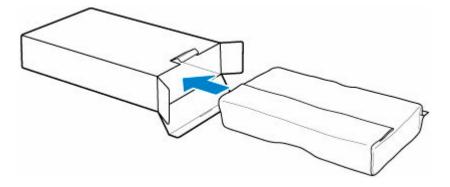

**6.** Hold the used maintenance cartridge by the grip (B) with one hand and put your other hand under the maintenance cartridge to hold it firmly on the bottom, keeping it level as you pull it out.

## >>>> Important

- A used maintenance cartridge is heavy. Always grasp the cartridge firmly and keep the
  cartridge level during removal. If you drop a used maintenance cartridge or store it at an angle,
  ink may leak and cause stains.
- 7. Put used maintenance cartridge in supplied plastic bag and store on flat surface.
- **8.** Check the top and bottom of the maintenance cartridge, place in the box, and store the box on a flat surface.

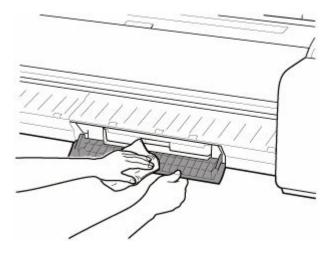

## >>> Important

• Always put the used maintenance cartridge back in the box and store the box on a flat surface.

#### Note

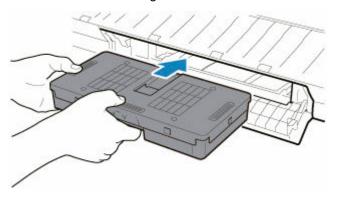

- Dispose of the used maintenance cartridge in accordance with local regulations.
- **9.** Wipe away any soiling on the maintenance cartridge cover.

## >>> Important

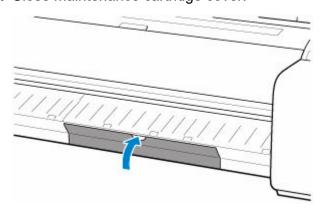

- Support the maintenance cartridge cover from underneath as you wipe it.
- **10.** Keeping the new maintenance cartridge level, insert it all the way in.

The maintenance cartridge is initialized.

## >>> Important

- Do not remove the maintenance cartridge during initialization immediately after replacing the maintenance cartridge. The maintenance cartridge may become damaged.
- **11.** Close maintenance cartridge cover.

## **Checking the Remaining Maintenance Cartridge Capacity**

The maintenance cartridge absorbs excess ink from borderless printing and print head cleaning. You can confirm the remaining capacity of the maintenance cartridge by checking the touch screen.

➡ Home Screen Menu Composition

The Maintenance screen appears.

### 2. Tap Maintenance cartridge info.

The Maintenance cartridge info screen appears.

If the touch screen indicates to replace the maintenance cartridge, replace the maintenance cartridge.

If a message appears indicating to check the remaining capacity of the maintenance cartridge, or before tasks that deplete much of the capacity such as head cleaning or preparations to move the printer, check the remaining maintenance cartridge capacity and prepare a new maintenance cartridge as needed.

➡ Replacing the Maintenance Cartridge

## When to Replace the Maintenance Cartridge

Replace or prepare to replace the maintenance cartridge in the following situations.

#### • If maintenance cartridge confirmation message appears on touch screen

When the maintenance cartridge is almost used up, the **Status** lamp lights orange and a notification message will appear on the touch screen. You can continue to print, but check the remaining maintenance cartridge capacity and prepare to replace the maintenance cartridge with a new one.

Checking the Remaining Maintenance Cartridge Capacity

#### · When the maintenance cartridge capacity is drastically depleted

Print head cleaning, print head replacement, and preparations to transfer the printer deplete much of the maintenance cartridge capacity. (In particular, preparing to move the printer depletes a lot of the capacity.)

Check the remaining maintenance cartridge capacity before this maintenance and replace the maintenance cartridge if necessary.

Checking the Remaining Maintenance Cartridge Capacity

#### · If message for maintenance cartridge replacement appears on touch screen

When the maintenance cartridge is used up, the **Status** lamp blinks orange, a message regarding maintenance cartridge replacement appears on the touch screen, and printing is disabled. Replace the maintenance cartridge with a new one.

➡ Replacing the Maintenance Cartridge

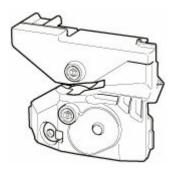

## **Cutter Blade**

- ➤ Cutter Blade
- ➤ Replacing the Cutter Blade

## **Cutter Blade**

When purchasing, check the Model number.

### Model number: CT-08

## >>>> Note

• For instructions on replacing the cutter blade, see Replacing the Cutter Blade.

## Replacing the Cutter Blade

## **Compatible Cutter Blade**

For details on compatible cutter blade, see Cutter Blade.

## **How to Replace Cutter Blade**

#### >>>> Important

• The cutter blade can not be replaced if there is paper in the moving range of the cutter. Remove the paper.

I. Tap (Setup) > Maintenance on HOME screen.

➡ Home Screen Menu Composition

The Maintenance screen appears.

#### 2. Tap Replace cutter blade unit.

A confirmation message appears.

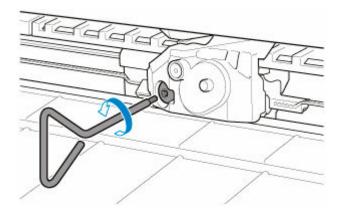

#### 3. Tap Yes.

The carriage moves and after it stops moving, instructions for the cutter blade replacement procedure appear on the touch screen.

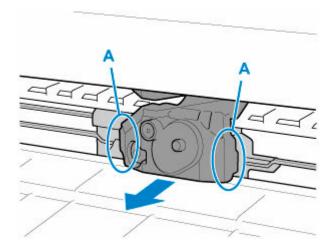

**4.** If cutter blade is dirty, use damp cloth that you have wrung out completely to wipe it clean.

## >>>> Important

- Do not use tissue paper, paper towels, rough-textured cloth, or similar materials for cleaning so as not to scratch the surface.
- 5. Turn hex screw with hex wrench until loose.

### 6. Remove cutter blade while holding A.

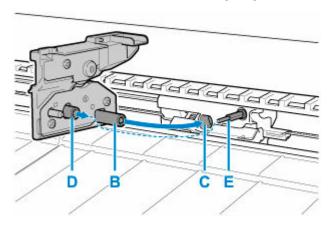

## **⚠** Caution

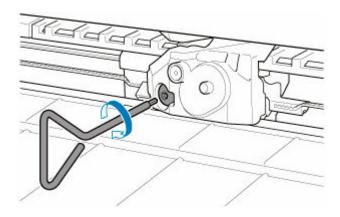

- Never touch any part other than A. This may stain your hands or cause injury. Additionally, this may damage the printer.
- Do not disassemble the cutter blade. Touching the blade may cause injury.

## >>> Note

- Dispose of the used cutter blade in accordance with local regulations.
- **7.** Install new cutter blade while aligning B to C and D to E.

8. Turn hex screw until securely fixed.

## >>> Important

- After the cutter blade is secured, check that the cutter blade does not come off. If the cutter blade comes off, this may damage the printer.
- **9.** Tap **Done**.
- **10.** Tap **Yes**.

# **Performing Maintenance Functions from Your Computer** (macOS)

- Opening Remote UI for Maintenance
- ➤ Cleaning the Print Heads
- Printing a Nozzle Check Pattern

## **Opening Remote UI for Maintenance**

You can perform maintenance of printer and change the settings from a Remote UI. The following is the procedure to open a Remote UI.

- 1. Open System Preferences, and select Printers & Scanners
- 2. Select your model from the printer list, and click Options & Supplies...
- 3. Click Show Printer Webpage... in General tab

Remote UI starts.

### >>> Note

 The password may have to be entered after Remote UI starts. In such a case, enter the password and click OK. In case you do not know the password, see "Password and Cookie."

## **Related Topics**

- Cleaning the Print Heads
- ➡ Printing a Nozzle Check Pattern
- ➡ Checking the Ink Status from Your Computer
- Updating Media Information in Printer Driver
- → Correcting Media Information in Printer Driver (When Printer Used in Shared Environment)
- **→** Confirm the Printer Paper Information

## **Cleaning the Print Heads**

The print head cleaning and Cleaning functions allow you to clear up clogged print headnozzle. Perform print head cleaning if printing is faint or a specific color fails to print, even though there is enough ink. If you perform Cleaning and the condition still does not improve, perform system cleaning.

The procedure for cleaning is as follows:

## Cleaning

1. Select Utilities from Remote UI

#### 2. Click Cleaning

Before running the cleaning, check the following items:

Check that the printer power is on. Then open the lnk Tank Cover.

Check the following items for each ink. Then, if necessary, perform Cleaning.

- Is there ink remaining in the tank?
- Is the ink tank attached properly?
   If the Ink Lamp is not lit, remove it and attach it again.
- · Did you install the ink tanks in their correct positions?

#### 3. Execute cleaning

Click Yes.

Print head cleaning starts.

#### 4. Check the results

Check the print results.

If cleaning the head once does not resolve the print head problem, clean it once more.

#### Important

Cleaning consumes a small amount of ink.
 Cleaning the print head frequently will rapidly deplete your printer's ink supply. Consequently, perform cleaning only when necessary.

## **Deep Cleaning**

**Deep Cleaning** is more thorough than cleaning. Perform deep cleaning when two **Cleaning** attempts do not resolve the print head problem.

1. Select Utilities from Remote UI

#### 2. Click Deep Cleaning

Before running the deep cleaning, check the following items:

Check that the printer power is on. Then open the lnk Tank Cover.

Check the following items for each ink. Then, if necessary, perform **Deep Cleaning**.

- Is there ink remaining in the tank?
- Is the ink tank attached properly?
   If the Ink Lamp is not lit, remove it and attach it again.
- Did you install the ink tanks in their correct positions?

#### 3. Execute deep cleaning

Click Yes.

Print head deep cleaning starts.

#### **4.** Check the results

Check the print results.

### >>> Important

Deep Cleaning consumes a larger amount of ink than Cleaning.
 Cleaning the print head frequently will rapidly deplete your printer's ink supply. Consequently, perform cleaning only when necessary.

## **System Cleaning**

Execute System Cleaning if the status does not improve even after Deep Cleaning is performed.

#### 1. Select Utilities from Remote UI

#### 2. Click System Cleaning

Before running the system cleaning, check the following items:

Check that the printer power is on. Then open the Ink Tank Cover.

Check the following items for each ink.

- Is there ink remaining in the tank?
- Is the ink tank attached properly?
   If the Ink Lamp is not lit, remove it and attach it again.
- · Did you install the ink tanks in their correct positions?

In addition, System Cleaning consumes an extremely large amount of ink.

Before executing this function, check the items below. Then, if you feel it necessary, execute **System Cleaning**.

- Did you use Nozzle Check to check the nozzle status and was there a problem?
- Did the status remain unchanged even after **Deep Cleaning** was executed?

#### 3. Execute system cleaning

Click Yes.

System cleaning starts.

#### **4.** Check the results

Check the print results.

## >>> Important

System Cleaning consumes an extremely large amount of ink.
 Executing system cleaning frequently will rapidly deplete your printer's ink supply. Therefore, execute system cleaning only when necessary.

## **Related Topic**

➡ Printing a Nozzle Check Pattern

## **Printing a Nozzle Check Pattern**

The nozzle check function allows you to check whether the print head is working properly by printing a nozzle check pattern. Print the pattern if printing becomes faint, or if a specific color fails to print.

The procedure for printing a nozzle check pattern is as follows:

## **Nozzle Check**

1. Select Utilities from Remote UI

#### 2. Click Nozzle Check

Before printing the nozzle check pattern, check the following items:

Check that the printer power is on. Then open the Ink Tank Cover.

Check the following items for each ink. Then, if necessary, perform Nozzle Check.

- Is there ink remaining in the tank?
- Is the ink tank attached properly?
   If the Ink Lamp is not lit, remove it and attach it again.
- Did you install the ink tanks in their correct positions?

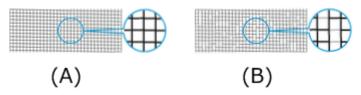

#### 3. Print a nozzle check pattern

Click Yes.

Printing of the nozzle check pattern begins.

#### 4. Check the print result

Check the print result.

- (A) As long as the horizontal lines are in line, and not missing, the nozzle is working normally.
- (B) Where the horizontal lines are not in line or are missing, the color nozzle is blocked.

From the nozzle check pattern printing results, if it becomes patchy or there are areas that cannot be printed, clean the print heads from **Cleaning**.

## **Related Topic**

Cleaning the Print Heads

## **Cleaning the Printer**

- ➤ Cleaning the Printer Exterior
- ➤ Cleaning Inside the Top Cover
- ➤ Cleaning the Print Head

## **Cleaning the Printer Exterior**

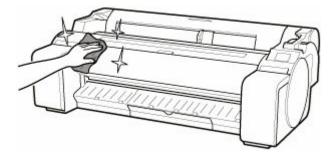

Clean the printer regularly to maintain better printing quality and help prevent problems.

To ensure a comfortable working environment, clean the printer exterior about once a month.

- 1. Turn printer off.
  - Turning the Printer On and Off
- 2. Unplug power cord from outlet.

#### Caution

- Always turn off the printer and unplug the power cord before cleaning or maintenance.
   Accidentally leaving the printer on poses a risk of injury if you touch moving parts inside the printer.
- **3.** Wring out soft cloth with water or watered-down neutral detergent, and use it to wipe off dirt. Clean the printer exterior and the power cord plug.

## **1** Warning

• Never use flammable solvents such as alcohol, benzine, or thinner. If these substances come into contact with electrical components inside the printer, there is a risk of fire or electrical shock.

## >>>> Important

- If the output guide is dirty, it may soil the edge of the paper when the paper is cut. We recommend cleaning the output guide even if it does not appear dirty, because it may actually be covered with paper dust.
  - ➡ Cleaning Inside the Top Cover
- Do not use tissue paper, paper towels, rough-textured cloth, or similar materials for cleaning so as not to scratch the surface.
- · When neutral detergent is used, be sure to wipe off the detergent with soft cloth with water.
- **4.** After cleaning, dry with a soft dry cloth.
- **5.** Plug power cord into outlet.

## Cleaning Inside the Top Cover

Clean inside the top cover about once a month to maintain better printing quality and help prevent problems.

Also clean inside the top cover in the following situations to ensure optimal operation.

- · If the printed surface or the underside of paper is dirty after printing
- · When a roll paper runs out
- · After borderless printing
- · After printing on small paper
- · After printing on paper that generates a lot of cutting debris
- · After changing the roll paper
- · After printing on paper that generates a lot of paper dust
- · After printing on adhesive paper

#### >>> Important

- If the platen inside the top cover becomes dirty, it may soil the underside of paper. We recommend cleaning the platen after borderless printing or printing on small paper.
- If the output guide is dirty, it may soil the edge of the paper when the paper is cut. We recommend cleaning the output guide even if it does not appear dirty, because it may actually be covered with paper dust.
- Printing on adhesive paper may leave adhesive on the platen, paper retainer, or other parts. To prevent paper jams, we recommend cleaning inside the top cover after printing.
- · Cleaning may not be performed if there is paper in the cleaning area. Remove the paper.

(Setup) > Maintenance on HOME screen.

➡ Home Screen Menu Composition

The Maintenance screen appears.

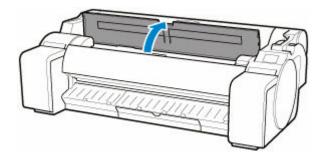

#### 2. Tap Platen cleaning.

A confirmation message appears.

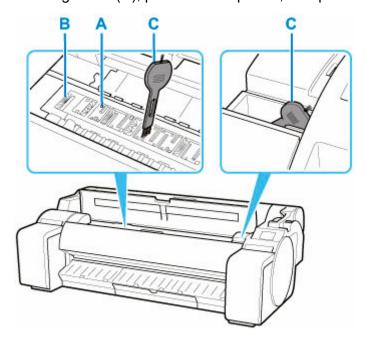

#### **3.** Tap **Yes**.

The carriage moves and after it stops moving, instructions appear on the touch screen.

#### 4. Open top cover.

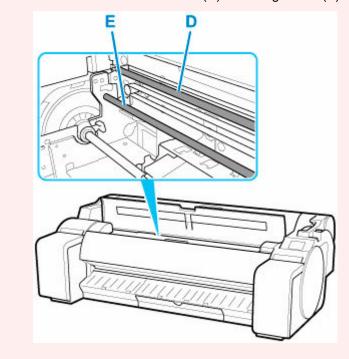

**5.** If paper dust has accumulated in vacuum holes (A) on platen or in ink grooves (B), use cleaning brush (C), provided with printer, to wipe it away.

## >>> Important

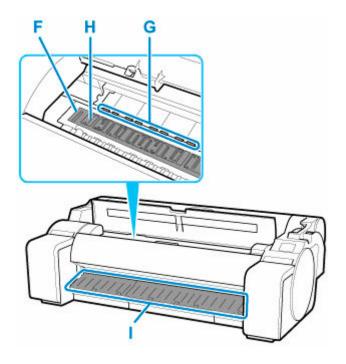

• Do not touch the linear scale (D) or carriage shaft (E). Touching these may cause malfunction.

#### Note

- If the cleaning brush is dirty, rinse it in water.
- **6.** Clean the inside of the top cover with a completely wrung out damp cloth.

Wipe away any ink residue and paper dust (debris from cutting) on entire platen (F), paper retainer (G), ink grooves (H), and output guide (I), and so on.

## **Marning**

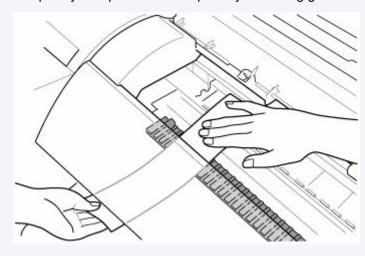

• Never use flammable solvents such as alcohol, benzine, or thinner. If these substances come into contact with electrical components inside the printer, there is a risk of fire or electrical shock.

### >>>> Important

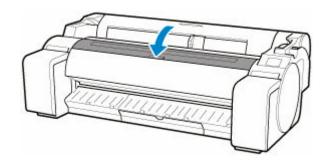

- Do not use a dry cloth to wipe inside the top cover. This may create a static charge, which may attract dust and affect the printing quality.
- Do not use tissue paper, paper towels, rough-textured cloth, or similar materials for cleaning so as not to scratch the surface.

#### >>> Note

• When cleaning between the platen and ejection guide, use a damp cloth that you have wrung out completely to wipe over the output tray and along grooves.

#### 2. Close top cover.

## **Other Maintenance**

- ➤ Preparing to Transfer the Printer
- ➤ Reinstalling the Printer
- ➤ Firmware update

## **Preparing to Transfer the Printer**

To protect the internal parts in transit, always follow these steps before transferring the printer to a new location.

For details on installing printer after transfer, see Reinstalling the Printer.

### >>> Important

- · Avoid tilting the printer excessively in transit. This may cause ink in the printer to leak and cause stains.
- When you select **Prepare to move**, any registered web services will be canceled. After moving your printer, set up your web services again.
  - ➡ Web service setup

#### Note

- The maintenance cartridge replacement may be required when you execute the **Prepare to** move menu. Prepare the maintenance cartridge in advance while referring below. The number
   of maintenance cartridge required varies depending on the amount remaining in the maintenance
   cartridge being used.
- If you can move the printer in a level state using casters or something similar, you do not need to execute **Prepare to move**.
- Always follow the instructions of the service representative when preparing to transfer the printer.

The following lists transport restrictions by type of transport.

#### Move on the same floor

Usage Examples: Move indoors by carrying

- Transport and storage in low temperature environments: No
- Required maintenance cartridges: 1

#### **Transport outdoors**

Usage Examples: Transport by vehicle

- Transport and storage in low temperature environments: Yes
- Required maintenance cartridges: 1

## **Preparing for Transportation**

- 1. Remove the paper.
  - Rolls
    - Removing the Roll from the Printer
  - Sheet
    - Removing Sheets
- **2.** If touch screen indicates to replace maintenance cartridge, replace maintenance cartridge.

➡ Replacing the Maintenance Cartridge

3. Tap (Setup) > Maintenance on HOME screen.

➡ Home Screen Menu Composition

The Maintenance screen appears.

- 4. Tap Prepare to move.
- 5. Tap Move on the same floor or Transport outdoors.

A confirmation message appears.

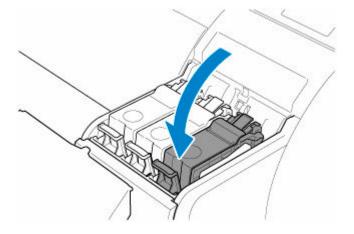

6. Tap Yes.

The printer is now prepared for transfer.

When the preparation is finished, a message prompting you to open the ink tank cover appears on the touch screen.

### >>>> Important

- If consumables must be replaced, a message appears on the touch screen, and preparation is disabled. If the message appears, tap **OK** and contact your Canon dealer for assistance.
- 7. Open ink tank cover to remove all ink tanks.
  - Replacing Ink Tanks
- 8. Push all ink tank lock levers closed until they click into place.

9. Close ink tank cover.

Ink is now drawn into the maintenance cartridge.

A confirmation message will appear when the process is finished.

### >>> Important

• Do not remove the maintenance cartridge except when the message indicating replacement is displayed.

If you remove the maintenance cartridge while ink is being removed, the ink may leak out.

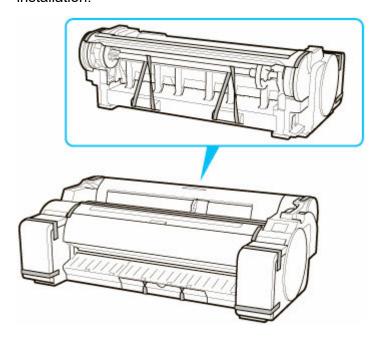

**10.** Press **ON** button and turn off printer.

## **Packing Printer**

1. Disconnect power cord and interface cable.

### >>> Important

- Turn off the printer before you unplug it. Unplugging the printer before it is off and moving it may damage the printer. If you accidentally unplug the printer, plug it in again, reinstall the ink tanks, and follow this procedure again.
- **2.** Tape down printer covers to secure them, in the reverse order of tape removal during installation.

- **3.** Remove the stand by reversing the installation procedure, when it was attached to the printer.
- **4.** Disassemble and repackage the stand by following the installation procedure in reverse.
- **5.** Repack roll holder, holder stopper, and printer in shipping materials, and then package them in shipping box.

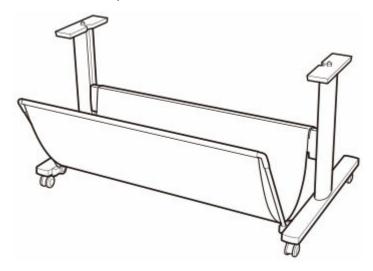

## **Reinstalling the Printer**

The basic workflow for reinstalling the printer is as follows.

For detailed instructions, see the Setup Guide.

## **Assemble the stand (Option)**

**1.** To use the optional stand, assemble the stand by referring to the Printer Stand Setup Guide that was provided with the stand.

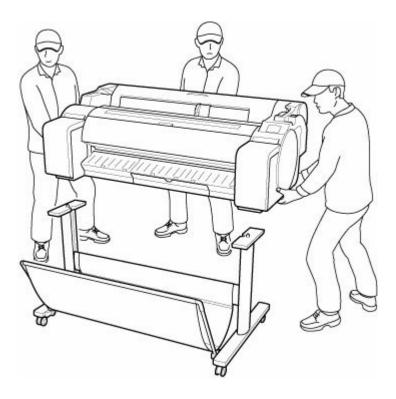

### ▲ Caution

- The stand must be assembled by at least two people on a flat surface. Attempting assembly by yourself poses a risk of injury or bending the Stand.
- When assembling the stand, lock all four of the casters. Attempting to move the stand when the casters are locked poses a risk of injury or damage to the location site.
- When moving the stand, make sure that the basket does not graze the floor and that all four
  of the casters are unlocked before moving the stand. Not doing so may damage the basket,
  scratch the floor, or cause injuries.

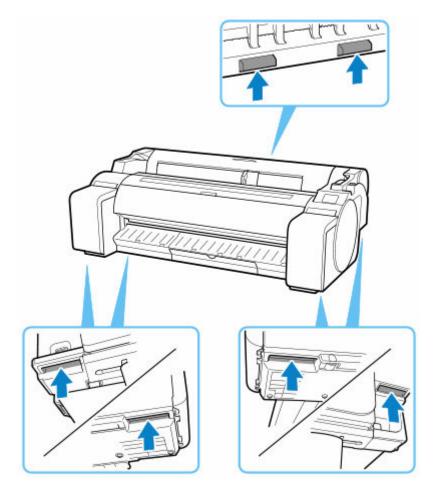

## Install the printer

**1.** Mount the printer on the assembled stand and tighten the screws firmly.

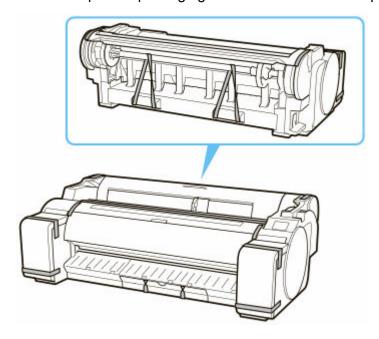

## **⚠** Caution

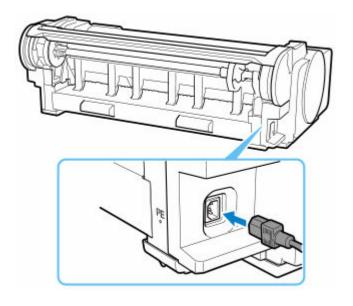

- Moving the printer requires at least three people. Be careful to avoid back strain and other injuries.
- When moving the printer, firmly grasp the carrying grips. The printer may be unsteady if you hold it at other positions, which poses a risk of injury from dropping the printer.

- When placing the printer on the stand, lock all four of the casters of the stand. Attempting to place the printer on the stand while the casters are not locked poses a risk of injury.
- **2.** Remove tape and packaging material attached to the printer.

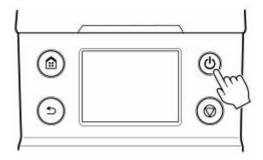

**3.** Connect the power cord to the power cord connector on the right side of the printer.

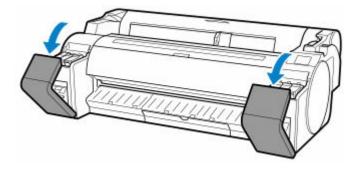

- **4.** Plug the power cord into the outlet.
- **5.** Press **ON** button to turn on printer.

When "Install the printer here? Do not install the ink tanks yet." appears, tap Yes.

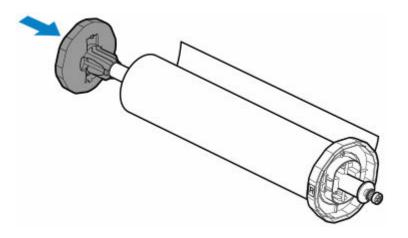

**6.** When instructions for loading ink tank appear on operation panel, open ink tank cover and load ink tank.

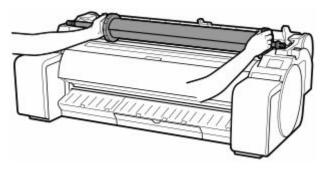

7. Loading Rolls on the roll holder

(See "Loading Rolls on the Roll Holder.")

### 8. Load the Roll Media in the printer.

(See "Loading Rolls in the Printer.")

#### **9.** Install the software.

Note that the driver installation procedure varies depending on the type of connection.

(See "Installing the Printer Driver" (Windows).)

(See "Installing the Printer Driver" (macOS).)

#### >>> Important

• When the printer is connected to a network (via TCP/IP), the printer's IP address may be changed if you reinstall the printer.

In this case, be sure to reconfigure the printer's IP address.

- When you select **Prepare to move**, any registered web services will be canceled. After moving your printer, set up your web services again.
  - ➡ Web service setup

## Firmware update

### >>> Important

- When you use this function, make sure the printer is connected to the Internet.
- The administrator password is required to change settings if it is enabled for changing settings using the operation panel.

## **Using Operation Panel**

- 1. Tap (Setup) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Printer settings.
- 3. Tap Firmware update.

If an administrator password is set, enter the password.

- 4. Tap Install update.
- 5. Tap Yes.
- **6.** Confirm displayed message and tap **Start update**.

## **Using Remote UI**

- 1. Start up Remote UI.
  - → Start up Remote UI
- 2. Select Firmware update.
- 3. Select Install update.
- 4. Confirm displayed message and select Update.

#### Note

- If the firmware update is not complete, check the following and take an appropriate action.
  - Check the network settings such as a wireless router.
  - If Cannot connect to the server. is displayed on the touch screen, select OK and try again after a while.

## **Printer specifications**

#### GP-300 / GP-5300

Power supply	100-240 V AC (50/60 Hz)
Power consumption	When printing: 74 W max. *1
	In Sleep mode: 2.0 W max. *1
	Standby (all ports connected): 2.1 W max.
	When power is off: 0.3 W max. *2
	*1 Wired LAN connection
	*2 The printer uses a trace amount of power even when turned off. To stop all power consumption, turn off the printer and unplug the power cord.
Operating environment	Temperature: 59 to 86 °F (15 to 30 °C)
	<b>Humidity:</b> 10 to 80 % RH (with no condensation)
Dimensions (W x D x H)	Printer only:
	Approx. 50.8 x 29.5 x 17.3 in. (1289 x 748 x 439 mm)
	Printer and Stand SD-33 (when opening the basket):
	Approx. 50.8 x 34.3 x 41.8 in. (1289 x 870 x 1060 mm)
	Stand may not be provided depending on the region where the printer is purchased.
Weight	Printer only (without print head and ink tanks):
	Approx. 108 lb (49 kg)
	Printer and Stand SD-33 (without print head and ink tanks):
	Approx. 134 lb (61 kg)

Printer only:
Approx. 66.5 x 53.5 x 29.1 in. (1689 x 1358 x 739 mm)
Printer and Stand SD-33 (when opening the basket):
Approx. 66.5 x 57.9 x 53.6 in. (1689 x 1470 x 1360 mm)

#### GP-200 / GP-5200

Power supply	100-240 V AC (50/60 Hz)
Power consumption	When printing: 71 W max. *1
	In Sleep mode: 2.0 W max. *1
	Standby (all ports connected): 2.1 W max.
	When power is off: 0.3 W max. *2
	*1 Wired LAN connection
	*2 The printer uses a trace amount of power even when turned off. To stop all power consumption, turn off the printer and unplug the power cord.
Operating environment	Temperature: 59 to 86 °F (15 to 30 °C)
	<b>Humidity:</b> 10 to 80 % RH (with no condensation)
Dimensions (W x D x H)	Printer only:
	Approx. 38.7 x 29.5 x 17.3 in. (982 x 748 x 439 mm)
	Printer and Stand SD-24 (when opening the basket):
	Approx. 38.7 x 34.3 x 41.8 in. (982 x 870 x 1060 mm)
	Stand may not be provided depending on the region where the printer is purchased.
Weight	Printer only (without print head and ink tanks):
	Approx. 91 lb (41 kg)
	Printer and Stand SD-24 (without print head and ink tanks):
	Approx. 115 lb (52 kg)
Space for installation (W x D x	Printer only:
н)	Approx. 54.5 x 53.5 x 29.1 in. (1382 x 1358 x 739 mm)
	Printer and Stand SD-24 (when opening the basket):
	Approx. 54.5 x 57.9 x 53.6 in. (1382 x 1470 x 1360 mm)

# Printing performance

Print method	Bubblejet
Maximum resolution	2400 dpi (horizontally) * x 1200 dpi (vertically)
	* Prints with a minimum 1/2400 inch dot pitch between ink droplets.
Print head	PF-07

Number of nozzles	2560 nozzles per color
-------------------	------------------------

## Memory and hard disk

Memory	Physical memory 2GB
Hard disk capacity	500 GB
	Personal mail boxes (Permanent storage area): 308 GB
Print job storage capacity	Common Box: 100 jobs
	Personal Boxes: 100 jobs

## Interface

USB and the network can be used at the same time.

You cannot use Wi-Fi and wired LAN at the same time.

USB	Hi-Speed USB *
	* To use Hi-Speed USB, your computer must support Hi-Speed USB. Additionally, the Hi-Speed USB interface is completely backward compatible with USB 1.1, so the printer can be connected even if the computer interface is USB 1.1.
USB memory	USB flash drive
LAN	Wired LAN: IEEE802.3ab (1000BASE-T) / IEEE802.3u (100BASE-TX) / IEEE802.3 (10BASE-T) Wi-Fi: IEEE802.11n / IEEE802.11g / IEEE802.11b

## **Network Specifications**

Communication protocol	SNMP, HTTP, TCP/IP (IPv4/IPv6), FTP
Wired LAN specifications	Compliance standards: IEEE802.3ab (1000BASE-T) / IEEE802.3u (100BASE-TX) / IEEE802.3 (10BASE-T)
	<b>Transmission speed:</b> 10 Mbps / 100 Mbps / 1000 Mbps (automatically selected)
	Security:IEEE802.1X (EAP-TLS/EAP-TTLS/PEAP)
Wi-Fi specifications	Compliance standards: IEEE802.11n / IEEE802.11g / IEEE802.11b
	Frequency range: 2.4 GHz
	<b>Channels:</b> 1-11 or 1-13 *
	* Varies by country and region.

Setup:
WPS (push button method/PIN code method)
Easy wireless connect
'

## Operating Conditions

If operating conditions of the operating system are high, follow those.

#### **Windows**

Compatible Operating System (Standard supplied	Windows 10
printer driver)	Windows 8.1
	Windows 7
	Windows Server 2019
	Windows Server 2016
	Windows Server 2012 R2
	Windows Server 2012
	Windows Server 2008 R2
	Use the latest Service Pack available.
Free hard disk space	20 GB or more

#### macOS

Compatible Operating System (Standard supplied printer driver)	macOS High Sierra 10.13.6 - macOS Big Sur 11
Free hard disk space	20 GB or more

#### **Other Supported OS**

iOS, iPadOS, Android

Some functions may not be available with the supported OS.

- An Internet connection is required to use the Online Manual.
- To install the software while using Windows, you must have a CD-ROM drive or a network connection.
- To install the software while using macOS, you must have a network connection.

### Ink

For information on the ink the printer supports, see <a href="Ink Tanks">Ink Tanks</a>.

## Paper

For details on the compatible media types, see Paper Information List.

For details on the paper widths supported by the printer, see  $\underline{\text{Paper Sizes}}$ .

For details about Print Area, see Print Area.

#### **Print Area**

A margin required by the printer is added with respect to the size of paper loaded in the printer. Except in borderless printing, the actual printing area corresponds to the paper size minus the space for this margin.

#### Note

- Printable Area: The area that can be printed.
- For borderless printing with roll paper, the margin is 0 in. (0 mm).
  - Printing without Edges Based on the Scenarios (Windows)
  - ➡ Printing without Edges Based on the Scenarios (macOS)
- · Recommended Print Area: We recommend printing within this area.
- To match the document size with the actual printing area, print on oversize paper with the required margin added.
  - Printing to Oversized Paper Sizes (Windows)
  - ➡ Printing to Oversized Paper Sizes (macOS)

#### **Sheets**

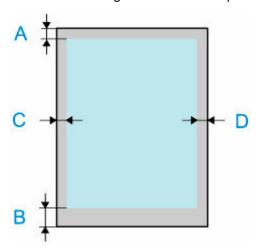

#### **Printable Area:**

A margin of 0.2 in. (3 mm) on top, 0.5 in. (12.7 mm) on bottom\*, and 0.2 in. (3 mm) on left and right sides is required.

#### **Recommended Print Area:**

A margin of 0.8 in. (20 mm) on top, 0.8 in. (20 mm) on bottom\*, and 0.2 in. (3 mm) on left and right sides is required.

\* The bottom margin for cut sheet depends on an OS and applications.

- A: Top Edge
- B: Bottom Edge
- C: Left Edge
- D: Right Edge

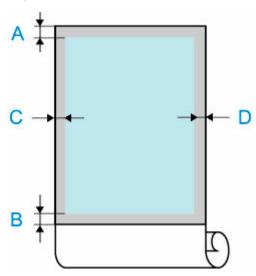

## Rolls

#### **Printable Area:**

A margin of 0.2 in. (3 mm) on top and bottom and 0.2 in. (3 mm) on left and right sides is required. For borderless printing, the margins on top, bottom, left, and right are 0 in. (0 mm). For paper that supports borderless printing, see Paper Information List.

#### **Recommended Print Area:**

A margin of 0.8 in. (20 mm) on top, 0.2 in. (3 mm) on bottom, and 0.2 in. (3 mm) on left and right sides is required.

A: Top Edge

B: Bottom Edge

C: Left Edge

D: Right Edge

Quick Guide	Replacing paper, ink tanks, and print head.
Setup Guide	Installing the printer and software.
Printer Stand Setup Guide	Assembling the stand.

## Safety

- Safety Precautions
- ➤ Regulatory Information
- ➤ WEEE (EU&EEA)
- ➤ When Repairing, Lending, or Disposing of the Printer

### **Safety Precautions**

#### **Choosing a location**

- · Never install the printer on an unstable or vibrating surface.
- Do not install the printer in locations that are very humid or dusty, in direct sunlight, outdoors, or close to a heating source.

To avoid the risk of fire or electric shocks, use the printer under the operating environment specified in the Specifications.

- · Do not place the printer on a thick rug or carpet.
- Do not place the printer with its back attached to the wall.
- · We recommend ensuring ample space for installation.
- Do not install the printer near sources of strong electromagnetic fields, whether equipment that generates such fields or places where such fields occur.

### **Power Supply**

- Ensure that the area around the power outlet is kept clear at all times so you can easily unplug the power cord if necessary.
- Never remove the plug by pulling on the cord.
   Pulling the cord may damage the power cord, leading to possible fire or electrical shock.
- · Do not use an extension lead/cord.

### **Working Around the Printer**

- · Never put your hands or fingers in the printer while it is printing.
- Firmly grasp the carrying grips on each side in the base. Holding the printer at other positions is dangerous and cause injury and damage if the printer is dropped.
- Use the following number of people to hold the printer when transporting the printer by carrying it. The weight may cause pain such as back pain.

For the GP-300, GP-5300: 3 people or more

For the GP-200, GP-5200: 3 people or more

- When using and transferring the printer, do not tilt it, stand it on its side, or turn it upside down. There is a risk of the ink spilling.
- When transferring the printer tilted, always perform the steps in "Preparing to Transfer the Printer" in order to protect the internal structure.
- Do not place any object on the printer. Especially do not place metal objects (paper clips, staples, etc.) or containers of flammable solvents (alcohol, thinners, etc.) on top of the printer.

### Print Heads/Ink Tanks/Maintenance Cartridges

Keep ink tanks out of the reach of children. In case ink is accidentally licked or swallowed, rinse out
mouth or give one or two glasses of water to drink. If irritation or discomfort occurs, obtain medical
advice immediately.

- In case ink gets in contact with eyes, rinse with water immediately. In case ink gets in contact with skin, wash with soap and water immediately. If irritation to eyes or skin persists, obtain medical advice immediately.
- Never touch the electrical contacts on a print head after printing. The metal parts may be very hot and could cause burns.
- Do not throw ink tanks and maintenance cartridges into fire.
- Do not attempt to disassemble or modify the print head, ink tanks, and maintenance cartridges.
- Avoid dropping or shaking print head, ink tanks, and maintenance cartridges.

### **Regulatory Information**

#### Users in the U.S.A.

FCC Notice (U.S.A. Only) For 120V, 60Hz model

Model Number: K10548/K10547 (Contains FCC Approved WLAN Module K30357)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of a shielded cable is required to comply with Class B limits in Subpart B of Part 15 of the FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The equipment complies with FCC radiation exposure limits for at uncontrolled equipment. This equipment should be installed and operated with minimum distance at least 20cm between the radiator and persons body (excluding extremities: hands, wrists, feet and ankles) and must not be colocated or operated with any other antenna or transmitter.

Canon U.S.A., Inc.
One Canon Park
Melville, New York 11747
1-800-652-2666

## Interference

Do not use the printer around medical equipment or other electronic devices. Signals from the printer may interfere with the correct operation of these devices.

### WEEE (EU&EEA)

### Only for European Union and EEA (Norway, Iceland and Liechtenstein)

These symbols indicate that this product is not to be disposed of with your household waste, according to the WEEE Directive (2012/19/EU), the Battery Directive (2006/66/EC) and/or national legislation implementing those Directives. If a chemical symbol is printed beneath the symbol shown above, in accordance with the Battery Directive, this indicates that a heavy metal (Hg = Mercury, Cd = Cadmium, Pb = Lead) is present in this battery or accumulator at a concentration above an applicable threshold specified in the Battery Directive. This product should be handed over to a designated collection point, e.g., on an authorized one-for-one basis when you buy a new similar product or to an authorized collection site for recycling waste electrical and electronic equipment (EEE) and batteries and accumulators. Improper handling of this type of waste could have a possible impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. Your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources. For more information about the recycling of this product, please contact your local city office, waste authority, approved scheme or your household waste disposal service or visit www.canoneurope.com/weee, or www.canoneurope.com/battery.

# Nur für Europäische Union und EWR (Norwegen, Island und Liechtenstein)

Diese Symbole weisen darauf hin, dass dieses Produkt gemäß WEEE-Richtlinie (2012/19/EU; Richtlinie über Elektro- und Elektronik-Altgeräte), Batterien-Richtlinie (2006/66/EG) und nationalen Gesetzen zur Umsetzung dieser Richtlinien nicht über den Hausmüll entsorgt werden darf. Falls sich unter dem oben abgebildeten Symbol ein chemisches Symbol befindet, bedeutet dies gemäß der Batterien-Richtlinie, dass in dieser Batterie oder diesem Akkumulator ein Schwermetall (Hg = Quecksilber, Cd = Cadmium, Pb = Blei) in einer Konzentration vorhanden ist, die über einem in der Batterien-Richtlinie angegebenen Grenzwert liegt. Dieses Produkt muss bei einer dafür vorgesehenen Sammelstelle abgegeben werden. Dies kann z. B. durch Rückgabe beim Kauf eines neuen ähnlichen Produkts oder durch Abgabe bei einer autorisierten Sammelstelle für die Wiederaufbereitung von Elektro- und Elektronik-Altgeräten sowie Batterien und Akkumulatoren geschehen. Der unsachgemäße Umgang mit Altgeräten kann aufgrund potenziell gefährlicher Stoffe, die generell mit Elektro- und Elektronik-Altgeräten in Verbindung stehen, negative Auswirkungen auf die Umwelt und die menschliche Gesundheit haben. Durch Ihre Mitarbeit bei der umweltgerechten Entsorgung dieses Produkts tragen Sie zu einer effektiven Nutzung natürlicher Ressourcen bei. Um weitere Informationen über die Wiederverwertung dieses Produkts zu erhalten, wenden Sie sich an Ihre Stadtverwaltung, den öffentlich-rechtlichen Entsorgungsträger, eine autorisierte Stelle für die Entsorgung von Elektro- und Elektronik-Altgeräten

oder Ihr örtliches Entsorgungsunternehmen oder besuchen Sie www.canon-europe.com/weee, oder www.canon-europe.com/battery.

