

EOS Utility

Ver. 2.7

Instruction Manual

● Content of this Instruction Manual

- EU is used for EOS Utility.
- Camera model is displayed as an icon.
Example: EOS-1D Mark III →
- displays the relevant camera model.
- In this manual, the windows used in the examples are from Mac OS X 10.4.
- The selection sequence of menus is displayed in ► procedures.
(Example: Select the [Window] menu ► [Main Window].)
- Square brackets are used to indicate items such as menu names, button names and window names that appear on the computer screen.
- Text inside < > indicates a camera switch name or icon, or a keyboard key name.
- ** indicates a reference page.
Click to move to the relevant page.
- : Marks information that should be read before use.
- : Marks additional information you may find helpful.

● Switching Between Pages

- Click on arrows on the bottom right of the screen.
 - : next page
 - : previous page
 - : return to a page you had previously displayed
- Click on the chapter headings on the right side of the screen to switch to the contents page of that chapter. Also, click the item you want to read about on the table of contents to move to the relevant page.

READ CAREFULLY BEFORE USING!

CANON SOFTWARE LICENSE AGREEMENT

IMPORTANT - READ THIS AGREEMENT BEFORE USING THE SOFTWARE ON THE CD-ROM IN THIS BOX. BY USING THE SOFTWARE, YOU AGREE TO BE BOUND BY THE TERMS OF THIS AGREEMENT.

This is a license agreement (the [Agreement]) between you and Canon Inc. ([Canon]).

IF YOU DO NOT AGREE TO THE TERMS AND CONDITIONS OF THIS AGREEMENT, DO NOT USE THE SOFTWARE PROGRAM ON THE CD-ROM AND THE USER MANUAL IN THIS BOX (COLLECTIVELY, THE [SOFTWARE]) AND RETURN THE SOFTWARE WITHIN 30 DAYS FROM THE DATE OF PURCHASE TO YOUR POINT OF PURCHASE FOR A REFUND.

In consideration of the right to use the SOFTWARE, you agree to abide by the terms and conditions of this Agreement.

1. **LICENSE:** Canon grants you the non-exclusive right to use the SOFTWARE only on a single computer. You may physically transfer the SOFTWARE from one computer to another provided that the SOFTWARE is used on only one computer at a time. You shall not install or use the SOFTWARE on a network, multiple CPU, multiple site arrangement, or any other hardware configuration where the SOFTWARE is accessible to more than one CPU or to more than one user.

YOU SHALL NOT ASSIGN, SUBLICENSE, RENT, LEASE, LOAN, CONVEY OR OTHERWISE USE, TRANSFER, COPY, TRANSLATE, CONVERT TO ANOTHER PROGRAMMING LANGUAGE, ALTER, MODIFY, DECOMPILE OR DISASSEMBLE THE SOFTWARE, IN WHOLE OR IN PART, EXCEPT AS EXPRESSLY PROVIDED IN THIS AGREEMENT.

2. **BACK-UP COPY:** You may make one copy of the SOFTWARE solely for back-up purposes, or copy the SOFTWARE onto the permanent storage device (e.g. a hard disk) of your computer and retain the original for back-up purposes. Any other copying of the SOFTWARE is a violation of this Agreement. You must reproduce and include the copyright notice on the back-up copy.

3. **SUPPORT AND UPDATES:** Canon is not responsible for providing maintenance or support for use of the SOFTWARE. No updates, fixes or support will be made available for the SOFTWARE.

4. **LIMITED WARRANTY AND LIMITATION OF LIABILITY:** It is your responsibility to choose, maintain and match the hardware and software components of your computer system. Thus Canon does not guarantee uninterrupted service or correction of errors or that the functions or performance of the SOFTWARE will meet your requirements. THE SOFTWARE IS LICENSED ON AN [AS IS] BASIS AND WITHOUT WARRANTY OF ANY KIND. The CD-ROM storing the SOFTWARE is warranted only against defective material under normal use for a period of ninety (90) days after purchase from an authorized Canon dealer as evidenced by your sales receipt. Your sole remedy for a defective CD-ROM shall be replacement of the same without charge when returned by you at your expense to your point of purchase and proven to be defective upon inspection. The replacement CD-ROM will be warranted for the remainder of the original ninety (90) day warranty period of the defective CD-ROM. The limited warranty does not apply if the failure of the CD-ROM resulted from accident, abuse or misapplication of the SOFTWARE and shall not extend to anyone other than the original user of the SOFTWARE.