### Union Européenne, Norvège, Islande et Liechtenstein uniquement.

Ces symboles indiquent que ce produit ne doit pas être mis au rebut avec les ordures ménagères, comme le spécifient la Directive européenne DEEE (2012/19/UE), la Directive européenne relative à l'élimination des piles et des accumulateurs usagés (2006/66/CE) et les lois en vigueur dans votre pays appliquant ces directives. Si un symbole de toxicité chimique est imprimé sous le symbole illustré ci-dessus conformément à la Directive relative aux piles et aux accumulateurs, il indigue la présence d'un métal lourd (Hg = mercure, Cd = cadmium, Pb = plomb) dans la pile ou l'accumulateur à une concentration supérieure au seuil applicable spécifié par la Directive. Ce produit doit être confié au distributeur à chaque fois que vous achetez un produit neuf similaire, ou à un point de collecte mis en place par les collectivités locales pour le recyclage des Déchets des Équipements Électriques et Électroniques (DEEE). Le traitement inapproprié de ce type de déchet risque d'avoir des répercussions sur l'environnement et la santé humaine, du fait de la présence de substances potentiellement dangereuses généralement associées aux équipements électriques et électroniques. Votre entière coopération dans le cadre de la mise au rebut correcte de ce produit favorisera une meilleure utilisation des ressources naturelles. Pour plus d'informations sur le recyclage de ce produit, contactez vos services municipaux, votre écoorganisme ou les autorités locales compétentes, ou consultez le site www.canon-europe.com/weee, ou www.canon-europe.com/battery.

# Uitsluitend bestemd voor de Europese Unie en EER (Noorwegen, IJsland en Liechtenstein)

Met deze symbolen wordt aangegeven dat dit product in overeenstemming met de AEEA-richtlijn (2012/19/EU), de richtlijn 2006/66/EG betreffende batterijen en accu's en/of de plaatselijk geldende wetgeving waarin deze richtlijnen zijn geïmplementeerd, niet bij het normale huisvuil mag worden weggegooid. Indien onder het hierboven getoonde symbool een chemisch symbool gedrukt staat, geeft dit in overeenstemming met de richtlijn betreffende batterijen en accu's aan dat deze batterij of accu een zwaar metaal bevat (Hg = kwik, Cd = cadmium, Pb = lood) waarvan de concentratie de toepasselijke drempelwaarde in overeenstemming met de genoemde richtlijn overschrijdt. Dit product dient te worden ingeleverd bij een hiervoor aangewezen inzamelpunt, bijv. door dit in te leveren bij een hiertoe erkend verkooppunt bij aankoop van een gelijksoortig product, of bij een officiële inzameldienst voor de recycling van elektrische en elektronische apparatuur (EEA) en batterijen en accu's. Door de potentieel gevaarlijke stoffen die gewoonlijk gepaard gaan met EEA, kan onjuiste verwerking van dit type afval mogelijk nadelige gevolgen hebben voor het milieu en de menselijke gezondheid. Uw medewerking bij het op juiste wijze weggooien van dit product draagt bij tot effectief gebruik van natuurlijke hulpbronnen. Voor verdere informatie over recycling van dit product kunt u contact opnemen met uw plaatselijke gemeente,

afvaldienst, officiële dienst voor klein chemisch afval of afvalstortplaats, of kunt u terecht op www.canoneurope.com/weee, of www.canon-europe.com/battery.

# Sólo para la Unión Europea y el Área Económica Europea (Noruega, Islandia y Liechtenstein)

Estos iconos indican que este producto no debe desecharse con los residuos domésticos de acuerdo con la Directiva sobre RAEE (2012/19/UE) y la Directiva sobre Pilas y Acumuladores (2006/66/CE) y/o la legislación nacional. Si aparece un símbolo químico bajo este icono, de acuerdo con la Directiva sobre Pilas y Acumuladores, significa que la pila o el acumulador contiene metales pesados (Hg = Mercurio, Cd = Cadmio, Pb = Plomo) en una concentración superior al límite especificado en dicha directiva. Este producto deberá entregarse en un punto de recogida designado, por ejemplo, entregándolo en el lugar de venta al adquirir un producto nuevo similar o en un centro autorizado para la recogida de residuos de aparatos eléctricos y electrónicos (RAEE), baterías y acumuladores. La gestión incorrecta de este tipo de residuos puede afectar al medio ambiente y a la salud humana debido a las sustancias potencialmente nocivas que suelen contener estos aparatos. Su cooperación en la correcta eliminación de este producto contribuirá al correcto aprovechamiento de los recursos naturales. Los usuarios tienen derecho a devolver pilas, acumuladores o baterías usados sin coste alguno. El precio de venta de pilas, acumuladores y baterías incluye el coste de la gestión medioambiental de su desecho, y no es necesario mostrar la cuantía de dicho coste en la información y la factura suministradas a los usuarios finales. Si desea más información sobre el reciclado de este producto, póngase en contacto con su municipio, el servicio o el organismo encargado de la gestión de residuos domésticos o visite www.canon-europe.com/ weee, o www.canon-europe.com/battery.

# Només per a la Unió Europea i a l'Espai Econòmic Europeu (Noruega, Islàndia i Liechtenstein)

Aquests símbols indican que aquest producte no s'ha de llençar amb les escombraries de la llar, d'acord amb la RAEE (2012/19/UE), la Directiva relativa a piles i acumuladors (2006/66/CE) i la legislació nacional que implementi aquestes directives. Si al costat d'aquest símbol hi apareix imprès un símbol químic, segons especifica la Directiva relativa a piles i acumuladors, significa que la bateria o l'acumulador conté un metall pesant (Hg = mercuri, Cd = cadmi, Pb = plom) en una concentració superior al límit aplicable especificat en la Directiva. Aquest producte s'hauria de lliurar en un dels punts de recollida designats, com per exemple, intercanviant un per un en comprar un producte similar o lliurant-lo en un lloc de recollida autoritzat per al reciclatge de residus d'aparells elèctrics i electrònics (RAEE) i piles i acumuladors. La manipulació inadequada d'aquest tipus de residus podria tenir un impacte negatiu en l'entorn i en la salut humana, a causa de les substàncies potencialment perilloses que normalment estan associades a l'RAEE. La vostra cooperació a l'hora de rebutjar correctament aquest producte contribuirà a la utilització efectiva dels recursos naturals. Els usuaris tenen dret a retornar les bateries o

els acumuladors usats sense cap càrrec. El preu de venda de les bateries i els acumuladors inclou el cost de la gestió ambiental dels residus i no es necessari mostrar l'import d'aquest cost en aquest fullet o en la factura que es lliuri a l'usuari final. Per a més informació sobre el reciclatge d'aquest producte, contacteu amb l'oficina municipal, les autoritats encarregades dels residus, el pla de residus homologat o el servei de recollida d'escombraries domèstiques de la vostra localitat o visiteu www.canon-europe.com/weee, o www.canon-europe.com/battery.

### Solo per Unione Europea e SEE (Norvegia, Islanda e Liechtenstein)

Questi simboli indicano che il prodotto non può essere smaltito con i rifiuti domestici, ai sensi della Direttiva RAEE (2012/19/UE), della Direttiva sulle Batterie (2006/66/CE) e/o delle leggi nazionali che attuano tali Direttive. Se sotto il simbolo indicato sopra è riportato un simbolo chimico, in osservanza della Direttiva sulle batterie, tale simbolo indica la presenza di un metallo pesante (Hg = Mercurio, Cd = Cadmio, Pb = Piombo) nella batteria o nell'accumulatore con un livello di concentrazione superiore a una soglia applicabile specificata nella Direttiva sulle batterie. Il prodotto deve essere conferito a un punto di raccolta designato, ad esempio il rivenditore in caso di acquisto di un nuovo prodotto simile oppure un centro di raccolta autorizzato per il riciclaggio di rifiuti di apparecchiature elettriche ed elettroniche (RAEE) nonché di batterie e accumulatori. Un trattamento improprio di questo tipo di rifiuti può avere conseguenze negative sull'ambiente e sulla salute umana a causa delle sostanze potenzialmente nocive solitamente contenute in tali rifiuti. La collaborazione dell'utente per il corretto smaltimento di questo prodotto contribuirà a un utilizzo efficace delle risorse naturali ed eviterà di incorrere in sanzioni amministrative ai sensi dell'art. 255 e successivi del Decreto Legislativo n. 152/06. Per ulteriori informazioni sul riciclaggio di questo prodotto, contattare le autorità locali, l'ente responsabile della raccolta dei rifiuti, un rivenditore autorizzato o il servizio di raccolta dei rifiuti domestici, oppure visitare il sito www.canon-europe.com/weee, o www.canon-europe.com/battery.

# Apenas para a União Europeia e AEE (Noruega, Islândia e Liechtenstein)

Estes símbolos indicam que este produto não deve ser eliminado juntamente com o seu lixo doméstico, segundo a Diretiva REEE de 2012/19/UE, a Diretiva de Baterias (2006/66/CE) e/ou a sua legislação nacional que transponha estas Diretivas. Se houver um símbolo químico impresso como mostrado abaixo, de acordo com a Diretiva de Baterias, isto indica que um metal pesado (Hg = Mercúrio, Cd = Cádmio, Pb = Chumbo) está presente nesta pilha ou acumulador, numa concentração acima de um limite aplicável especificado na Diretiva. Este produto deve ser entregue num ponto de recolha designado, por exemplo num local autorizado de troca quando compra um equipamento novo idêntico, ou num local de recolha autorizado para reciclar equipamento elétrico e eletrónico (EEE) em fim de vida, bem como pilhas e baterias. O tratamento inadequado deste tipo de resíduos pode ter um impacto negativo no ambiente e na saúde humana, devido a substâncias potencialmente perigosas que estão associadas

com equipamentos do tipo EEE. A sua cooperação no tratamento correto deste produto irá contribuir para a utilização mais eficaz dos recursos naturais. Para obter mais informações acerca de como reciclar este produto, por favor contacte as suas autoridades locais responsáveis pela matéria, serviço de recolha aprovado para pilhas e baterias ou serviço de recolha de resíduos sólidos domésticos da sua municipalidade, ou visite www.canon-europe.com/weee, ou www.canon-europe.com/battery.

# Gælder kun i Europæiske Union og EØS (Norge, Island og Liechtenstein)

Disse symboler betyder, at produktet ikke må bortskaffes sammen med dagrenovation i henhold til WEEE-direktivet (2012/19/EU), batteridirektivet (2006/66/EF) og/eller den lokale lovgivning, som disse direktiver er gennemført i. Hvis der i overensstemmelse med batteridirektivet er trykt et kemisk symbol under det symbol, der er vist ovenfor, betyder det, at batteriet eller akkumulatoren indeholder tungmetaller (Hg = kviksølv, Cd = cadmium, Pb = bly) i en koncentration, som ligger over de grænseværdier, der er beskrevet i batteridirektivet. Produktet skal afleveres på et godkendt indsamlingssted, f.eks. i overensstemmelse med en godkendt én-til-én-procedure, når du indkøber et nyt tilsvarende produkt, eller på et godkendt indsamlingssted for elektronikaffald samt for batterier og akkumulatorer. Forkert håndtering af denne type affald kan medføre negative konsekvenser for miljøet og menneskers helbred på grund af de potentielt sundhedsskadelige stoffer, der generelt kan forefindes i elektrisk og elektronisk udstyr. Når du foretager korrekt bortskaffelse af produktet, bidrager du til effektiv brug af naturressourcerne. Kontakt din kommune, den lokale affaldsmyndighed, det lokale affaldsanlæg, eller besøg www.canon-europe.com/weee, eller www.canon-europe.com/battery for at få flere oplysninger om genbrug af dette produkt.

# Μόνο για την Ευρωπαϊκή Ένωση και τον ΕΟΧ (Νορβηγία, Ισλανδία και Λιχτενστάιν)

Αυτά τα σύμβολα υποδεικνύουν ότι αυτό το προϊόν δεν πρέπει να απορρίπτεται μαζί με τα οικιακά απορρίμματα, σύμφωνα με την Οδηγία για τα Απόβλητα Ηλεκτρικού και Ηλεκτρονικού Εξοπλισμού (ΑΗΗΕ) (2012/19/ΕΕ), την Οδηγία για τις Ηλεκτρικές Στήλες (2006/66/ΕΚ) ή/και την εθνική νομοθεσία που εφαρμόζει τις Οδηγίες εκείνες. Εάν κάποιο χημικό σύμβολο είναι τυπωμένο κάτω από το σύμβολο που φαίνεται παραπάνω, σύμφωνα με την Οδηγία για τις Ηλεκτρικές Στήλες, υποδηλώνει ότι κάποιο βαρύ μέταλλο (Hg = Υδράργυρος, Cd = Κάδμιο, Pb = Μόλυβδος) υπάρχει στην μπαταρία ή τον συσσωρευτή σε συγκέντρωση μεγαλύτερη από το ισχύον επίπεδο που καθορίζεται στην Οδηγία για τις Ηλεκτρικές Στήλες. Αυτό το προϊόν πρέπει να παραδίδεται σε καθορισμένο σημείο συλλογής, π.χ. σε μια εξουσιοδοτημένη βάση ανταλλαγής όταν αγοράζετε ένα νέο παρόμοιο προϊόν ή σε μια εξουσιοδοτημένη θέση συλλογής για την ανακύκλωση των αποβλήτων ηλεκτρικού και ηλεκτρονικού εξοπλισμού (ΗΗΕ) και των ηλεκτρικών στηλών και συσσωρευτών. Ο ακατάλληλος χειρισμός αυτού του τύπου αποβλήτων μπορεί να έχει αρνητικό αντίκτυπο στο περιβάλλον και την υγεία του ανθρώπου, λόγω δυνητικά επικίνδυνων ουσιών

που γενικά συνδέονται με τον ΗΗΕ. Η συνεργασία σας για τη σωστή απόρριψη αυτού του προϊόντος θα συμβάλει στην αποτελεσματική χρήση των φυσικών πόρων. Για περισσότερες πληροφορίες σχετικά με ανακύκλωση αυτού του προϊόντος, επικοινωνήστε με το τοπικό γραφείο της πόλης σας, την υπηρεσία απορριμμάτων, το εγκεκριμένο σχήμα ή την υπηρεσία απόρριψης οικιακών αποβλήτων ή επισκεφθείτε τη διεύθυνση www.canon-europe.com/weee ή www.canon-europe.com/battery.

# Gjelder kun den europeiske union og EØS (Norge, Island og Liechtenstein)

Disse symbolene indikerer at dette produktet ikke skal kastes sammen med husholdningsavfall, i henhold til WEEE-direktivet (2012/19/EU), batteridirektivet (2006/66/EF) og/eller nasjonal lov som har implementert disse direktivene. Hvis et kjemisk symbol vises under symbolet vist ovenfor, i samsvar med batteridirektivet, indikerer dette at et tungmetall (Hg = kvikksølv, Cd = kadmium, Pb = bly) finnes i batteriet eller akkumulatoren i en konsentrasjon over en gjeldende øvre grense som er spesifisert i batteridirektivet. Produktet må leveres til et dertil egnet innsamlingspunkt, det vil si på en autorisert en-til-en-basis når en kjøper et nytt lignende produkt, eller til et autorisert innsamlingssted for resirkulering av avfall fra elektrisk og elektronisk utstyr (EE-utstyr) og batterier og akkumulatorer. Feil håndtering av denne typen avfall kan være miljø- og helseskadelig på grunn av potensielt skadelige stoffer som ofte brukes i EE-utstyr. Din innsats for korrekt avhending av produktet vil bidra til effektiv bruk av naturressurser. Du kan få mer informasjon om resirkulering av dette produktet ved å kontakte lokale myndigheter, avfallsadministrasjonen, et godkjent program eller husholdningens renovasjonsselskap, eller gå til www.canon-europe.com/weee, eller www.canon-europe.com/battery.

# Vain Euroopan unionin sekä ETA:n (Norja, Islanti ja Liechtenstein) alueelle.

Nämä tunnukset osoittavat, että sähkö- ja elektroniikkalaiteromua koskeva direktiivi (SER-direktiivi, 2012/19/EU), paristoista ja akuista annettu direktiivi (2006/66/EY) sekä kansallinen lainsäädäntö kieltävät tuotteen hävittämisen talousjätteen mukana. Jos yllä olevan symbolin alapuolelle on paristodirektiivin mukaisesti painettu kemiallisen aineen tunnus, kyseinen paristo tai akku sisältää raskasmetalleja (Hg = elohopea, Cd = kadmium, Pb = lyijy) enemmän kuin paristodirektiivin salliman määrän. Tuote on vietävä asianmukaiseen keräyspisteeseen, esimerkiksi kodinkoneliikkeeseen uutta vastaavaa tuotetta ostettaessa tai viralliseen sähkö- ja elektroniikkalaiteromun tai paristojen ja akkujen keräyspisteeseen. Sähkö- ja elektroniikkalaiteromun virheellinen käsittely voi vahingoittaa ympäristöä ja ihmisten terveyttä, koska laitteet saattavat sisältää ympäristölle ja terveydelle haitallisia aineita. Tuotteen asianmukainen hävittäminen säästää myös luonnonvaroja. Jos haluat lisätietoja tämän tuotteen kierrätyksestä, ota yhteys kunnan jätehuoltoviranomaisiin tai käyttämääsi jätehuoltoyhtiöön tai käy osoitteessa www.canoneurope.com/weee, tai www.canon-europe.com/battery.

# Endast för Europeiska unionen och EES (Norge, Island och Liechtenstein)

De här symbolerna visar att produkten inte får sorteras och slängas som hushållsavfall enligt WEEE-direktivet (2012/19/EU), batteridirektivet (2006/66/EG) och/eller nationell lagstiftning som implementerar dessa direktiv. Om en kemisk symbol förekommer under ovanstående symbol innebär detta enligt Batteridirektivet att en tungmetall (Hg = Kvicksilver, Cd = Kadmium, Pb = Bly) förekommer i batteriet eller ackumulatorn med en koncentration som överstiger tillämplig gräns som anges i Batteridirektivet. Produkten ska lämnas in på en avsedd insamlingsplats, t.ex. på en återvinningsstation auktoriserad att hantera elektrisk och elektronisk utrustning (EE-utrustning) samt batterier och ackumulatorer eller hos handlare som är auktoriserade att byta in varor då nya, motsvarande köps (en mot en). Olämplig hantering av avfall av den här typen kan ha negativ inverkan på miljön och människors hälsa på grund av de potentiellt farliga ämnen som kan återfinnas i elektrisk och elektronisk utrustning. Din medverkan till en korrekt avfallshantering av produkten bidrar till effektiv användning av naturresurserna. Om du vill ha mer information om var du kan lämna in den här produkten, kontakta ditt lokala kommunkontor, berörd myndighet eller företag för avfallshantering eller se www.canon-europe.com/weee, eller www.canon-europe.com/battery.

### Pouze Evropská unie a EHP (Norsko, Island a Lichtenštejnsko)

Tento symbol znamená, že podle směrnice OEEZ (2012/19/EU), směrnice o bateriích (2006/66/ES) a/ nebo podle vnitrostátních právních prováděcích předpisů k těmto směrnicím nemá být tento výrobek likvidován s odpadem z domácností. Je-li v souladu s požadavky směrnice o bateriích vytištěna pod výše uvedeným symbolem chemická značka, udává, že tato baterie nebo akumulátor obsahuje těžké kovy (Hg = rtuť, Cd = kadmium, Pb = olovo) v koncentraci vyšší, než je příslušná hodnota předepsaná směrnicí. Tento výrobek má být vrácen do určeného sběrného místa, např. v rámci autorizovaného systému odběru jednoho výrobku za jeden nově prodaný podobný výrobek, nebo do autorizovaného sběrného místa pro recyklaci odpadních elektrických a elektronických zařízení (OEEZ), baterií a akumulátorů. Nevhodné nakládání s tímto druhem odpadu by mohlo mít negativní dopad na životní prostředí a lidské zdraví, protože elektrická a elektronická zařízení zpravidla obsahují potenciálně nebezpečné látky. Vaše spolupráce na správné likvidaci tohoto výrobku napomůže efektivnímu využívání přírodních zdrojů. Chcete-li získat podrobné informace týkající se recyklace tohoto výrobku, obraťte se prosím na místní úřad, orgán pro nakládání s odpady, schválený systém nakládání s odpady či společnost zajišťující likvidaci domovního odpadu, nebo navštivte webové stránky www.canon-europe.com/weee nebo www.canon-europe.com/battery.

# Csak az Európai Unió és az EGT (Norvégia, Izland és Liechtenstein) országaiban

Ezek a szimbólumok azt jelzik, hogy a termék hulladékkezelése a háztartási hulladéktól különválasztva, az elektromos és elektronikus berendezések hulladékairól (WEEE) szóló (2012/19/EU) irányelvnek és az elemekről és akkumulátorokról, valamint a hulladék elemekről és akkumulátorokról szóló (2006/66/EK) irányelvnek megfelelően és/vagy ezen irányelveknek megfelelő helyi előírások szerint történik. Amennyiben a fent feltüntetett szimbólum alatt egy vegyjel is szerepel, az elemekről és akkumulátorokról szóló irányelvben foglaltak értelmében ez azt jelzi, hogy az elem vagy az akkumulátor az irányelvben meghatározott határértéknél nagyobb mennyiségben tartalmaz nehézfémet (Hg = higany, Cd = kadmium, Pb = ólom). E terméket az arra kijelölt gyűjtőhelyre kell juttatni – pl. hasonló termék vásárlásakor a régi becserélésére vonatkozó hivatalos program keretében, vagy az elektromos és elektronikus berendezések (EEE) hulladékainak gyűjtésére, valamint a hulladék elemek és hulladék akkumulátorok gyűitésére kijelölt hivatalos gyűitőhelyre. Az ilyen jellegű hulladékok nem előírásszerű kezelése az elektromos és elektronikus berendezésekhez (EEE) általánosan kapcsolható potenciálisan veszélyes anyagok révén hatással lehet a környezetre és az egészségre. E termék megfelelő leselejtezésével Ön is hozzájárul a természeti források hatékony használatához. A termék újrahasznosítását illetően informálódjon a helyi polgármesteri hivatalnál, a helyi közterület-fenntartó vállalatnál, a hivatalos hulladéklerakó telephelyen vagy a háztartási hulladék begyűjtését végző szolgáltatónál, illetve látogasson el a www.canon-europe.com/weee, vagy www.canon-europe.com/battery internetes oldalra.

#### Tylko dla krajów Unii Europejskiej oraz EOG (Norwegia, Islandia i Liechtenstein)

Te symbole oznaczają, że produktu nie należy wyrzucać razem z odpadami gospodarstwa domowego, zgodnie z dyrektywą WEEE w sprawie zużytego sprzętu elektrycznego i elektronicznego (2012/19/UE) lub dyrektywą w sprawie baterii (2006/66/WE) bądź przepisami krajowymi wdrażającymi te dyrektywy. Jeśli pod powyższym symbolem znajduje się symbol chemiczny, zgodnie z dyrektywą w sprawie baterii oznacza to, że bateria lub akumulator zawiera metal ciężki (Hg = rtęć, Cd = kadm, Pb = ołów) w stężeniu przekraczającym odpowiedni poziom określony w dyrektywie w sprawie baterii. Użytkownicy baterii i akumulatorów mają obowiązek korzystać z dostępnego programu zwrotu, recyklingu i utylizacji baterii oraz akumulatorów. Niewłaściwe postępowanie z tego typu odpadami może mieć wpływ na środowisko i zdrowie ludzi ze względu na substancje potencjalnie niebezpieczne, związane ze zużytym sprzętem elektrycznym i elektronicznym. Państwa współpraca w zakresie właściwej utylizacji tego produktu przyczyni się do efektywnego wykorzystania zasobów naturalnych. W celu uzyskania informacji o sposobie recyklingu tego produktu prosimy o kontakt z właściwym urzędem miejskim lub zakładem gospodarki komunalnej bądź zapraszamy na stronę www.canon-europe.com/weee, lub www.canon-europe.com/battery.

# Platí len pre štáty Európskej únie a EHP (Nórsko, Island a Lichtenštajnsko)

Tieto symboly označujú, že podľa Smernice o odpade z elektrických a elektronických zariadení (OEEZ) 2012/19/EÚ, Smernice o batériách (2006/66/ES) a podľa platnej legislatívy Slovenskej republiky sa tento produkt nesmie likvidovať spolu s komunálnym odpadom. Ak je chemická značka vytlačená pod vyššie uvedeným symbolom, znamená to, že táto batéria alebo akumulátor obsahuje ťažký kov (Hg = ortuť, Cd = kadmium, Pb = olovo) v koncentrácii vyššej, ako je príslušná povolená hodnota stanovená v Smernici o batériách. Produkt je potrebné odovzdať do určenej zberne, napr. prostredníctvom výmeny za kúpu nového podobného produktu, alebo na autorizované zberné miesto, ktoré spracúva odpad z elektrických a elektronických zariadení (EEZ), batérií a akumulátorov. Nesprávna manipulácia s takýmto typom odpadu môže mať negatívny vplyv na životné prostredie a ľudské zdravie, pretože elektrické a elektronické zariadenia obsahujú potenciálne nebezpečné látky. Spoluprácou na správnej likvidácii tohto produktu prispejete k účinnému využívaniu prírodných zdrojov. Ďalšie informácie o recyklácii tohto produktu získate od miestneho úradu, úradu životného prostredia, zo schváleného plánu OEEZ alebo od spoločnosti, ktorá zaisťuje likvidáciu komunálneho odpadu. Viac informácií nájdete aj na webovej stránke: www.canon-europe.com/weee, alebo www.canon-europe.com/battery.

### Üksnes Euroopa Liit ja EMP (Norra, Island ja Liechtenstein)

Antud sümbolid viitavad sellele, et vastavalt elektri- ja elektroonikaseadmete jäätmeid käsitlevale direktiivile (2012/19/EL), patareisid ja akusid ning patarei- ja akujäätmeid käsitlevale direktiivile (2006/66/EÜ) ja/või nimetatud direktiive rakendavatele riiklikele õigusaktidele ei või seda toodet koos olmejäätmetega ära visata. Kui keemiline sümbol on trükitud eespool toodud sümboli alla, siis tähendab see, et antud patareis või akus leiduva raskemetalli (Hg = elavhõbe, Cd = kaadmium, Pb = plii) kontsentratsioonitase on kõrgem kui patareisid ja akusid ning patarei- ja akujäätmeid käsitlevas direktiivis sätestatud piirmäär. Antud tootest tekkinud jäätmed tuleb anda vastavasse kogumispunkti, nt müügipunkti, mis on volitatud üks ühe vastu vahetama, kui ostate uue sarnase toote, või vastavasse elektri- ja lektroonikaseadmete jäätmete ning patareide ja akude ümbertöötlemiseks mõeldud kogumispunkti. Antud liiki jäätmete vale käitlemine võib kahjustada keskkonda ja inimeste tervist elektrija elektroonikajäätmetes tavaliselt leiduvate potentsiaalselt ohtlike ainete tõttu. Antud tootest tekkinud jäätmete nõuetekohase kõrvaldamisega aitate kasutada loodusvarasid efektiivselt. Täiendava teabe saamiseks elektri- ja elektroonikaseadmetest tekkinud jäätmete ning patarei- ja akujäätmete tagastamise ja ümbertöötlemise kohta võtke ühendust kohaliku omavalitsusega, asjakohase valitsusasutusega, asjakohase tootjavastutusorganisatsiooniga või olmejäätmete käitlejaga. Lisateavet leitate ka Internetileheküljelt www.canon-europe.com/weee või www.canon-europe.com/battery.

### Tikai Eiropas Savienībai un EEZ (Norvēģijai, Islandei un Lihtenšteinai)

Šie simboli norāda, ka atbilstoši ES Direktīvai (2012/19/ES) par elektrisko un elektronisko iekārtu atkritumiem (EEIA), Direktīvai (2006/66/EK) par baterijām un akumulatoriem, un akumulatoru atkritumiem, ar ko atceļ Direktīvu 91/157/EEK, un vietējiem tiesību aktiem šo izstrādājumu nedrīkst izmest kopā ar sadzīves atkritumiem. Ja zem iepriekš norādītā simbola ir uzdrukāts kīmiskais simbols, saskanā ar direktīvu par baterijām un akumulatoriem tas nozīmē, ka šīs baterijas vai akumulatori satur smagos metālus (Hg = dzīvsudrabs, Cd = kadmijs, Pb = svins) un to koncentrācijas līmenis pārsniedz direktīvā par baterijām un akumulatoriem minēto piemērojamo slieksni. Šis izstrādājums ir jānodod piemērotā savākšanas vietā, piemēram, apstiprinātā veikalā, kur iegādājaties līdzīgu jaunu produktu un atstājat veco, vai apstiprinātā vietā izlietotu elektrisko un elektronisko iekārtu un bateriju un akumulatoru pārstrādei. Nepareiza šāda veida atkritumu apsaimniekošana var apdraudēt vidi un cilvēka veselību tādu iespējami bīstamu vielu dēļ, kas parasti ir elektriskajās un elektroniskajās iekārtās. Jūsu atbalsts pareizā šāda veida atkritumu apsaimniekošanā sekmēs efektīvu dabas resursu izmantošanu. Lai sanemtu pilnīgāku informāciju par šāda veida izstrādājumu nodošanu otrreizējai pārstrādei, sazinieties ar vietējo pašvaldību, atkritumu savākšanas atbildīgo dienestu, pilnvaroto organizāciju vai iestādi, kas veic sadzīves atkritumu apsaimniekošanu, vai apmeklējiet tīmekla vietni www.canon-europe.com/weee, vai www.canoneurope.com/battery.

### Tik Europos Sąjungai ir EEE (Norvegijai, Islandijai ir Lichtenšteinui)

Šie simboliai reiškia, kad šio gaminio negalima išmesti į buitines atliekas, kaip reikalaujama WEEE Direktyvoje (2012/19/ES) ir Baterijų direktyvoje (2006/66/EB) ir (ar) jūsų šalies nacionaliniuose įstatymuose, kuriais šios Direktyvos yra įgyvendinamos. Jeigu cheminio ženklo simbolis yra nurodytas žemiau šio ženklo, tai reiškia, kad vadovaujantis Baterijų direktyvą, baterijų ar akumuliatorių sudėtyje yra sunkiųjų metalų (Hg = gyvsidabrio, Cd = kadmio, Pb = švino), kurių koncentracija viršija Baterijų direktyvoje nurodytas leistinas ribas. Šį gaminį reikia pristatyti į specialųjį surinkimo punktą, pavyzdžiui, mainais, kai jūs perkate naują panašų gaminį, arba į specialiąją surinkimo vietą, kurioje perdirbamos elektrinės ir elektroninės įrangos atliekos bei naudotos baterijos ir akumuliatoriai. Dėl netinkamo šio tipo atliekų tvarkymo gali nukentėti aplinka ir iškilti grėsmė žmogaus sveikatai dėl galimai kenksmingų medžiagų, iš esmės susijusių su elektrine ir elektronine įranga. Bendradarbiaudami ir teisingai utilizuodami šiuos gaminius, jūs padėsite efektyviai naudoti gamtinius išteklius. Daugiau informacijos apie gaminio perdirbimą jums gali suteikti vietinis biuras, atliekų tvarkymo bendrovė, sertifikuoti organai ar buitinių atliekų surinkimo įmonės. Taip pat siūloma apsilankyti interneto svetainėje www.canoneurope.com/weee, arba www.canoneurope.com/battery.

### Samo za Evropsko unijo in EGP (Norveška, Islandija in Lihtenštajn)

Ti simboli pomenijo, da tega izdelka skladno z Direktivo OEEO (2012/19/EU), Direktivo 2006/66/ES in/ali nacionalno zakonodajo, ki uvaja ti direktivi, ne smete odlagati z nesortiranimi gospodinjskimi odpadki. Če je pod zgoraj prikazanim simbolom natisnjen kemijski simbol, to v skladu z Direktivo pomeni, da je v tej bateriji ali akumulatorju prisotna težka kovina (Hg = živo srebro, Cd = kadmij, Pb = svinec), in sicer v koncentraciji, ki je nad relevantno mejno vrednostjo, določeno v Direktivi. Ta izdelek je potrebno odnesti na izbrano zbirno mesto, t. j. pooblaščeno trgovino, kjer ob nakupu novega (podobnega) izdelka vrnete starega, ali na pooblaščeno zbirno mesto za ponovno uporabo odpadne električne in elektronske opreme (EEO) ter baterij in akumulatorjev. Neustrezno ravnanje s to vrsto odpadkov lahko negativno vpliva na okolje in človeško zdravje zaradi potencialno nevarnih snovi, ki so pogosto povezane z EEO. Vaše sodelovanje pri pravilnem odlaganju tega izdelka predstavlja pomemben prispevek k smotrni izrabi naravnih virov. Za več informacij o ponovni uporabi tega izdelka se obrnite na lokalen mestni urad, pristojno službo za odpadke, predstavnika pooblaščenega programa za obdelavo odpadkov ali na lokalno komunalo. Lahko pa tudi obiščete našo spletno stran www.canon-europe.com/weee, ali www.canon-europe.com/battery.

# Само за Европейския съюз и ЕИП (Норвегия, Исландия и Лихтенщайн)

Тези символи показват, че този продукт не трябва да се изхвърля заедно с битовите отпадъци съгласно Директивата за ИУЕЕО (2012/19/ЕС), Директивата за батерии (2006/66/ЕО) и/или Вашето национално законодателство, прилагащо тези Директиви. Ако под показания горе символ е отпечатан символ за химически елемент, съгласно разпоредбите на Директивата за батерии, този втори символ означава наличието на тежък метал (Hg = живак, Cd = кадмий, Pb = олово) в батерията или акумулатора в концентрация над указаната граница за съответния елемент в Директивата. Този продукт трябва да бъде предаден в предназначен за целта пункт за събиране, например на база размяна, когато купувате нов подобен продукт, или в одобрен събирателен пункт за рециклиране на излязло от употреба електрическо и електронно оборудване (ИУЕЕО), батерии и акумулатори. Неправилното третиране на този тип отпадъци може да доведе до евентуални отрицателни последствия за околната среда и човешкото здраве поради потенциално опасните вещества, които обикновено са свързани с ЕЕО. В същото време Вашето съдействие за правилното изхвърляне на този продукт ще допринесе за ефективното използване на природните ресурси. За повече информация относно това къде можете да предадете за рециклиране на този продукт, моля свържете се с Вашите местни власти, с органа, отговорен за отпадъците, с одобрената система за ИУЕЕО или с Вашата местна служба за битови отпадъци, или посетете www.canon-europe.com/weee, или www.canon-europe.com/battery.

# Doar pentru Uniunea Europeană și EEA (Norvegia, Islanda și Liechtenstein)

Aceste simboluri indică faptul că acest produs nu trebuie aruncat împreună cu deşeurile menajere, în conformitate cu Directiva DEEE (2012/19/UE), Directiva referitoare la baterii (2006/66/CE) şi/sau legile dvs. naţionale ce implementează aceste Directive. Dacă un simbol chimic este imprimat sub simbolul de mai sus, în conformitate cu Directiva referitoare la baterii, acest simbol indică prezenţa în baterie sau acumulator a unui metal greu (Hg = Mercur, Cd = Cadmiu, Pb = Plumb) într-o concentraţie mai mare decât pragul admis specificat în Directiva referitoare la baterii. Acest produs trebuie înmânat punctului de colectare adecvat, ex: printr-un schimb autorizat unu la unu atunci când cumpăraţi un produs nou similar sau la un loc de colectare autorizat pentru reciclarea reziduurilor de echipament electric şi electronic (EEE) şi baterii şi acumulatori. Administrarea neadecvată a acestui tip de deşeuri, ar putea avea un impact asupra mediului şi asupra sănătăţii umane datorită substanţelor cu potenţial de risc care sunt în general asociate cu EEE. Cooperarea dvs. în direcţia reciclării corecte a acestui produs va contribui la o utilizare eficientă a resurselor naturale. Pentru mai multe informaţii despre reciclarea acestui produs, vă rugăm să contactaţi biroul dvs. local, autorităţile responsabile cu deşeurile, schema aprobată sau serviciul dvs. responsabil cu deşeurile menajere sau vizitaţi-ne la www.canon-europe.com/weee, sau www.canon-europe.com/battery.

### Samo za Europsku uniju i EEA (Norveška, Island i Lihtenštajn)

Oznaka pokazuje da se ovaj proizvod ne smije odlagati s komunalnim i ostalim vrstama otpada, u skladu s direktivom WEEE (2012/19/EC), Direktivom o baterijama (2006/66/EC) i Pravilnikom o gospodarenju otpadnim baterijama i akumulatorima te Pravilnikom o gospodarenju otpadnim električnim i elektroničkim uređajima i opremom. Ako je ispod prethodno prikazane oznake otisnut kemijski simbol, u skladu s Direktivom o baterijama, to znači da se u ovoj bateriji ili akumulatoru nalazi teški metal (Hg = živa, Cd = kadmij, Pb = olovo) i da je njegova koncentracija iznad razine propisane u Direktivi o baterijama. Ovaj bi proizvod trebalo predati ovlašenom skupljaču EE otpada ili prodavatelju koji je dužan preuzeti otpadni proizvod po sistemu jedan za jedan, ukoliko isti odgovara vrsti te je obavljao primarne funkcije kao i isporučena EE oprema. Otpadne baterije i akumulatori predaju se ovlaštenom skupljaču otpadnih baterija ili akumulatora ili prodavatelju bez naknade i obveze kupnje za krajnjeg korisnika. Neodgovarajuće rukovanje ovom vrstom otpada može utjecati na okoliš i ljudsko zdravlje zbog potencijalno opasnih supstanci koje se najčešće nalaze na takvim mjestima. Vaša suradnja u pravilnom zbrinjavanju ovog proizvoda pridonijet će djelotvornom iskorištavanju prirodnih resursa. Dodatne informacije o recikliranju ovog proizvoda zatražite od svog lokalnog gradskog ureda, službe za zbrinjavanje otpada, odobrenog programa ili komunalne službe za uklanjanje otpada ili pak na stranicama www.canon-europe.com/weee ili www.canon-europe.com/battery.

### Korisnici u Srbiji

Ovaj simbol označava da ovaj proizvod ne sme da se odlaže sa ostalim kućnim otpadom, u skladu sa WEEE Direktivom (2012/19/EU), Direktivom o baterijama (2006/66/EC) i nacionalnim zakonima. Ukoliko je ispod gore navedenog simbola odštampan hemijski simbol, u skladu sa Direktivom o baterijama, ovaj simbol označava da su u ovoj bateriji ili akumulatoru prisutni teški metali (Hg – živa, Cd – kadmijum, Pb - olovo) u koncentracijama koje premašuju prihvatljivi prag naveden u Direktivi o baterijama. Ovaj proizvod treba predati određenom centru za prikupljanje, npr. po principu "jedan-za-jedan" kada kupujete sličan novi proizvod, ili ovlašćenom centru za prikupljanje za reciklažu istrošene električne i elektronske opreme (EEE), baterija i akumulatora. Nepravilno rukovanje ovom vrstom otpada može imati negativne posledice po životnu sredinu i ljudsko zdravlje usled potencijalno opasnih materijala koji se uglavnom vezuju za EEE. Vaša saradnja na ispravnom odlaganju ovog proizvoda će doprineti efikasnom korišćenju prirodnih resursa. Više informacija o tome kako možete da reciklirate ovaj proizvod potražite od lokalnih gradskih vlasti, komunalne službe, odobrenog plana reciklaže ili servisa za odlaganje kućnog otpada, ili posetite stranicu www.canon-europe.com/weee, ili www.canon-europe.com/battery.

## When Repairing, Lending, or Disposing of the Printer

If you have entered personal data, passwords and/or other security settings on the printer, such information may be stored in the printer.

When sending the printer for repair, lending or transferring the printer to another person, or disposing of the printer, please be sure to follow the steps below in order to delete such information and prevent third parties from accessing it.

➡ Initializing Printer's Setting

### **Online Manual**

- Switching the Paper Source to Match the Purpose
- Cutting Roll Paper after Printing
- Specify Fluorescent Colors and Print
- Printing Using AirPrint

## **Printing with Easy Setup**

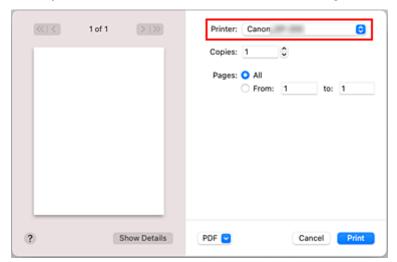

The simple setup procedure for carrying out appropriate printing on this printer is as follows:

- 1. Check that printer is turned on
- 2. Load paper on the printer

Set roll paper or cut paper.

3. Select the printer

Select your model from the **Printer** list in the **Print Dialog**.

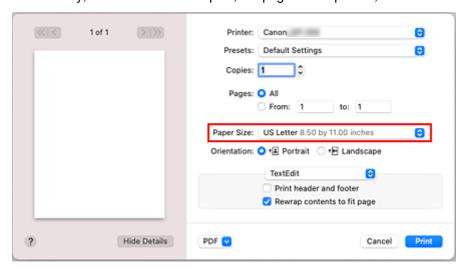

#### Note

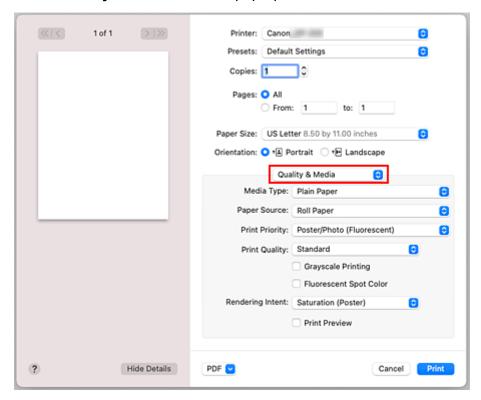

- Click Show Details to switch the Setup window to the detailed display.
   However, depending on the application you are using, Show Details may not be displayed.
- **4.** Select the paper size

For **Paper Size**, select the paper size to be used.

If necessary, set the number of copies, the pages to be printed, and the orientation.

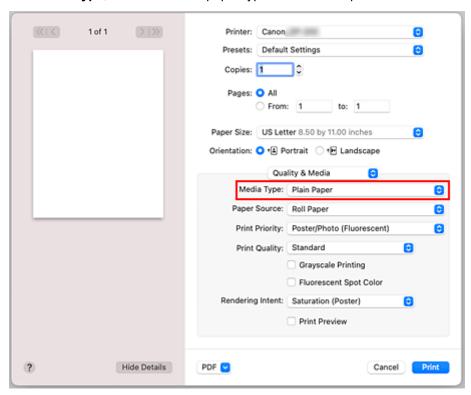

#### 5. Select Quality & Media from the pop-up menu

#### 6. Select the media type

For **Media Type**, select the same paper type loaded in the printer.

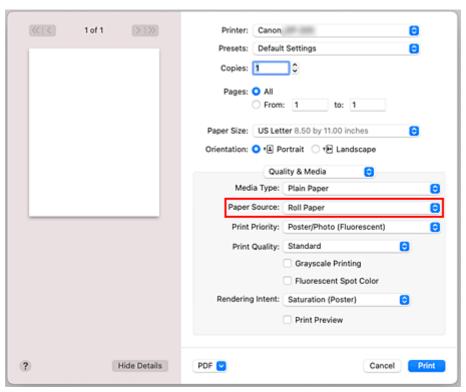

#### >>> Important

• In the Presets section, click Save Current Settings as Preset... to register the specified settings.

• See "Paper Information List" for Canon authentic paper or Canon output check paper.

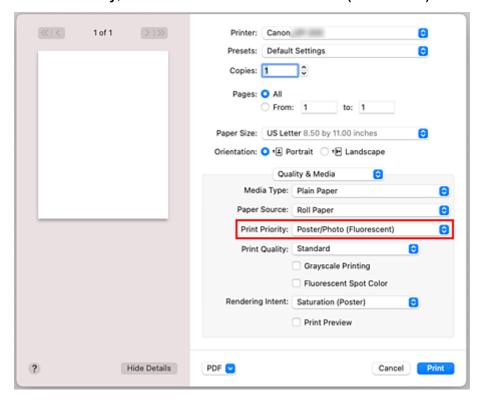

#### 7. Select the paper source

For **Paper Source**, select the setting that matches your purpose.

#### 8. Select print priority

For Print Priority, select Poster/Photo or Poster/Photo (Fluorescent) according to your purpose.

## >>> Important

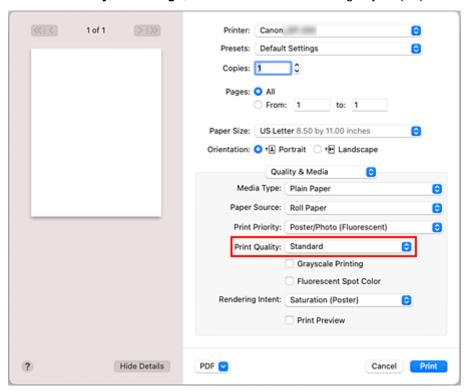

· The selectable print priority differs depending on media type settings.

### Note

• Under initial settings, **Print Priority** is set to **Poster/Photo (Fluorescent)**, so your print data will be printed with bright colors overall.

## **9.** Select the print quality

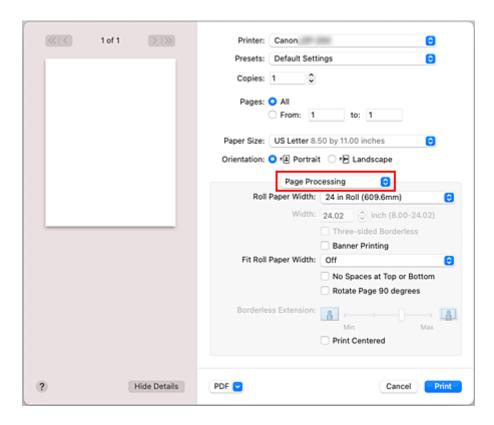

For Print Quality, select High, Standard or Fast according to your purpose.

## >>> Important

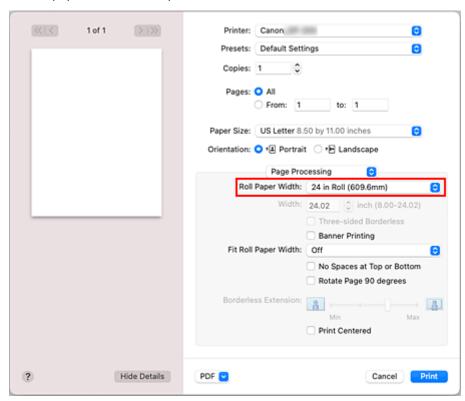

• The print quality settings that can be selected may differ depending on a printing profile.

# 10. Select Page Processing from the pop-up menu

## 11. Selecting Roll Paper Width

If you selected a roll paper for **Paper Source** in **Quality & Media**, set **Roll Paper Width** to the width of the roll paper loaded in the printer.

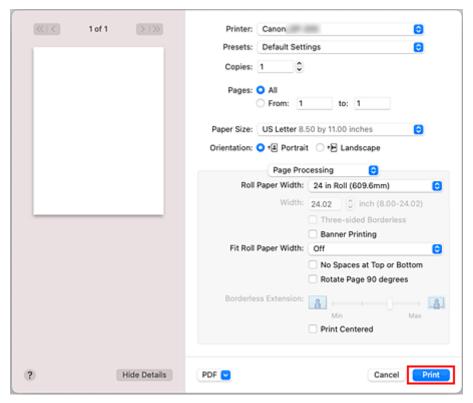

# >>> Important

• If cut sheet is selected for the paper source, Roll Paper Width is grayed out and cannot be set.

### 12. Complete the setup

#### Click Print.

When you execute print, the document will be printed in accordance with the type and size of the media.

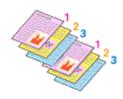

### Note

• If the paper settings in the printer driver differ from the paper information registered on the printer, an error message may appear on the printer's operation panel. You can still print but you may not be able to obtain correct print results.

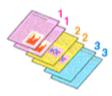

# **Setting the Number of Copies and Printing Order**

Collate pages + Reverse Collate pages + Normal

Reverse

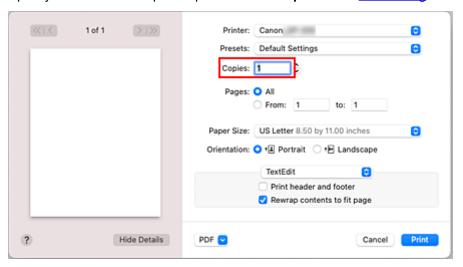

The procedure for specifying the number of copies and printing order is as follows:

1. Specify the number of copies to be printed

Specify the number of copies to print from the Copies in the Print Dialog.

- 2. Select Paper Handling from the pop-up menu
- Check the Collate pages check box when you are specifying multiple copies in the Copies box

Check the **Collate pages** check box to print all the pages of a single copy together.

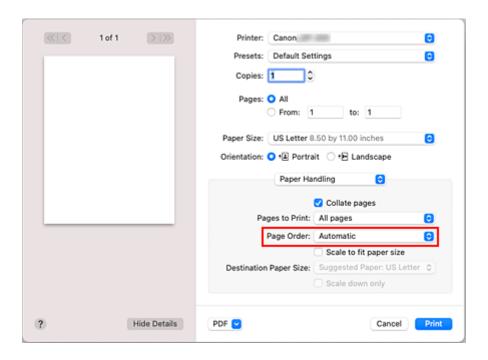

Uncheck this check box to print all pages with the same page number together.

4. Specify the print order

Check Page Order.

When you select **Reverse**, printing starts from the last page.

When you select **Automatic** or **Normal**, printing starts from the first page.

### 5. Complete the setup

#### Click Print.

When you execute print, the specified number of copies will be printed with the specified printing order.

## >>> Important

When the application software that you used to create the document has the same function, specify
the settings on the printer driver. However, if the print results are not acceptable, specify the function
settings on the application software. When you specify the number of copies and the printing order with
both the application software and this printer driver, the number of copies may be multiplied numbers of
the two settings or the specified printing order may not be enabled.

# **Changing the Print Quality and Correcting Image Data**

- ➤ Adjusting Color Balance
- Setting the Print Quality Level (Custom)
- Printing a Color Document in Monochrome
- Specifying Color Correction
- Adjusting Brightness
- **▶** Adjusting Contrast

# **Adjusting Color Balance**

You can adjust the color tints when printing.

Since this function adjusts color balance of the output by changing the ink ratios of each color, it changes the total color balance of the document. Use the application software when you want to change the color balance significantly. Use the printer driver only when you want to adjust the color balance slightly. The following sample shows the case when color balance is used to intensify cyan and to diminish yellow so that the overall colors are more uniform.

No adjustment Adjust color balance

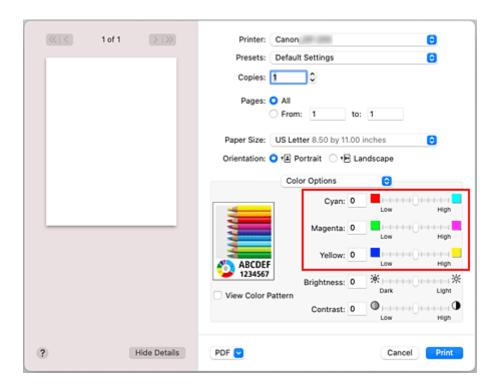

The procedure for adjusting color balance is as follows:

1. Select Color Options from the pop-up menu of the Print Dialog

### 2. Adjust color balance

There are individual sliders for **Cyan**, **Magenta**, and **Yellow**. Each color becomes stronger when the corresponding slider is moved to the right, and becomes weaker when the corresponding slider is moved to the left. For example, when cyan becomes weaker, the color red becomes stronger.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. The current settings are displayed in the settings preview on the left side of the printer driver.

## 3. Complete the setup

### Click Print.

When you execute print, the document is printed with the adjusted color balance.

- → Setting the Print Quality Level (Custom)
- → Specifying Color Correction
- Adjusting Brightness
- → Adjusting Contrast

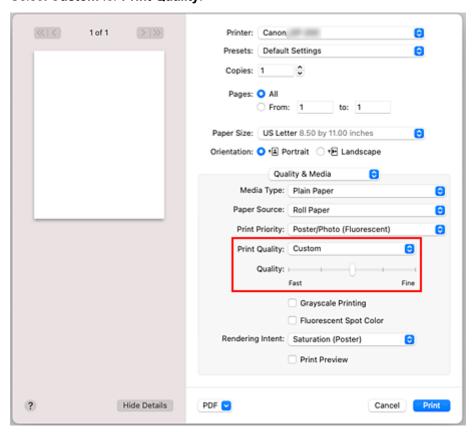

# **Setting the Print Quality Level (Custom)**

The print quality level can be set in the **Custom**.

The procedure for setting the print quality level is as follows:

- 1. Select Quality & Media from the pop-up menu on the Print Dialog
- 2. Select the print quality

Select Custom for Print Quality.

3. Setting the print quality level

Move the Quality slider to select the print quality level.

# >>>> Important

- · Certain print quality levels cannot be selected depending on the settings of media type.
- 4. Complete the setup

Click Print.

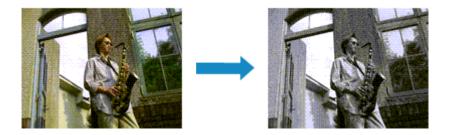

When you execute print, the image data is printed with the selected print quality level.

# **Related Topics**

Specifying Color Correction

- → Adjusting Color Balance
- → Adjusting Brightness
- → Adjusting Contrast

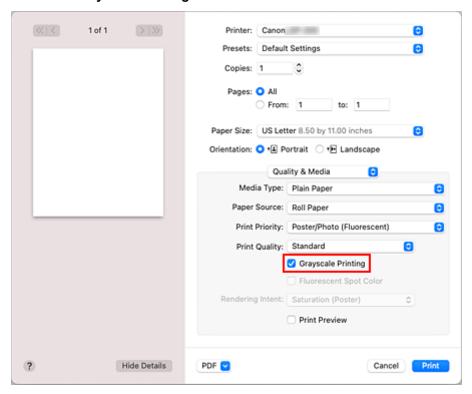

# **Printing a Color Document in Monochrome**

The procedure for printing a color document in monochrome is as follows:

- 1. Select Quality & Media from the pop-up menu on the Print Dialog
- 2. Set monochrome printing

Check the Grayscale Printing check box.

## 3. Complete the setup

#### Click Print.

When you execute print, the document is converted to grayscale data. It allows you to print the color document in monochrome.

#### Note

• With monochrome printing, inks other than black ink may be used as well.

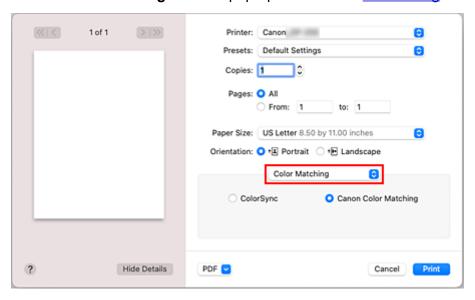

# **Specifying Color Correction**

You can specify the color correction method suited to the type of document to be printed. Normally, when data is printed, the printer driver automatically adjusts the colors.

When you want to print by using the color space of the image data effectively or by specifying a printing ICC profile from your application software, select **ColorSync**. When you want to print by having the printer driver correct the colors, select **Canon Color Matching**.

The procedure for specifying color correction is as follows:

## 1. Select Color Matching from the pop-up menu of the Print Dialog

## 2. Select color correction

Select the item below that matches your purpose.

#### ColorSync

Perform color correction using ColorSync.

#### **Canon Color Matching**

The driver will perform necessary adjustments during printing.

For information about driver matching, see "Adjusting Colors with the Printer Driver."

#### 3. Complete the setup

#### Click Print.

When you execute print, the document data is printed with the specified color correction.

#### >>>> Important

- Depending on the application software, when a printing ICC profile is specified from that application software, **Canon Color Matching** cannot be selected because **ColorSync** is selected automatically.
- The Quality & Media setting is necessary even when ColorSync or Canon Color Matching is selected.

- → Optimal Photo Printing of Image Data
- ➡ Adjusting Colors with the Printer Driver
- → Printing with ICC Profiles (Specifying an ICC Profile from the Application Software)
- → Printing with ICC Profiles (Specifying an ICC Profile from the Printer Driver)

# **Optimal Photo Printing of Image Data**

When people print images taken with digital cameras, they sometimes feel that the printed color tones differ from those of actual image or those displayed on the monitor.

To get the print results as close as possible to the desired color tones, you must select a printing method that is best suited to the application software used or to your purpose.

# **Color Management**

Devices such as digital cameras, scanners, monitors, and printers handle color differently. Color management (color matching) is a method that manages device-dependent "colors" as a common color space.

For macOS, a color management system called "ColorSync" is built into the operating system. sRGB is one of the common color spaces that is frequently used.

ICC profiles convert device-dependent "colors" into a common color space. By using an ICC profile and carrying out color management, you can draw out the color space of the image data within the color reproduction area that the printer can express.

#### Note

Normally, image files are saved in JPEG format. Some digital cameras allow you to save images in a
format called RAW. RAW data refers to an image saving format that requires a computer to develop
the image. You can embed an input ICC profile tag into a RAW file by using special application
software.

# Selecting a Printing Method Suited to the Image Data

The recommended printing method depends on the color space of the image data or the application software to be used.

There are two typical printing methods.

Check the color space of the image data and the application software to be used, and then select the printing method suited to your purpose.

#### **Adjusting Colors with the Printer Driver**

Describes the procedure for printing by using the color correction function of the printer driver. Select this function when you want to print impressions that are close to those displayed on the monitor, for example, if you corrected the colors while checking the print image on the monitor.

#### Printing with ICC Profiles (Specifying an ICC Profile from the Application Software)

Describes the procedure for printing by using the color space of the image data effectively.

You can print with a common color space by setting up the application software and the printer driver so that the color management matches the input ICC profile of the image data.

The method for setting up the printer driver differs depending on the application software to be used.

# **Adjusting Colors with the Printer Driver**

To use printer driver matching when printing, turn on the printer driver's color correction function. Printer driver matching accurately applies the characteristics of data displayed on the monitor and allows you to obtain print results of impressions that are close to those displayed on the monitor.

## >>> Important

 When printing using printer driver matching, Canon recommends that you set the monitor and the environment light as follows:

- Monitor

Color temperature: D50 (5000K) Brightness: 100 to 120cd/m2

Gamma: 2.2 Environment light

Fluorescent light for D50 color evaluation (color temperature 5000K, high color rendering

properties)

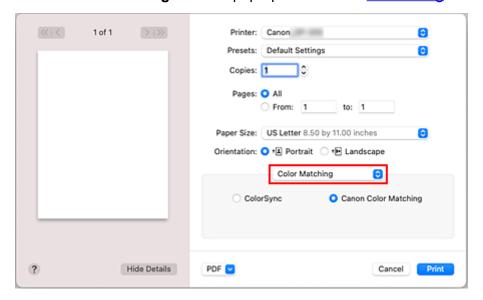

Brightness when looking at printed materials: 500 lx ± 125 lx

### Note

• When printing from an application software that allows you to identify and specify ICC profiles, use an ICC profile for printing with that application software and select setting items that manage colors.

The procedure for adjusting colors with the printer driver is as follows:

1. Select Color Matching from the pop-up menu of the Print Dialog

2. Select color correction

Select Canon Color Matching.

3. Select Quality & Media from the pop-up menu

### 4. Select the rendering intent

Select the coloring adjustment method in Rendering Intent.

## Perceptual (Photo)

Reproduces colors of general photos naturally and features smooth gradation. In addition, selecting this setting allows you to adjust colors easily using an application software.

#### Saturation (Poster)

Reproduces vivid colors on data such as a poster.

#### **No Color Correction**

Performs printing without color matching.

#### 5. Set the other items

From the pop-up menu, select **Color Options**. If necessary, adjust the color balance (**Cyan**, **Magenta**, **Yellow**) and adjust **Brightness**, and **Contrast** settings.

## 6. Complete the setup

Click Print.

When you execute print, the printer driver adjusts the colors when printing the data.

- → Setting the Print Quality Level (Custom)
- → Specifying Color Correction
- → Adjusting Color Balance
- Adjusting Brightness
- → Adjusting Contrast

# Printing with ICC Profiles (Specifying an ICC Profile from the Application Software)

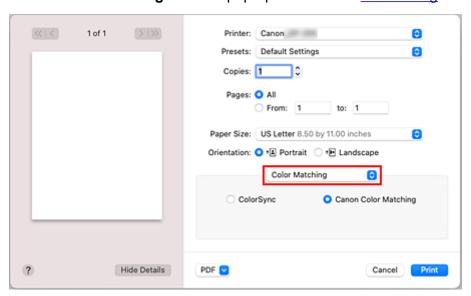

When you print from Adobe Photoshop, Canon Digital Photo Professional, or any application software that can identify input ICC profiles and allows you to specify such profiles, printer uses the color management system (ColorSync) built-into macOS when printing. The printer prints the editing and touch-up results of the application software and effectively uses the color space of the input ICC profile specified in the image data.

To use this printing method, use your application software to select color management items and specify an input ICC profile and a printing ICC profile in the image data.

Even if you print using a printing ICC profile that you created yourself, be sure to select color management items from your application software.

For instructions, refer to the manual of the application software you are using.

## 1. Select Color Matching from the pop-up menu of the Print Dialog

#### 2. Select color correction

## Select ColorSync.

You can leave Profile set to Automatic.

# >>> Important

- Depending on the application software you use, you may not be able to select setting items other than **ColorSync**.
- If you choose a **Profile** setting other than **Automatic** or "Printing Paper ICC Profile", the printer will not be able to print with the correct colors.

#### 3. Complete the setup

#### Click Print.

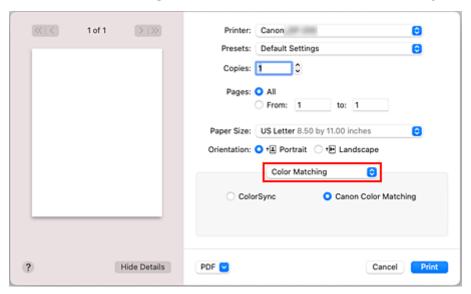

When you execute print, the printer uses the color space of the image data.

- **➡** Setting the Print Quality Level (Custom)
- ➡ Specifying Color Correction
- → Adjusting Color Balance
- → Adjusting Brightness
- → Adjusting Contrast

# Printing with ICC Profiles (Specifying an ICC Profile from the Printer Driver)

Print from an application software that cannot identify or specify input ICC profiles by using the color space of the input ICC profile (sRGB) found in the data.

1. Select Color Matching from the pop-up menu of the Print Dialog

#### 2. Select color correction

#### Select ColorSync.

You can leave Profile set to Automatic.

### Important

- If you choose a Profile setting other than Automatic or "Printing Paper ICC Profile", the printer will not be able to print with the correct colors.
- 3. Complete the setup

#### Click Print.

When you execute print, the printer uses the color space of the image data.

### >>>> Important

· You cannot specify an input ICC profile from the printer driver.

- Setting the Print Quality Level (Custom)
- → Specifying Color Correction
- Adjusting Color Balance
- Adjusting Brightness
- → Adjusting Contrast

# **Adjusting Brightness**

You can brighten or darken the colors of the overall image data during printing.

The following sample shows the case when light colors are darkened when the image data is printed.

No adjustment

Darken light colors

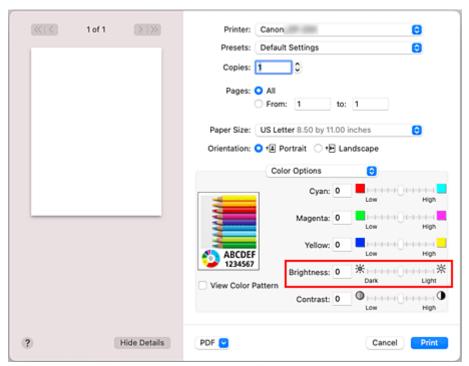

The procedure for adjusting brightness is as follows:

## 1. Select Color Options from the pop-up menu of the Print Dialog

## 2. Adjust brightness

Moving the **Brightness** slider to the right brightens the colors, and moving the slider to the left darkens the colors.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. The current settings are displayed in the settings preview on the left side of the printer driver.

# 3. Complete the setup

#### Click Print.

When you execute print, the data is printed at the adjusted brightness.

- **➡** Setting the Print Quality Level (Custom)
- → Specifying Color Correction
- → Adjusting Color Balance
- → Adjusting Contrast

# **Adjusting Contrast**

You can adjust the image contrast during printing.

To make the differences between the light and dark portions of images greater and more distinct, increase the contrast. On the other hand, to make the differences between the light and dark portions of images smaller and less distinct, reduce the contrast.

No adjustment

Adjust the contrast

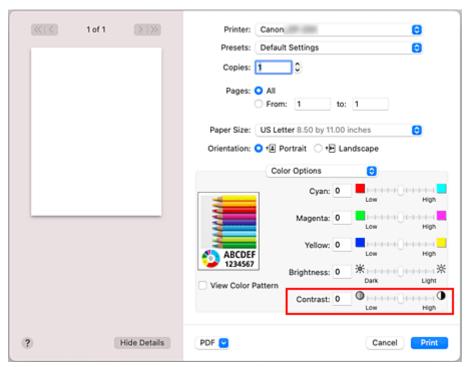

The procedure for adjusting contrast is as follows:

1. Select Color Options from the pop-up menu of the Print Dialog

## 2. Adjust the contrast

Moving the **Contrast** slider to the right increases the contrast, and moving the slider to the left decreases the contrast.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. The current settings are displayed in the settings preview on the left side of the printer driver.

3. Complete the setup

## Click Print.

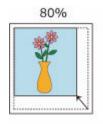

When you execute print, the image is printed with the adjusted contrast.

- → Setting the Print Quality Level (Custom)
- → Specifying Color Correction
- ➡ Adjusting Color Balance
- → Adjusting Brightness

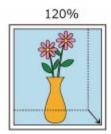

# **Scaled Printing**

The procedure for printing a document with pages enlarged or reduced is as follows:

# Printing by Enlarging/Reducing Document to Specified Ratio

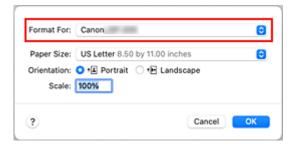

## 1. Select the printer

In the Page Setup Dialog, select your model name from the Format For list.

### 2. Set scaled printing

Specify the scaling factor in the **Scale** box, and click **OK**.

#### Note

• Depending on the **Scale** value that you set, an error message may be displayed.

## 3. Complete the setup

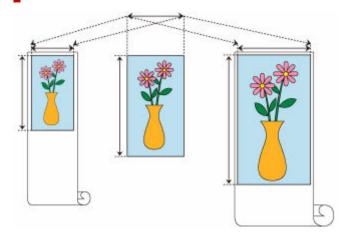

On the Print Dialog, click Print.

When you execute print, the document will be printed with the specified scale.

## >>> Important

 When the application software which you used to create the original has the scaled printing function, configure the settings on your application software. You do not need to configure the same setting in the Page Setup dialog.

# Printing by Enlarging/Reducing Document to Match Roll Paper Width

- 1. Select Page Processing from the pop-up menu of the Print Dialog
- 2. Setting Enlarged/Reduced Printing

For Fit Roll Paper Width, select On (Bordered) or On (Borderless).

## Note

- Depending on the **Paper Size** settings, the settings you can choose will differ.
- When selecting "XXX oversize" from Paper Size, On (Borderless) cannot be selected.

## 3. Complete the setup

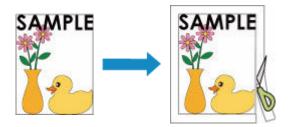

## Click Print.

When you print, the document is expanded or reduced to match the roll paper width and then printed.

# **Printing to Oversized Paper Sizes**

When printing a created document so that it fills the entire paper width, select a paper size from the "XXX oversize" (sizes resulting from adding margins necessary for printer operation to the document sizes) so that all areas of the document are printed at their actual size.

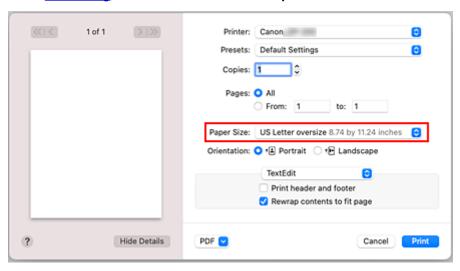

A printout that has the same area as the document can be obtained by trimming the outer margins after printing.

The procedure for printing with oversize is as follows:

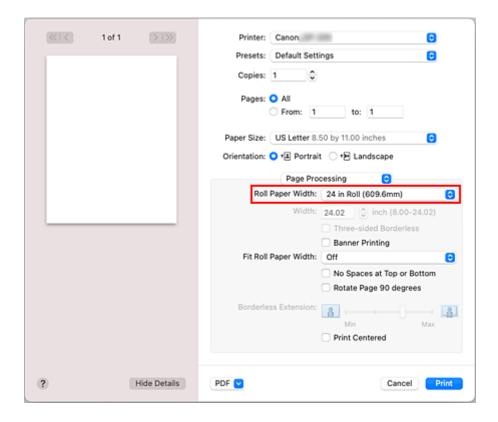

1. Select oversized paper size

In the Print dialog, select "XXX oversize" for Paper Size.

- 2. Select Quality & Media from the pop-up menu
- Select the paper sourceSelect Roll Paper for Paper Source.
- 4. Select Page Processing from the pop-up menu
- **5.** Select roll paper width

Set Roll Paper Width to the width of the roll paper loaded in the printer.

## 6. Complete the setup

#### Click Print.

When you print, the document is printed so that it fills the paper width.

## >>> Important

- When printing to oversized paper sizes, use paper that has the following necessary margins added to the document size.
  - Cut sheet: 6 mm or more added to width and 23 mm or more added to height of document size
  - Roll paper: 6 mm or more added to width and 6 mm or more added to height of document size

## >>>> Note

• An oversized paper size cannot be used for the largest paper size that can be loaded in the printer.

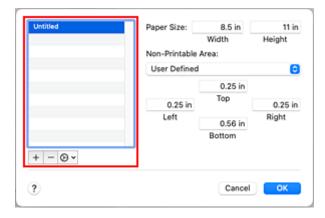

# **Setting Paper Dimensions (Custom Size)**

You can specify the height and width of paper when its size cannot be selected from the **Paper Size** menu. Such a paper size is called "custom size."

The procedure for specifying a custom size is as follows:

1. Creating a new custom paper size

In the <u>Print Dialog</u>, select **Manage Custom Sizes...** from **Paper Size**. In the displayed dialog, click +.

Untitled will be added to the list.

2. Setting details about the custom paper size

Double-click **Untitled**, enter the name of the paper size you want to register, and specify the **Width** and **Height** of the paper for **Paper Size**.

Select User Defined or your model for Non-Printable Area, and enter the margins.

3. Registering the custom paper size

Click OK.

The custom size is registered.

## >>>> Important

If the application software that created the document has a function for specifying height and width
values, use the application software to set the values. If the application software does not have such a
function or if the document does not print correctly, perform the above procedure from the printer driver
to set the values.

#### Note

- To duplicate the registered paper size, select the paper size that you want to duplicate from the Custom Paper Sizes list, and click Duplicate.
- To delete a registered paper size, select the paper size that you want to delete from the Custom Paper Sizes list, and click -.

<ul> <li>If the paper settings in the printer driver differ from the paper information registered on the printer, an error message may appear on the printer's operation panel. You can still print but you may not be able to obtain correct print results.</li> </ul>

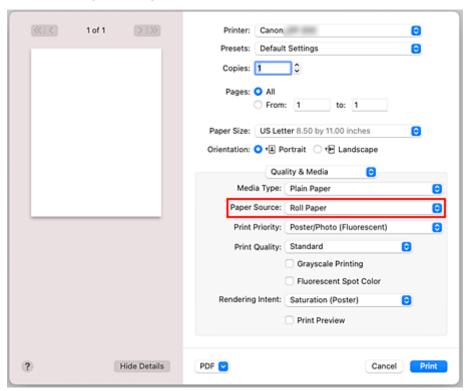

# Set a Custom Size Roll Width

By specifying the roll paper width with a value, you can use roll paper with a width that cannot be selected in **Roll Paper Width**.

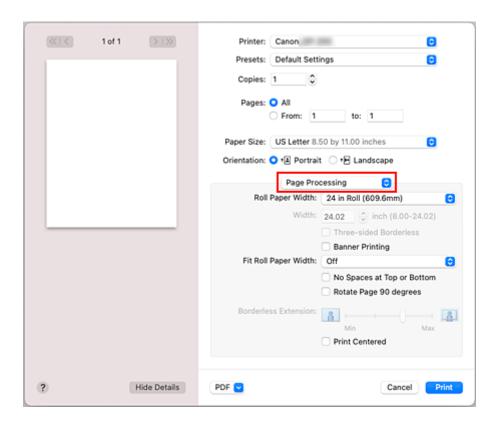

The procedure for setting custom size roll width is described below.

- 1. Select Quality & Media from the pop-up menu of the Print Dialog
- 2. Select the paper source

Select Roll Paper for Paper Source.

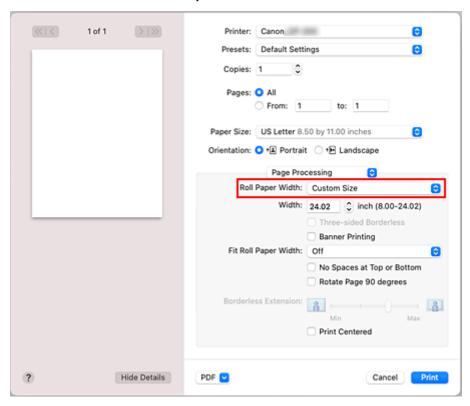

3. Select Page Processing from the pop-up menu

## 4. Select paper roll width

Select Custom Size for Roll Paper Width.

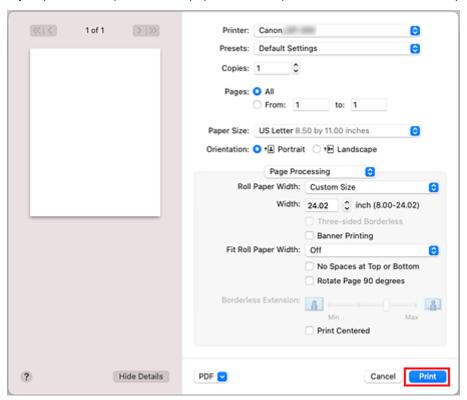

### 5. Set paper roll width

Enter the roll width you want to use for Width.

## **6.** Complete the setup

### Click Print.

If you perform the print, the roll paper with the specified width will be used for printing.

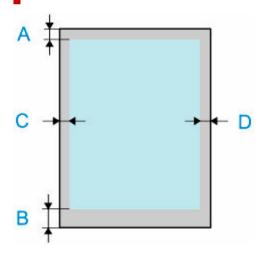

# **Print Area**

A margin required by the printer is added with respect to the size of paper loaded in the printer. Except in borderless printing, the actual printing area corresponds to the paper size minus the space for this margin.

#### Note

- Printable Area: The area that can be printed.
- For borderless printing with roll paper, the margin is 0 in. (0 mm).
   However, depending on the paper size, minor margins may be available.
  - ➡ Prints without Edges Based on the Scenarios
- Recommended Print Area: We recommend printing within this area.
- To match the document size with the actual printing area, print on oversize paper with the required margin added.
  - ➡ Printing to Oversized Paper Sizes

# **Sheets**

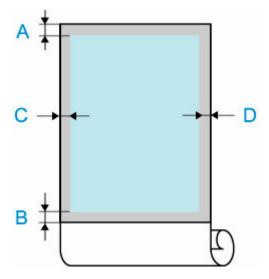

- A: Top Edge
- B: Bottom Edge
- C: Left Edge
- D: Right Edge
  - · Printable Area:

A margin of 0.2 in. (3 mm) on top, 0.5 in. (12.7 mm) on bottom\*, and 0.2 in. (3 mm) on left and right sides is required.

Recommended Print Area:
 A margin of 0.8 in. (20 mm) on top, 0.8 in. (20 mm) on bottom\*, and 0.2 in. (3 mm) on left and right sides is required.

\* The bottom margin for cut sheet depends on an OS and applications.

# Rolls

A: Top Edge

B: Bottom Edge

C: Left Edge

D: Right Edge

· Printable Area:

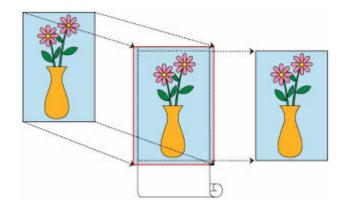

A margin of 0.2 in. (3 mm) on top and bottom and 0.2 in. (3 mm) on left and right sides is required. For borderless printing, the margins on top, bottom, left, and right are 0 in. (0 mm). For paper that supports borderless printing, see "Paper Information List."

Recommended Print Area:
 A margin of 0.8 in. (20 mm) on top, 0.2 in. (3 mm) on bottom, and 0.2 in. (3 mm) on left and right sides is required.

# **Printing without Edges Based on the Scenarios**

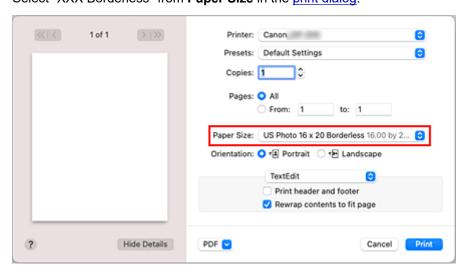

- ➤ Printing without Margins to Match Roll Paper Width
- ➤ Printing Full-Size without Margins
- ➤ Three-sided Borderless Printing on Roll Paper

### **Printing without Margins to Match Roll Paper Width**

Procedure for printing borderless by enlarging/reducing documents to match roll paper width.

 Select the paper size for whole-surface borderless printing Select "XXX Borderless" from Paper Size in the print dialog.

- 2. From the pop-up menu, select Page Processing
- 3. Select roll paper width

For paper roll width, enter the same value set in the printer under Roll Paper Width.

- Select a method for printing on roll paperIn Fit Roll Paper Width, select On (Borderless).
- 5. Complete setting process

#### Click Print.

If you print now, the document will be printed by filling in the entire surface of the paper.

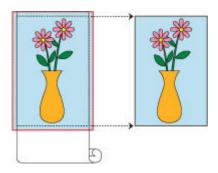

#### >>> Important

- If you want to print borderless using a custom paper size, create a custom paper size by choosing Paper Size, Manage Custom Sizes..., and setting all Non-Printable Area values to 0 mm. Next, choose Page Processing, Fit Roll Paper Width and select On (Borderless).
- If you try to set borderless printing, in **Page Processing**, **Banner Printing** and **Print Centered** will be displayed in gray and you will not be able to configure them.
- Depending on paper size, the length/width ratio of the paper may be different from that of the image, making it impossible for the whole image to fit on the paper.
  - When this happens, crop the image with the application software to match paper size.
- When printing borderless, printing may stop abruptly and the paper will be cut causing a slight color
  unevenness on the edges of the paper. If you require particularly high quality, go to Automatic Cutting
  under Advanced Paper Settings, and select None. When you do so, the document will be printed
  without the left and right margins. After the printed material has exited the printer and has been cut, cut
  the upper and lower edges with a pair of scissors.
- When printing borderless on paper with low ink-fixing properties, depending on frequency of use, the cutter unit may come into contact with the paper surface scratching it and causing the paper to be unevenly cut.
  - You may be able to improve the situation by choosing **Advanced Paper Settings** and set **Dry Time** (**Between Pages**) to a higher value.
- The following roll paper supports borderless printing.
  - → Paper Sizes
- If margins are formed on the left and right of the document, adjust the amount extending off paper during borderless printing from operation panel of the printer.
  - See "Borders appear in borderless printing" for details on how to set the amount extending off paper.

#### Note

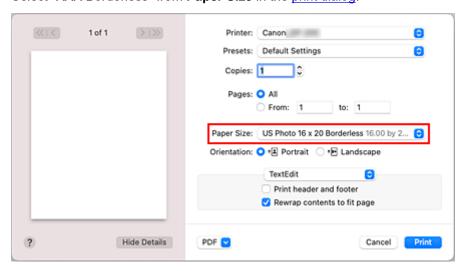

• When using applications that allow you to set margins, set margins to 0 mm.

### **Printing Full-Size without Margins**

Procedure for printing borderless images in the same size as the original document without enlarging/reducing them

 Select the paper size for whole-surface borderless printing Select "XXX Borderless" from Paper Size in the print dialog.

- 2. From the pop-up menu, select Page Processing
- 3. Select roll paper width

For paper roll width, enter the same value set in the printer under Roll Paper Width.

Select a method for printing on roll paper

For Fit Roll Paper Width, select Off.

#### >>> Important

- Depending on **Paper Size**, when setting **Fit Roll Paper Width** on **Off**, it may not be possible to print borderless.
- 5. Complete setting process

#### Click Print.

If you print now, the document will be printed by filling in the entire surface of the paper.

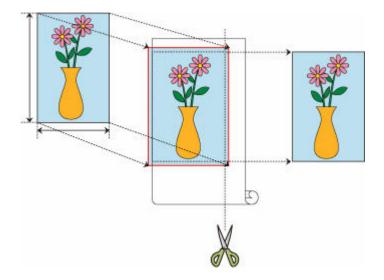

#### >>> Important

- If you try to set borderless printing, in **Page Processing**, **Banner Printing** and **Print Centered** will be displayed in gray and you will not be able to configure them.
- Depending on paper size, the length/width ratio of the paper may be different from that of the image, making it impossible for the whole image to fit on the paper.
  - When this happens, crop the image with the application software to match paper size.
- When printing borderless, printing may stop abruptly and the paper will be cut causing a slight color unevenness on the edges of the paper. If you require particularly high quality, go to Automatic Cutting under Advanced Paper Settings, and select None. When you do so, the document will be printed without the left and right margins. After the printed material has exited the printer and has been cut, cut the upper and lower edges with a pair of scissors.
- When printing borderless on paper with low ink-fixing properties, depending on frequency of use, the
  cutter unit may come into contact with the paper surface scratching it and causing the paper to be
  unevenly cut.
  - You may be able to improve the situation by choosing **Advanced Paper Settings** and set **Dry Time** (**Between Pages**) to a higher value.
- · The following roll paper supports borderless printing.
  - → Paper Sizes
- If margins are formed on the left and right of the document, adjust the amount extending off paper during borderless printing from operation panel of the printer.
  - See "Borders appear in borderless printing" for details on how to set the amount extending off paper.

#### >>> Note

• When using applications that allow you to set margins, set margins to 0 mm.

### **Three-sided Borderless Printing on Roll Paper**

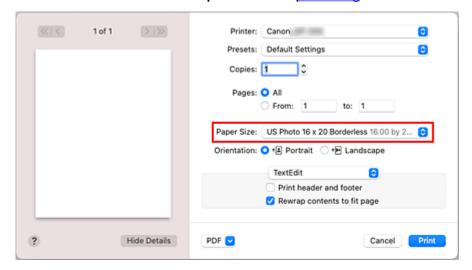

With the three-sided borderless printing feature, you can print with no borders on three sides if the paper sizes don't match the roll paper width.

You can complete borderless printing by cutting the right side of the paper after printing.

### **Three-sided Borderless Printing to Match Paper Size**

The procedure for three-sided borderless printing by enlarging or reducing documents to match paper size is described below.

 Select the paper size for whole-surface borderless printing Select "XXX Borderless" from Paper Size in the print dialog.

- 2. From the pop-up menu, select Paper Handling
- 3. Place a checkmark next to Scale to fit paper size
- 4. Select paper size

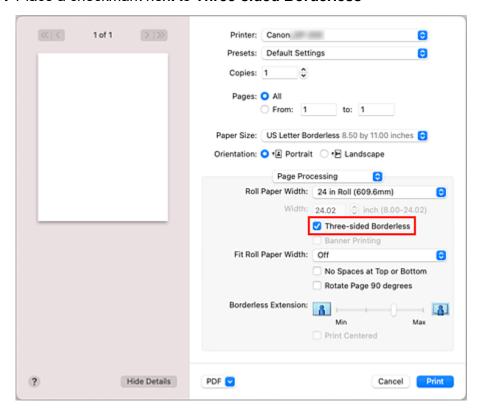

Select "XXX Borderless" in **Destination Paper Size**.

#### 5. From the pop-up menu, select Page Processing

#### 6. Select roll paper width

For paper roll width, enter the same value set in the printer under **Roll Paper Width**.

#### 7. Place a checkmark next to Three-sided Borderless

#### 8. Complete setting process

#### Click Print.

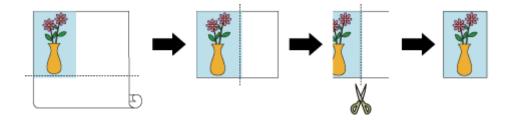

If you print now, the document will be printed without margins on three sides to fit the paper size.

#### **9.** Cut the right side of the paper

Cut the margin on the right side of the paper with scissors after printing.

Cut slightly to the inside of the margin as the document is enlarged to extend slightly beyond the specified size.

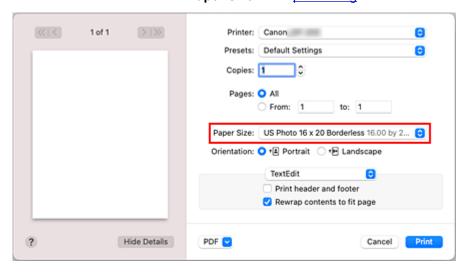

To get the document to standard size, it is recommended to take measurements and cut in the correct positions.

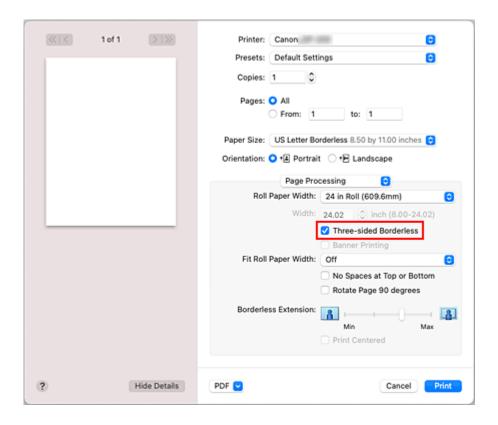

### Printing Full-Size without Margins on Three Sides

The procedure for three-sided borderless printing in the same size as the original document without enlarging or reducing the size is described below.

 Select the paper size for whole-surface borderless printing Select "XXX Borderless" from Paper Size in the <u>print dialog</u>.