EXCEPT AS SPECIFICALLY SET FORTH IN THIS PARAGRAPH 4, CANON, CANON'S SUBSIDIARIES, DISTRIBUTORS AND DEALERS DISCLAIM ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO THE SOFTWARE.

NEITHER CANON NOR ANY OF CANON'S SUBSIDIARIES, DISTRIBUTORS OR DEALERS IS LIABLE FOR ANY DAMAGES HOWSOEVER CAUSED, INCLUDING WITHOUT LIMITATION, DIRECT, CONSEQUENTIAL OR INCIDENTAL LOSS OR DAMAGE INCLUDING LOSS OF

PROFITS, EXPENSE OR INCONVENIENCE HOWSOEVER CAUSED OR ARISING OUT OF THE SOFTWARE OR THE USE THEREOF.

NEITHER CANON, NOR ANY OF CANON'S SUBSIDIARIES, DISTRIBUTORS OR DEALERS SHALL HAVE ANY OBLIGATION TO INDEMNIFY YOU AGAINST ANY CLAIM OR SUIT BROUGHT BY A THIRD PARTY ALLEGING THAT THE SOFTWARE OR THE USE THEREOF INFRINGES ANY INTELLECTUAL PROPERTY OF SUCH THIRD PARTY.

5. **TERM:** This Agreement is effective upon your using the SOFTWARE and remains in effect until expiration of all copyright interests in the SOFTWARE unless earlier terminated. You may terminate this Agreement by destroying the SOFTWARE. This Agreement will also terminate without notice to you if you fail to comply with any of the terms of this Agreement and you must then promptly return the SOFTWARE. In addition, Canon may enforce its other legal rights.

6. **U.S. GOVERNMENT RESTRICTED RIGHTS NOTICE:** The SOFTWARE is provided with restricted rights. Use, duplication or disclosure is subject to restrictions as set forth in either subparagraph (c) (1) (ii) of the Rights in Technical Data and Computer software clause at DFARs 252.227-7013 or subparagraph (c) (1) and (2) of the Commercial Computer Software Restricted Rights Clause at FAR 52.227-19, as applicable.

7. **SEVERABILITY:** In the event that any provision of this Agreement is declared or found to be illegal by any court or tribunal of competent jurisdiction, such provision shall be null and void with respect to the jurisdiction of that court or tribunal and all the remaining provisions of this Agreement shall remain in full force and effect.

8. **CONTROLLING LAW:** The terms of this Agreement as it relates to purchases of the Software in the United States of America shall be governed and construed in all respects in accordance with the laws and regulations of the State of New York, without reference to choice of law principles. The terms of this Agreement as it relates to purchases of the Software in Canada shall be governed by the laws of the province of Ontario.

9. **OWNERSHIP:** All rights, including but not limited to copyrights and trade secret rights, to the SOFTWARE belong to Canon, its affiliated corporations and third party licensors. Your use of the SOFTWARE is subject to the United States, Canada and other applicable copyright and trademark laws and nothing in this Agreement constitutes a waiver of the rights of Canon, its affiliated corporations and third party licensors under such laws. Nothing contained in Paragraph 1 shall be construed to give Canon any ownership rights in any images, graphics or textual material that you save in connection with the Software.

10. **ACKNOWLEDGEMENT:** BY USING THE SOFTWARE, YOU ACKNOWLEDGE THAT YOU HAVE READ THIS AGREEMENT, UNDERSTOOD IT, AND AGREE TO BE BOUND BY ITS TERMS AND CONDITIONS. YOU ALSO AGREE THAT THIS AGREEMENT IS THE COMPLETE AND EXCLUSIVE STATEMENT OF AGREEMENT BETWEEN YOU AND CANON CONCERNING THE SUBJECT MATTER HEREOF AND SUPERSEDES ALL PROPOSALS OR PRIOR AGREEMENTS, VERBAL OR WRITTEN, AND ANY OTHER COMMUNICATIONS BETWEEN THE PARTIES RELATING TO THE SUBJECT MATTER HEREOF. NO AMENDMENT TO THIS AGREEMENT SHALL BE EFFECTIVE UNLESS SIGNED BY A DULY AUTHORIZED OFFICER OF CANON.

EOS Utility (hereinafter EU) is software for communication with your EOS DIGITAL camera. By connecting the camera and computer with the cable provided with the camera, you can download to your computer images saved in the camera's memory card as well as set various camera settings or shoot remotely from EU on your computer.

Main Features of EU

From EU, you can control the camera remotely and perform the following main features.