- 2. From the pop-up menu, select Page Processing
- Select roll paper widthFor paper roll width, enter the same value set in the printer under Roll Paper Width.
- 4. Place a checkmark next to Three-sided Borderless

#### 5. Select a method for printing on roll paper

For Fit Roll Paper Width, select Off.

#### **6.** Complete setting process

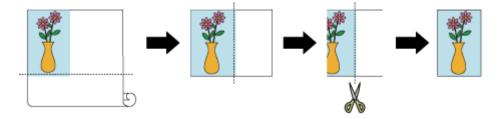

#### Click Print.

If you print now, the document will be printed without margins on three sides while retaining the same document size.

#### 7. Cut the right side of the paper

Cut the margin on the right side of the paper with scissors after printing.

To get the document to standard size, it is recommended to take measurements and cut in the correct positions.

### >>> Important

• If you try to set borderless printing, in **Page Processing**, **Banner Printing** and **Print Centered** will be displayed in gray and you will not be able to configure them.

- Depending on paper size, the length/width ratio of the paper may be different from that of the image, making it impossible for the whole image to fit on the paper.
  - When this happens, crop the image with the application software to match paper size.
- When printing borderless, printing may stop abruptly and the paper will be cut causing a slight color
  unevenness on the edges of the paper. If you require particularly high quality, go to **Automatic Cutting**under **Advanced Paper Settings**, and select **None**. When you do so, the document will be printed
  without the left and right margins. After the printed material has exited the printer and has been cut, cut
  the upper, lower, and right edges with a pair of scissors.
- When printing borderless on paper with low ink-fixing properties, depending on frequency of use, the cutter unit may come into contact with the paper surface scratching it and causing the paper to be unevenly cut.
  - You may be able to improve the situation by choosing **Advanced Paper Settings** and set **Dry Time** (**Between Pages**) to a higher value.
- The following roll paper supports borderless printing.
  - → Paper Sizes
- If margins are formed on the left of the document, adjust the amount extending off paper during borderless printing from operation panel of the printer.
  - See "Borders appear in borderless printing" for details on how to set the amount extending off paper.

#### >>>> Note

When using applications that allow you to set margins, set margins to 0 mm.

# **Printing Hanging and Horizontal Banners (Large-Format Printing)**

A drapery or banner up to 18.0m can be made by enlarging or reducing original documents made on application software.

However, there are cases in which an 18.0 meter banner cannot be printed because the application software used has limits on the document size that can be set.

The procedure for printing hanging and horizontal banners is as follows:

1. Register custom paper size

From Paper Size, use Manage Custom Sizes... to register the paper size that you want to use.

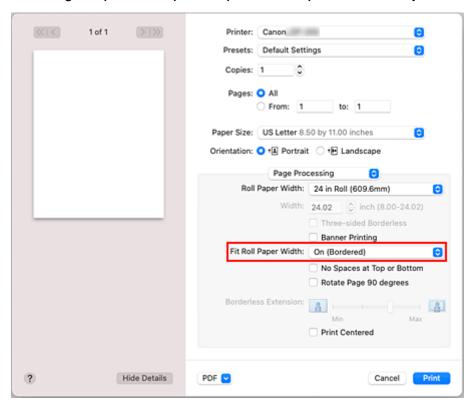

2. Select the paper size

In the Print dialog, select a registered custom paper size from the Paper Size list.

- 3. Select Page Processing from the pop-up menu
- 4. Select roll paper width

Set Roll Paper Width to the width of the roll paper loaded in the printer.

5. Selecting On (Bordered) or On (Borderless) for Fit Roll Paper Width

### >>> Important

• When using the customer paper size and printing the whole sheet without edges, create a paper size with the Non-Printable Area values all set to 0mm in Manage Custom Sizes... from Paper Size, and select On (Bordered) from the Fit Roll Paper Width in Page Processing.

#### 6. Complete the setup

Click Print.

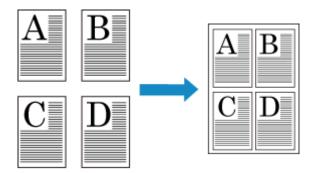

When you print, the hanging or horizontal banner is printed by using the custom paper size.

# **Printing by Dividing/Joining Documents**

- ➤ Lining Up and Printing Multiple Documents
- ➤ Printing by Connecting Multiple Pages
- ➤ Printing Multiple Pages All on One Page

## **Lining Up and Printing Multiple Documents**

You can line up multiple documents that were created separately and print them together on one page.

The procedure for lining up and printing multiple documents is as follows:

1. In Print dialog, select Canon imagePROGRAF Free Layout for PDF

Canon imagePROGRAF Free Layout is started.

Canon imagePROGRAF Free Layout allows you to edit and rearrange images.

#### 2. Execute printing

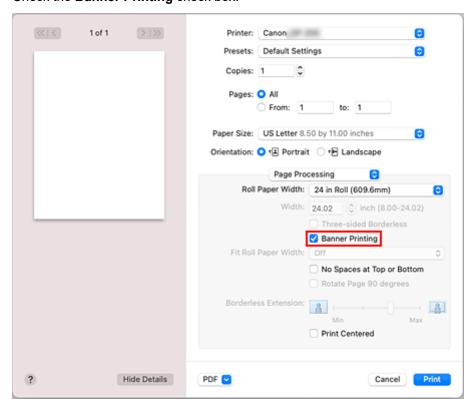

From the File menu of Canon imagePROGRAF Free Layout, select Print... to execute printing.

### **Printing by Connecting Multiple Pages**

Print documents with several pages as one continuous document. When you do this, the spaces between the pages will be removed.

The procedure for printing by connecting multiple pages is as follows:

- 1. Select Quality & Media from the pop-up menu of the Print Dialog
- Select the paper sourceSelect Roll Paper for Paper Source.
- 3. Select Page Processing from the pop-up menu
- Setting Banner Printing
  Check the Banner Printing check box.

5. Complete the setup

Click Print.

When you print, the document is printed with the multiple pages connected.

#### >>> Important

When "XXX Borderless" or "XXX Cut Sheet" is selected for Paper Size in the Print dialog, Banner
 Printing is grayed out and cannot be set.

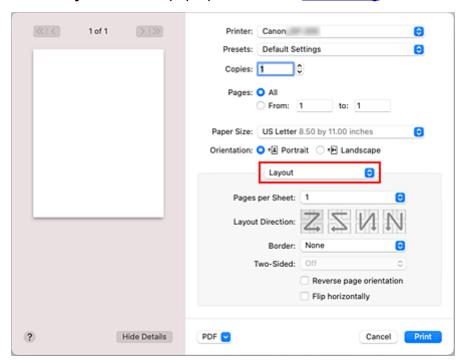

### **Printing Multiple Pages All on One Page**

The page layout printing function allows you to print more than one page image on a single sheet of paper.

The procedure for performing page layout printing is as follows:

1. Select Layout from the pop-up menu in the Print Dialog

2. Set the number of original you print on one page

In Pages per Sheet, specify the number of page you print on one page.

**3.** If necessary, set the following items

#### **Layout Direction**

To change the page placement order, select an icon from the list.

#### Border

To print a page border around each document page, select a type of page border.

#### Reverse page orientation

Select this check box to change the paper orientation.

#### Flip horizontally

Select this check box to reverse left and right of the document.

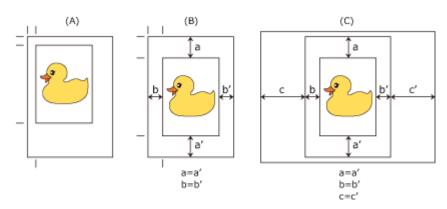

### 4. Complete the setup

#### Click Print.

When you execute print, the specified number of pages will be arranged on each sheet of paper in the specified order.

### **Printing Document in Center of Paper**

When you want to position the source document in the middle of the cut paper and print, or print with even margins on the right and left in relation to the width of the roll paper, use the **Print Centered** function. The print results when setting with **Print Centered** are as follows. Normally, if **Print Centered** is set when printed as in (A), it will be printed as in (B) for cut paper and (C) for roll paper.

#### Note

When setting the magnification using Scale in the <u>Page Setup Dialog</u>, a fixed point at the upper left corner of a page is always used as a start point for enlarging or reducing the page. For that reason, when performing reduced printing, the bottom and right margins of the paper will increase. At this time, if you place a checkmark next to **Print Centered**, the top, bottom, left and right margins can all be printed evenly.

The procedure for printing to the center of the paper is as follows:

**1.** Select the paper size

From **Paper Size**, select the size of the paper you want to print.

- 2. Select Quality & Media from the pop-up menu
- 3. Select the media type

For **Media Type**, select the same paper type loaded in the **printer**.

4. Select the paper source

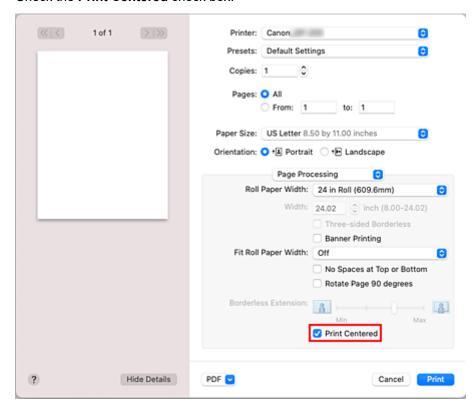

For **Paper Source**, select the setting that matches your purpose.

- 5. Select Page Processing from the pop-up menu
- 6. Selecting Roll Paper Width

If you selected a roll paper for **Paper Source**, set **Roll Paper Width** to the width of the roll paper loaded in the printer.

7. Print document in the center of paper

#### Check the **Print Centered** check box.

#### 8. Complete the setup

#### Click Print.

When you print, the printer automatically lays out the document to the center of the page and then prints it.

### >>> Important

• When you select "XXX Borderless" from **Paper Size** in the print dialog, the **Print Centered** is grayed out and cannot be selected.

# **Printing by Saving Roll Paper**

- ➤ Saving Roll Paper by Rotating Document 90 Degrees
- ➤ Saving Roll Paper by Eliminating Upper and Lower Margins on Document

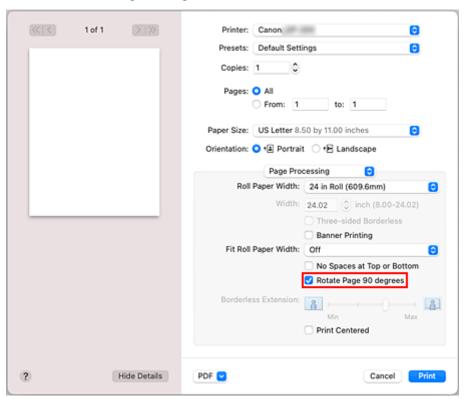

### Saving Roll Paper by Rotating Document 90 Degrees

When printing a portrait document on roll paper, you can save paper by rotating the document 90 degrees and printing the document so that it is oriented horizontally relative to the paper.

The procedure for saving paper by rotating the document 90 degrees is as follows:

- 1. Select Page Processing from the pop-up menu of the Print Dialog
- 2. Selecting Paper Saving

Select the Rotate Page 90 degrees check box.

#### 3. Complete the setup

Click Print

When you print, you can rotate a portrait document 90 degrees to save paper.

#### Important

- If the Banner Printing check box is selected for Page Processing, Rotate Page 90 degrees is grayed out and cannot be set.
- When selecting paper in portrait format from **Paper Size** in the print dialog, when this is longer than the width selected in **Roll Paper Width**, **Rotate Page 90 degrees** cannot be used.

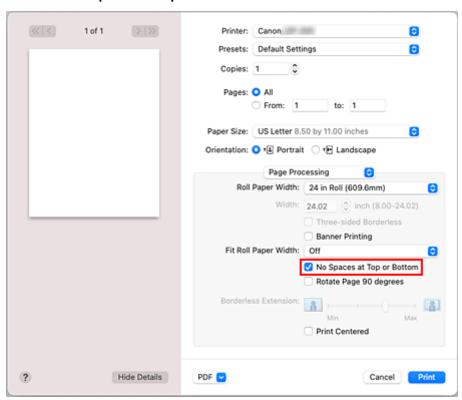

# Saving Roll Paper by Eliminating Upper and Lower Margins on Document

When printing on roll paper, you can save paper by reducing the upper and lower margins when printing.

The procedure for saving paper by reducing the upper and lower margins is as follows:

- 1. Select Quality & Media from the pop-up menu of the Print Dialog
- Select the paper sourceSelect Roll Paper for Paper Source.
- 3. Select Page Processing from the pop-up menu
- 4. Selecting Paper Saving

Check the No Spaces at Top or Bottom check box.

#### 5. Complete the setup

#### Click Print.

When you print, the upper and lower margins are reduced so that you can save paper.

### Switching the Paper Source to Match the Purpose

This printer has two paper sources: Roll Paper and Cut Sheet.

You can facilitate printing by selecting a paper source setting that matches your media type or purpose.

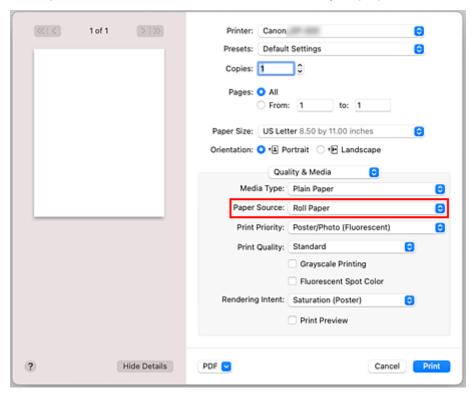

The procedure for setting paper source is as follows:

- 1. Select Quality & Media from the pop-up menu of the Print Dialog
- 2. Select the media type

For **Media Type**, select the same paper type loaded in the printer.

3. Select the paper source

For **Paper Source**, select the item below that matches your purpose.

#### **Roll Paper**

Feeds paper using roll paper.

#### **Cut Sheet**

Feeds paper that was cut to a specific paper size.

#### 4. Complete the setup

#### Click Print.

When you execute print, the printer uses the specified paper source to print the data.

### >>> Note

• If the paper settings in the printer driver differ from the paper information registered on the printer, an error message may appear on the printer's operation panel. You can still print but you may not be able to obtain correct print results.

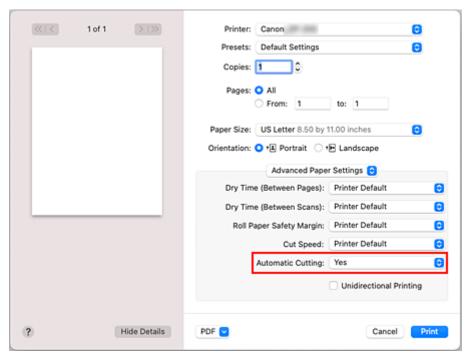

### **Cutting Roll Paper after Printing**

The procedure for cutting roll paper automatically and printing cut guidelines is as follows:

1. Select Advanced Paper Settings from the pop-up menu of the Print Dialog

#### 2. Setting Auto Cut

From Automatic Cutting, select the setting that matches your purpose.

#### Yes

The roll paper is cut automatically after printing.

#### None

The roll paper is not cut after printing.

#### **Print Cut Guideline**

Cut guidelines are printed for cutting the roll paper manually after printing.

#### >>> Note

• The default setting for automatic cutting is Yes.

#### 3. Complete the setup

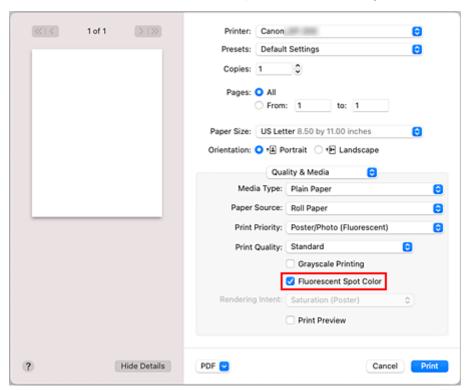

#### Click Print.

When you print, the status after printing is set to whatever was set in Automatic Cutting.

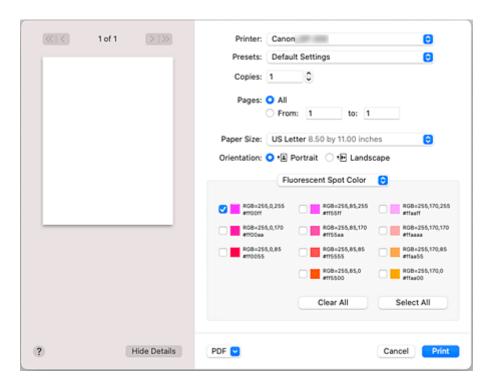

### **Specify Fluorescent Colors and Print**

You can set specific RGB values in advance for text and figures that are painted over (single-color painting) with the color palette of the application you are using, and print the specified sections of posters with bright colors using fluorescent ink.

1. Add a checkmark to Fluorescent Spot Color in Quality & Media.

2. Select Fluorescent Spot Color from the pop-up menu, and then add a checkmark to the color of the fluorescent ink you want to print with.

You can print the color palette from the printer operation panel. Print to the paper of your choice, and set the RGB values as you check the colors.

→ Test print

#### 3. Print

The color that you added the checkmark for will be brightly printed.

#### Note

When printing by specifying fluorescent colors, the RGB values set by the application software must be
retained when being input to the printer driver. If color management is performed during printing by the
application software, the RGB values are not retained, and therefore may not produce the desired print
results. If this happens, configure the settings on the application software as follows.

For detailed instructions on settings, see the user's guide of the application software you are using.

- Disable color management and color adjustment functions during printing.
- Configure settings so that color management during printing is performed by the printer.
- For color management during printing, specify the same profile as the document profile.
- Under the following conditions, printing may not produce the desired results.
  - Text or shapes that have been shaded, rotated, or anti-aliased
  - Data with specified RGB values that were saved in GIF format
- Sections that are close to the specified RGB values will also be printed with bright colors.

### **Printing Using AirPrint**

You can print photographs, E-mails, web pages, and other documents using AirPrint, even if the printer driver is not installed or the application is not downloaded.

#### Important

• There are <u>restrictions</u> for printing with AirPrint. Please be aware in advance. If you want to use all the functions of the printer, use the Canon IJ printer driver.

### **Checking Your Environment**

First, check your environment.

- AirPrint Operation Environment
   Mac running the latest version of OS
- Requirement

The Mac and the printer must be connected by one of the following methods:

- Connected to the same network over a LAN
- Connected directly without wireless router (Direct Connection)
- Connected by USB

### Add The Printer as AirPrint Printer on Your Mac

- 1. Open System Preferences -> Printers & Scanners
- 2. Click + next to the printer list
- 3. Select your printer listed as Bonjour
- 4. Select Secure AirPrint from Use
- 5. Click Add

The Printer will be added as AirPrint Printer on Your Mac

### Print with AirPrint from a Mac

- 1. Check that printer is turned on
- 2. Load paper in printer

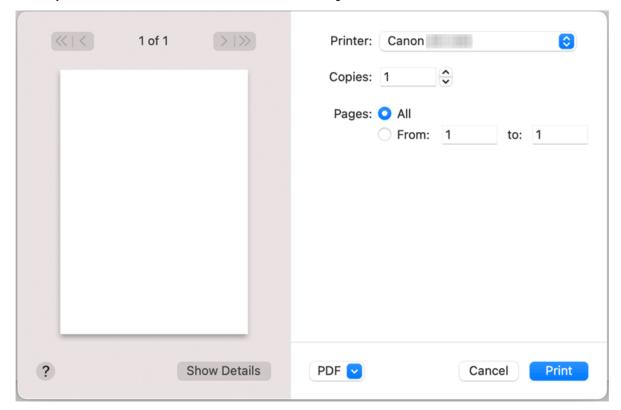

Set roll paper or cut paper.

3. Start printing from your application software

The Print dialog opens.

#### 4. Select printer

Select your model from the **Printer** list in the Print dialog.

#### Note

• Click **Show Details** to switch the setup window to the detailed display.

#### 5. Check print settings

Set paper size and other items as needed.

Set paper type from the printer.

#### >>> Note

- Use the Print dialog to set general print settings such as the layout and the print sequence. For information about print settings, refer to macOS help.
- You can set Print quality settings (Color mode, Print resolution, and Print target), Paper settings (No Top/Btm Space (Save Paper) and Unidirectional printing), and Magnification level for borderless on the operation panel of the printer. For details, see "Print settings."

#### 6. Click Print

The printer prints according to the specified settings.

#### >>>> Note

- It can take the Wi-Fi a few minutes to get connected after the printer turns on. Print after checking that the printer is connected to the network.
- You cannot use AirPrint if Bonjour settings of printer are disabled. Check LAN settings of printer and enable Bonjour settings.
- Refer to "Cannot Print Using AirPrint" for printing problems when using AirPrint.

• The display of the settings screen may differ depending on the application software you are using.

### **Deleting Print Job**

Use **Stop** button from printer to cancel the print job.

### **Restrictions on the AirPrint**

- If A2+, A3+, or 13 x 22 is selected for Paper Size in the print dialog, part of the image may not fit on the paper.
- If printing cut paper, the bottom edge of the image may be cut out.
- To perform borderless printing, configure settings in **Paper Size**. Depending on the type of paper, print results might have slight margins on the left and right edges.
- If printing cut paper, feed the paper vertically. If the paper is fed horizontally, it will still print vertical images.
- When printing images with large data sizes, the color may turn out uneven. In this case, select Printer settings -> Hard disk settings -> Save first and print -> ON on the operational panel of the printer.
- Some paper sizes that are compatible with the Canon IJ printer driver are not compatible with AirPrint. If using these sizes, set a custom size.
- Canon imagePROGRAF Free Layout and Canon imagePROGRAF Preview cannot be used.

# **Printing from Printer**

➤ Printing Data Saved on USB Flash Drive

### **Printing Data Saved on USB Flash Drive**

You can print photo data (JPEG file) or document data (PDF file) saved on the USB flash drive easily.

#### Note

- · Restrictions on printable PDF/JPEG files
  - PDF file:

Files which conforms to V 1.7

- -Does not support overprint or some of transparent processing.
- -Font embedding is recommended. If a font is not embedded, it is replaced with one of the built-in fonts below.

Times-Roman, Helvetica, Courier, Symbol, Times-Bold, Helvetica-Bold, Courier-Bold, ZapfDingbats, Times-Italic, Helvetica-Oblique, Courier-Oblique, Times-BoldItalic, Helvetica-BoldOblique, Courier-BoldOblique

- JPEG file:

Files which conforms to JFIF 1.02

Supports the files with the following conditions.

-Processing method: Basic DCT

-Color mode: RGB/GrayScale

-Number of colors: 24bit/8bit

-Number of pixels: 38400 or less vertically and horizontally

Does not support some samplings

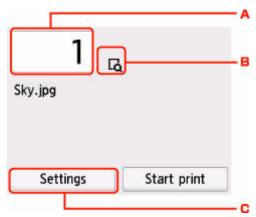

- 1. Load paper.
  - → Loading Rolls in the Printer
  - ➡ Loading Sheets in the Printer
- 2. Insert USB flash drive into USB flash drive port.
- 3. Tap on (Print from USB flash drive) displayed on the top right of the HOME screen.
  - >>> Note
    - When the message informing you that the operation restriction is enabled, ask the administrator of the printer you are using.
    - If no printable data is saved on the USB flash drive, **There are no files that can be printed.** is displayed on the touch screen.
- 4. In the list, tap folder or data to print.

Tapping a folder displays the data list. Tap the data to print.

#### >>> Note

• If no printable data is saved on the folder you tapped, **There are no files that can be printed.** is displayed on the touch screen.

The following screen is displayed.

#### A. Number of copies

Tap to display the screen below and specify the number of copies.

#### **B.** Preview

Tap to preview an image of the printout on the preview screen.

#### C. Settings

Tap to display the **Settings** screen. You can check and change the print settings.

#### 5. Tap Start print.

The following screen is displayed.

Please select something to print.

All pages

Specify page

#### All pages

Tap to start printing all pages.

#### Specify page

Tap to specify a page to print. Tap **OK** to start printing the specified page.

#### >>> Note

• Tapping **Yes** on the displayed screen returns to step 4. Tapping **No** returns to HOME screen.

# **Printing from Smartphone/Tablet**

For more on printing from a device, refer to the device's or application's instruction manual.

- > Print Easily from a Smartphone or Tablet with Canon PRINT Inkjet/SELPHY
- Printing from iOS Device (AirPrint)

### **Printing from iOS Device (AirPrint)**

Use AirPrint to print photographs, E-mails, web pages, and other documents without having to download special applications.

#### Important

• There are restrictions for printing with AirPrint. Please be aware in advance.

### **Checking Your Environment**

First, check your environment.

- AirPrint Operation Environment
   iPhone, iPad, and iPod touch running the latest version of iOS / iPadOS
- Requirement

The iOS device and the printer must be connected by one of the following methods:

- · Connected to the same network over a LAN
- Connected directly without wireless router (Direct Connection)

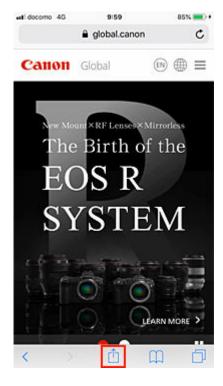

### **Printing with AirPrint from iOS Device**

- 1. Check that printer is turned on
- 2. Load paper in printer

Set roll paper or cut paper.

3. Tap operation icon using your iOS device's application

The following screen appears when printing from iOS 12's Safari. The screen differs depending on the devices or applications.

Menu options appear.

#### 4. Tap Print

#### 5. Select your model name from **Printer** on **Printer Options**

### >>> Important

• Because some applications do not support AirPrint, **Printer Options** may not be displayed. If an application does not let you use printer options, you cannot print from that application.

#### 6. Check Print Settings

Set the number of copies to be printed and print options, as needed.

#### 7. Tap Print

The printer prints according to the specified settings.

#### Note

- It can take the Wi-Fi a few minutes to get connected after the printer turns on. Print after checking that the printer is connected to the network.
- You cannot use AirPrint if Bonjour settings of printer are disabled. Check **LAN** settings of printer and enable Bonjour settings.
- Refer to "Cannot Print Using AirPrint" for printing problems when using AirPrint.

## **Paper Size**

With AirPrint, the paper size is selected automatically according to the application being used on the iOS device and the region in which AirPrint is used.

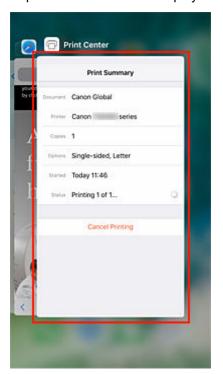

#### Important

- Depending on the device or OS, the initial settings of paper size may differ.
   Test printing is recommended.
- Depending on the application you are using, the available paper size may differ.

## **Checking Print Status**

You can check the print status of AirPrint from Print Center.

Tap **Print Center** that is displayed in multitasking mode on your iOS device.

## **Deleting Print Job**

To delete a print job with AirPrint, use one of the following two methods:

- From printer: Use **Stop** button to cancel the print job.
- From iOS device: Tap **Print Center** that is displayed in multitasking mode. In the screen that appears, tap on the print job to be deleted, and then tap **Cancel Printing**.

## Restrictions on the AirPrint

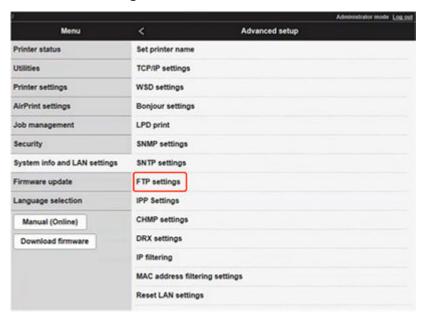

- If A2+, A3+, or 13 x 22 is selected for Paper Size in the print dialog, part of the image may not fit on the paper.
- If printing cut paper, the bottom edge of the image may be cut out.
- If printing cut paper, feed the paper vertically. If the paper is fed horizontally, it will still print vertical images.
- To perform borderless printing, configure settings in **Paper Size**. Depending on the type of paper, print results might have slight margins on the left and right edges.
- When printing images with large data sizes, the color may turn out uneven. In this case, select Printer settings -> Hard disk settings -> Save first and print -> ON on the operational panel of the printer.

# **Enlarging Copy with imageRUNNER ADVANCE**

Copy scanned with imageRUNNER ADVANCE can be sent to the printer via FTP.

## **Enable FTP from Remote UI.**

- 1. Start up Remote UI.
  - → Start up Remote UI
- 2. Select System info and LAN settings.
- 3. Select LAN settings.
- 4. Select Advanced setup.
- 5. Confirm displayed message and tap Yes.
- 6. Select FTP settings.

7. Select Enable.

**8.** Select **Use authentication** check box and **Set/change password** check box, and then enter a user name and password.

The user name and password you enter in this step are used for FTP authentication.

Enter the same value for FTP settings of imageRUNNER ADVANCE.

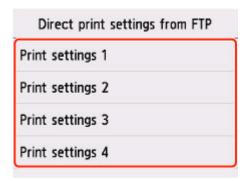

9. Select OK.

Please wait momentarily appears and returns to the startup screen.

10. Close web browser.

## Perform enlarge settings on the operation panel.

- 1. Tap (Setup) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Printer settings.
- 3. Tap Print settings.
- 4. Tap Direct print settings from FTP.
- **5.** Select the number to set and tap.

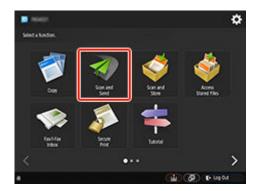

See the following two types of enlargement setting methods.

- Fitting to Paper Width
- → Specifying Magnification Level

## Scan and enlarge copy

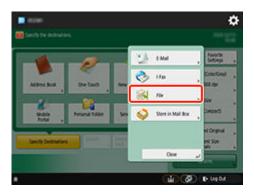

- 1. Place the copy on the platen glass or feeder of imageRUNNER ADVANCE.
- 2. Select Scan and Send.

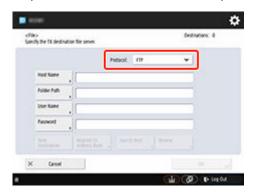

3. Tap New Destination.

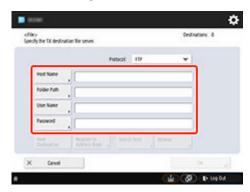

4. Tap File.

5. Tap FTP from the Protocol drop-down list.

6. Enter setting items.

Enter the printer's IP address as the Host Name.

#### Note

• We recommend that you set a fixed IP address for your printer.

Enter "./folderN" in **Folder Path**. ("N" represents the print setting number specified in the **Direct print settings from FTP** screen on the printer.) For example, to enter the pathname for **Print settings 1**, enter "./folder1". For **Print settings 2**, enter "./folder2".

Use the same User Name and Password that you set for FTP authentication in the Remote UI.

- **7.** Tap **OK**.
- **8.** Tap the setting button for file format.

#### 9. Select File Format.

Select PDF or JPEG.

#### Note

- If you select PDF, remove the check from the Compact and Encrypt check boxes.
- 10. Specify the settings as necessary.

## >>>> Important

- Select 300x300 dpi or 600x600 dpi as the resolution.
- **11.** Press **(Start)**.

If you are placing your originals on the platen glass, press (Start) to scan each original.

**12.** When scanning is complete, tap **Start Sending**.

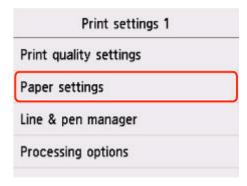

Scanned originals are sent to the printer and printing starts.

## >>> Note

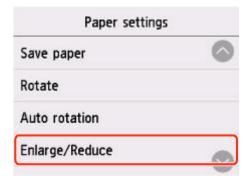

• It is recommended to register the setting contents in **Favorite Settings**.

# **Fitting to Paper Width**

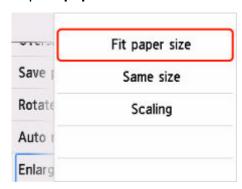

#### 1. Tap Paper settings.

#### 2. Tap Enlarge/Reduce.

#### 3. Tap Fit paper size.

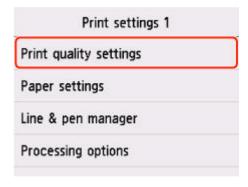

#### Note

- Change the image quality in **Print quality settings** if necessary.
- You can specify the orientation of the image from Rotate.

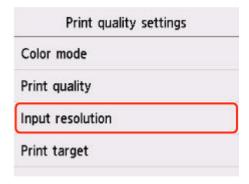

## **Specifying Magnification Level**

## **Setting Input resolution**

#### 1. Tap Print quality settings.

#### 2. Tap Input resolution.

Select the input resolution that matches your output requirements.

#### 600 dpi

Select when printing at 600 dpi.

#### 300 dpi

Select when printing at 300 dpi.

#### Specify print job

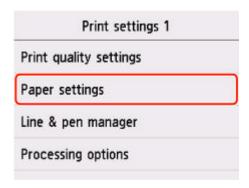

Select to match the input resolution of the printer with the scanning resolution when scanning the original in JPEG format.

### >>> Important

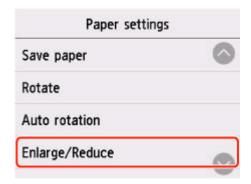

• When scanning the original in JPEG format with imageRUNNER ADVANCE, match the scanning resolution with the input resolution of the printer. If the resolution is different, it will not be printed at the specified magnification level.

## Setting scale percentage

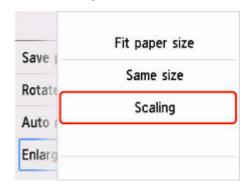

#### 1. Tap Paper settings.

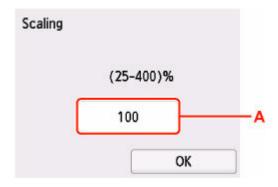

## 2. Tap Enlarge/Reduce.

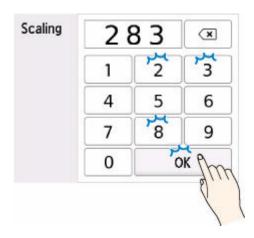

## 3. Tap Scaling.

**4.** Tap A on the displayed screen.

**5.** Enter the scale percentage, and then tap **OK**.

For commonly used magnification conversions, refer to Reference for Magnification.

**6.** Select **OK** on the displayed screen.

#### >>> Note

- Change the image quality in **Print quality settings** if necessary.
- You can specify the orientation of the image from **Rotate**.

## **Reference for Magnification**

ISO A format

		Original size		
		A4	А3	
Output size	A4	100%	71%	
	А3	141%	100%	
	A2	200%	141%	
	A1	283%	200%	
	A0	400%	283%

# **Printing with Fluorescent Ink**

Create items such as posters in bright and vivid color tones using fluorescent ink.

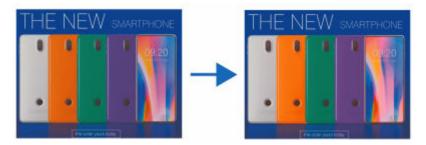

## **Using Vivid Color Tones**

There are two ways to make your item vivid.

#### **Printing the Entire Item Vividly (Vivid mode)**

Make all warm colors bright and vivid.

This is recommended when a photo or illustration contains multiple warm colors such as pink and orange.

#### **Printing Colors of Specific Areas Vividly (Spot mode)**

Make specific colors bright and vivid using pink or orange fluorescent ink.

This is recommended when you want to enhance text or shapes.

## **Creating Vivid Items**

In Windows, you can use PosterArtist, an application for creating professional-looking posters even without professional knowledge or technique; simply select a design from a variety of templates and then insert and edit text, photos, clipart, and other materials.

Use PosterArtist to quickly create a bright and vivid item by selecting a template and specifying colors for text and shapes. There is also a function for previewing only the area that will be vivid. For details, see Creating Vivid Posters Using Fluorescent Colors.

#### >>> Note

- Even for items you created in your application, you can use PosterArtist to make them vivid by specifying pink or orange fluorescent ink for specific portions. For details, see Link with PosterArtist to print with bright colors.
- You can also open the printer driver from your application and specify the setting for making color tones vivid in the print settings screen. For details, see Printing By Setting Print Purpose or Specify Fluorescent Colors and Print.
- If using macOS, create an item in your application, and then see <u>Printing with Easy Setup</u> or <u>Specify</u> Fluorescent Colors and Print and print.

# **Printer Driver**

- Windows Printer Driver
- macOS Printer Driver

# macOS Printer Driver

- Overview of the Printer Driver
- ➤ Description of Print Dialog
- ➤ Updating the Printer Driver

## **Overview of the Printer Driver**

- Canon IJ Printer Driver

- Deleting the Undesired Print Job
- Display the Printing Status Screen
- Canon IJ Printer Utility2
- Opening the Canon IJ Printer Utility2
- Checking the Ink Status from Your Computer
- Instructions for Use (Printer Driver)

## **Canon IJ Printer Driver**

The Canon IJ printer driver (called printer driver below) is a software that is installed on your computer for printing data with this printer.

The printer driver converts the print data created by your application software into data that your printer can understand, and sends the converted data to the printer.

Because different models support different print data formats, you need a printer driver for the specific model you are using.

## **Using Help of the Printer Driver**

You can display Help function from the Print Dialog.

Select a setup item from the pop-up menu in the Print dialog. Then click ? at the bottom left of the screen to display an explanation of the item.

Help for the printer driver is displayed when the following pop-up menu item is selected:

- · Quality & Media
- Color Options
- Fluorescent Spot Color
- Advanced Paper Settings
- · Page Processing
- Additional Settings

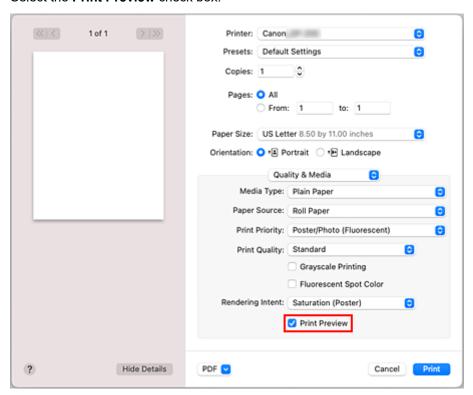

## **Checking Layout in Preview before Printing**

You can display and check the print result before printing.

The procedure for displaying the print result before printing is as follows:

- 1. Select Quality & Media from the pop-up menu of the Print Dialog
- 2. Select Print Preview

Select the Print Preview check box.

3. Complete the setup

#### Click Print.

When executing printing, start up Canon imagePROGRAF Preview to display the print results.

#### Note

• The printing results can be displayed even when selecting Canon imagePROGRAF Preview from PDF.

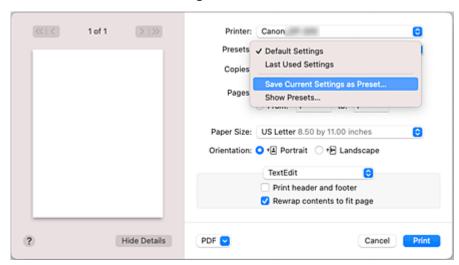

## **Registering a Changed Printing Profile**

You can name and register the printing profile you made in the <u>Print Dialog</u>. The registered printing profile can be called up from **Presets** to be used. You can also delete the unnecessary printing profile.

The procedure for registering a printing profile is as follows:

## **Registering a Printing Profile**

- 1. In the Print dialog, set the necessary items
- 2. Select Save Current Settings as Preset... from the Presets

#### 3. Save the settings

In the displayed dialog, enter a name in **Preset Name**, and if necessary, set **Preset Available For**. Then click **OK**.

## Important

• There are also print settings that cannot be saved to preset.

## **Using Registered Printing Profile**

 On Presets in the Print dialog, select the name of printing profile you want to use Printing profile in the Print dialog will be updated to the called profile.

# Deleting Unnecessary Printing Profile

#### 1. Select the printing profile to be deleted

In the print dialog, select **Show Presets...** in the **Presets** section. Then in the dialog that appears, select the name of the printing profile to be deleted.

#### 2. Delete the printing profile

Click -, and click  $\mathbf{OK}$ . The selected printing profiles will be deleted from  $\mathbf{Presets}$ .

## **How to Open the Printer Driver Setup Dialog**

You can display the printer driver setup dialog from the application software you are using.

## **Opening the Page Setup Dialog**

Use this procedure to set the page (paper) settings before printing.

Select Page Setup... from the File menu of the application software
 The Page Setup Dialog opens.

## **Opening the Print Dialog**

Use this procedure to set the print settings before printing.

Select Print... from the File menu of the application software
 The Print Dialog opens.

#### >>> Important

 Depending on the macOS version or the application you are using, the print dialog screen display may differ.

Also, some features may be restricted.

# **Page Setup Dialog**

In the Page Setup dialog, you configure the basic print settings such as the size of paper loaded in the printer or the scaling ratio.

To open the Page Setup dialog, you typically select **Page Setup...** from the **File** menu of your application software.

#### **Format For**

Select the model to be used for printing.

#### Paper Size

Select the size of the paper to be used for printing.

To set a non-standard size, select Manage Custom Sizes....

#### Orientation

Select the print orientation.

#### Scale

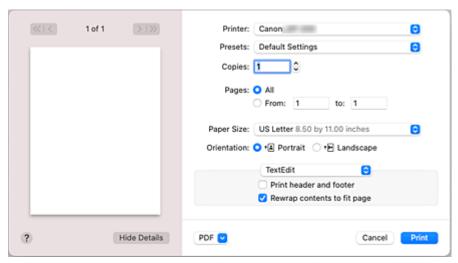

Set the scaling percentage.

You can expand or reduce the size of the document when printing.

## **Print Dialog**

In the Print dialog, you can set paper type, paper source and print quality to start printing.

To open the Print dialog, you typically select Print... from the File menu of your application software.

#### **Printer**

Select the model to be used for printing.

When you click **Add Printer...**, a dialog for specifying the printer opens.

#### **Presets**

You can save or delete the settings of the Print dialog.

#### >>>> Note

• You can select **Show Presets...** to check the print settings that are set in the Print dialog.

#### Copies

You can set the number of copies to be printed.

#### Note

• You can set collated printing by choosing **Paper Handling** from the pop-up menu.

#### **Pages**

You can set the range of pages to be printed.

#### Paper Size

Select the size of the paper to be used for printing.

To set a non-standard size, select Manage Custom Sizes....

#### Orientation

Select the print orientation.

#### Pop-up Menu

You can switch between pages in the Print dialog by the pop-up menu. The first menu to appear differs depending on the application software that opened the Print dialog.

You can choose one of the following items from the pop-up menu.

#### Layout

You can set page layout printing.

Use **Reverse page orientation** to change the paper orientation, and use **Flip horizontally** to print a mirror image of the document.

#### **Color Matching**

You can select the color correction method.

#### **Paper Handling**

You can set the pages to be printed on paper and the print order.

#### **Cover Page**

You can output cover pages both before and after a document.

#### **Quality & Media**

You can set basic print settings that match the printer.

#### **Fluorescent Spot Color**

Set the colors you want to use as fluorescent spot colors.

#### **Color Options**

You can adjust the print colors as you desire.

#### **Advanced Paper Settings**

Specifies detailed print settings that match the media type loaded in the printer.

#### **Page Processing**

You can configure the detailed settings when printing to roll paper, and adjust the amount of the source document that sticks out from the page when printing all borderless.

#### **Additional Settings**

The output method can be set.

#### **Supply Levels**

A rough indication of the remaining ink level is displayed.

#### **PDF**

You can save a document in PDF (Portable Document Format) format.

By starting up Canon imagePROGRAF Free Layout, it is possible to allocate multiple source documents, and display the print results in imagePROGRAF Preview.

## **Updating Media Information in Printer Driver**

This function gets the latest media information from the printer and updates the media information in the printer driver.

When the media information is updated, the media displayed for **Media Type** on the **Quality & Media** screen is updated to the latest information.

The procedure for updating media information is described below.

# **Update Media Information**

1. From the Canon IJ Printer Utility2 pop-up menu, select Media Information

#### 2. Click Update Media Information

A dialog appears.

#### 3. Check that the media information has updated

By following the dialog instructions, check that the printer is on, and then click **OK**.

After checking whether or not the printer media information needs to be updated, a message will be displayed.

If the printer media information is up to date, click **OK** and finish updating media information.

If the information needs to be updated, follow the below steps to do so:

#### 4. Update media information

Check the message and click **Update**.

The printer driver media information will update.

When the authentication screen appears, enter the administrator's name and password, and then click **Install Helper**.

#### >>>> Important

- It may take some time to update the media information.
- Do not change media information on the printer while you are updating media information on the driver.

#### 5. Finish updating media information

When a confirmation message appears, click OK.

The media information will be updated.

#### >>>> Important

Restart the application or software you are printing from after updating media information.

## >>> Important

- Ensure that a user with administrator privileges carries out the media information update.
   Users other than administrators can check if a media information update is required, but cannot carry out the update itself.
- When you have added, deleted, or edited media using administrative tools (the Media Configuration Tool) but have not updated the media information, issues may arise such as the inability to print.

#### >>> Note

• If the printer is being shared, **Correct Media Information** will display on the client machine.

# **Correcting Media Information in Printer Driver (When Printer Used in Shared Environment)**

The printer driver media information will be corrected.

Carrying out a media information correction will correct the configuration of the media information in the printer driver.

The procedure for correcting media information is described below.

# **Correct Media Information**

1. From the Canon IJ Printer Utility2 pop-up menu, select Media Information

#### 2. Click Correct Media Information

After checking whether or not the printer driver's media information is correct, a message will be displayed.

If the printer media information is set correctly, click **OK** and finish correcting media information. If the information needs to be corrected, follow the below steps to do so:

#### 3. Correct media information

When a confirmation message appears, click **OK**.

The printer driver media information will be corrected.

When the authentication screen appears, enter the administrator's name and password, and then click **Install Helper**.

#### 4. Complete media information correction

When a confirmation message appears, click **OK**.

The paper information will be corrected.

#### >>> Important

Restart the application or software you are printing from after correcting media information.

#### Note

 Media Information will only be displayed on the client machine in use when the printer is being shared.

# **Confirm the Printer Paper Information**

You can check the size and type of paper that was set to the printer.

- 1. From the Remote UI, select Printer status
- 2. Check printer's paper information

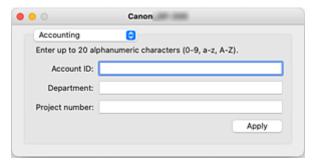

The size and type of the media set on the printer main unit is displayed by feed position.

## **Setting Accounting Information**

By Setting Accounting Information, you add IDs to print jobs, and use the printer and cost management tool to tabulate print history information for any ID.

The procedure for Setting Accounting Information is described below.

1. From the Canon IJ Printer Utility2 pop-up menu, select Accounting

#### 2. Set Account ID

Set an Account ID, as necessary.

#### Account ID/Department/Project number

Enter the Account ID, Department, or Project number to be set. Enter the ID by using up to 20 alphanumeric characters (0 to 9, a to z, A to Z).

#### 3. Apply settings

Check that the printer is on, and then click **Apply**.

When the confirmation message appears, click **OK**.

The setting is now valid.

#### Note

• If the printer is being shared, **Accounting** information cannot be set on client machines.

### Set a PIN Code for Print Jobs

If you set a PIN code to your print jobs, the print jobs remain in standby status until the PIN code is entered on the printer operation panel.

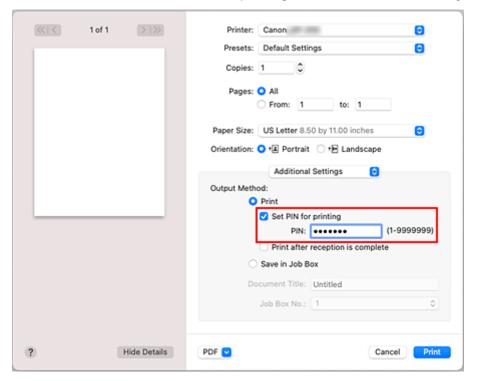

As the material is printed immediately after entering the PIN code, issues such as retrieving the wrong documents and allowing others to peek at your documents can be prevented.

The procedure for setting a PIN code to your print jobs is explained here.

1. Select Additional Settings from the pop-up menu of the Print Dialog

#### 2. Set the PIN code

Place a checkmark next to Set PIN for printing, and enter a one to seven-digit number in PIN.

#### 3. Complete the setup

#### Click Print.

When you print, the print job is set to standby status on the printer unit.

If you enter the PIN code you set on the printer operation panel, the print job will be printed.

#### Note

- See "Printing Security Print Jobs" for instructions on how to operate using the printer operation panel.
- Print jobs with a PIN code set are not saved on the printer hard disk.

## **Related Topics**

- → Adjusting Contrast

# **Deleting the Undesired Print Job**

If the printer does not start printing, canceled or failed print job data may be remaining. Delete unnecessary print jobs from the print status check screen.

- 1. Open System Preferences, and select Printers & Scanners
- 2. Select your model, and then click Open Print Queue...

The print status check screen appears.

3. Select the unnecessary print job and click  $\otimes$ 

The selected print jobs will be deleted.

## **Displaying the Printing Status Screen**

Check the print progress according to the following procedure:

#### 1. Launch the printing status screen

· If the print data has been sent to the printer

The printing status screen opens automatically. To display the printing status screen, click the printer icon displayed on the Dock.

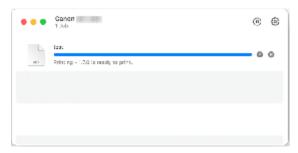

· If the print data has not been sent to the printer

#### Open System Preferences, and select Printers & Scanners.

To display the printing status screen, select the name of your printer model from the printer list, and then click **Open Print Queue...**.

#### 2. Checking the printing status

You can check the name of the file being printed or ready for being printed.

- Deletes the specified print job.
- Stops printing the specified document.
- Resumes printing the specified document.
- Stops printing all documents.
- Displayed only when printing of all documents is being stopped, and resumes printing all documents.

#### Note

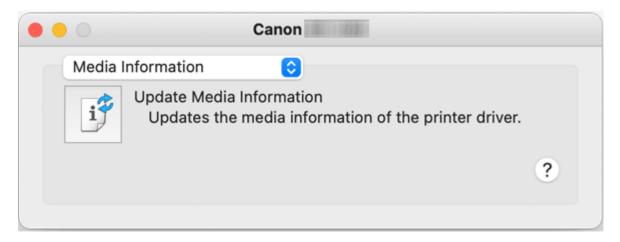

· Depending on your model, the printer icon display may be different.

#### >>>> Important

- If an error occurs, an error message will appear on the printing progress confirmation screen.
- The content of the error message may differ depending on the OS version.
- · The printer part names in the error message may differ from what is listed in this manual.
- If the content of the error message is difficult to understand, check the error message displayed on the printer operation panel.

## **Canon IJ Printer Utility2**

The Canon IJ Printer Utility2 allows you to update media information and configure accounting.

You can switch between pages in Canon IJ Printer Utility2 by the pop-up menu. You can choose one of the following items from the pop-up menu.

#### **Media Information**

Gets the latest media information from the printer and updates the media information in the printer driver.

#### **Accounting**

Allows you to set IDs for each job and each user, and manage the print history and print jobs.

#### >>>> Note

• If the printer is being shared, **Accounting** information cannot be set on client machines.

#### >>> Note

• To operate the Canon IJ Printer Utility2, you must first turn on the printer.

# **Opening the Canon IJ Printer Utility2**

To open the Canon IJ Printer Utility2, follow the steps below.

- 1. Open System Preferences, and select Printers & Scanners
- 2. Start the Canon IJ Printer Utility2

Select your model from the printer list, and click **Options & Supplies...**.

Click Open Printer Utility in Utility tab.

Canon IJ Printer Utility2 is launched.

## **Checking the Ink Status from Your Computer**

You can check the detailed information such as the remaining ink level and the ink tank types of your model.

If you select **Printer status** from Remote UI, an illustration showing the status of the ink tanks and maintenance cartridge appears.

#### Estimated ink levels

You can check the types and levels of ink.

When ink levels are running low or an error occurs because there is no ink, a notification icon will appear.

#### Ink model number

You can look up the correct ink tank for your printer.

### Maintenance cartridge usage

You can check the estimated usage amount of the maintenance cartridge.

When capacity levels are low or the cartridge is at full capacity, a notification icon will appear.

### >>> Note

• To check the ink levels or the estimated usage of the maintenance cartridge, you can also display the pop-up menu of the Print dialog and select **Supply Levels**.

## **Instructions for Use (Printer Driver)**

This printer driver is subject to the following restrictions. Keep the following points in mind when using the printer driver.

## **Restrictions on the Printer Driver**

- When you set up the Page Setup dialog, be sure to begin by selecting the model you are using from the **Format For** list. If you select another printer, printing may not be performed properly.
- The following functions cannot be used in macOS, though they can be used in Windows computers.
  - Poster Printing
  - Stamp Printing
- Depending on the macOS version or the application you are using, the print dialog screen display may differ.
  - Also, some features may be restricted.
- If you connect this printer and AirPort with a USB cable and print, you must install the latest AirPort firmware.

## **Notes on Adding a Printer**

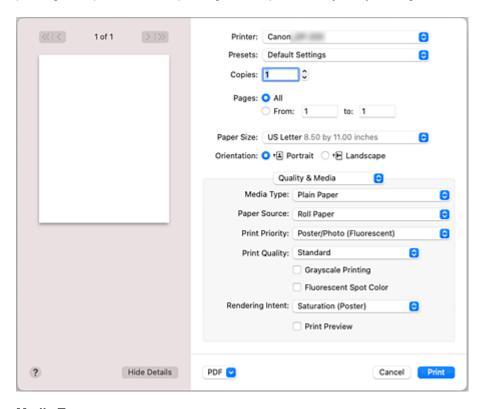

- If you will be installing the Canon printer driver on a macOS and using the printer through a network connection, select the printer name that contains Bonjour in the **Add (Add Printer)** dialog.
- If several options are displayed under Use in the Add (Add Printer) dialog, choose Canon XXX
  (where "XXX" is your model name) in order to maximize your ability to control settings during printing.

# **Description of Print Dialog**

- Quality & Media
- Color Options
- ► Advanced Paper Settings
- ▶ Page Processing
- Additional Settings
- Specifications

## **Quality & Media**

This dialog allows you to create a basic print setup in accordance with the paper type. Unless special printing is required, normal printing can be performed just by setting the items in this dialog.

### Media Type

Select the type of media to be used.

You must select the type of media actually loaded in the printer. This selection enables the printer to carry out printing properly for the material of the media used.

#### >>> Note

 After updating media information of the printer, start up the Canon IJ Printer Utility2 and update media information.

### **Paper Source**

Select the source from which paper is supplied.

### **Roll Paper**

Feeds paper using roll paper.

#### **Cut Sheet**

Feeds paper using the cut paper.

### **Print Priority**

Select elements to prioritize for print results.

### Poster/Photo

Prioritize the print results of the poster or photo without using fluorescent ink.

### Poster/Photo (Fluorescent)

Use fluorescent ink to make posters or photos more vibrant.

### **Print Quality**

Select the one that is closest to the original document type and the purpose.

When one of the radio buttons is selected, the appropriate quality will be set automatically.

#### High

Gives priority to print quality over printing speed.

#### Standard

Prints with average speed and quality.

#### **Fast**

Gives priority to printing speed over print quality.

#### Custom

Select this radio button to specify a quality.

#### Quality

When you select **Custom** in **Print Quality**, you can use the slider bar to adjust the print quality level.

### **Grayscale Printing**

Print in grayscale.

#### **Fluorescent Spot Color**

Specify an area and print posters with bright colors.

To use fluorescent spot colors, add a checkmark.

#### **Rendering Intent**

Specify the method of matching to use when selecting Canon Color Matching in Color Matching.

#### Perceptual (Photo)

Reproduces colors of general photos naturally and features smooth gradation. In addition, selecting this setting allows you to adjust colors easily using an application software.

### Saturation (Poster)

Reproduces vivid colors on data such as a poster.

#### **No Color Correction**

Performs printing without color matching.

### **Print Preview**

You can start up the Canon imagePROGRAF Preview, and check what the printing results will be before executing the print.

Check this check box to display a preview before printing.

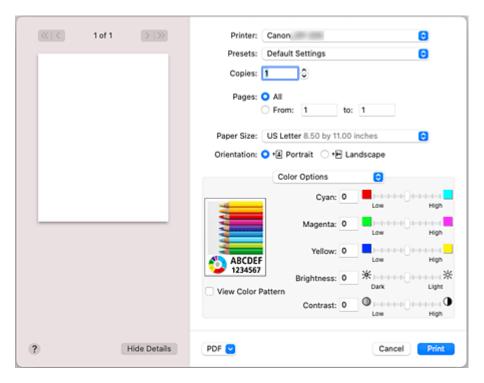

## **Related Topics**

- ➡ Switching the Paper Source to Match the Purpose
- Setting the Print Quality Level (Custom)
- ➡ Printing a Color Document in Monochrome
- ➡ Specify Fluorescent Colors and Print

## **Color Options**

This dialog allows you to adjust the print color as you like. If the color of the printed image is not as expected, adjust the properties in the dialog and retry printing.

The adjustments made here do not affect the colors of the original print data unlike applications dedicated to image processing. Use this dialog just to make fine adjustments.

#### **Preview**

Shows the effect of color adjustment.

As you adjust each item, the effects are reflected in the color and brightness.

#### **View Color Pattern**

Displays a pattern for checking color changes produced by color adjustment.

When you want to display the sample image with a color pattern, check this check box.

#### Note

 When Grayscale Printing check box is checked in the Quality & Media, the graphic is displayed in monochrome.

### Color balance (Cyan, Magenta, Yellow)

If necessary, adjust the strength of each color. To strengthen a color, drag the slider to the right. To weaken a color, drag the slider to the left.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

Adjusting the color balance will result in variations in the balance among the volumes of the individual color inks and hence in the hues of the document as a whole.

Use the printer driver only when adjusting the color balance slightly. To change the color balance significantly, use the application software.

### **Brightness**

Adjusts the brightness of your print. You cannot change the levels of pure white and black. However, the brightness of the colors between white and black can be changed. Colors become brighter as you

drag the slider toward the right and darker as you drag the slider toward the left. You can also directly enter brightness values that are linked to the slider bar. Enter a value in the range from -50 to 50.

#### Contrast

The Contrast function changes the differences between light and dark in images during printing. To make the differences between the light and dark portions of images greater and more distinct, increase the contrast. On the other hand, to make the differences between the light and dark portions of images smaller and less distinct, reduce the contrast.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

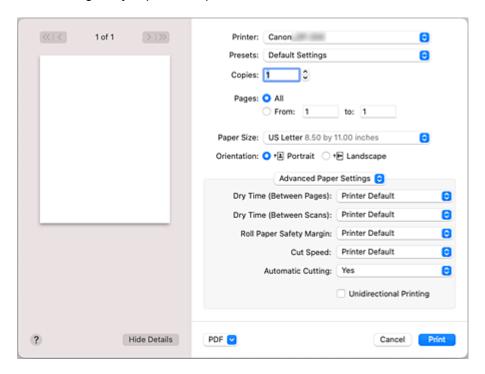

## **Related Topics**

- Specifying Color Correction
- → Adjusting Color Balance
- → Adjusting Brightness
- Adjusting Contrast

## **Advanced Paper Settings**

Use this dialog box to set detailed print settings that match the media type loaded on the printer.

If the paper becomes stained during printing or if the quality of the print results is less than expected, using these settings may improve the print results.

#### **Dry Time (Between Pages)**

Allows you to set the interval between the time each page is printed and the time it exits the printer. Since a certain waiting time is required for the ink to dry before the roll paper is cut, even when automatic cutting is set, you can cut the paper when the ink is dry.

The **Dry Time (Between Pages)** setting is effective only for roll paper.

#### **Printer Default**

Applies the settings configured in operation panel of the printer.

#### None

Documents are ejected immediately after printing is over.

#### 30 seconds / 1 minute / 3 minutes / 5 minutes / 10 minutes / 30 minutes / 60 minutes

After printing is over, documents are ejected after the set time has elapsed.

#### **Dry Time (Between Scans)**

Allows you to set the interval between the printing of a scan on a page and the printing of the next scan. Prevents ink bleeding on a page or uneven coloring during borderless printing.

#### **Printer Default**

Applies the settings configured in operation panel of the printer.

#### None

Each scan is printed immediately after the previous one.

#### 0.5 seconds / 1 second / 3 seconds / 5 seconds / 7 seconds / 9 seconds

After one scan has been printed, the next one will be printed after the set time has elapsed. Increase the interval depending on the occurrence of bleeding and uneven coloring.

#### **Roll Paper Safety Margin**

Allows you to specify the length of the white margins on the edges of the paper in order to make even significantly curled paper adsorb to the platen.

#### **Printer Default**

Applies the settings configured in operation panel of the printer.

#### 3<sub>mm</sub>

Prints in standard-size.

Choose this setting if there are no particular problems when printing.

#### 20<sub>mm</sub>

Choose this setting in case of chafing against the print head, for example when using significantly curled paper.

#### **Cut Speed**

Allows you to select the speed of automatic cutting. Use it to adjust the automatic cutting function when clean cutting is not possible.

### **Printer Default**

Applies the settings configured in operation panel of the printer.

#### **Fast**

Choose this if clean cut surfaces are not possible with the **Standard** setting.

#### **Standard**

Choose this if there are no particular problems with automatic cutting.

#### Slow

Choose it when using adhesive paper in order to prevent the glue from sticking to the cutter and to avoid a drop in cutting performance.

### **Automatic Cutting**

You can set whether to have the paper cut automatically or to have cut lines printed on the paper.

The following settings can be configured for automatic cutting.

#### **Printer Default**

Applies the settings configured in the operation panel of the printer unit.

#### None

After printing is over, the printer goes on to print the next set of data without cutting the paper into individual pages.

#### **Print Cut Guideline**

After printing is over, the printer prints cutting lines on each page and goes on to print the next set of data.

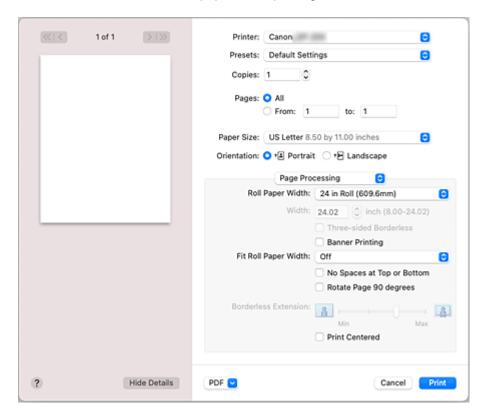

### **Unidirectional Printing**

Suppresses uneven coloring and line shifts during printing.

To perform unidirectional printing, check this check box.

## **Page Processing**

You can configure advanced settings, such as for printing on roll paper and for adjusting how much of the document extends outside the paper when printing borderless.

#### **Roll Paper Width**

Select the roll paper width.

Select the width that matches the width of the roll paper loaded in the printer.

#### Width

This enables you to select Custom Size in Roll Paper Width, allowing you to specify the roll width.

#### **Three-sided Borderless**

If you check this check box, and the width or the length of the output paper size is smaller than the roll width, a margin will be created on the right of the document, and the remaining three sides (top, bottom, and left) will be borderless when printing.

### **Banner Printing**

Select this check box to print documents with several pages as one continuous document. When you do this, the spaces between the pages will be removed.

### Fit Roll Paper Width

The printer automatically expands or reduces the document to match the roll paper width and then prints the document.

#### Off

The document is printed as-is without being expanded or reduced.

## On (Bordered)

The printer automatically expands or reduces the document to match the roll paper width and then prints the document.

#### On (Borderless)

When borderless printing is performed, the printer automatically enlarges or reduces the document to match the roll paper width and then prints the document.

#### No Spaces at Top or Bottom

When printing on roll paper, you can save paper by reducing the upper and lower margins.

### **Rotate Page 90 degrees**

When you print a portrait document onto roll paper, you can save paper by rotating the document 90 degrees and print the document horizontally relative to the paper.

#### **Borderless Extension**

Adjusts how much of the document extends outside the paper by using the **Borderless Extension** slider bar.

Drag to slider bar to the right to increase the extension amount, and to the left to decrease the extension amount.

#### **Print Centered**

Prints document in center of paper.

### >>> Note

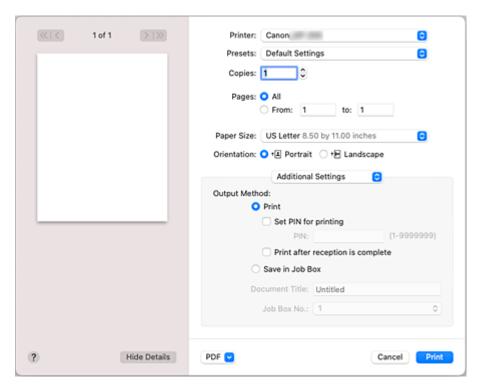

• Depending on the settings, some items cannot be set.

## **Related Topic**

➡ Prints without Edges Based on the Scenarios

## **Additional Settings**

Use this dialog to set the output method.

### **Output Method**

Set the method for exporting the print job to the printer's hard disk drive.

#### **Print**

After the printing ends, the print job is not saved to the printer's hard disk drive.

#### Set PIN for printing

Set a PIN code for print jobs to prevent issues such as retrieving the wrong documents and allowing others to peek at your documents.

### PIN

Enter a one to seven-digit number.

### Print after reception is complete

This can be set when selecting **Print**.

If you check this, printing will start after the print job is received. This prevents a decrease in print quality due to the printing being suspended.

#### Save in Job Box

Save the print job to the hard disk of the printer. When selecting **Save in Job Box**, select the individual box to save to from the **Job Box No.** list.

### **Document Title**

This can be set when selecting Save in Job Box.

Input the name of the document you wish to save.

#### Job Box No.

This can be set when selecting Save in Job Box.

Select the box number from the list.

# **Specifications**

## >>> Important

• The following values may vary depending on the operating environment.

# Paper

For details on the compatible media types, see "Paper Information List."

Paper width		For details on the paper widths supported by the printer, see "Paper Sizes."
Minimum paper length	Rolls	8.00 in. (203.2 mm)
	Sheets	11.00 in. (279.4 mm)
Maximum printable length	Rolls	59 feet (18 m) Varies depending on the operating system or application.
	Sheets	5.2 feet (1.6 m)
Thickness	Rolls	3-31 mil (0.07-0.8 mm)
	Sheets	3-31 mil (0.07-0.8 mm)
Roll maximum outer diameter		5.9 in. (150 mm) or shorter
Supported paper core inner diameter		2.00 in./3.00 in. (50.8 mm/76.2 mm)
Print area		For details about Print Area, see "Print Area."

# **Updating the Printer Driver**

- ➤ Obtaining the Latest Printer Driver
- ➤ Delete the Unnecessary Canon IJ Printer from the Printer List
- ➤ Before Installing the Printer Driver
- ➤ Installing the Printer Driver

# **Obtaining the Latest Printer Driver**

By updating the printer driver to the latest version of the printer driver, unresolved problems may be solved.

You can access our website and download the latest printer driver for your model.

### >>> Important

• You can download the printer driver for free, but any Internet access charges incurred are your responsibility.

# **Related Topics**

- ➡ Before Installing the Printer Driver

# **Delete the Unnecessary Canon IJ Printer from the Printer List**

A Canon IJ Printer that you no longer use can be deleted from the printer list.

Before deleting the Canon IJ Printer, disconnect the cable that connects the printer to the computer.

The procedure to delete the unnecessary Canon IJ Printer from the printer list is as follows:

You cannot delete the Canon IJ Printer unless you are logged on as a user with administrative rights.

- 1. Open System Preferences, and select Printers & Scanners
- 2. Delete the Canon IJ Printer from the printer list

From the printer list, select the Canon IJ Printer to be deleted, and then click -.

Click **Delete Printer** when the confirmation message appears.

## **Before Installing the Printer Driver**

This section describes the items that you should check before installing the printer driver. You should also refer to this section if the printer driver cannot be installed.

## **Checking the Personal Computer Settings**

- · Terminate all running applications.
- Log on as a user who has the administrator account. The installer will prompt you to enter the name and password of the administrative user. When multiple users are using macOS, log on with the account of the administrator who registered first.

## >>> Important

• When you upgrade macOS, all printer drivers that were installed will be deleted. If you plan to continue using this printer, re-install the latest printer driver.

## **Related Topics**

- Obtaining the Latest Printer Driver
- ➡ Installing the Printer Driver

## **Installing the Printer Driver**

You can access our web site through the Internet and download the latest printer driver for your model.

The procedure for installing the downloaded printer driver is as follows:

#### 1. Mount the disk

Double-click the disk image file you have downloaded.

The file is unpacked, and then the disk is mounted.

#### 2. Start the installer

Double-click "PrinterDriver\_XXX\_YYY.pkg" (where "XXX" is your model name, and "YYY" is version) contained in the disk.

#### **3.** Start the installation

Install the printer driver according to the messages on the screen.

When the Software License Agreement is displayed, check the contents, and click **Continue**. If you do not agree to the terms of the Software License Agreement, you cannot install this software.

### **4.** Selecting the install destination

If necessary, select where you want to install the printer driver, and then click **Continue**.

### **5.** Executing the installation

Click Install.

When the authentication screen is displayed, enter the name and password of the administrator, and then click **Install Software**.

#### 6. Complete the installation

When the completion message appears, click Close.

The printer driver is installed successfully.

### >>> Important

- If the Installer does not operate properly, select **Quit Installer** from the **Installer** menu of the Finder to quit the Installer. Then start the Installer again.
- You can download the printer driver for free, but you are responsible for paying any connection fees to the Internet.

# **Basic Print Job Operations**

- Using Printer Hard Disk
- Saving Print Jobs in Personal Job Boxes
- Priority Printing
- Printing Pending Jobs
- Printing Security Print Jobs
- Deleting Print Jobs
- Printing Saved Jobs
- Deleting Saved Jobs
- Moving Saved Jobs

## **Using Printer Hard Disk**

The printer can save print jobs on the built-in hard disk.

Saving print jobs offers the following benefits.

### · Save the time spent using a computer

When you send a print job to the printer, you can save it on the printer after printing or simply save it on the printer without printing it yet. Saved print jobs can be printed in the required quantity later without the need to use a computer again.

### · Simplify reprinting, if any errors occur

If errors occur in the middle of printing (as when paper runs out), you can resume printing after clearing the error without resending the print job from a computer.

### Streamline printing work

Without using a computer, you can select print jobs and print in the desired quantity. You can also select multiple print jobs to print during the same period. This enables unattended operation at night, for example.

# **Output Method**

To save print jobs on the printer's hard disk, configure the printer driver.

In Windows, this is set using the Output Method dialog box.

In macOS, this is set by selecting Additional Settings in the pop-up menu of the printer properties dialog.

#### **Print**

Perform printing while saving the print job on the temporary storage area of the printer's hard disk.

### **Set PIN for printing**

Set a 7 digit security code. To start printing, enter the PIN set here using the operation panel. If the entered PIN does not match the set PIN, the printing does not start.

#### Print after reception is complete

This option is available in combination with **Print**. You can prevent degradation of print quality that occurs when receiving a print job is interrupted and printing is aborted in the middle.

#### Save in Job Box

Save print jobs on the permanent storage area of the printer's hard disk. Selecting this does not start printing.

## **Storage Destination**

The storage area on the printer's hard disk is divided into a temporary storage area and a permanent storage area. The temporary storage area stores print jobs in the job queue or common job box. The permanent storage area stores jobs in personal job boxes.

#### Job queue

The job queue refers to print jobs that are being processed by the printer (saved, received, prepared for processing, printed, deleted, or held). Up to 100 jobs can be stored in the temporary storage area. However, the number of jobs available as queued jobs is up to 64.

When the maximum number of job queues are saved, the print job sent from the computer is in a state of waiting for processing.

However, if all saved job queue states are pending, the oldest job queue of the saved date and time will be deleted and the print job sent from the computer will be processed.

### Common job box

Jobs for which you have specified **Print** in **Output Method** are saved in common job box and classified as saved jobs.

There is one common job box, numbered "00". A password cannot be set for common job box.

Up to 100 print jobs can be saved here. However, they will be deleted one after another starting with the oldest job in the following situations.

- If there are over 101 jobs queued and saved in common job box combined
- If no more temporary storage space is available when jobs for which you have selected **Print** in
   Output Method are received
- If there is not enough space in the temporary or permanent storage area when jobs for which you have selected **Save in Job Box** in **Output Method** are received.

#### Personal job boxes

In the following cases, the job is classified as saved job and saved in a personal job box on the permanent storage area.

- When a saved job stored in common job box is moved to a personal job box
- · When you have selected Save in Job Box in Output Method

There are 29 personal job boxes, numbered "01" to "29". You can specify a name and password for each personal job box.

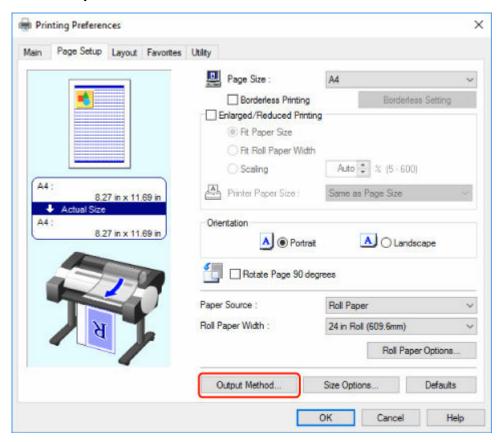

Up to 100 print jobs can be saved in all personal job boxes combined.

# **Saving Print Jobs in Personal Job Boxes**

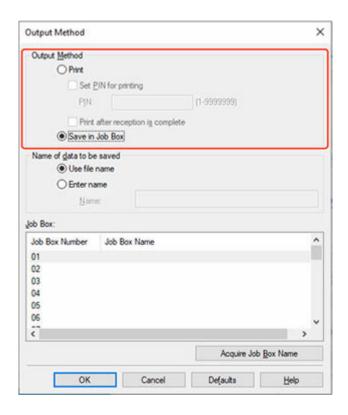

To save print jobs in personal job boxes, configure the printer driver.

## **Configuring Printer Driver (Windows)**

- 1. Open printer properties dialog box.
  - → How to Open the Printer Driver Setup Window
- 2. Select Page Setup tab.
- 3. Select Output Method.

4. Select Save in Job Box in Output Method.

5. In Name of data to be saved, specify how to name saved print jobs.

To use the file name, select **Use file name**.

Otherwise select Enter name and enter a name in Name.

**6.** Select a personal job box in **Job Box**.

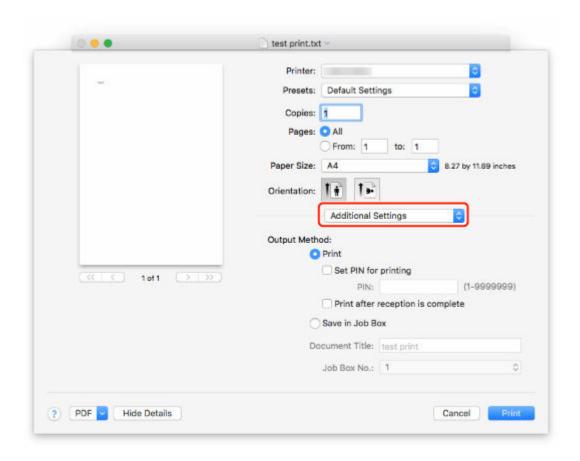

### Note

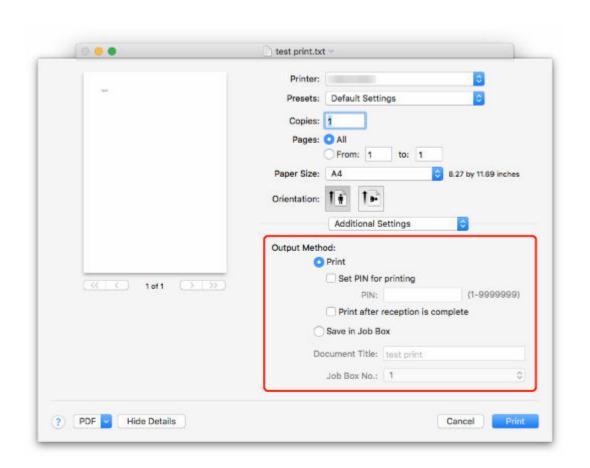

- Select **Acquire Job Box Name** to display personal job box names in the **Job Box** list, as acquired from the printer.
- 7. Select OK.

## Configuring Printer Driver (macOS)

- 1. Open printer properties dialog.
  - ➡ How to Open the Printer Driver Setup Dialog
- 2. Select Additional Settings in pop-up menu.

3. Select Save in Job Box in Output Method.

## **Priority Printing**

You can change the print order (Priority printing) by specifying the print job that is being received.

This operation is available using the operation panel or Remote UI.

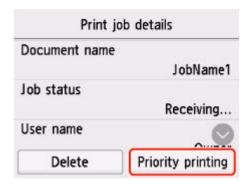

- Using Operation Panel
- ➡ Using Remote UI

### Note

## **Using Operation Panel**

- 1. Tap (Jobs) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Print job.
- 3. In the list, tap the target job.
- 4. Tap Priority printing.

**5.** Confirm displayed message and tap **Yes**.

## **Using Remote UI**

- 1. Start up Remote UI.
  - → Start up Remote UI

- 2. Select Job management.
- 3. Select Print job.
- **4.** In the list, select the target job.
- 5. Select Prioritize.

## **Printing Pending Jobs**

If the type or size of paper loaded does not match the settings in the print job received when you have set **Detect paper setting mismatch** to **Hold job** in the operation panel, the print job is held on the printer as a pending job in the job queue.

To print held jobs, replace the loaded paper with the paper specified in the print job.

- ▶ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

This operation is available using the operation panel or Remote UI.

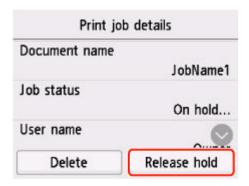

- Using Operation Panel
- → Using Remote UI

### Note

• As long as you do not manage held jobs from the operation panel, they will remain in the job queue. In this case, the printer processes the next job in the queue without pausing.

## **Using Operation Panel**

- 1. Tap (Jobs) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Print job.
- 3. In the list, tap print job with icon on the left.
- 4. Tap Release hold.

5. Confirm displayed message and tap Yes.

## **Using Remote UI**

1. Start up Remote UI.

- → Start up Remote UI
- 2. Select Job management.
- 3. Select Print job.
- **4.** In the list, select print job with icon on the left.
- 5. Select Release.

## **Printing Security Print Jobs**

A security print job is a print job that requires you to enter the PIN code set in the printer driver when printing.

The print job specified for the security print job has a lock icon to the left of the job name in the list such as **List of print jobs**.

### >>> Note

- The security print job remains saved as a normal pending job until you enter the PIN code using the
  operation panel or Remote UI. In this case, the printer processes the next job in the queue without
  pausing.
- When deleting a security print job, you do not need to enter a PIN code.
  - 1. Tap (Jobs) on HOME screen.
    - → Home Screen Menu Composition
  - 2. Tap Job management.
  - **3.** In the list, tap print job with icon on the left.
  - 4. Tap Print.

**5.** Enter PIN code you set and tap **OK**.

## **6.** Tap **OK**.

PIN authentication successful. is displayed and printing starts.

## >>> Note

• The security print job is deleted after printing.

# **Deleting Print Jobs**

You can delete a print job as needed.

This operation is available using the operation panel or Remote UI.

- Using Operation Panel
- ➡ Using Remote UI

## **Using Operation Panel**

- 1. Tap (Jobs) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Print job.
- **3.** In the list, tap the target job.

### Note

- Tap Del. selected to delete multiple jobs at one time.
- 4. Tap Delete.

5. Confirm displayed message and tap Yes.

### Note

- Select Delete all print jobs on Job management to delete all jobs in the job queue
  - → Job management

# **Using Remote UI**

- 1. Start up Remote UI.
  - ➡ Start up Remote UI

- 2. Select Job management.
- 3. Select Print job.
- **4.** In the list, select the target job.
- 5. Select **Delete**.
- **6.** Confirm displayed message and tap **Yes**.

## **Printing Saved Jobs**

Print saved print jobs stored on the printer's hard disk as follows.

This operation is available using the operation panel or Remote UI.

- Using Operation Panel
- ➡ Using Remote UI

### **Using Operation Panel**

- 1. Tap (Jobs) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Saved job.
- **3.** In the list, tap the target job box.

#### >>> Note

- If an administrator password is set, enter the password.
- 4. Tap Job list.
- **5.** In the list, tap the target job.
- 6. Tap Print settings.
- 7. Specify the number of copies.
  - 1. To change the number of copies, tap A.

2. Specify the number of copies and tap OK.

8. Tap Start print.

# Using Remote UI

- 1. Start up Remote UI.
  - → Start up Remote UI
- 2. Select Job management.
- 3. Select Saved job.
- **4.** In the list, select the target job box.

#### >>> Note

- If an administrator password is set, enter the password.
- **5.** In the list, select the target job.
- 6. Select Print.
- **7.** Enter the number of copies and select **Yes**.
- 8. select Yes.

## **Deleting Saved Jobs**

Delete saved print jobs stored on the printer's hard disk as follows.

This operation is available using the operation panel or Remote UI.

- Using Operation Panel
- → Using Remote UI

### **Using Operation Panel**

- 1. Tap (Jobs) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Saved job.
- **3.** In the list, tap the target job box.

#### Note

- · If an administrator password is set, enter the password.
- 4. Tap Job list.
- **5.** In the list, tap the target job.
- 6. Tap Delete.
- 7. Confirm displayed message and tap Yes.

### **Using Remote UI**

- 1. Start up Remote UI.
  - Start up Remote UI
- 2. Select Job management.
- 3. Select Saved job.
- **4.** In the list, select the target job box.

#### >>> Note

· If an administrator password is set, enter the password.

- **5.** In the list, select the target job.
- 6. Select Edit.
- 7. Select Delete.
- 8. Select Yes.

### **Moving Saved Jobs**

Print jobs stored on the printer's hard disk (saved jobs) can be moved from the current job box to another job box as follows.

However, jobs saved in personal job boxes cannot be moved to common job box.

#### >>> Important

- Jobs stored in common job box may be automatically deleted under some conditions. To prevent jobs from being deleted, move them from common job box to personal job boxes.
  - ➡ Using Printer Hard Disk
- **1.** Start up Remote UI.
  - ➡ Start up Remote UI
- 2. Select Job management.
- 3. Select Saved job.
- 4. In the list, select the target job box.

#### Note

- If an administrator password is set, enter the password.
- **5.** In the list, select the target job.
- 6. Select Edit.
- 7. Select Move.
- 8. Select Destination job box.
- **9.** In the list, select the personal job box to move to and select **OK**.

#### >>>> Note

· If an administrator password is set, enter the password.

## **Advanced Print Job Operations**

- Saving Print Jobs Sent from Sources Other than Printer Driver
- ➤ Printing without Saving Jobs in Common Job Box
- Setting Passwords for Personal Job Boxes
- Naming Personal Job Boxes
- Printing List of Saved Jobs
- Renaming Saved Jobs
- Printer Hard Disk Operations
- Checking Free Hard Disk Space

### Saving Print Jobs Sent from Sources Other than Printer Driver

To save print jobs sent from software or systems other than the printer driver or applications provided with the printer, specify the output method and select the setting to perform printing after saving printing data using the operation panel.

#### >>> Note

• Contact the software or system developer for information about support for this printer function.

#### >>> Important

- The administrator password is required to change settings if it is enabled for changing settings using the operation panel.
- Specifying Output Method
- Printing after Saving Printing Data

### **Specifying Output Method**

Perform settings for printing or saving print job.

- 1. Tap (Setup) on HOME screen.
  - → Home Screen Menu Composition
- 2. Tap Printer settings.
- 3. Tap Hard disk settings.

Enter administrator password if it is enabled.

- 4. Tap Output method.
- **5.** Tap the output method you want to set up.

#### **Print**

Save print jobs automatically at the same time they are printed. (This is the default format.)

#### Print (auto delete)

Save print jobs temporarily at the same time they are printed and delete them after printing.

#### Save to job box

Save print jobs on in the personal job box.

### **Printing after Saving Printing Data**

To save print jobs on the hard disk before printing, select **ON** for **Save first and print**.

Printing will start when **Save first and print** is set to **ON**, even if you have selected **Save to job box** for **Output method**.

- 1. Tap (Setup) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Printer settings.
- 3. Tap Hard disk settings.

Enter administrator password if it is enabled.

- 4. Tap Save first and print.
- **5.** Tap **ON**.

### **Printing without Saving Jobs in Common Job Box**

Jobs sent from a computer for which you have selected **Print** in **Output Method** in the printer driver are saved in common job box.

➡ Using Printer Hard Disk

When **Common job box settings** is set to **Print (auto delete)** in the operation panel menu, print jobs for which you have selected **Print** in **Output Method** in the printer driver are deleted from common job box after printing.

Use this function when printing highly confidential documents.

#### >>> Important

• The administrator password is required to change settings if it is enabled for changing settings using the operation panel.

- ➡ Home Screen Menu Composition
- 2. Tap Printer settings.
- 3. Tap Hard disk settings.

Enter administrator password if it is enabled.

- 4. Tap Common job box settings.
- 5. Tap Print (auto delete).

### **Setting Passwords for Personal Job Boxes**

For greater security, you can specify a password for personal job boxes. After setting the password, it is necessary to enter the password when performing the following operations.

- · Change personal job box settings
- Display / print the list of jobs saved in personal job box, print / delete / move /rename jobs saved in personal job box

#### Note

- By default, no passwords are set for personal job boxes.
- A password cannot be set for common job box.
- Enter a seven-digit number as the password, in the range 0000001 to 9999999.
- Even if you have set passwords, they are not required to access personal job boxes in Administrator Mode in Remote UI.
- 1. Start up Remote UI.
  - **➡** Start up Remote UI
- 2. Select Job management.
- 3. Select Saved job.
- 4. In the list, tap the target job box.
- 5. Select Edit.
- **6.** Select **Set/change password** check box and enter password. (This field is limited to seven digits in the range 0000001 to 9999999.)
- 7. Select OK.

# **Naming Personal Job Boxes**

For easier identification, you can assign names to personal job boxes.

- 1. Start up Remote UI.
  - → Start up Remote UI
- 2. Select Job management.
- 3. Select Saved job.
- 4. In the list, select the target job box.

#### Note

- Enter the password if the personal job box has it.
- 5. Select Edit.
- 6. Enter name and select OK.

# **Printing List of Saved Jobs**

The list of print jobs stored on the printer's hard disk (saved jobs) can be printed by job box as follows.

- 1. Tap (Jobs) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Saved job.
- **3.** In the list, tap the target job box.

#### >>> Note

- Enter the password if the personal job box has it.
- 4. Tap Print the job list.

For each job box, a list of saved jobs is printed.

## **Renaming Saved Jobs**

Print jobs stored on the printer's hard disk (saved jobs) can be renamed as follows.

- 1. Start up Remote UI.
  - → Start up Remote UI
- 2. Select Job management.
- 3. Select Saved job.
- **4.** In the list, tap the target job box.

#### Note

- Enter the password if the personal job box has it.
- **5.** In the list, tap the target job.
- 6. Select Edit.
- 7. Select Change.
- 8. Enter name and select OK.

# **Printer Hard Disk Operations**

Printer hard disk operations are available from the following programs and interfaces.

- Printer driver
- Remote UI
- Operation panel

The hard disk operations available through each interface are as follows.

Operation		Printer driv- er	Remote UI	Operation panel
Saving print jobs	Save to job box	1	-	-
	Print without saving jobs in common job box	-	-	1
	Save print jobs sent from sources other than printer driver	-	-	1
Operations with saved jobs	Print saved jobs	-	1	1
	Delete saved jobs	-	1	1
Job queue management	Display job queue	-	1	1
	Delete	-	1	1
	Priority printing	-	1	1
	Operations with pending jobs	-	1	1
	Operations with security print jobs	-	-	1
	Delete Operations with security jobs	-	1	1
Job box management	Move saved jobs	-	1	-
	Modify saved jobs	-	1	-
	Modify job boxes	-	1	-
	Print a list of saved jobs	-	-	1
	Display a list of saved jobs	-	1	1
Other operations	Display free hard disk space	-	1	1
	Initialize hard disk	-	-	1
	Display the time of printing	-	1	1
Display error messages	-	1	1	

## **Checking Free Hard Disk Space**

Check the space available on the printer's hard disk as follows.

This operation is available using the operation panel or Remote UI.

- Using Operation Panel
- ➡ Using Remote UI

### **Using Operation Panel**

- 1. Tap (Setup) on HOME screen.
  - ➡ Home Screen Menu Composition
- 2. Tap Printer information.
- 3. Tap Hard disk information.

The free hard disk space (job box free space) appears.

### **Using Remote UI**

- 1. Start up Remote UI.
  - → Start up Remote UI
- 2. Select Job management.
- 3. Select Hard disk information.

The free hard disk space (job box free space) appears.

## **Frequently Asked Questions**

### **Problems with the Printing Quality**

Unevenness, Banding, Faint

- ➡ Printing is faint
- ➡ Banding in different colors occurs
- → Colors in printed images are uneven
- ➡ Image edges are blurred or white banding occurs

dirt

- → Paper rubs against the Print Head
- ➡ The edges of the paper are dirty
- → The surface of the paper is dirty
- ➡ The back side of the paper is dirty
- ➡ Immediately after borderless printing, the trailing edge margin is soiled during regular printing

colors are inaccurate

- ➡ Printed colors are inaccurate
- → Documents are printed in monochrome

Line

- ➡ Line thickness is not uniform
- ➡ Lines or colors are misaligned

#### Others

- → The length of the printed image in the paper ejection direction is not accurate
- ➡ Images are printed crooked
- ➡ Borders appear in borderless printing

#### **General FAQ**

- ➡ I want to easily create vertical or horizontal banners
- → Does this printer support sub-ink tank system
- → I want to know how to configure roll cutting
- ➡ I want to configure so that the roll is cut automatically after waiting for the ink to dry
- → How do I print without borders
- ➡ I want to know the paper types that can be used in this printer
- ➡ The paper type that I want to print is not displayed on the Touch Screen
- Can I perform duplex printing
- ➡ I want to perform enlargement printing
- ▶ Network Settings and Common Problems

#### Search by Category

#### **Problems Regarding Paper**

Remove Jammed Roll Paper

- Remove a Jammed Sheet
- Remove Jammed Paper (Paper Feed Slot)
- Roll paper cannot be inserted into the Paper Feed Slot
- Roll Paper Remains/Lacks under Quantity Management
- Cannot load sheets
- Paper is not cut straight
- Paper is not cut
- Cutter Blade Does Not Work While Cutting Is in Progress
- ➡ The size of clear film cannot be detected
- Margins are wide
- ➡ When printing on roll paper, the printed surface becomes scratched

#### **Printing Does Not Start**

- Printer Suddenly Stopped Working for Some Reason
- The Data lamp on the Operation Panel does not light up
- The printer does not respond even if print jobs are sent
- "Preparing the ink system." is displayed
- ➡ "Agitating the ink" is displayed
- Message Is Displayed and Borderless Printing Fails

#### The Printer Stops During a Print Job

- ➡ Printing stops and an error message is displayed
- The printer ejects blank, unprinted paper

#### **Cannot Print over Network**

- → Cannot Connect Printer to Network
- Cannot Print over Bonjour networks

#### **Cannot Find Printer on Network**

- Cannot Find Printer During Setup
- Cannot Proceed beyond Printer Connection Screen/Connect Cable Screen
- Searching Printer by IP Address or Host Name During Setup
- Cannot Find Printer while Using Wi-Fi
- Cannot Find Printer while Using Wired LAN
- Cannot Print Using AirPrint

#### **Installation Problems**

- ➡ Removing Printer Software
- Taking Time to Setup Process (Windows)
- Failed to Printer Driver Installation (Windows)

#### **Other Problems**

- Printer does not turn on
- ➡ If the Printer Makes a Strange Sound
- ➡ Messages advising to check the maintenance cartridge are not cleared
- ➡ Printer consumes a lot of ink
- ➡ Ink Level Detection

→ Media Type Selection does not Match Loaded Media Type

## I want to easily create vertical or horizontal banners

You can print originals that are in landscape (or portrait) orientation automatically enlarged to fit the roll width. This is an easy way to create vertical or horizontal banners.

- → Printing Hanging and Horizontal Banners (Large-Format Printing) (Windows)
- ➡ Printing Hanging and Horizontal Banners (Large-Format Printing) (macOS)

## Does this printer support sub-ink tank system

This printer supports hot-swap ink tank replacement.

Even if an ink tank becomes empty during printing, since a certain amount of ink always is stored in a sub-ink tank, you can replace the ink tank while printing.

→ Replacing Ink Tanks

### I want to know how to configure roll cutting

Cutting methods can be selected in the printer settings and printer driver settings.

To automatically cut roll paper after printing, open the **Cutting mode** settings on the printer, and then under **Automatic cut** set **Automatic Cutting** in the printer driver to **Yes**.

When using paper that is easily scratched, or paper where the ink requires extra time to fix, we recommend setting **Cutting mode** on the printer to **Eject cut**.

- → Specifying the Cutting Method for Rolls
- Cutting Roll Paper after Printing (Windows)
- **➡** Cutting Roll Paper after Printing (macOS)

# I want to configure so that the roll is cut automatically after waiting for the ink to dry

You can set an ink drying time in the printer driver.

You can also configure the same settings on the printer itself.

→ Specifying the Ink Drying Time

## How do I print without borders

If printing on roll paper, you can set borderless printing in the printer driver settings. (If printing on sheets, borderless printing is not possible)

- ➡ Printing without Edges Based on the Scenarios (Windows)
- ➡ Printing without Edges Based on the Scenarios (macOS)

# I want to know the paper types that can be used in this printer

For information about paper that can be used with this printer, refer to the media information list.

➡ Paper Information List

# The paper type that I want to print is not displayed on the Touch Screen

If using a new paper type, start the Media Configuration Tool to get the latest media information.

➡ <u>Updating paper information</u>

## Can I perform duplex printing

This printer cannot print double-sided.

An alternative to double-sided printing is to use the **Folded Duplex** function of the Windows software Free Layout plus, which prints two pages on one side, folds the sheet back from the center, and hangs it.

➡ Laying Out Documents Freely Using Free Layout plus

# I want to perform enlargement printing

Use the printer driver to adjust the original to the paper size and width, or print enlarged or reduced by specifying a magnification factor.

- ➡ Scaled Printing (Windows)
- ➡ <u>Scaled Printing</u> (macOS)

### **Network Settings and Common Problems**

Here are frequently asked questions on network.

#### **Cannot Find Printer**

- Cannot Find Printer During Setup
- → Cannot Proceed beyond Printer Connection Screen/Connect Cable Screen
- Searching Printer by IP Address or Host Name During Setup
- Cannot Find Printer while Using Wi-Fi
- Cannot Find Printer while Using Wired LAN
- Cannot Print Using AirPrint

#### **Cannot Print or Connect**

- → Cannot Connect Printer to Network
- ➡ Cannot Print over TCP/IP Network
- → Cannot Print over Bonjour networks
- ➡ Printer Suddenly Stopped Working for Some Reason

#### **LAN Setting Tips/Changing LAN Settings**

- ➡ Printer Connection Methods
- ▶ Default Network Settings
- → Another Printer Found with Same Name
- → Connecting to Another Computer via LAN/Changing from USB to LAN Connection
- Printing Network Settings
- Reconfiguration Method of LAN Connection/Reconfiguration Method of Wi-Fi Connection
- Network Status and Troubleshooting

### **Problems Regarding Paper**

- Remove Jammed Roll Paper
- ➤ Remove a Jammed Sheet
- Remove Jammed Paper (Paper Feed Slot)
- > Roll paper cannot be inserted into the Paper Feed Slot
- Roll Paper Remains/Lacks under Quantity Management
- Cannot load sheets
- Paper is not cut straight
- Paper is not cut
- Cutter Blade Does Not Work While Cutting Is in Progress
- Dent in the Tip of Paper
- > The size of clear film cannot be detected
- ➤ Printer Keeps Ejecting the Roll Paper
- Margins are wide
- > When printing on roll paper, the printed surface becomes scratched

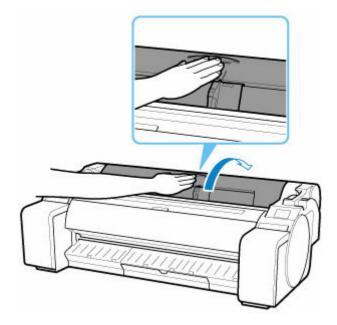

### **Remove Jammed Roll Paper**

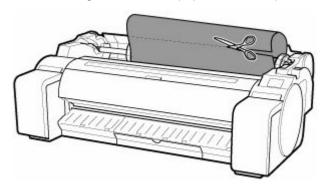

If roll paper jams, follow the steps below to remove jams.

- 1. Turn off printer.
  - ➡ Turning the Printer On and Off
- 2. Positioning your hands as shown, open roll paper cover.

3. Cut loaded roll paper with regular scissors or the like.

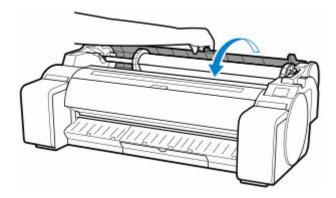

Before cutting, loose the roll paper and lift it up.

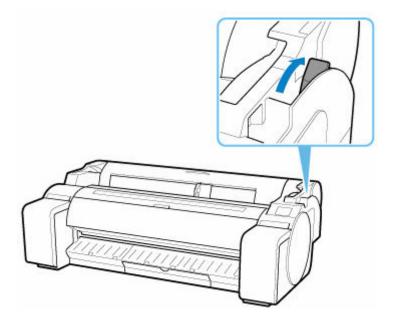

#### **A** Caution

• When cutting paper, be careful to avoid injury or damage to the printer.

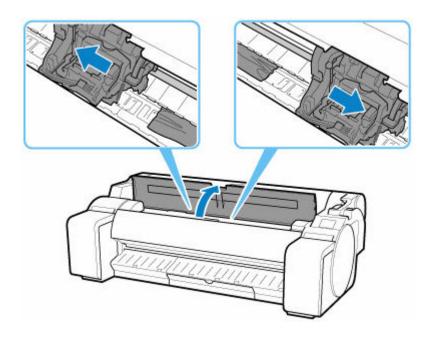

**4.** Holding it at the positions indicated, close roll paper cover.

**5.** Push release lever back.

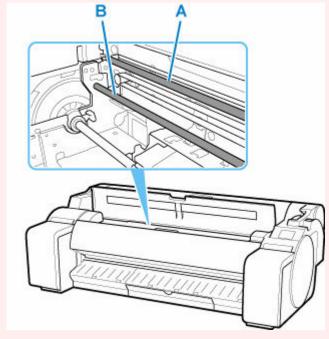

- 6. Remove jammed paper.
  - If paper is jammed inside the top cover
    - **1.** Open top cover and move carriage to the left or right side manually, away from the jam.

### >>> Important

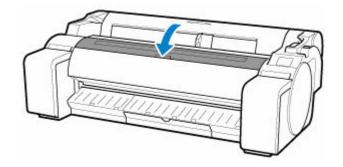

- Do not move the carriage over jammed paper. This may damage the print head.
- Do not touch the linear scale (A) or carriage shaft (B). This may stain your hands and damage the printer.

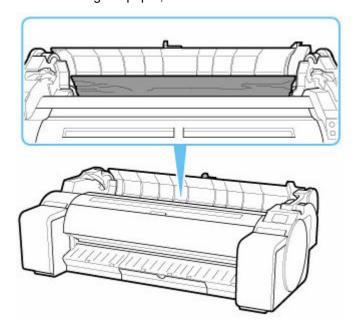

2. Remove any jammed paper inside top cover.

After removing the paper, make sure there are no other scraps of paper in the printer.

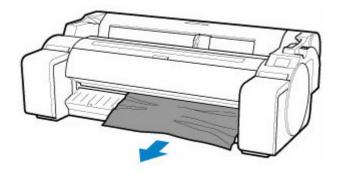

3. Close top cover.

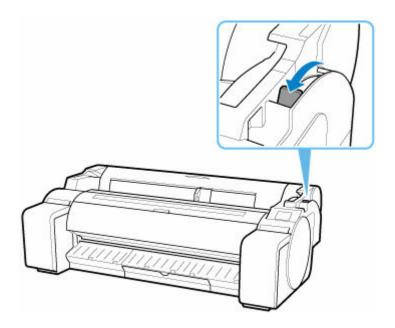

If the paper from a roll is jammed by the paper feed slot
 Remove the jammed paper from the paper feed slot.
 After removing the paper, make sure there are no other scraps of paper in the printer.

If the paper is jammed by the ejection guide
 Remove the jammed paper from the output tray.
 After removing the paper, make sure there are no other scraps of paper in the printer.

7. Pull release lever forward.

### >>> Important

• Changing the release lever position while printing is in progress causes paper jam, misaligned lines, or wrong colors. Be careful not to touch the release lever while printing in progress.

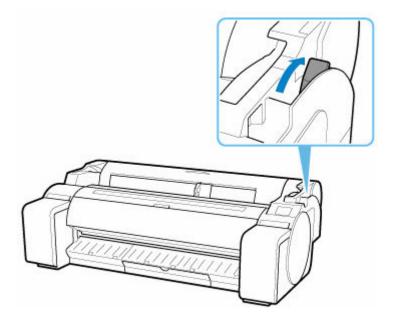

## **Remove a Jammed Sheet**

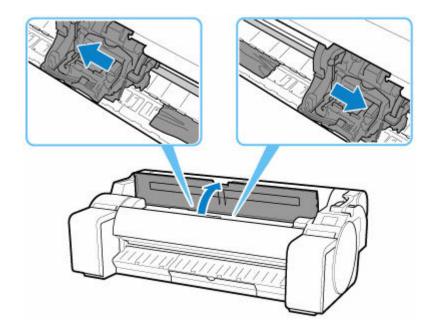

If a sheet jams, follow the steps below to remove it.

- 1. Turn off printer.
  - → Turning the Printer On and Off
- 2. Push release lever back.

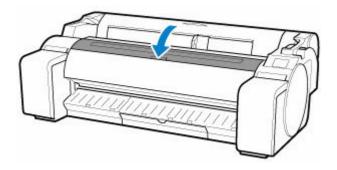

- 3. Remove jammed paper.
  - If paper is jammed inside the top cover
    - **1.** Open top cover and move carriage to the left or right side manually, away from the jam.

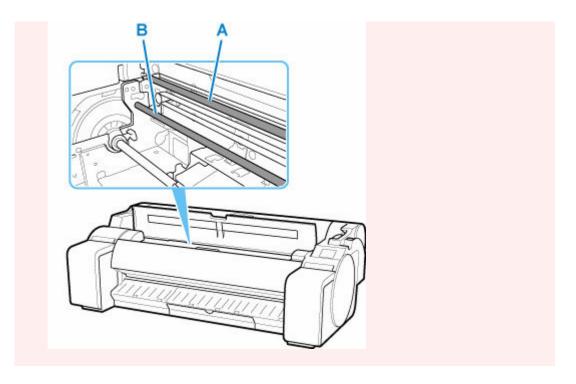

## >>> Important

- Do not move the carriage over jammed paper. This may damage the print head.
- Remove any jammed paper inside top cover.After removing the paper, make sure there are no other scraps of paper in the printer.
- 3. Close top cover.

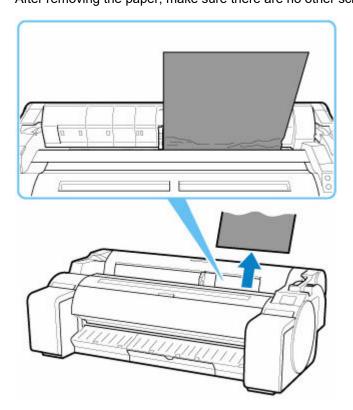

#### >>> Important

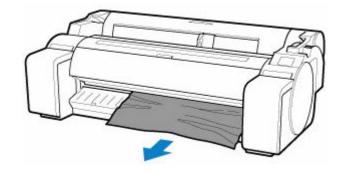

• Do not touch the linear scale (A) or carriage shaft (B). This may stain your hands and damage the printer.

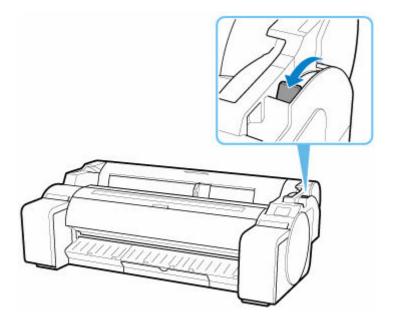

If the paper is jammed by the paper feed slot
 Remove the jammed paper from the paper feed slot.
 After removing the paper, make sure there are no other scraps of paper in the printer.

If the paper is jammed by the ejection guide
 Remove the jammed paper from the output tray.
 After removing the paper, make sure there are no other scraps of paper in the printer.

#### **4.** Pull release lever forward.

## >>> Important

• Changing the release lever position while printing is in progress causes paper jam, misaligned lines, or wrong colors. Be careful not to touch the release lever while printing in progress.

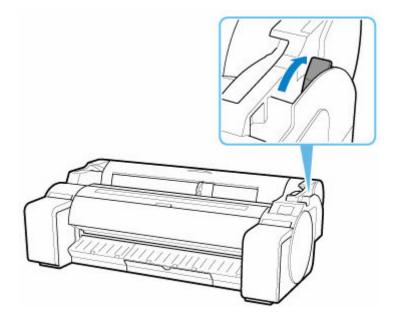

## **Remove Jammed Paper (Paper Feed Slot)**

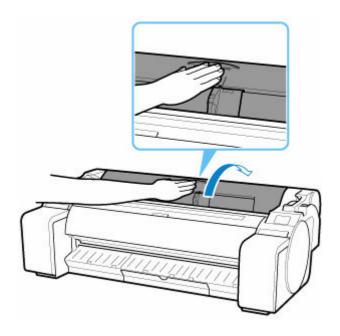

Follow these steps to remove any scraps left in the paper feed slot after you clear jammed sheets or roll paper.

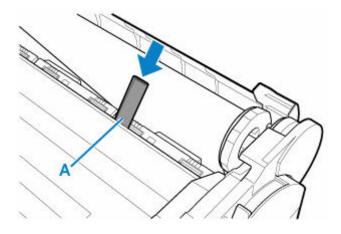

- 1. Turn off printer.
  - → Turning the Printer On and Off
- 2. Push release lever back.

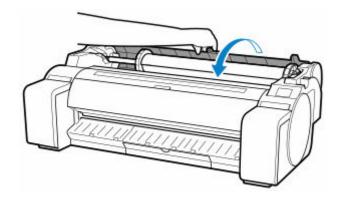

3. Positioning your hands as shown, open roll paper cover.

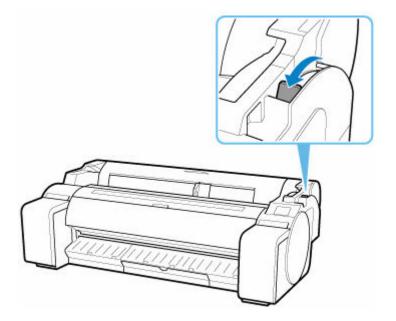

**4.** Fold an A4 sheet lengthwise four times and insert it through the gap of paper feed slot. Push scrap out toward platen.

- **5.** Remove scrap when it is pushed out onto platen.
- **6.** If any scraps remain inside paper feed slot, repeat steps 4 and 5.
- **7.** Holding it at the positions indicated, close roll paper cover.

#### 8. Pull release lever forward.

## >>> Important

• Changing the release lever position while printing is in progress causes paper jam, misaligned lines, or wrong colors. Be careful not to touch the release lever while printing in progress.

## Roll paper cannot be inserted into the Paper Feed Slot

Check 1 Is the roll paper curled?

Straighten out curls and reload the roll.

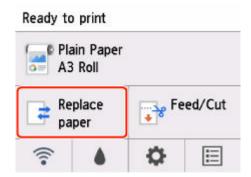

Check 2 Is paper jammed in the feed slot?

Remove the jammed paper.

- Remove Jammed Roll Paper
- Remove a Jammed Sheet

Check 3 Check the paper information on the HOME screen.

If "Roll" is not displayed, select **Replace roll paper** or **Load roll paper** from the **Select paper** screen, and then load the roll paper.

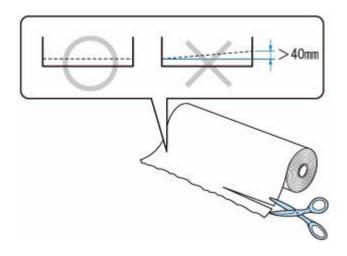

#### >>> Note

• You cannot load a roll paper and sheets on the printer at the same time.

Check 4 The leading edge of the roll paper may not be cut properly.

If the leading edge of the roll paper is crooked or folded, the paper may not be fed correctly. Cut the leading edge with scissors to straighten it. If the roll paper has a printed barcode, be careful not to cut the barcode part.

## **Roll Paper Remains/Lacks under Quantity Management**

Check the setting of Manage remaining roll amount.

- If Barcodes is selected for Manage remaining roll amount:
  - 1. Enter Roll paper length and tap OK.
  - 2. Select the timing when the warning message appears for Roll amount warning settings.
- If Warning message only is selected for Manage remaining roll amount:
   Select the timing to display warning messages for Roll amount warning settings.
- ▶ Paper-related settings

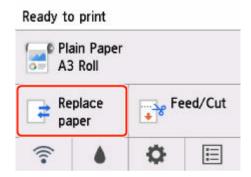

## **Cannot load sheets**

Check Check the paper information on the HOME screen.

If "Roll" is displayed, select Load cut sheet from the Select paper screen, and then load the sheet.

#### >>>> Note

• You cannot load a roll paper and sheets on the printer at the same time.

#### Paper is not cut straight

Check 1 Is the edge of the paper cutting position creased?

Straighten out any curling by the edges of the paper.

Check 2 Is the edge of the paper cutting position lifting up when cutting?

Reload the paper correctly.

Check 3 Is the paper a type that can be cut with the cutter blade?

Set **Cutting mode** in the touch screen menu to **User cut**, then and cut the roll paper with a cutting implement such as scissors.

➡ Specifying the Cutting Method for Rolls

Check 4 Are you using the basket properly?

Make sure that you are using the basket properly.

➡ Using the Basket

Check 5 Check that the **Cut speed** setting is correct.

Select Paper settings > Advanced on Paper menu in the touch screen menu, and change Cut speed.

If the paper edge cannot be cut straight at the cut starting position, it may be improved by selecting slower cut speed than that selected currently.

If the paper edge cannot be cut straight at the cut ending position, it may be improved by selecting faster cut speed than that selected currently.

Select **Paper settings** > **Advanced** on **Paper menu** in the touch screen menu, and change the **Cut speed** setting.

→ Menu Structure

Check 6 Did the printing material slip diagonally while being cut?

Set the **Cutting mode** in the touch screen menu to **Eject cut**, and then hold and cut the material after it has printed.

Specifying the Cutting Method for Rolls

Check 7 Is the cutter blade attached properly?

Attach the cutter blade properly.

Replacing the Cutter Blade

## Check 8 Is the edge of the cutter blade blunt?

Replace the cutter blade.

→ Replacing the Cutter Blade

## Paper is not cut

Check 1 Is Automatic Cutting in the printer driver set to No or Print Cut Guideline?

Set the printer driver Automatic Cutting setting to Yes.

- ➡ Page Setup Tab Description (Windows)
- Quality & Media (macOS)

Check 2 Is Cutting mode in the touch screen menu set to Eject cut or User cut?

If Cutting mode is set to Eject cut, select Feed/cut in the touch screen menu and cut the paper.

If Cutting mode is set to User cut, cut the roll paper with a cutting implement such as scissors.

➡ Specifying the Cutting Method for Rolls

Check 3 Is the cutter blade attached?

Attach the cutter blade.

Replacing the Cutter Blade

## **Cutter Blade Does Not Work While Cutting Is in Progress**

#### Check 1 Does a message appear on the touch screen?

If the cutter blade failed to cut the paper, it stops moving and a message appears on the touch screen.

Remove the paper and try printing again.

Remove Jammed Roll Paper

Check 2 Make sure the cutter blade can cut paper used currently.

Select **User cut** for **Cutting mode** in the touch screen menu and cut the roll paper with a cutting implement such as scissors.

➡ Specifying the Cutting Method for Rolls

#### Check 3 Check the setting value for **Cut speed**.

Selecting slower value may enable the cutter blade to cut paper.

Tap paper settings display area on Home screen of touch screen, tap the feed slot where the paper to change is set, then tap **Paper settings > Advanced** and, change the setting value of **Cut speed**.

- → Menu Structure
- → Paper-related settings

Check 4 Is the edge of the cutter blade blunt?

Replace the cutter blade.

➡ Replacing the Cutter Blade

## **Dent in the Tip of Paper**

Check Are you keeping the roll in the printer for a long time without printing on it?

Doing so may leave a dent on the tip of paper and it remains when you print on the paper the next time.

When printing quality is most important, we recommend cutting the paper tip before printing.

On the HOME screen, selecting **Feed/Cut > Cut paper > Yes** enables the printer to cut the paper tip at the shortest length.

→ Menu Structure

## The size of clear film cannot be detected

Check Is the platen dirty with ink?

Open the top cover and clean the entire platen area.

★ Cleaning Inside the Top Cover

## **Printer Keeps Ejecting the Roll Paper**

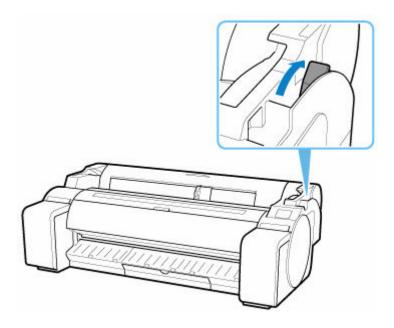

When a sheet is selected on the HOME screen, loading a roll paper with its surface left loose may make the printer recognize the loaded roll paper as a sheet.

In this case, selecting **Remove paper** on **Paper menu** may allow the printer to keep ejecting the paper.

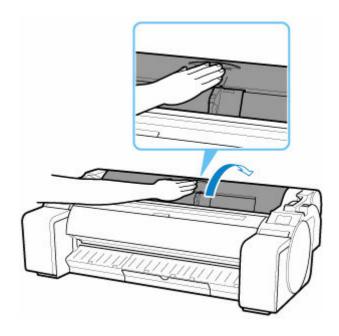

Check the paper feed settings on the printer.

After roll ejection stops, follow these steps to reload the roll.

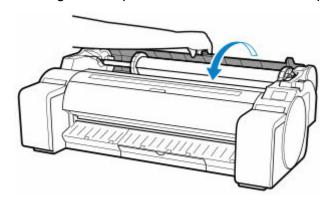

1. Push release lever back.

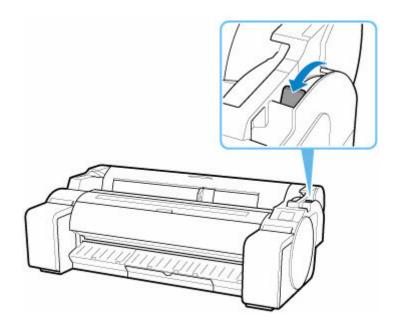

2. Positioning your hands as shown, open roll paper cover.

- **3.** Using both hands, rotate the roll holder toward the back to rewind the roll. At this time, ensure that both ends of the roll are rewound evenly.
- **4.** Holding it at the positions indicated, close roll paper cover.

**5.** Pull release lever forward.

## 6. Load roll.

At this time, be sure to press the Load button and select **Load roll paper**.

▶ Loading Rolls in the Printer

## Margins are wide

Check 1 Is auto cut being used on printed material with a wide margin on the trailing edge only?

Rolls are advanced a specific amount before cutting to prevent problems with cutting and paper ejection.

This operation is normal.

The specified length varies depending on the media type and the usage environment (humidity). Please refer to the minimum printing length of the paper from paper information list.

If the length of the printed document is shorter than the minimum cut length, an extra edge margin will be added to increase the length of the printed document to the minimum cut length.

➡ Paper Information List (Rolls)

Check 2 Is leading edge detection set to **Do not detect**?

Do not detect may have been set by responding to the message Do you want to set to detect the leading edge of the paper? when Cutting mode was set to User cut in the touch screen menu.

If the message **Do you want to set to detect the leading edge of the paper?** appears when setting **Cutting mode** to **User cut**, select **Detect (recommended)**.

Please note that if **Detect (recommended)** is selected and the paper has a strong curl, the Print head may rub against the edge of the paper when printing starts.

Specifying the Cutting Method for Rolls

# When printing on roll paper, the printed surface becomes scratched

Make sure the roll paper has not lost tension during printing.

If the roll paper loses tension, the paper surface could be damaged and the paper could wrinkle or fold.

Select Paper settings > Advanced on Paper menu in the touch screen menu, and set Roll paper tension (printing) to High.

→ Menu Structure

#### Note

 Carrying out Adjust print quality is recommended when changing Roll paper tension (printing) settings.

# **Printing Does Not Start**

- ➤ Printer Suddenly Stopped Working for Some Reason
- > The Data lamp on the Operation Panel does not light up
- ➤ The printer does not respond even if print jobs are sent
- "Preparing the ink system." is displayed
- "Agitating the ink" is displayed
- Message Is Displayed and Borderless Printing Fails

## **Printer Suddenly Stopped Working for Some Reason**

- Cannot Connect to a Printer after Network Configuration Changes
- Cannot Connect to a Printer via Wi-Fi
- Cannot Connect to a Printer through Wireless Direct
- → Cannot Connect to a Printer via Wired LAN
- Cannot Print through Network

# Cannot Connect to a Printer after Network Configuration Changes

It may take a while for the computer to obtain an IP address, or you may need to restart your computer.

Make sure the computer has obtained a valid IP address, and try again to find the printer.

## Cannot Connect to a Printer via Wi-Fi

Check 1 Check the power status of printer and devices (e.g. wireless router or computer) connected to the network.

Turn on the printer or devices.

If the power is already turned on, turn it off and on again.

It may be necessary to resolve wireless router problems (e.g. update interval of a key, problems of DHCP update interval, energy saving mode, etc.) or to update the wireless router firmware.

For details, contact the manufacturer of your wireless router.

Check 2 Can you view any web pages on your computer?

Make sure your computer is connected to the wireless router properly.

For more on checking computer settings or connection status, see the instruction manual supplied with the computer or contact the manufacturer.

Check 3 Is the printer connected to the wireless router?

Use the icon on the touch screen to check the connection status between the printer and wireless router. If the

icon is not displayed, Wi-Fi is disabled. Turn on wireless communication on the printer.

Check 4 Make sure the printer and wireless router network settings match.

Make sure the network settings of the printer (e.g. wireless router name, SSID, network key, etc.) are identical with those of the wireless router.

To check the settings of the wireless router, refer to the instruction manual provided with it or contact its manufacturer.

To check the current network settings of the printer, print out the network setting information.

Printing Network Settings

#### >>> Note

- IJ Network Device Setup Utility allows you to diagnose and repair the network status.
   Select the link below to download IJ Network Device Setup Utility and install it.
  - ➡ Checking Printer Connection Status Using IJ Network Device Setup Utility

Check 5 Make sure the printer is not placed too far away from the wireless router.

If the distance between the printer and wireless router is too far, wireless communication becomes poor. Place the printer and wireless router close to each other.

#### Note

· Though an antenna is attached to most wireless routers, note that some of them have it inside.

Check 6 Make sure wireless signal is strong. Monitor signal status and move printer and wireless router as necessary.

Place the printer and wireless router where there are no obstacles between them. Wireless communication between different rooms or floors is generally poor. Wireless communication can be impeded by building materials containing metal or concrete. If the printer cannot communicate with the computer over a Wi-Fi due to a wall, place the printer and the computer in the same room.

In addition, if a device like a microwave oven that emits radio waves of the same frequency bandwidth as a wireless router is nearby, it may cause interference. Place the wireless router as far away from interference sources as possible.

#### >>> Note

- IJ Network Device Setup Utility allows you to diagnose and repair the network status.
   Select the link below to download IJ Network Device Setup Utility and install it.
  - → Checking Printer Connection Status Using IJ Network Device Setup Utility

#### Check 7 Make sure of the Wi-Fi channel numbers used for your computer.

You need to have the same Wi-Fi channel number that you are using for the wireless router as your computer. It is normally set in the way that you can use all the Wi-Fi channels. However, when the channels that you are using are restricted, the Wi-Fi channels do not match.

See the instruction manual provided with your computer and check the Wi-Fi channel number available for your computer.

Check 8 Make sure channel set on wireless router is a usable channel as confirmed in Check 7.

If it is not, change the channel set on the wireless router.

Check 9 Make sure security software's firewall is off.

If your security software's firewall is on, a message may appear warning you that Canon software is attempting to access the network. If this warning message appears, set security software to always allow access.

If you are using any programs that switch between network environments, check their settings.

Check 10 If printer is connected to an AirPort Base Station via LAN, make sure you use alphanumeric characters for network identifier (SSID). (macOS)

#### If the problem is not resolved, redo setup.

· For Windows:

Perform setup using the Setup CD-ROM or from Setup Guide.

For macOS

Perform setup from Setup Guide.

## Cannot Connect to a Printer through Wireless Direct

Check 1 Check the power status of printer and other devices (smartphone or tablet).

Turn on the printer or devices.

If the power is already turned on, turn it off and on again.

Check 2 Is the icon displayed on the touch screen?

If not, Wireless Direct is disabled. Turn on Wireless Direct.

Check 3 Check the settings of your device (smartphone/tablet).

Make sure Wi-Fi is enabled on your device.

For details, refer to your device's instruction manual.

Check 4 Make sure printer is selected as connection for device (e.g. smartphone or tablet).

Select the identifier for Wireless Direct (SSID) specified for the printer as the connection destination for

Check the destination on your device.

For details, refer to your device's instruction manual or visit the manufacturer's website.

To check the identifier for wireless direct (SSID) specified for the printer, display it using the operation panel of the printer or print out the network setting information of the printer.

· Display on the touch screen.

- LAN settings
- · Print the network settings.
  - Printing Network Settings

Check 5 Have you entered the proper password specified for the Wireless Direct?

To check the password specified for the printer, display it using the operation panel of the printer or print out the network setting information of the printer.

- · Display on the touch screen.
  - **★** LAN settings
- · Print the network settings.
  - Printing Network Settings

Check 6 Make sure the printer is not placed too far away from the device.

If the distance between the printer and device is too far, wireless communication becomes poor. Place the printer and device close to each other.

Check 7 Make sure 5 devices are already connected.

Wireless Direct does not allow more than 5 devices to be connected.

# Cannot Connect to a Printer via Wired LAN

Check 1 Make sure the printer is turned on.

Check 2 Make sure the LAN cable is connected properly.

Make sure the printer is connected to the router with the LAN cable. If the LAN cable is loose, connect the cable properly.

If the LAN cable is connected to the WAN side of the router, connect the cable to the LAN side of the router.

#### If the problem is not resolved, redo setup.

• For Windows:

Perform setup using the Setup CD-ROM or from Setup Guide.

• For macOS:

Perform setup from Setup Guide.

# Cannot Print through Network

Check 1 Make sure the computer is connected to the wireless router.

For more on how to check the computer settings or connection status, see your computer instruction manual or contact its manufacturer.

Check 2 If the printer driver is not installed, install it. (Windows)

Install the printer driver using the Setup CD-ROM or install it from here.

Check 3 When using Wi-Fi, make sure wireless router does not restrict which computers can access it.

For more on connecting to and setting up your wireless router, see the wireless router instruction manual or contact its manufacturer.

## The Data lamp on the Operation Panel does not light up

Check 1 Does the printer have power?

Check that the power cord is firmly plugged all the way in. Turn on the power to the printer.

Check 2 Was the correct printer selected?

In Windows, select the printer by clicking **Select Printer** or **Printer** in the printing dialog box and try printing again.

In macOS, open the dialog box of the printer driver, select the printer from the list of **Printer**, and try printing again.

Check 3 Is the print job paused?

In Windows, restart the print job as follows.

- 1. Select the printer icon in the **Devices and Printers** window.
- 2. Clear Pause Printing in the Printer menu to restart the print job.

In macOS, restart the print job as follows.

- 1. Click Print & Scan (or Print & Fax).
- 2. Select the printer, and then **Resume Printer** (or **Start Jobs**) in the **Printers** menu to restart the print job.

## The printer does not respond even if print jobs are sent

#### Check 1 Is Pause printing set to Enable?

Set Pause printing on the touch screen menu to Disable.

Pausing Printing

#### Check 2 Is USB or LAN connection disabled?

• For USB connection:

Set Use USB connection on the touch screen menu to Use.

• For LAN connection (wired/Wi-Fi/Wireless Direct):

Set Enable/disable Wired LAN, Enable/disable Wi-Fi, or Enable/disable Wireless Direct on the touch screen menu to Enable.

#### >>>> Note

· You cannot enable wired LAN and Wi-Fi or Wireless Direct at the same time.

#### Check 3 Is **Save to job box** selected as the printer **Output method**?

Print the job saved on the printer's hard disk.

➡ Printing Saved Jobs

#### Check 4 Is the print job pending?

Manage the jobs on hold and print as needed.

Printing Pending Jobs

## "Preparing the ink system." is displayed

The Print head and sub-ink tank are being filled with ink.

Wait until the system has been filled with ink.

#### >>> Note

- This message might appear if you force the power off while the printer is operating.

  Always follow the correct procedure when turning off the power.
  - ➡ Turning the Printer On and Off

# "Agitating the ink" is displayed

Ink agitation is in progress.

Please wait until ink agitation is finished.

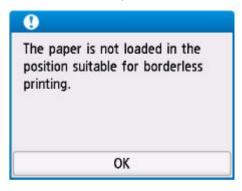

Agitation time varies depending on time elapsed since powering off (approximately 30 seconds to 2 minutes).

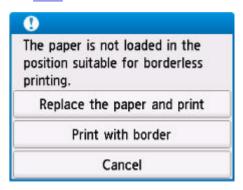

## Message Is Displayed and Borderless Printing Fails

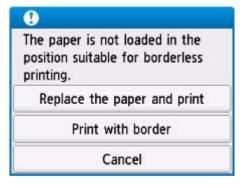

For information on possible solutions, refer to the link for each message.

**→** 4114

**→** 4116

**→** 4913

# The Printer Stops During a Print Job

- Printing stops and an error message is displayed
- ➤ The printer ejects blank, unprinted paper

## Printing stops and an error message is displayed

If the action indicated in the error message does not solve the problem, the roll paper may not be able to be advanced and may be stuck.

Check 1 Is the loaded roll paper touching printer parts, etc.?

If the loaded roll paper is touching printer parts, load the roll paper again.

Removing the Roll from the Printer

Check 2 Is the roll paper proper to use?

Check the outer diameter and paper thickness of the roll paper that can be used with your printer.

→ Paper Sizes

## The printer ejects blank, unprinted paper

Check 1 The leading edge of the roll paper may have been trimmed.

The leading edge of the roll paper may be trimmed if **Trim edge first** is not set to **Off** or **Manual** in the touch screen menu.

➡ Cutting the Leading Edge of Roll Paper Automatically

Check 2 Is the Print head nozzle blocked?

Print a nozzle check pattern to check the Print head status.

Checking for Nozzle Clogging

Check 3 Is the correct printer driver selected?

Print again using the correct printer driver for your printer.

Check 4 When you print data including HP RTL command, check the settings below in the touch screen menu.

- · Set Auto rotation to OFF.
- If Rotate is set to 90 degrees, select 0 degrees and start printing.
- → Menu Structure

If none of the above apply, there may be a printer malfunction.

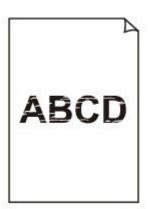

Contact your Canon dealer for assistance.

## **Problems with the Printing Quality**

- Printing is faint
- Paper rubs against the Print Head
- The edges of the paper are dirty
- ➤ The surface of the paper is dirty
- ➤ The back side of the paper is dirty
- Immediately after borderless printing, the trailing edge margin is soiled during regular printing
- Printed colors are inaccurate
- Banding in different colors occurs
- Colors in printed images are uneven
- Image edges are blurred or white banding occurs
- > The length of the printed image in the paper ejection direction is not accurate
- Images are printed crooked
- Documents are printed in monochrome
- Line thickness is not uniform
- Lines or colors are misaligned
- Borders appear in borderless printing

## **Printing is faint**

Check 1 Is the reverse side of the paper being used for printing?

Print on the printing surface.

Check 2 Is the Print head nozzle blocked?

Print a test pattern to check the nozzles and see if they are clogged.

➡ Checking for Nozzle Clogging

#### Note

• To automatically check for nozzle blockages after printing, set **Auto nozzle check** in the touch screen menu to a setting other than **Disable**.

To show warnings based on nozzle check results, set **Nozzle check error display** in the touch screen menu to **Enable**.

However, printing may be stopped by warnings if this setting is set to **Enable**.

→ Menu Structure

Check 3 Was the printer left with the ink tank out?

The ink supply may become blocked by ink if the ink tank is left out.

If this happens, leave the printer for at least 24 hours with the ink tank in, and then carry out **Print Head Cleaning**.

Cleaning the Print Head

Check 4 Are paper scraps stuck in the top cover?

Remove paper scraps left inside the top cover.

Remove Jammed Roll Paper

Remove a Jammed Sheet

Check 5 Was the paper cut before the ink dried?

Set a longer Ink drying wait time in Advanced paper settings in the touch screen menu.

→ Menu Structure

Check 6 Is the printer driver **Print Quality** set to a low quality setting?

Follow the steps below to set Print Quality to higher quality settings, and then print.

Windows

Change the **Print Quality** settings in the printer driver **Advanced Settings**.

- ➡ Changing the Print Quality and Correcting Image Data (Windows)
- macOS

Change the Print Quality in the printer driver Quality & Media settings.

➡ Changing the Print Quality and Correcting Image Data (macOS)

Check 7 Does the paper used for printing create a lot of cutting dust?

In the touch screen menu, set Cut-dust reduction in Advanced paper settings to ON.

➡ Reducing Dust from Cutting Rolls

## Paper rubs against the Print Head

Check 1 Is the media type specified in the printer driver the same as the media type loaded in the printer?

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- ★ Loading Rolls in the Printer
- ★ Loading Sheets in the Printer

When printing with the media type loaded in the printer, specify the same media type in the printer driver.

- 1. To stop printing, press the **Stop** button.
- 2. Change the paper type in the printer driver and try printing again.

### Note

- When **Auto (Use Printer Settings)** is selected for the media type, printing is performed with the media type loaded in the printer.
- · Click **Get Information** to reflect the paper information set in the printer to the printer driver.
  - Printing with Easy Setup

Check 2 When loading paper in the printer, is the media loaded the same as the media type selected on the touch screen?

Select the correct media type in the touch screen menu when loading paper in the printer.

- ★ Loading Sheets in the Printer

Check 3 Is the paper loaded properly?

If not loaded properly, paper can buckle and rub against the Print head.

Reload the paper.

- ➡ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

Check 4 Is the Print head height set too low?

Set Paper thickness (head height) in the touch screen menu to the value higher than the current one.

➡ Troubleshooting Paper Abrasion and Blurry Images

Check 5 Is the paper thick, or a type that curls easily or is prone to buckling after absorbing ink?

If using paper-based printing material such as Heavyweight Coated Paper, set **Transport unit vacuum strength** in the touch screen menu to **Medium-strong** or **Strong**.

If that does not resolve the problem, increase the **Paper thickness (head height)** setting in the touch screen menu.

- Adjusting Vacuum Strength
- ➡ Troubleshooting Paper Abrasion and Blurry Images

If using film-based printing material such as CAD Tracing Paper, set the **Transport unit vacuum strength** in the touch screen menu to **Standard**, **Medium-strong**, or **Strong**.

If that does not resolve the problem, increase the **Paper thickness (head height)** setting in the touch screen menu.

- Adjusting Vacuum Strength
- ➡ Troubleshooting Paper Abrasion and Blurry Images

If using paper thinner than 0.004 inches (0.1 mm), set **Transport unit vacuum strength** in the touch screen menu to **Weak**.

If that does not resolve the problem, increase the **Paper thickness (head height)** setting in the touch screen menu.

- Adjusting Vacuum Strength
- Troubleshooting Paper Abrasion and Blurry Images

Check 6 Does the paper have a strong curl at the front edge or is it buckled?

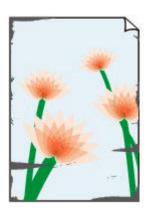

Set Cutting mode in the touch screen menu to User cut, and set leading edge detection to Do not detect.

In this case, to keep track of the amount of remaining roll paper, set **Manage remaining roll amount** to **OFF** before loading the roll paper, and then restore the setting of **Manage remaining roll amount** to **ON** after the roll paper is loaded.

- Specifying the Cutting Method for Rolls
- ➡ Keeping Track of the Amount of Roll Paper Left

## The edges of the paper are dirty

Check 1 Was printing borderless or on small paper?

The platen may become dirtied by borderless printing or on small paper sizes.

Open the top cover and clean the platen.

➡ Cleaning Inside the Top Cover

## Check 2 Is Extension for borderless printing set to a large value?

The platen may become dirtied by setting a large amount of extension.

Reduce the value of Extension for borderless printing.

Specifying the Amount of Extension for Borderless Printing

Check 3 Is the media type specified in the printer driver the same as the media type in the printer?

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- ➡ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

When printing with the media type loaded in the printer, specify the same media type in the printer driver.

- 1. To stop printing, press the **Stop** button.
- 2. Change the type of paper in the printer driver and try printing again.

#### Note

- When **Auto (Use Printer Settings)** is selected for the media type, printing is performed with the media type loaded in the printer.
- Click Get Information to reflect the paper information set in the printer to the printer driver.

Printing with Easy Setup

Check 4 When loading paper in the printer, is the media loaded the same as the media type selected on the touch screen?

Select the correct media type in the touch screen menu when loading paper in the printer.

- ★ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

Check 5 Is the paper creased or curled?

Straighten out the wrinkles or curls and reload the paper.

- ▶ Loading Rolls in the Printer
- ➡ Loading Sheets in the Printer

Check 6 In the touch screen menu, is **Cut-dust reduction** in **Advanced paper settings** set to **ON**?

A cut dust reduction line is printed at the paper cut position when Cut-dust reduction is set to ON.

If cutting dust reduction is not required, set Cut-dust reduction to OFF.

→ Menu Structure

Check 7 Is the Print head height set too low in the touch screen menu?

Set Paper thickness (head height) to the value higher than the current one.

➡ Troubleshooting Paper Abrasion and Blurry Images

Check 8 Is the paper thick, or a type that curls easily or is prone to buckling after absorbing ink?

If using paper-based printing material such as thick-coat paper, set **Transport unit vacuum strength** in the touch screen menu to **Medium-strong** or **Strong**.

If that does not resolve the problem, increase the **Paper thickness (head height)** setting in the touch screen menu.

- Adjusting Vacuum Strength
- ➡ Troubleshooting Paper Abrasion and Blurry Images

If using film-based printing material such as tracing paper, set the **Transport unit vacuum strength** in the touch screen menu to **Standard**, **Medium-strong**, or **Strong**.

If that does not resolve the problem, increase the **Paper thickness (head height)** setting in the touch screen menu.

- Adjusting Vacuum Strength
- ➡ Troubleshooting Paper Abrasion and Blurry Images

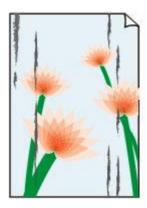

Check 9 Is the output guide clean?

Clean the output guide.

➡ Cleaning the Printer Exterior

## The surface of the paper is dirty

Check 1 Is the paper retainer clean?

Clean the paper retainer.

➡ Cleaning Inside the Top Cover

Check 2 If using plain papers, is the media type set to Plain papers?

Set the media type to PlainP(Instant-dry) for improved quick-drying.

➡ Changing the Type of Paper

Check 3 Does this paper take longer to dry?

Increase the length of the **Pause between pages** and **Pause between scans** settings from the touch screen menu.

→ Menu Structure

#### >>> Note

• When printing on paper that takes longer to dry, the paper may curl during printing and come in contact with the output tray.

In such situations, set an **Ink drying wait time** and an **Ink drying target area** for **Pause between scans** in the touch screen menu.

However, note that printing will now take longer.

→ Menu Structure

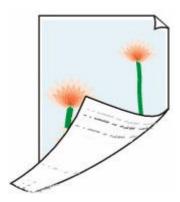

#### Note

• In a hot and humid environment, rolling paper printed with images containing areas of saturated color may transfer ink to the contact surface, affecting print quality.

Move the printer to a different environment, or let the paper dry before rolling it.

## The back side of the paper is dirty

Check 1 Was the previous print job borderless, or printed on small paper?

Open the top cover and clean the platen.

Cleaning Inside the Top Cover

Check 2 Is **Detect paper width** in the touch screen menu set to **Disable**?

Printing with Detect paper width set to Disable may cause the platen to be dirtied.

Set Detect paper width in the touch screen menu to Enable, and then open the top cover and clean the platen.

Cleaning Inside the Top Cover

To continue printing with **Detect paper width** set to **Disable**, first open the top cover and clean the platen, and then manually feed roll paper over the platen when printing.

- Cleaning Inside the Top Cover
- ➡ Feeding Roll Paper Manually

Check 3 Paper may be gripped weakly over the platen.

Set a higher **Transport unit vacuum strength** in the touch screen menu.

Adjusting Vacuum Strength

Check 4 Is the setting of **Extension for borderless printing** in the touch screen menu large?

The platen may become dirtied by setting a large amount of extension.

Reduce the setting of **Extension for borderless printing** in the touch screen menu to less than the current setting.

→ Menu Structure

Check 5 If using plain papers, is the media type set to **Plain papers**?

Set the media type to PlainP(Instant-dry) for improved quick-drying.

➡ Changing the Type of Paper

Check 6 Does this paper take longer to dry?

Increase the length of the **Pause between pages** and **Pause between scans** settings from the touch screen menu.

→ Menu Structure

#### Note

• When printing on paper that takes longer to dry, the paper may curl during printing and come in contact with the output tray.

In such situations, set an **Ink drying wait time** and an **Ink drying target area** for **Pause between scans** in the touch screen menu.

However, note that printing will now take longer.

→ Menu Structure

#### Note

- If the platen is dirty, open the top cover and clean the platen.
- In a hot and humid environment, rolling paper printed with images containing areas of saturated color may transfer ink to the contact surface, affecting print quality.

Move the printer to a different environment, or let the paper dry before rolling it.

# Immediately after borderless printing, the trailing edge margin is soiled during regular printing

In some situations, borderless printing with automatic cutting of the leading and trailing edges on roll paper may transfer ink on the cutter blade to the next item printed.

Follow the steps below to change **Between Pages** in **Drying Time** to between 30 seconds and 3 minutes and perform borderless printing.

- Windows
  - 1. Click Specify for Media Type on the Main sheet of the printer driver.
  - 2. Select an ink drying time from the Between Pages list in Drying Time.
- macOS

Select an ink drying time from the **Drying Time** list on the **Advanced Paper Settings** sheet of the printer driver.

## Printed colors are inaccurate

Check 1 Is the Print head nozzle blocked?

Print a test pattern to check the nozzles and see if they are clogged.

➡ Checking for Nozzle Clogging

Check 2 Has color been adjusted in the printer driver?

Follow the steps below to adjust color settings.

Windows

Adjust the color settings with Color Mode > Color Settings in Advanced Settings in the printer driver.

- → Main Tab Description (Windows)
- macOS

Adjust the color settings in the printer driver Color Options.

Check 3 Is **Application Color Matching Priority** set to **Off** in a Windows printer driver?

In the printer driver **Layout** sheet, click **Special Settings**, and then set **Application Color Matching Priority** to **On** in the dialog box that appears.

→ Layout Tab Description (Windows)

Check 4 Has the computer or monitor color been adjusted?

Take the actions below.

• Refer to the computer and monitor documentation to adjust the colors.

• Adjust the settings of the color management software, referring to the software documentation as needed.

Check 5 Color varies even between printers of the same model due to differences in firmware and printer driver versions, settings, or environment.

Follow these steps to prepare the printing environment.

- 1. Use the same version of firmware or printer driver.
- 2. Specify the same value for all settings items.

## Banding in different colors occurs

Check 1 Make sure that the Print head nozzle is not blocked

Print a test pattern to check the nozzles and see if they are clogged.

➡ Checking for Nozzle Clogging

#### Note

• To automatically check for nozzle blockages after printing, set **Auto nozzle check** in the touch screen menu to a setting other than **Disable**.

To show warnings based on nozzle check results, set **Nozzle check error display** in the touch screen menu to **Enable**.

However, printing may be stopped by warnings if this setting is set to **Enable**.

→ Menu Structure

Check 2 Is the media type specified in the printer driver the same as the media type loaded in the printer?

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- ▶ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

When printing with the media type loaded in the printer, specify the same media type in the printer driver.

- 1. To stop printing, press the **Stop** button.
- 2. Change the type of paper in the printer driver and try printing again.

#### >>> Note

- When **Auto (Use Printer Settings)** is selected for the media type, printing is performed with the media type loaded in the printer.
- · Click **Get Information** to reflect the paper information set in the printer to the printer driver.
  - Printing with Easy Setup

Check 3 Does the paper loaded on the printer match the media type selected on the touch screen?

Select the correct media type in the touch screen menu when loading paper in the printer.

- ➡ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

Check 4 Has the paper feed rate been calibrated properly?

Adjust the feed amount.

→ Adjusting Feed Amount

Check 5 Low **Print Quality** setting causing lines in the printing

Follow the steps below to set Print Quality to the highest quality setting, and then print.

Windows

Change the **Print Quality** settings in the printer driver **Advanced Settings**.

- ➡ Changing the Print Quality and Correcting Image Data (Windows)
- macOS

Change the **Print Quality** in the printer driver **Quality & Media** settings.

➡ Changing the Print Quality and Correcting Image Data (macOS)

Check 6 Is **Set priority** in the touch screen menu set to **Prioritize length accuracy**?

Setting Set priority to Prioritize print quality and adjusting the feed amount can help.

Adjusting Feed Amount

Check 7 Check if the Print head is in the right position

Adjust the Print head position.

→ Automatic Adjustment to Straighten Lines and Colors

Check 8 Print job may have been interrupted while receiving, and therefore not printed at a fast frame rate

Exit other applications and cancel other print jobs.

## Colors in printed images are uneven

Check 1 Does the paper loaded on the printer match the media type selected in the printer driver?

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- ▶ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- 1. To stop printing, press the **Stop** button.
- 2. Change the paper type in the printer driver and try printing again.

### Note

- When **Auto (Use Printer Settings)** is selected for the media type, printing is performed with the media type loaded in the printer.
- Click **Get Information** to reflect the paper information set in the printer to the printer driver.
  - Printing with Easy Setup

Check 2 When loading paper in the printer, is the media loaded the same as the media type selected on the touch screen?

Select the correct media type in the touch screen menu when loading paper in the printer.

- → Loading Rolls in the Printer
- ★ Loading Sheets in the Printer

Check 3 Is the Print head position adjusted correctly?

Adjust the Print head position.

→ Automatic Adjustment to Straighten Lines and Colors

Check 4 Is the feed amount adjusted correctly?

Adjust feed amount.

Adjusting Feed Amount

Check 5 Colors in printed images may be uneven if the **Print Quality** setting is too low

If using Windows, select **Advanced Settings** from the **Main** tab of the printer driver, and then select a higher **Print Quality** setting.

If using macOS, select Quality & Media in the printer driver, and then select a higher Print Quality setting.

- ➡ Changing the Print Quality and Correcting Image Data (Windows)
- → Changing the Print Quality and Correcting Image Data (macOS)

Check 6 Colors in printed images may be uneven on the boundary between shades if there are dark and light areas in an image

Prints on the same page while switching between Bidirectional printing and Unidirectional printing. Therefore, color unevenness may occur when switching. Using the unidirectional printing function may reduce color unevenness in this situation.

Follow the steps below for unidirectional printing.

Windows

Open **Paper Detailed Settings** from the **Main** tab of the printer driver, and then select **Unidirectional Printing**.

macOS

Open Advanced Paper Settings in the printer driver, and then select Unidirectional Printing.

Check 7 If printing borderless, colors in printed images may be a little uneven at the leading edge of the paper because printing is interrupted to cut the paper

Set the printer driver **Automatic Cutting** settings to **No**, and then print. Doing this prints only the left and right sides borderless. Cut the top and bottom borders with a cutting implement such as scissors after the printed materials are output and cut.

#### Note

- · Selecting a higher Print Quality in the printer driver Advanced Settings may resolve the problem.
  - Changing the Print Quality and Correcting Image Data (Windows)
  - ➡ Changing the Print Quality and Correcting Image Data (macOS)

#### Check 8 Does this paper curl easily?

Colors in printed images may be uneven at the leading edge of paper that curls easily. Change the **Transport unit vacuum strength** in the touch screen to increase the grip on the paper, or set a margin of at least 0.8 inches (20 mm) at the front edge of the paper.

Adjusting Vacuum Strength

Check 9 Color may be uneven if printing materials were stacked while drying

To avoid uneven colors, we recommend drying each sheet separately.

Check 10 Is **Ink drying target area** for **Pause between scans** in the touch screen menu set to **Leading edge**?

If the **Ink drying target area** for **Pause between scans** is set to **Leading edge**, color may be uneven approximately 4.3 to 6.3 inches (110 to 160 mm) from the front edge of the paper. (The position depends on the **Print Quality** settings)

On the home screen of the touch screen, tap the paper setting display area, tap the paper feed slot where the paper whose settings to change is set, and then tap **Paper settings** > **Advanced** > **Pause between scans** > **Ink drying target area** and set to **Overall**.

However, note that printing will now take longer.

→ Menu Structure

Check 11 Make sure you are not printing cut sheet with AirPrint (macOS)

When you print cut sheets with AirPrint, uneven or streaked colors may occur at the trailing edge of the sheet.

To print cut sheets with AirPrint. From the touch screen menu, tap **Printer settings > Paper-related settings > Keep margin at cut sheet end**.

→ Menu Structure

#### Note

• Set Keep margin at cut sheet end to Enable to increase the margin at the trailing edge of the sheet.

## Image edges are blurred or white banding occurs

Check 1 Paper may be gripped too strongly over the platen.

Set a lower Transport unit vacuum strength in the touch screen menu.

Adjusting Vacuum Strength

Check 2 Check if the Print head is in the right position.

For detailed printing of small text or fine lines on glossy or semi-gloss photo paper or proof paper, etc., set the Print head to the optimal height and then adjust the position of the Print head.

Adjusting the Print Head

Setting a lower value for Paper thickness (head height) in the touch screen menu may resolve the problem.

➡ Troubleshooting Paper Abrasion and Blurry Images

Check 3 Is the media type specified in the printer driver the same as the media type loaded in the printer?

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- ★ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- 1. To stop printing, press the **Stop** button.
- 2. Change the paper type in the printer driver and try printing again.

#### Note

• When **Auto (Use Printer Settings)** is selected for the media type, printing is performed with the media type loaded in the printer.

- Click **Get Information** to reflect the paper information set in the printer to the printer driver.
  - ➡ Printing with Easy Setup

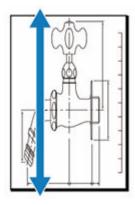

Check 4 When loading paper in the printer, is the media loaded the same as the media type selected on the touch screen?

Select the correct media type in the touch screen menu when loading paper in the printer.

- ➡ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

# The length of the printed image in the paper ejection direction is not accurate

Check 1 Is the media type specified in the printer driver the same as the media type loaded in the printer?

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- ▶ Loading Rolls in the Printer

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- 1. To stop printing, press the **Stop** button.
- 2. Change the paper type in the printer driver and try printing again.

#### Note

- When **Auto (Use Printer Settings)** is selected for the media type, printing is performed with the media type loaded in the printer.
- Click **Get Information** to reflect the paper information set in the printer to the printer driver.
  - Printing with Easy Setup

Check 2 When loading paper in the printer, is the media loaded the same as the media type selected on the touch screen?

Select the correct media type in the touch screen menu when loading paper in the printer.

- ▶ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

Check 3 Perform print quality adjustment to automatically adjust the feed amount.

Perform **Adjust print quality** from **Paper feed adjustment** and **Print alignment pattern** to automatically adjust the feed amount.

→ Automatic Banding Adjustment

Check 4 Is **Set priority** for **Paper feed adjustment** in the touch screen menu set to **Prioritize print quality**?

Set **Set priority** for **Paper feed adjustment** to **Prioritize length accuracy**, and then carry out **Adjust feed length**.

➡ Adjusting Feed Amount

# Images are printed crooked

Check 1 Has the roll paper been loaded at an angle?

If there is a gap between the roll paper and roll holder, reload the roll on the roll holder.

★ Loading Rolls on the Roll Holder

Check 2 Is **Detect paper width** set to **Disable**?

Set **Detect paper width** in the touch screen menu to **Enable** to load the paper.

→ Menu Structure

Check 3 Is Skew detection accuracy in the touch screen menu set to Loose or OFF?

Set Skew detection accuracy to Standard, and then reload the paper.

→ Menu Structure

## Documents are printed in monochrome

Check 1 Is Color Mode set to Monochrome, or Print Target set to Monochrome (Photo) in a Windows printer driver?

In the **Advanced Settings** of the printer driver, specify **Color** in **Color Mode** and try printing again.

Check 2 Is Black and White Photo Print selected in a macOS printer driver?

Deselect Black and White Photo Print in the printer driver Quality & Media settings, and then print again.

Check 3 The print head nozzle may be blocked

Print a test pattern to check the color ink nozzles and see if they are clogged.

➡ Checking for Nozzle Clogging

## Line thickness is not uniform

Check 1 Is the media type specified in the printer driver the same as the media type loaded in the printer?

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- ★ Loading Rolls in the Printer
- ★ Loading Sheets in the Printer

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- 1. To stop printing, press the **Stop** button.
- 2. Change the paper type in the printer driver and try printing again.

#### Note

- When **Auto (Use Printer Settings)** is selected for the media type, printing is performed with the media type loaded in the printer.
- Click **Get Information** to reflect the paper information set in the printer to the printer driver.
  - Printing with Easy Setup

Check 2 When loading paper in the printer, is the media loaded the same as the media type selected on the touch screen?

Select the correct media type in the touch screen menu when loading paper in the printer.

- ▶ Loading Rolls in the Printer
- ★ Loading Sheets in the Printer

## Check 3 Adjust the position of the Print head

If the printed result does not look uniform, such as when the lines are misaligned, adjust the position of Print Head.

- → Automatic Adjustment to Straighten Lines and Colors
- ★ Manual Adjustment to Straighten Lines and Colors

For photo paper and proof paper, it may be improved by setting **Paper thickness (head height)** to a value lower than the current setting and then adjust the position of the Print head.

➡ Troubleshooting Paper Abrasion and Blurry Images

# Check 4 Is **Fast Graphic Process** set to **On** in the 32-bit Windows printer driver **Special Settings** dialog box?

Access the printer driver **Properties** dialog box from **Print** in the **File** menu of the source application, and follow these steps to print.

- 1. Deselect Preview before printing in the Main sheet.
- 2. Deselect Page Layout in the Layout sheet.
- 3. Click the **Special Settings** button in the **Layout** sheet, and then set **Fast Graphic Process** to **Off** in the **Special Settings** dialog box that opens.

## Lines or colors are misaligned

## Check 1 Adjust the position of the Print head

If borders are misaligned or the print results are not uniform, adjust the position of the Print head.

- → Automatic Adjustment to Straighten Lines and Colors
- Manual Adjustment to Straighten Lines and Colors

For photo paper and proof paper, it may be improved by setting **Paper thickness (head height)** to a value lower than the current setting and then adjust the position of the Print head.

➡ Troubleshooting Paper Abrasion and Blurry Images

Check 2 Is the media type specified in the printer driver the same as the media type loaded in the printer?

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- ▶ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

When printing with the media type specified in the printer driver, load the specified media type in the printer.

- 1. To stop printing, press the **Stop** button.
- 2. Change the paper type in the printer driver and try printing again.

#### Note

- When **Auto (Use Printer Settings)** is selected for the media type, printing is performed with the media type loaded in the printer.
- Click Get Information to reflect the paper information set in the printer to the printer driver.
  - Printing with Easy Setup

Check 3 When loading paper in the printer, is the media loaded the same as the media type selected on the touch screen?

Select the correct media type in the touch screen menu when loading paper in the printer.

▶ Loading Rolls in the Printer

▶ Loading Sheets in the Printer

Check 4 Adjust the angle of the Print head

Select Print head angle adjustment from the touch screen menu to adjust the Print head angle.

➡ Adjusting Line Misalignment

Check 5 Is the Roll Paper loaded at an angle?

If there is a gap between the roll paper and the roll holder, reload the roll paper.

★ Loading Rolls in the Printer

Check 6 Is **Detect paper width** set to **Disable**?

Set **Detect paper width** in the touch screen menu to **Enable** to load the paper.

→ Menu Structure

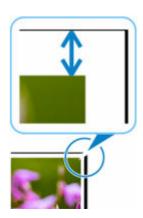

Check 7 Is Skew detection accuracy in the touch screen menu set to Loose or OFF?

Set Skew detection accuracy to Standard, and then reload the paper.

→ Menu Structure

# Borders appear in borderless printing

If white bandings or borders appear on the edges of borderless printing, check the following items.

Check 1 Is the position of the Print head adjusted?

Adjusting the position of the Print head will improve the printing accuracy.

➡ Adjusting the Print Head

Check 2 If printing full-scale borderless, is the selected paper wider than the source size?

For borderless printing at actual size, use roll paper that has the same width as the actual page size.

- Printing Full-Size without Margins (Windows)
- ➡ Printing Full-Size without Margins (macOS)

Check 3 Does the source file have margins?

Check that the printing image data does not have any objects like crop marks and transparent objects.

Check 4 Is a margin set in application software?

Check that no margins are configured in the application software you are using.

Check 5 Is the **Extension for borderless printing** set to large in the touch screen menu?

In the touch screen menu, set Extension for borderless printing to the smaller number than the current setting.

➡ Specifying the Amount of Extension for Borderless Printing

# **Cannot Print over Network**

- **▶** Cannot Connect Printer to Network
- ➤ Cannot Print over TCP/IP Network
- ➤ Cannot Print over Bonjour networks

## **Cannot Connect Printer to Network**

Check1 Is the Ethernet cable connected correctly to the printer's wired LAN connector?

Make sure the printer is connected to the network with the correct Ethernet cable, and then turn the printer on. For instructions on connecting the cable, refer to the Setup Guide.

Check2 Make sure the Link indicator is lit.

The left and right indicators are lit if the printer is connected via 1000Base-T.

The left indicator is green if the printer is connected via 100Base-TX, and the right indicator is orange if connected via 10Base-T.

If the Link indicator is not lit, check the following points.

- The hub is on.
- The end of the Ethernet cable is connected correctly.

Insert the Ethernet cable until it clicks and locks in place.

• There is no problem with the Ethernet cable.

If there is any problem, replace the Ethernet cable.

## **Cannot Print over TCP/IP Network**

Check 1 Is the printer's IP address configured correctly?

Make sure the printer's IP address is configured correctly.

### >>> Note

- For Windows, you can configure the printer's IP address using IJ Network Device Setup Utility.
   For details, refer to "Performing/Changing Network Settings" > "Performing Network Settings" in IJ Network Device Setup Utility Guide.
  - ➡ IJ Network Device Setup Utility Guide

Check 2 Are the printer's TCP/IP network settings configured correctly?

Make sure the printer's TCP/IP network settings are configured correctly.

Check 3 Is the computer you are trying to print from configured correctly?

Make sure the computer's TCP/IP network settings are configured correctly.

# **Cannot Print over Bonjour networks**

Check 1 Is the computer you are trying to print from configured correctly?

Make sure the computer is configured correctly.

Check 2 Are the computer and printer on the same network?

Due to the nature of Bonjour, printing may not be possible if the printer is on another network behind a router. Make sure the computer and printer are on the same network. For information about network settings, ask your network administrator.

Check 3 Are the printer's Bonjour settings configured correctly?

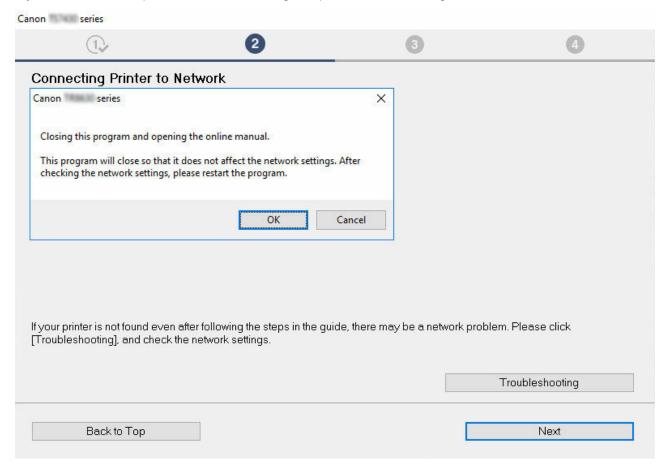

Make sure the Bonjour settings are configured correctly.

# **Cannot Find Printer on Network**

- ➤ Cannot Find Printer During Setup
- ➤ Cannot Proceed beyond Printer Connection Screen/Connect Cable Screen
- Searching Printer by IP Address or Host Name During Setup
- ➤ Cannot Find Printer while Using Wi-Fi
- Cannot Find Printer while Using Wired LAN
- ➤ Cannot Print Using AirPrint

# **Cannot Find Printer During Setup**

If you cannot find the printer on network during setup, check the following.

When you complete all the checking, try to set up from the beginning.

# Items to check for Wi-Fi

#### Step 1 Check the basic items for Wi-Fi

1. Check power status

Are printer and network device (router, etc.) turned on?

Stop setting up, and check if the router (modem) is turned on and then check if the printer is turned on.

1. Check if network devices such as router are turned on.

If network devices are not turned on, turn on the power. If the network devices are on, turn them off and on again.

It may take a while for the network device to become ready for use once they are turned on.

Proceed once the network devices such as router are ready for use.

2. Check if the printer is turned on

If printer is not turned on, turn on the power. If the printer is on, turn them off and on again.

2. Check PC network connection

Can you view any web pages on your computer? Make sure the computer and network device (wireless router, etc.) are configured and the computer is connected to the network.

If you cannot view web pages on your computer, check wireless router network connection settings, such as IP address filtering, MAC address filtering, and DHCP function.

For more on checking the settings of the wireless router, refer to the instruction manual supplied with the wireless router or contact the manufacturer.

#### Important

 Depending on the wireless router, note that different network name (SSID) is assigned for a bandwidth (2.4 GHz or 5 GHz) or its usage (for PC or game machine), using alphanumeric characters at the end of network name (SSID).

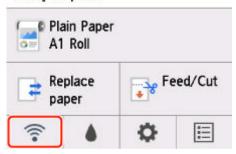

Once you complete checking the wireless router, configure the network settings for your computer. For the procedures, refer to the instruction manual supplied with the computer, or contact the manufacturer.

Once you complete setting up the wireless router and your computer, configure the settings on your computer in order to view web pages, using the information of the wireless router.

#### 3. Check printer's Wi-Fi settings

#### Ready to print

#### If icon is not displayed:

The printer is not set to enable wireless communication. Change the printer settings in order to use Wi-Fi. Turn on wireless communication on the printer.

#### icon is displayed:

con indicates that the wireless router and the printer are not connected. Reconsider the locations of the wireless router and the printer.

· Checking the location of wireless router:

After checking the wireless router setting, make sure the printer is not placed too far away from the wireless router. The printer can be up 164 ft. (50 m) from the wireless router indoors if unobstructed. Make sure the printer is close enough to the wireless router to be used.

Place the printer and wireless router where there are no obstacles between them. Wireless communication between different rooms or floors is generally poor. Wireless communication can be impeded by building materials containing metal or concrete. If the printer cannot communicate with the computer over a Wi-Fi due to a wall, place the printer and the computer in the same room.

In addition, if a device like a microwave oven that emits radio waves of the same frequency bandwidth as a wireless router is nearby, it may cause interference. Place the wireless router as far away from interference sources as possible.

Checking the location of printer:

Make sure that the printer is not placed behind an object. The printer may not be connected when placed behind a wall or on a shelf. Try to place the printer in a location where there is no obstacle.

For details, see the instruction manual supplied with the wireless router or contact the manufacturer.

# Step 2 Solve the Problem, Using IJ Network Device Setup Utility

Diagnose and repair the network connections using IJ Network Device Setup Utility.

Download IJ Network Device Setup Utility from the below page, and install it on your computer.

➡ Checking Printer Connection Status Using IJ Network Device Setup Utility

If you can connect to the network, try to set up from the beginning.

### Items to check for wired LAN

### Step 1 Check the basic items for wired LAN

#### 1. Check the power and LAN Cable

When the printer cannot be found on the setup screen, using wired LAN connection setup, make sure that all the network devices are connected with the router and the hub via LAN cables and that all the devices are turned on.

#### If LAN cable is not connected:

Connect the router, hub, computer and printer via LAN cables.

Make sure the printer is turned on.

Make sure the printer is turned on, and make sure that the router and the hub are turned on.

#### If LAN cable is connected, and printer and network device are off:

Turn on printer or network device.

#### If LAN cable is connected, and printer and network device are on:

If they are on, turn them off and on again.

• It may take a while for the printer and network device to become ready for use once they are turned on again. After turning it on, wait for a while and proceed.

#### 2. Check PC network connection

Can you view any web pages on your computer? Make sure the computer and network device (router, etc.) are configured and the computer is connected to the network.

If you cannot view web pages, unplug the cable connected to the router's WAN side. Connect the cable directly to the computer to see if you can view web pages on the Internet.

Check the settings for the router if you were able to view web pages. For details on checking the settings of the router, refer to the instruction manual supplied with the router or contact the manufacturer. Refer also to the instruction manual regarding the connection of the provider.

Once you complete checking the router, configure the network settings of your computer. For the procedures, refer to the instruction manual supplied with the computer, or contact the manufacturer.

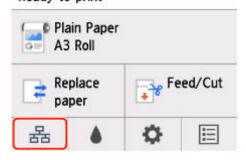

Once you complete setting up the router and your computer, configure the settings on your computer to view web pages, using the information of the router.

Proceed once you can view web pages on your computer.

#### 3. Check printer's wired LAN settings

#### Ready to print

#### If icon is not displayed:

The printer is not set to enable wired communication. Change the printer settings in order to use wired LAN.

When you complete checking [Step 1] above, try to set up from the beginning.

If the printer cannot be detected after trying to set up from the beginning, proceed to [Step 2].

Step 2 Solve the Problem, Using IJ Network Device Setup Utility

Diagnose and repair the network connections using IJ Network Device Setup Utility.

Download IJ Network Device Setup Utility from the below page, and install it on your computer.

➡ Checking Printer Connection Status Using IJ Network Device Setup Utility

If you can connect to the network, try to set up from the beginning.

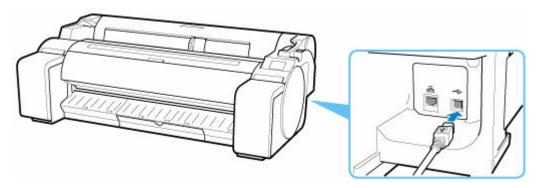

# Cannot Proceed beyond Printer Connection Screen/Connect Cable Screen

If you cannot proceed beyond the **Printer Connection** screen or the **Connect Cable** screen, check the following.

Check 1 Make sure USB cable is securely plugged in to printer and computer.

Connect the printer and the computer using a USB cable as the illustration below. The USB port is located at the back side of the printer.

Check the items below only if you cannot proceed beyond the Printer Connection screen.

Check 2 Follow procedure below to connect printer and computer again.

#### >>>> Important

- For macOS, make sure the lock icon is on the lower left of the **Printers & Scanners** screen.
  - If the icon (locked) is displayed, click the icon to unlock. (The administrator name and the password are necessary to unlock.)
- 1. Turn off printer.
- 2. Unplug USB cable from printer and computer and connect it again.
- 3. Turn on printer.
- Check 3 If you cannot resolve problem, follow procedure below to reinstall printer driver.
  - 1. Exit setup.

- 2. Turn off printer.
- 3. Restart computer.
- 4. Make sure you have no application software running.
- 5. Click here and perform setup.

### >>>> Note

• You can use the Setup CD-ROM to redo setup.

# Searching Printer by IP Address or Host Name During Setup

If the printer cannot be found on the **Select Printer** screen, search for the printer by an IP address or host name. Click **Search By IP Address** on the screen which appears by clicking **Printer Not Found**. The screen to select searching criteria appears.

#### 1. Check printer's IP address or host name.

To check the printer's IP Address or host name, print out the network settings information or use the touch screen to display it.

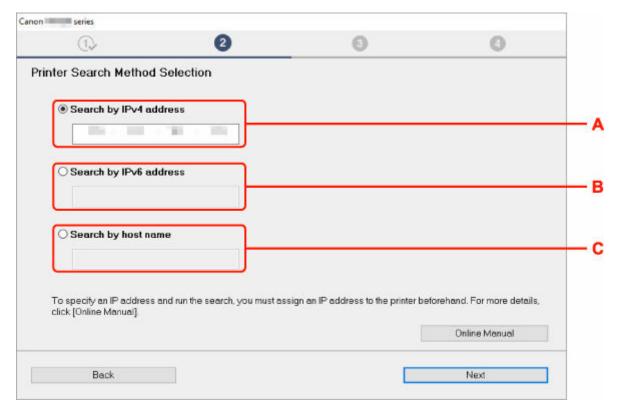

- · Display on the touch screen.
  - **LAN settings**
- · Print the network settings.
  - Printing Network Settings

#### Note

• If you use the printer in an office, ask the network administrator.

#### 2. Specify searching method.

Select one of the methods below.

#### A: Search by IPv4 address

Select to search for printers by IPv4 address.

#### B: Search by IPv6 address

Select to search for printers by IPv6 address.

#### C: Search by host name

Select to search for printers by host name. A host name is referred to as LLMNR host name or Bonjour name.

3. Enter IP address or host name and click **Next**.

Printer search starts.

# If an error screen appears:

Resolve the error according to the instruction on the screen.

If the IP address you entered is already used for another device, follow the procedure below to specify printer's IP address.

- 1. Select LAN settings on HOME screen.
  - ➡ Home Screen Menu Composition

If you specify the administrator password, enter the password.

- 2. Select Wi-Fi.
- 3. Select Settings.
- 4. Select Advanced.
- 5. Select TCP/IP settings.
  - If you specify IPv4 address:
    - 1. Select IPv4.
    - 2. Select Yes on the displayed screen.
    - 3. Select IP address.
    - 4. Select Manual setup.

Selecting Auto setup specifies the IP address automatically.

- 5. Enter IP address.
- 6. Select OK.
- 7. Enter subnet mask.
- 8. Select OK.
- 9. Enter default gateway.

#### 10. Select OK.

The IPv4 address has been specified.

#### • If you specify IPv6 address:

- 1. Select IPv6.
- 2. Select Yes on the displayed screen.
- 3. Select Enable/disable IPv6.
- 4. Select Enable.

The IPv6 address has been specified.

### >>> Important

• If firewall is enabled on the computer, printers on a different subnet may not be detected. Disable firewall.

# If firewall interferes with printer search:

#### • If a firewall message appears:

If a firewall message appears warning that Canon software is attempting to access the network, set the security software to allow access.

After allowing the software to access, specify the IP address or host name and search for printers again.

If the printer is found, follow the instructions on the screen to continue to set up the network communication.

#### • If no firewall message appears:

Temporarily disable the firewall and specify the IP address or host name to search for printers again.

After the setup is complete, re-enable the firewall.

#### Note

 For more on firewall settings of your operating system or security software, see instruction manual or contact its manufacturer.

### **Cannot Find Printer while Using Wi-Fi**

Check 1 Make sure printer is turned on.

If not, make sure the printer is securely plugged in and press **ON** button to turn on.

The ON lamp flashes while the printer is initializing. Wait until the ON lamp stops flashing and remains lit.

Check 2 Check the network status on the touch screen.

If the icon is displayed, or only the icon is displayed, Wi-Fi is disabled.

Set Enable/disable Wi-Fi in the touch screen menu to Enable.

If the icon is displayed, see Check 3 or later checking items to make sure whether printer setup is complete or the settings of wireless router to connect are correct.

Check 3 Make sure printer setup is complete on the computer.

If it is not, perform setup.

· For Windows:

Perform setup using the Setup CD-ROM or from Setup Guide.

• For macOS:

Perform setup from Setup Guide.

#### >>> Note

- IJ Network Device Setup Utility allows you to diagnose and repair the network status. Download it from the web page.
  - For Windows
  - For macOS

Check 4 Make sure printer and wireless router network settings match.

Make sure the network settings of the printer (e.g. wireless router name, SSID, network key, etc.) are identical with those of the wireless router.

To check the settings of the wireless router, refer to the instruction manual provided with it or contact its manufacturer.

#### Note

• Use 2.4 GHz frequency band to connect to a wireless router. Match the SSID set for the printer with that for 2.4 GHz frequency band of the wireless router.

To check the SSID set for the printer, print out the network setting information or use the operation panel to display it.

- · Display on the touch screen.
  - **► LAN settings**
- · Print the network settings.
  - Printing Network Settings

#### Note

- IJ Network Device Setup Utility allows you to diagnose and repair the network status.
   Select the link below to download IJ Network Device Setup Utility and install it.
  - ➡ Checking Printer Connection Status Using IJ Network Device Setup Utility

Check 5 Make sure the printer is not placed too far away from the wireless router.

If the distance between the printer and wireless router is too far, wireless communication becomes poor. Place the printer and wireless router close to each other.

#### Note

• Though an antenna is attached to most wireless routers, note that some of them have it inside.

Check 6 Make sure wireless signal is strong. Monitor signal strength and move printer and wireless router as necessary.

Place the printer and wireless router where there are no obstacles between them. Wireless communication between different rooms or floors is generally poor. Wireless communication can be impeded by building materials containing metal or concrete. If the printer cannot communicate with the computer over a Wi-Fi due to a wall, place the printer and the computer in the same room.

In addition, if a device like a microwave oven that emits radio waves of the same frequency bandwidth as a wireless router is nearby, it may cause interference. Place the wireless router as far away from interference sources as possible.

#### Note

- IJ Network Device Setup Utility allows you to diagnose and repair the network status.
   Select the link below to download IJ Network Device Setup Utility and install it.
  - Checking Printer Connection Status Using IJ Network Device Setup Utility

Check 7 Make sure the computer is connected to the wireless router.

For more on how to check the computer settings or connection status, see your computer instruction manual or contact its manufacturer.

#### Note

• If you use a smartphone or tablet, make sure the Wi-Fi is enabled on the device.

Check 8 Make sure **Enable bidirectional support** is selected in the **Ports** sheet of the properties dialog box of the printer driver. (Windows)

If not, select it to enable bidirectional support.

Check 9 Make sure security software's firewall is off.

If your security software's firewall is on, a message may appear warning you that Canon software is attempting to access the network. If this warning message appears, set security software to always allow access.

If you are using any programs that switch between network environments, check their settings.

Check 10 If printer is connected to an AirPort Base Station via LAN, make sure you use alphanumeric characters for network identifier (SSID). (macOS)

#### If the problem is not resolved, redo setup.

• For Windows:

Perform setup using the Setup CD-ROM or from Setup Guide.

• For macOS:

Perform setup from Setup Guide.

# **Cannot Find Printer while Using Wired LAN**

Check 1 Make sure printer is turned on.

If not, make sure the printer is securely plugged in and press **ON** button to turn on.

The **ON** lamp flashes while the printer is initializing. Wait until the **ON** lamp stops flashing and remains lit.

Check 2 Make sure LAN cable is connected properly.

Make sure the printer is connected to the router with the LAN cable. If the LAN cable is loose, connect the cable properly.

If the LAN cable is connected to the WAN side of the router, connect the cable to the LAN side of the router.

If the icon is not displayed, wired LAN is disabled.

If not, select LAN settings > Wired LAN > Settings, and then select Enable for Enable/disable Wired LAN.

# **Cannot Print Using AirPrint**

Check 1 Make sure printer is turned on.

If the printer is turned on, turn it off and back on, and then check whether the issue is resolved.

Check 2 Make sure printer is registered to your computer.

Check 3 Make sure printer is connected by LAN to same network subnet as AirPrint compliant device when printing over LAN.

Check 4 Make sure printer has enough paper and ink.

Check 5 Make sure no error message is displayed on printer's touch screen.

# **Installation Problems**

- ➤ Removing Printer Software
- ➤ Taking Time to Setup Process (Windows)
- ➤ Failed to Printer Driver Installation (Windows)

### **Removing Printer Software**

Follow the steps below to remove utility software installed on the computer.

#### >>>> Important

• You must log in as an administrator or have administrator permissions.

#### >>> Note

- See the pages below for how to remove printer drivers.
  - Deleting the Unnecessary Printer Driver (Windows)
  - ➡ Delete the Unnecessary Canon IJ Printer from the Printer List (macOS)

# Removing the IJ Network Device Setup Utility (Windows)

Follow the steps below to remove the IJ Network Device Setup Utility.

- Windows 10
  - 1. Click start, select Windows System, and then select Control Panel.
  - 2. Under **Programs**, select **Programs and Features**, select IJ Network Device Setup Utility from the list of programs, and then click **Uninstall**.
- Windows 8.1
  - 1. Use the **Settings** charm on the desktop to open the **Control Panel**.
  - **2.** Under **Programs**, select **Programs and Features**, select IJ Network Device Setup Utility from the list of programs, and then click the **Uninstall** button.
- · Windows 7
  - 1. Select Control Panel from the start menu.
  - 2. Select Uninstall a program.
  - 3. Select IJ Network Device Setup Utility, and then click the Uninstall button.

#### Note

• If the User Account Control dialog box is displayed, click Yes.

# Removing the IJ Network Device Setup Utility (macOS)

Follow the steps below to remove the IJ Network Device Setup Utility.

- Select Applications from Go menu of Finder, double-click Canon Utilities > IJ Network
   Device Setup Utility, and then drag Canon IJ Network Device Setup Utility icon into
   Trash.
- 2. Restart computer.

Empty the **Trash** and restart your computer.

#### Note

 To reinstall IJ Network Device Setup Utility, uninstall IJ Network Device Setup Utility and install it again from the Canon website.

# **Taking Time to Setup Process (Windows)**

If Windows update starts during setup, or if you perform setup while Windows update is in progress, it may take a while to register the printer or to perform other processes.

Wait for a while. This is not a malfunction.

# **Failed to Printer Driver Installation (Windows)**

• If installation does not start when you insert Setup CD-ROM:

Follow the instructions below to start the installation.

- **1.** Make the following settings.
  - In Windows 10, click **Start** button > **File Explorer**, and then click **This PC** from list on left.
  - In Windows 8.1, select Explorer icon in Taskbar on Desktop, and then select This PC from list on left.
  - In Windows 7, click Start, and then click Computer.
- 2. Double-click the CD-ROM icon in the window that appears.

If the contents of the CD-ROM appear, double-click MSETUP4.EXE.

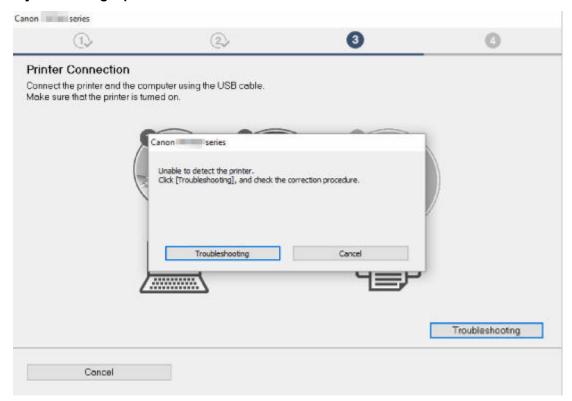

If you cannot install the printer driver with the Setup CD-ROM, install it from the Canon website.

#### >>> Note

- If the CD-ROM icon does not appear, try the following:
  - Remove the CD-ROM from your computer and reinsert it.
  - Restart your computer.

If the icon still does not appear, try a different disc and see if it appears. If it does, there is a problem with the Setup CD-ROM. Contact your nearest Canon service center to request a repair.

#### • If you cannot get past the Printer Connection screen:

→ Cannot Proceed beyond Printer Connection Screen/Connect Cable Screen

#### · Other cases:

Reinstall the printer driver.

If the printer driver was not installed correctly, uninstall the printer driver, restart your computer, and then reinstall the printer driver.

→ Deleting the Unnecessary Printer Driver

Reinstall the printer driver with the Setup CD-ROM or install it from the Canon website.

#### Note

• If the installer was stopped due to a Windows error, Windows operation may be unstable, and you may not be able to install the drivers. Restart your computer and then reinstall the drivers.

# **Other Problems**

- Printer does not turn on
- ➤ If the Printer Makes a Strange Sound
- ➤ Messages advising to check the maintenance cartridge are not cleared
- Printer consumes a lot of ink
- ➤ Ink Level Detection
- ➤ Media Type Selection does not Match Loaded Media Type

# Printer does not turn on

Check 1 Is the power cord plugged in?

Plug the power cord into the outlet, and then turn on the printer.

Check 2 Is the specified voltage being supplied?

Check the voltage of the outlet and breaker.

→ Specifications

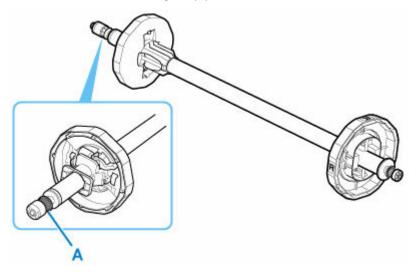

### If the Printer Makes a Strange Sound

Check 1 Has an unusual noise been produced from the vicinity of the roll holder?

If dust accumulates on the gear (A) at the end of the roll holder, a noise may be produced from that area.

When the noise starts, clean the gear with the following procedure.

- 1. Remove the roll holder from the printer.
- 2. Wipe the dust off the gear with a damp, tightly wrung cloth, and then dry with a dry cloth.
- 3. Insert the roll holder in the printer.

Check 2 Operating noise may be heard from the printer even when not printing.

The following sounds do not indicate a problem with the printer.

- A suction sound can be heard from the platen
   To prevent the paper from rising, the surface of the platen has vacuum holes that create suction on the paper.
- Roll paper makes a fluttering sound during printing.

There may be a fluttering sound when large paper is advanced.

- You suddenly hear the sound of cleaning operations.
   Cleaning is automatically performed at specified intervals in order to keep the printer maintained.
- You suddenly hear the sound of ink agitation.

Ink is automatically agitated after specified intervals to maintain optimal print quality. Agitation takes approximately 1 minute 30 seconds.

Ink is also agitated automatically at the following times. Please note that no other operations can be performed while "Agitating the ink" is on the touch screen.

- After the printer is turned on
- After data transmission
- After ink tank replacement

In other cases, contact your Canon dealer.

# Messages advising to check the maintenance cartridge are not cleared

The newly replaced maintenance cartridge is not recognized.

Remove the newly replaced maintenance cartridge, and then reinsert it again firmly.

➡ Replacing the Maintenance Cartridge

### Printer consumes a lot of ink

Check 1 Are lots of full-color materials being printed?

In print jobs such as photos, images are filled with color. This consumes a lot of ink. This does not indicate a problem with the printer.

Check 2 Is System Cleaning being carried out frequently?

**System Cleaning** uses a lot of ink. This is normal. We recommend that you only carry out **System Cleaning** after the printer has been transported, if it has not been used for a long time, or if there is a problem with the Print head.

Check 3 You have just finished initial installation, when more ink is consumed to fill the system.

If using the printer for the first time, or using it after transport, the ink tank will supply an initial fill of ink to the Print head.

Although the amount of remaining ink may drop as a result, it does not indicate a problem.

Check 4 Is the Print head nozzle blocked?

Check for nozzle clogging.

Checking for Nozzle Clogging

### **Ink Level Detection**

The printer ink tank detects the amount of ink remaining to prevent running out of ink while printing and to avoid printer failure.

#### ➡ Ink Tanks

When using an ink tank refilled with ink, the function for detecting the remaining ink level may not operate properly and printing may stop. If you want to use an ink tank refilled with ink, you need to disable the function for detecting the remaining ink level.

#### >>>> Important

- Printing with the ink level detection canceled may lead to printer damage and printing problems. Canon Inc. is not liable for any damage that may occur as a result of refilling ink.
- Once the function for detecting the remaining ink level is disabled, it cannot be restored for that ink tank.
   To restore the function for detecting the remaining ink level, replace the ink tank with a new ink tank for that printer.
- Repeatedly removing and inserting the same ink tank can cause the contacts between the ink tank and
  printer to malfunction, ink may leak from the ink tank, and the printer may become damaged.

# Releasing ink level detection

Ink level detection will be deactivated if you load ink tanks once emptied.

If "The above ink tank may be an ink tank that ran out of genuine Canon ink or a counterfeit Canon ink tank." appears on the touch screen, follow the steps below.

- **1.** Move through the screens, performing the actions described in the messages that appear on the touch screen.
- **2.** If an instruction to disable detection of remaining ink appears, touch **Stop** on the printer for at least 5 seconds, and then release it.

Ink level detection is now released.

# Media Type Selection does not Match Loaded Media Type

Check 1 Is this paper being used for the first time?

If this is the first time to use the paper, it may not be selected correctly. In the media type selection, manually select the correct paper type.

Check 2 Is the paper you set genuine paper or recommended paper?

If you want to use a paper that is not in the paper information list, register the media type in the Media Configuration Tool.

- → Paper Information List
- → Media Configuration Tool Guide

Check 3 Is there any unevenness in the gloss and color of the paper surface?

Some media types may not be suitable for paper type estimation. If the paper type is not recognized correctly, manually select the correct paper in the media type selection.

# **List of Support Code for Error**

Support codes appear on the PC when an error occurs.

Support codes are error identification numbers that appear alongside error messages.

If an error occurs, check the support code and follow the recommended steps to resolve the issue.

# Support code displayed

B20A B510

# 1005

# Cause

You have attempted to print on a sheet, but no sheet is loaded.

# What to Do

Check the media size and type for the print job on the touch screen, and then tap **OK**.

#### Continuing to print

Tap Load paper, and then load the paper.

▶ Loading and Printing on Sheets

#### Stopping printing

To stop printing, tap **Cancel** on the touch screen or press the **Stop** button.

# 100A

# Cause

You have attempted to print on a roll, but no roll is loaded.

# What to Do

Tap **Load paper** on the touch screen, and then load the paper roll and print.

▶ Loading Rolls in the Printer

### >>> Note

• To stop printing, tap **Cancel** on the touch screen or press the **Stop** button.

# 1012

# Cause

You have attempted to print on a sheet, but no sheet is loaded.

# What to Do

Tap **Load paper** on the touch screen, and then load cut paper and print.

▶ Loading and Printing on Sheets

### >>> Note

• To stop printing, tap **Cancel** on the touch screen or press the **Stop** button.

# Cause

The printer has received a print job longer than the amount of roll paper left.

# What to Do

#### Continuing to print

To continue printing, tap **Print with the loaded paper.** on the touch screen.

However, the roll paper may run out during the print job and you may not be able to print all of the document.

#### · Replacing paper

Tap Replace the paper and print and print on the touch screen.

Change the **Paper Source** in the printer driver, or replace the paper with paper of the right length for the print job, and then try again.

- ➡ Removing the Roll from the Printer
- ▶ Loading Rolls in the Printer

#### Stopping printing

To stop printing, tap **Cancel** on the touch screen or press the **Stop** button.

#### Cause

Possible causes include the following.

- · Roll paper is empty.
- There is remaining roll paper, but because it could not be advanced, it could not be detected.

### What to Do

· The roll paper has run out

Follow the steps below to replace the used roll with a new roll of the same type and size.

- 1. Tip back the release lever and remove the roll paper.
  - Removing the Roll from the Printer
- 2. Load the new roll.
  - ▶ Loading Rolls in the Printer
- 3. If "There is a job which has not been printed yet. Do you want to print this job?" appears on the touch screen, tap Yes.

Printing will resume, starting from the page on which the error occurred.

· Feed stopped because the end of the paper roll is attached to the core with tape

Remove the used roll paper and insert a new roll paper.

- Removing the Roll from the Printer
- ▶ Loading and Printing on Rolls
- Feed stopped because the remaining paper roll is too heavy

It may be helpful to change the printing mode, which will change the paper feed timing.

If using Windows, select a higher Print Quality setting under Advanced Settings in the printer driver.

If using macOS, select **Quality & Media** in the printer driver, and then select a higher **Print Quality** setting.

- Setting the Print Quality Level (Custom) (Windows)
- → Setting the Print Quality Level (Custom) (macOS)

#### Note

• To stop printing, press the **Stop** button.

# 1041

# Cause

You have selected wrong paper source for **Replace paper**.

# What to Do

Match the paper source for loading paper with the paper source setting for **Replace paper**.

For the roll paper, select **Roll paper** and load it.

For the cut sheet, select Cut sheet and load it.

# Cause

The media type specified in the printer driver is not the same as the media type loaded in the printer.

# What to Do

# Cause

The width of the roll paper set in **Fit Roll Paper Width** in the printer driver is not the same as the width of the roll paper loaded in the printer.

# What to Do

# Cause

The paper in the printer is smaller than the paper size set in the printer driver.

# What to Do

# Cause

The paper position is not suitable for borderless printing.

# What to Do

# Cause

The paper position is not suitable for borderless printing.

# What to Do

# Cause

Roll paper has almost run out.

## What to Do

Printing will continue. Replace the roll paper in the printer with one that has enough paper for printing as soon as possible.

- Removing the Roll from the Printer
- ▶ Loading Rolls in the Printer

#### >>>> Note

• To stop printing, press the **Stop** button.

#### Cause

The media type specified in the print job is not the same as the media type loaded in the printer.

### What to Do

Tap **OK** on the touch screen to go to the next screen.

Check the displayed media type and size, and tap **OK**.

#### · Printing again according to the media type

Follow the steps below to match the media type in the print job and the media type loaded in the printer.

#### · Changing the media type in the print job

- 1. Tap Cancel to stop printing.
- 2. Change the media type in the print job settings to the media type loaded in the printer, and then try again.
  - ★ Loading and Printing on Rolls
  - Loading and Printing on Sheets

#### Replacing paper

- 1. Tap Replace the paper and print.
- 2. Load the paper with the media type specified in the print job, and then try again.
  - ▶ Loading and Printing on Rolls
  - ▶ Loading and Printing on Sheets

#### · Printing with the current print settings

To continue printing, tap **Print with the loaded paper.** on the touch screen.

However, note that this error may cause paper jams and affect the printing quality.

### Cause

Top cover or print head lock lever is open.

# What to Do

Open the top cover and make sure the print head lock lever is closed properly.

Make sure there are no foreign objects caught in the top cover, and then close the top cover.

If this error appears again, close the top cover, turn the power off, wait a moment, and then turn the power back on.

#### >>> Note

• If installing a print head, close the top cover after finishing.

# Cause

The ink tank cover is open.

# What to Do

Close the ink tank cover.

# Cause

The ink tank cover is open.

# What to Do

Close the ink tank cover.

# Cause

Release lever is released.

# What to Do

Pull the release lever toward the front.

If the error occurs again, turn off the printer and wait a while before restoring power.

# Cause

While the printer was printing or performing maintenance, the release lever was released.

# What to Do

Turn off the power, wait a moment, and then turn it back on.

If the error appears again, make a note of the detailed error code (ECxx-xxxx) that appears on the touch screen, and then turn off the power and contact a Canon customer service center.

# **Detailed error codes**

EC19-2F21

## Cause

Paper jammed inside the printer while printing.

# What to Do

Follow the steps below to remove jammed paper.

- 1. Tip back the release lever and remove the jammed paper.
  - ➡ Remove Jammed Roll Paper
  - Remove a Jammed Sheet
- 2. Load the paper.
  - ▶ Loading Rolls in the Printer
  - ▶ Loading Sheets in the Printer
- 3. If "There is a job which has not been printed yet. Do you want to print this job?" appears on the touch screen, tap Yes.

Printing will resume, starting from the page on which the error occurred.

If the error appears again, the printer may be damaged. Contact a Canon customer service center.

# Cause

A print job for rolls was received when a sheet is loaded.

# What to Do

Follow these steps to load and print on a roll.

- 1. To remove the cut paper, tap **Remove paper** on the touch screen.
  - → Removing Sheets
- 2. Load a new roll.
  - ▶ Loading Rolls in the Printer

#### >>>> Note

• To stop printing, tap **Cancel** on the touch screen or press the **Stop** button.

## Cause

Paper loaded crooked was detected when the paper was advanced.

### What to Do

Tip back the release lever and reload the paper.

- ▶ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

If this error appears again even after reloading the paper roll, remove the roll holder from the printer, insert the paper roll firmly into the roll holder until it is up against the flange, and then insert the roll holder into the printer.

▶ Loading Rolls on the Roll Holder

#### >>> Important

If this message continues to appear even after taking the steps above, or if you do not want this
message to appear, set Skew detection accuracy in the printer menu to OFF or Loose. However,
note that the paper will be printed skewed, which could cause paper jams and abnormal print results,
or dirty the platen and the reverse of the next printed sheet.

#### Cause

Cannot detect paper size because paper is not in the correct position or because curled paper has been loaded.

#### What to Do

Tip back the release lever and remove any paper. Then check the paper and reload it.

- ▶ Loading Rolls in the Printer
- ▶ Loading Sheets in the Printer

If "There is a job which has not been printed yet. Do you want to print this job?" appears on the touch screen, tap Yes.

Printing will resume, starting from the page on which the error occurred.

#### Note

- If this error appears again even after reloading the paper roll, remove the roll holder from the printer, insert the paper roll firmly into the roll holder until it is up against the flange, and then insert the roll holder into the printer.
  - → Loading Rolls on the Roll Holder
- This error might also appear if the platen has been dirtied by ink or another substance, or if the size of clear film could not be detected. In this case, open the top cover and clean the entire platen area.
  - Cleaning Inside the Top Cover

## Cause

An unsuitable paper size has been loaded.

# What to Do

Tip back the release lever, remove any paper, and then reload paper of suitable size.

→ Paper Sizes

#### >>> Note

• Load unused A4/letter size or larger paper if printing calibration and nozzle check patterns. Each calibration may take several sheets of paper.

### Cause

A print job for printing on sheets was sent when a roll is loaded.

# What to Do

Follow the steps below to print again.

- 1. Tap Remove paper on the touch screen to stop printing.
- 2. Remove the paper roll, load cut paper of the size and type specified in the printer driver, and then try again.
  - Removing the Roll from the Printer
  - ▶ Loading and Printing on Sheets

#### >>> Note

• To stop printing, tap Cancel on the touch screen or press the Stop button.

# Cause

Failed to recognize print head.

# What to Do

Open the top cover and reattach the print head.

➡ Replacing the Print Head

# Cause

There is a problem with the print head.

Turn off the power, wait a moment, and then turn it back on.

If the error appears again, remove and reattach the print head.

Replacing the Print Head

If that does not get rid of the error, replace the print head with a new one.

### Cause

The print head nozzle is blocked.

# What to Do

Follow the steps below to clean the print head.

- 1. Tap Cancel on the touch screen to stop printing.
- 2. Clean the print head.
  - Cleaning the Print Head

If this message still appears when printing, replace the print head.

Replacing the Print Head

#### >>> Important

• To continue printing, use the touch screen and tap **Continue printing**. However, the print results may not be satisfactory.

# Cause

The ink in the ink tank is running low.

# What to Do

Prepare a new ink tank.

# Cause

A genuine Canon ink tank with a history of past use has been detected.

## What to Do

To dismiss the message, tap  $\mathbf{OK}$  on the touch screen.

# Cause

A genuine Canon ink tank has been inserted.

## What to Do

To dismiss the message, tap  $\mathbf{OK}$  on the touch screen.

### Cause

The ink in the ink tank has run out.

### What to Do

Open the ink tank cover, and then replace the ink tank before the ink in the sub-ink tank of this printer becomes insufficient.

Replacing Ink Tanks

### >>>> Note

• You can replace the ink tank even while printing.

# Cause

Ink tank removed during printing.

## What to Do

If replacing the ink tank, insert a new ink tank.

→ Replacing Ink Tanks

# Cause

Ink tank not inserted.

## What to Do

Insert the ink tank correctly.

→ Replacing Ink Tanks

### 168B

### Cause

The ink tank cannot be recognized.

Printing cannot be executed because the ink tank may not be compatible with this printer.

## What to Do

Install the appropriate ink tank.

### Cause

The maintenance cartridge is full.

It needs to be replaced.

## What to Do

Replace the maintenance cartridge.

→ Replacing the Maintenance Cartridge

# Cause

The maintenance cartridge is not installed.

## What to Do

Install the maintenance cartridge.

➡ Replacing the Maintenance Cartridge

### Cause

Incorrect type of maintenance cartridge.

## What to Do

Insert the correct maintenance cartridge.

➡ Replacing the Maintenance Cartridge

If this error continues to appear, contact a Canon customer service center.

The ink tank may be an ink tank that ran out of genuine Canon ink or a counterfeit Canon ink tank.

### What to Do

To print, you must replace the ink tank or disable the function for detecting the remaining ink level.

Replacing Ink Tanks

To disable the function for detecting the remaining ink level, press and hold the printer's **Stop** button for at least 5 seconds, and then release it.

By this operation, the fact that you have disabled the function for detecting the remaining ink level will be memorized. Please be advised that Canon shall not be liable for any malfunction or trouble caused by continuation of printing under the ink out condition or by using refilled ink tanks.

#### Note

• If the function for detecting the remaining ink level is disabled, the ink tank in gray is displayed on the touch screen when checking the current ink level.

To report the counterfeit ink tank, access Canon website from the following link.

→ Report Counterfeit

Non-genuine Canon ink tank has been detected.

### What to Do

To print, you must replace the ink tank or disable the function for detecting the remaining ink level.

#### Replacing Ink Tanks

To disable the function for detecting the remaining ink level, press and hold the printer's **Stop** button for at least 5 seconds, and then release it.

By this operation, the fact that you have disabled the function for detecting the remaining ink level will be memorized. Please be advised that Canon shall not be liable for any malfunction or trouble caused by using a non-genuine Canon ink tank.

### >>> Note

• If the function for detecting the remaining ink level is disabled, the ink tank in gray is displayed on the touch screen when checking the current ink level.

To report the counterfeit ink tank, access Canon website from the following link.

→ Report Counterfeit

# Cause

The ink has run out.

## What to Do

Open the ink tank cover, and then replace the ink tank.

→ Replacing Ink Tanks

The remaining level of the ink cannot be correctly detected.

### What to Do

Replace the ink tank. Printing will restart.

#### → Replacing Ink Tanks

An ink tank that was once empty is installed.

If you want to continue printing, you need to disable the function for detecting the remaining ink level.

To disable this function, press and hold the printer's **Stop** button for at least 5 seconds, and then release it

With this operation, disabling the function for detecting the remaining ink level is memorized.

Please be advised that Canon shall not be liable for any malfunction or trouble caused by continuation of printing under the ink out condition or by using refilled ink tanks.

## Cause

The ink may become insufficient.

## What to Do

To perform the next process or to continue the specified process, replace the ink tank.

→ Replacing Ink Tanks

### Cause

Cannot fill sub ink tank.

## What to Do

Check the touch screen, remove the ink tank for the affected color, and then reinsert it.

If the inserted ink tank is empty, replace it with a new ink tank.

→ Replacing Ink Tanks

### Cause

An incompatible device is connected.

## What to Do

Check the device connected to the USB flash drive port.

Only USB flash drive can be connected to this device for direct printing.

### Cause

An incompatible USB hub is connected.

## What to Do

If USB flash drive is connected to this device through a USB hub, remove the USB hub.

Connect the USB flash drive directly to this device.

The roll paper width set in the print job is not the same as the width of the roll paper in the printer.

### What to Do

Tap **OK** on the touch screen to go to the next screen.

Check the media type and size that appear and tap **OK**.

#### Stopping printing

Tap **Cancel** on the touch screen or press the **Stop** button.

#### Replacing the roll paper

Follow the steps below to replace the paper with roll paper of the width set in the printer driver.

- 1. Tap Replace the paper and print, then remove the roll paper.
  - Removing the Roll from the Printer
- 2. Replace the paper with paper of the width set in the printer driver.
  - ★ Loading Rolls in the Printer

Printing begins.

#### Printing without changes

Tap Print with the loaded paper..

However, note that this error may cause paper jams and affect the printing quality.

#### Note

- To change print settings in Windows, select **Fit Roll Paper Width** in the printer driver and set the roll paper width in the dialog box that appears.
- To change print settings in macOS, open the printer driver and select **Fit Roll Paper Width**, and then set the roll paper width in that panel to the width of the paper loaded in the printer.
- To suppress this message, set **Detect paper setting mismatch** in the touch screen menu to **Do not detect**. However, note that this error may affect the printing quality.
  - → Menu Structure

The roll paper loaded in the printer is narrower than the roll paper width in the print job.

### What to Do

Tap **OK** on the touch screen to go to the next screen.

Check the media type and size that appear and tap **OK**.

#### Stopping printing

Tap Cancel on the touch screen or press the Stop button.

#### · Replacing the roll paper

Follow the steps below to replace the paper with roll paper of the width specified in the print job paper size settings.

- 1. Tap Replace the paper and print, then remove the roll paper.
  - Removing the Roll from the Printer
- 2. Replace the paper with paper of the width set in the printer driver.
  - → Loading Rolls in the Printer

Printing begins.

#### · Printing without changes

Tap Print with the loaded paper..

However, note that this error may cause paper jams and affect the printing quality.

#### Note

- To change print settings in Windows, select **Fit Roll Paper Width** in the printer driver and set the roll paper width in the dialog box that appears.
- To change print settings in macOS, open the printer driver and select **Fit Roll Paper Width**, and then set the roll paper width in that panel to the width of the paper loaded in the printer.
- To suppress this message, set **Detect paper setting mismatch** in the touch screen menu to **Do not detect**. However, note that this error may affect the printing quality.
  - → Menu Structure

Cannot print internal printer data, such as test prints, for the following reasons.

- The paper roll loaded in the printer is too small.
- The cut paper loaded in the printer is the wrong size or type.

### What to Do

#### Roll

Tap **Replace the paper and print** on the touch screen, or tip back the release lever and replace the paper with paper of the correct size.

▶ Loading Rolls in the Printer

To stop printing, tap **Cancel** or press the **Stop** button.

#### Sheet

Tip back the release lever, remove any paper, and then load paper of the same size and type as the first page.

▶ Loading Sheets in the Printer

To stop printing, press the **Stop** button.

### Cause

The print head has not been calibrated.

## What to Do

Print Head Alignment is recommended.

➡ Adjusting the Print Head

### >>> Note

• This message will appear until Print Head Alignment is carried out.

# Cause

The print head nozzle is becoming blocked.

## What to Do

Check the printed materials.

If the printed materials are scratched, clean the print head.

★ Cleaning the Print Head

### Cause

It is almost time to replace consumables for which service is required.

## What to Do

This can used for a little while, until the message "A part needs to be replaced." appears.

Contact your Canon dealer for assistance.

## Cause

It is past the recommended time to replace consumables for which service is required.

## What to Do

Contact your Canon dealer for assistance.

### Cause

The maintenance cartridge is almost full.

## What to Do

Prepare a new maintenance cartridge because an error may occur if you continue to use the printer while the maintenance cartridge is full.

➡ Replacing the Maintenance Cartridge

### Cause

Media information cannot be recognized because the printer media information is corrupt.

### What to Do

Start the Media Configuration Tool, and then recover the media information.

Media Configuration Tool Guide

To set the Media Configuration Tool to recovery mode, open the Media Configuration Tool, select this device and then click **OK**.

Select and load the media information backup file.

If you do not have a media information backup file, contact a Canon customer service center.

### Cause

Incorrect print data.

Illegal number of parameters.

## What to Do

Defective print data, please check the print results.

### Cause

Incorrect print data.

Required items have been omitted.

## What to Do

Defective print data, please check the print results.

### Cause

Incorrect print data.

Data out of range.

## What to Do

Defective print data, please check the print results.

### Cause

Incorrect print data.

Resolution value out of range.

## What to Do

Defective print data, please check the print results.

### Cause

Incorrect print data.

Compression method value out of range.

## What to Do

Defective print data, please check the print results.

### Cause

Incorrect print data.

Incorrect data formatting (color sequence, bit count).

## What to Do

Defective print data, please check the print results.

### Cause

Incorrect print data.

Illegal combination of resolution and image data format.

## What to Do

Defective print data, please check the print results.

# Cause

Print results may be abnormal as there is a large volume of print data.

# What to Do

Check the print job.

Unsupported JPEG data format.

### What to Do

Check the JPEG data.

Printable file formats are as follows.

#### • Files which conforms to JFIF 1.02

Processing method: Basic DCT

· Color mode: RGB/GrayScale

• Number of colors: 24bit/8bit

Number of pixels: 38400 or less vertically and horizontally

\* Does not support some samplings.

Unsupported JPEG data format.

### What to Do

Check the JPEG data.

Printable file formats are as follows.

#### • Files which conforms to JFIF 1.02

Processing method: Basic DCT

· Color mode: RGB/GrayScale

• Number of colors: 24bit/8bit

Number of pixels: 38400 or less vertically and horizontally

\* Does not support some samplings.

## Cause

Too many fonts are used in the PDF file, causing a memory shortage.

Printing will continue but some incorrect characters will be printed.

# What to Do

Print the PDF file from a computer or convert the PDF file to JPEG and then print it.

# Cause

Resolution of JPEG data and printer settings are mismatched.

# What to Do

Check the print results.

When the print results have problems, print using a printer driver.

## Cause

Print data including the image processing table was sent.

# What to Do

Print data that includes the image processing table cannot be printed.

If using printing software such as RIP (Raster Image Processor), contact the software manufacturer.

# Cause

Incorrect resolution value.

# What to Do

Check the print settings.

If using printing software such as RIP (Raster Image Processor), contact the software manufacturer.

## Cause

Free space on the personal box on the printer hard disk is running low.

# What to Do

Delete unneeded jobs stored in personal boxes.

▶ Deleting Saved Jobs

# Cause

100 jobs are stored in the personal box.

# What to Do

Delete any unneeded jobs saved in the personal box.

▶ Deleting Saved Jobs

## Cause

The printer hard disk is full, so the job will only be printed.

(The print job will not be saved to the hard disk.)

# What to Do

To save the print job, delete any unneeded jobs saved in the personal box.

→ Deleting Saved Jobs

### Cause

Communication with mail server failed.

## What to Do

Tap **OK** on the touch screen to dismiss the error.

Check that the address and port numbers of the sending mail server (SMTP server) are correct in the Remote UI mail server settings.

#### → Setting Mail Server

If this does not resolve the error, check the status of the mail server.

### Cause

Communication with mail server failed.

## What to Do

Tap **OK** on the touch screen to dismiss the error.

Check that the address and port numbers of the receiving mail server (POP3 server) are correct in the Remote UI mail server settings.

### → Setting Mail Server

If this does not resolve the error, check the status of the mail server.

### Cause

Communication with mail server failed.

# What to Do

Tap **OK** on the touch screen to dismiss the error.

Check that the mail server and device secure connection (SSL) settings match.

Check the secure connection (SSL) settings in Remote UI.

→ Setting Mail Server

Contact the mail server administrator to configure a secure connection (SSL) to the mail server.

Communication with mail server failed.

# What to Do

Tap **OK** on the touch screen to dismiss the error.

Check that the mail server and device secure connection (SSL) settings match.

Check the secure connection (SSL) settings in Remote UI.

→ Setting Mail Server

Contact the mail server administrator to configure a secure connection (SSL) to the mail server.

### Cause

Communication with mail server failed.

## What to Do

Tap **OK** on the touch screen to dismiss the error.

Check that the sending mail server (SMTP server) is correctly configured in the Remote UI mail server settings.

#### → Setting Mail Server

If this does not resolve the error, check the status of the mail server.

### Cause

Communication with mail server failed.

## What to Do

Tap **OK** on the touch screen to dismiss the error.

Check that the sending account and password are correctly configured in the Remote UI mail server settings.

#### → Setting Mail Server

If this does not resolve the error, check the status of the mail server.

### Cause

Communication with mail server failed.

## What to Do

Tap **OK** on the touch screen to dismiss the error.

Check that the receiving mail server (POP3 server) is correctly configured in the Remote UI mail server settings.

#### → Setting Mail Server

If this does not resolve the error, check the status of the mail server.

Communication with mail server failed.

## What to Do

Tap **OK** on the touch screen to dismiss the error.

Check that the receiving account and password are correctly configured in the Remote UI mail server settings.

#### → Setting Mail Server

If this does not resolve the error, check the status of the mail server.

Communication with mail server failed.

# What to Do

Tap **OK** on the touch screen to dismiss the error.

Check that the settings on the mail server and the APOP settings on this device match.

Check this device's APOP settings in Remote UI.

→ Setting Mail Server

Contact the mail server administrator for configuring APOP on the mail server.

Communication with mail server failed.

## What to Do

Tap **OK** on the touch screen to dismiss the error.

Check if the Remote UI mail server settings are correct.

→ Setting Mail Server

If this does not resolve the error, check the status of the mail server.

# Cause

Sending mail failed.

# What to Do

Tap  $\mathbf{OK}$  on the touch screen to dismiss the error.

Specify the correct destination mail address and try again.

### Cause

IP address is conflicting.

# What to Do

Tap  $\mathbf{OK}$  on the touch screen to dismiss the error.

Check the network configuration and change the network configuration to prevent a conflict with other network devices.

For details on changing the network configuration, refer to the documentation for your network device.

## Cause

Failed to communicate with the monitoring service center.

# What to Do

Check the network connection and perform a communication test.

For details on changing the network configuration, refer to the documentation for your network device.

# Cause

The media type specified is incompatible with this device.

# What to Do

Press the **Stop** button to stop printing.

Check the media type settings, and then try again.

Cannot print borderless for the following reasons.

- Printer driver is not set to Fit Roll Paper Width.
- Roll paper is not wide enough, or the paper is out of position.

### What to Do

· Stopping printing

Tap Cancel on the touch screen.

· Replacing paper

Follow the steps below to replace the printer paper with paper that can be printed borderless.

- 1. Tap **Replace the paper and print** on the touch screen, then remove the roll paper.
  - Removing the Roll from the Printer
- 2. Replace the printer paper with paper that can be printed borderless.
  - ▶ Loading Rolls in the Printer
- · Printing with the loaded paper

Tap Print with the loaded paper. on the touch screen.

Paper is printed borderless with the document width set slightly smaller than the paper.

The paper position is not suitable for borderless printing.

# What to Do

Tap  $\mathbf{OK}$  on the touch screen, then reload the paper.

Insert the roll paper firmly until it is against the roll holder flange.

The paper is loaded askew.

### What to Do

#### · Reloading paper

Tap Replace the paper and print on the touch screen, and then load the paper.

▶ Loading Rolls in the Printer

Insert the roll paper firmly until it is against the roll holder flange.

- ▶ Loading Rolls on the Roll Holder
- · Printing with the loaded paper

Tap Print with the loaded paper. on the touch screen.

Paper is printed borderless with the document width set slightly smaller than the paper.

Stopping printing

Tap Cancel on the touch screen to stop printing.

#### >>> Note

 To force the printer to print, set Detect paper setting mismatch in the touch screen menu to Do not detect.

However, note that this error may affect the printing quality.

The print job received contains settings not compatible with borderless printing.

### What to Do

· Changing the print job settings

Follow these steps to change the settings of the print job to enable borderless printing.

- 1. Tap Cancel on the touch screen to stop printing.
- 2. Check that the paper source is set to Roll Paper in your application.
- 3. Check that banner printing is not set, and then try again.

See the media information list for media types compatible with borderless printing.

- → Paper Information List
- · Printing with a border

Tap Print with border on the touch screen.

Printing with a border is now enabled.

#### Note

• To force the printer to print, set **Detect paper setting mismatch** in the touch screen menu to **Do not** detect.

However, note that this error may affect the printing quality.

### Cause

The media type in the printer cannot be printed borderless.

## What to Do

Tap Cancel on the touch screen to stop printing.

### >>>> Note

- See the media information list for media types compatible with borderless printing.
  - ➡ Paper Information List

### Cause

A printer error has occurred.

### What to Do

Turn off the power, wait a moment, and then turn it back on.

If the error appears again, make a note of the detailed error code (ECxx-xxxx) that appears on the touch screen, and then turn off the power and contact a Canon customer service center.

### **Detailed error codes**

EC51-3304 EC51-3306 EC51-3307 EC51-3308 EC51-3309 EC51-330A

The width of the roll paper set in **Fit Roll Paper Width** in the printer driver is not the same as the width of the roll paper loaded in the printer.

### What to Do

Tap **OK** on the touch screen to go to the next screen.

Check the media type and size that appear and tap **OK**.

#### Stopping printing

Tap Cancel on the touch screen or press the Stop button.

#### · Replacing the roll paper

Follow the steps below to replace the paper with roll paper of the width set in the printer driver.

- 1. Tap Replace the paper and print, then remove the roll paper.
  - Removing the Roll from the Printer
- 2. Replace the paper with paper of the width set in the printer driver.
  - → Loading Rolls in the Printer

Printing begins.

#### · Printing without changes

Tap Print with the loaded paper..

However, note that this error may cause paper jams and affect the printing quality.

#### Note

- To change print settings in Windows, select **Fit Roll Paper Width** in the printer driver and set the roll paper width in the dialog box that appears.
- To change print settings in macOS, open the printer driver and select **Fit Roll Paper Width**, and then set the roll paper width in that panel to the width of the paper loaded in the printer.

The media type specified in the printer driver is not the same as the media type loaded in the printer.

### What to Do

Tap **OK** on the touch screen to go to the next screen.

Check the media type and size that appear and tap **OK**.

#### · Changing the printer driver print settings

Follow the steps below to match the media type in the printer driver and the media type specified for the printer.

- 1. Tap Cancel on the touch screen to stop printing.
- 2. Change the media type in the printer driver settings to the media type loaded in the printer, and then try again.

#### · Replacing paper

Follow the steps below to match the media type in the printer driver and the media type specified for the printer.

- 1. Tap **Replace the paper and print** on the touch screen to stop printing.
- 2. Load the paper with the media type set in the printer driver, and then try again.
  - ★ Loading and Printing on Rolls
  - ▶ Loading and Printing on Sheets

#### Printing without changes

To continue printing, tap Print with the loaded paper. on the touch screen.

However, note that this error may cause paper jams and affect the printing quality.

Cannot print borderless for one of the following reasons.

- The paper size in the printer cannot be printed borderless.
- · The paper is loaded askew.

### What to Do

#### · Replacing paper

Follow the steps below to replace the printer paper with paper that can be printed borderless.

- 1. Tap Replace the paper and print on the touch screen, then remove the roll paper.
  - Removing the Roll from the Printer
- 2. Replace the printer paper with paper that can be printed borderless.
  - ▶ Loading Rolls in the Printer

Printing begins.

#### >>> Note

See the media information list for media types compatible with borderless printing.

➡ Paper Information List

#### · Reloading paper

Tap Replace the paper and print on the touch screen, and then load the paper.

★ Loading Rolls in the Printer

Insert the roll paper firmly until it is against the roll holder flange.

- ▶ Loading Rolls on the Roll Holder
- · Printing with the loaded paper

Tap Print with the loaded paper. on the touch screen.

Paper is printed borderless with the document width set slightly smaller than the paper.

#### · Stopping printing

Tap Cancel on the touch screen to stop printing.

Cannot cut paper for one of the following reasons.

- · Paper that has been cut remains on the output guide.
- There is a foreign object near the output slot that is obstructing the cutter blade.
- The paper is not being used under the recommended usage conditions.
- The paper in use cannot be used with Automatic cut.

#### What to Do

· Paper that has been cut remains on the output guide

Follow the steps below to resume printing.

- 1. Tip back the release lever and remove the paper.
- 2. Load the paper.
- 3. If "There is a job which has not been printed yet. Do you want to print this job?" appears on the touch screen, tap Yes.

Printing will resume, starting from the page on which the error occurred.

- Removing the Roll from the Printer
- A foreign object near the output slot is obstructing the cutter blade

Follow the steps below to resume printing.

- 1. Open the top cover and remove any foreign objects.
- 2. If "There is a job which has not been printed yet. Do you want to print this job?" appears on the touch screen, tap Yes.

Printing will resume, starting from the page on which the error occurred.

· Paper not being used under the recommended usage conditions

Every paper type has different recommended conditions of use. Use all paper under its recommended usage conditions.

See the media information list for recommended usage conditions.

Paper Information List

· The paper in use cannot be used with Automatic cut

Set the roll paper cutting method to **User cut** and cut the roll paper with a cutting implement such as scissors.

➡ Specifying the Cutting Method for Rolls

See the media information list for paper types that can be used with Automatic cut.

Paper Information List

If this does not apply, there may be a cutter blade malfunction.

Contact your Canon dealer for assistance.

Paper feed adjustment may have failed for the following reasons.

- The paper for printing a test pattern is soiled. Otherwise, you have loaded colored paper.
- The printer may be exposed to strong light, such as direct sunlight, which can cause the sensors to malfunction.
- · The test pattern was printed too faintly.

#### What to Do

Tap **OK** on the touch screen to dismiss the error, and then take the following actions.

- · Load unused paper.
- Make adjustments to ensure that the printer is not exposed to strong light.
- Print a nozzle check pattern to check the print head status.

If the pattern has gaps or horizontal white lines, the print head nozzle is blocked. Clean the print head.

➡ Checking for Nozzle Clogging

The print head cannot be calibrated because the printer is loaded with very transparent film-type paper.

# What to Do

Tap **OK** on the touch screen to dismiss the error.

We recommend calibrating the print head with a frequently used, non-film paper.

➡ Automatic Adjustment to Straighten Lines and Colors

The print head nozzle may be blocked.

## What to Do

Follow the steps below to repeat **Print Head Alignment**.

- 1. Tap **OK** on the touch screen to dismiss the error.
- 2. Print a test pattern to check the nozzles.
  - ➡ Checking for Nozzle Clogging
- 3. If the nozzle is blocked, clean the print head.
  - Cleaning the Print Head
- 4. Repeat Print Head Alignment.
  - → Automatic Adjustment to Straighten Lines and Colors

The print head nozzle may be blocked.

## What to Do

Follow the steps below to repeat **Print Head Alignment**.

- 1. Tap **OK** on the touch screen to dismiss the error.
- 2. Print a test pattern to check the nozzles.
  - ➡ Checking for Nozzle Clogging
- 3. If the nozzle is blocked, clean the print head.
  - Cleaning the Print Head
- 4. Repeat Print Head Alignment.
  - → Automatic Adjustment to Straighten Lines and Colors

The print head nozzle may be blocked.

## What to Do

Follow the steps below to repeat **Print Head Alignment**.

- 1. Tap **OK** on the touch screen to dismiss the error.
- 2. Print a test pattern to check the nozzles.
  - ➡ Checking for Nozzle Clogging
- 3. If the nozzle is blocked, clean the print head.
  - Cleaning the Print Head
- 4. Repeat Print Head Alignment.
  - → Automatic Adjustment to Straighten Lines and Colors

Print head position adjustment failed.

#### What to Do

Follow the steps below to repeat **Print Head Alignment**.

- 1. Tap **OK** on the touch screen to dismiss the error.
- 2. Print a test pattern to check the nozzles.
  - ➡ Checking for Nozzle Clogging
- 3. If the nozzle is blocked, clean the print head.
  - Cleaning the Print Head
- 4. Retry Print Head Alignment.
  - ➡ Automatic Adjustment to Straighten Lines and Colors

If any print head nozzles are still blocked, replace the print head.

Replacing the Print Head

If the error appears again, the printer may be damaged. Contact a Canon customer service center.

# Cause

WPS (Push button method) connection failed.

# What to Do

Follow the instructions on the touch screen to try connecting to the wireless router again.

# Cause

AOSS (BUFFALO) connection failed.

# What to Do

Follow the instructions on the touch screen to try connecting to the wireless router again.