- **Batch download to your computer images saved in the camera's memory card.**
 - You can also download to your computer only images you have selected.
- **Set various camera settings from your computer.**
- **Shoot remotely by controlling the camera from your computer.**
 - Remote Live View shooting – Shoot while checking your subject in real time on your computer.
 - You can also shoot remotely by operating the camera's shutter button.
 - Preset a time allowing the camera to shoot automatically with timer shooting.
- **When downloading images or shooting remotely, view/check images with the linked Digital Photo Professional.**

System Requirements

OS	Mac OS X 10.4 to 10.5
Computer	Macintosh with one of the above OS installed and a USB port as a standard feature
CPU	PowerPC G4, G5, Intel processor
RAM	Minimum 1GB
Interface	Hi-Speed USB
Display	Resolution: 1024 x 768 or more Colors: Thousands or more

- When using EU on an Intel-based Macintosh running Mac OS X 10.4, be sure your Mac OS is updated to version 10.4.7 or later.
- Users of Mac OS 10.5.6 should update to Mac OS 10.5.7.

Supported Camera

Can be used for RAW images, JPEG images or MOV movies shot with the cameras below.

EOS-1Ds Mark III	EOS-1D Mark III
EOS 5D Mark II	EOS 7D
EOS 50D	EOS 40D
EOS REBEL T1i/500D	EOS DIGITAL REBEL XSi/450D
EOS DIGITAL REBEL XS/1000D	—

Connecting the Camera and Computer

To download to your computer images shot with your camera, you will need to connect your camera and computer using the interface cable provided with your camera.

1 Connect the large plug of the cable into the USB port of your computer.

- For the location and direction of the USB port, refer to the computer User's Manual.

2 Connect the small plug of the cable into the < USB > terminal (7D < AV OUT / DIGITAL > terminal) on your camera.

- Connect the plug with the < USB > mark facing the front of the camera.
- Image downloading preparation is now complete. Continue with "Starting up EU".
- With 1Ds Mk III, 1D Mk III, you can fix the plug to the camera with the cable protector to prevent the plug from disconnecting. For details on using, refer to p.57.

Starting up EU

When the camera's power switch is set to < ON >, EU will start up, and the camera and computer will be able to communicate.

Set the camera's power switch to < ON >.

EU Main window

→ EU starts up, the main window appears, and your camera and computer can now communicate. Continue with "Batch Downloading Images to Your Computer".

- The camera's LCD monitor turns on when EU starts up.
- For cameras other than 7D, you can operate the camera and download images saved on the memory card inserted in the camera to your computer. Refer to your camera's Instruction Manual for details.
- REBEL1i, 500D cannot communicate with EU if the camera's mode dial is set to < P >. Set the mode dial to a mode other than < P >.

Batch Downloading Images to Your Computer

You can batch download to your computer all the images saved on the memory card inserted in the camera that you have not already downloaded.

The downloaded images are sorted by date into folders and are then displayed in the main window of Digital Photo Professional (RAW image processing, viewing and editing software) (hereinafter DPP), which is linked to start up automatically, where you can check them immediately.

1 Click [Starts to download images].

Save File dialog box

- The [Save File] dialog box appears and image downloading to your computer begins.
- The downloaded images are saved in the [Pictures] folder.
- When all images have been downloaded, DPP starts up automatically and the downloaded images are displayed in DPP's main window.

2 Check the downloaded images.

DPP Main window

- Check the downloaded images in DPP. For details on using DPP, refer to the “Digital Photo Professional Instruction Manual” (PDF electronic manual).
- Continue with “Quitting EU” (p.9).

- When you download images, you can change the software that starts up from DPP to ImageBrowser or another software (p.50).
- You can change images downloaded and the save destination (p.49, p.50).
- Downloading movie files may take some time due to the large file size.

Downloading Selected Images to Your Computer

From the images saved in your camera's memory card, you can select the ones you want and download them to your computer.

1 Click [Lets you select and download images].

→ A viewer window appears and the images in the memory card are displayed.

2 View the images and checkmark images to download. Viewer window

Add check mark

3 Click the [Download] button.

→ The [Download image] dialog box appears.

4 Specify the save destination and then click the [OK] button.

Displays the save destination on the computer

Download image dialog box

Specify the save destination

→ The [Save File] dialog box appears and image downloading to your computer begins.

→ The images downloaded to your computer are displayed in the [Quick Preview] window.

- The [Quick Preview] window allows you to quickly review the downloaded images. You can also resize the [Quick Preview] window.
- When all images have been downloaded, DPP starts up automatically and the downloaded images are displayed.
- To switch to the main window, click the [Main Window] button in the viewer window.

- In step 2, you can batch checkmark several images in sequence. After clicking the first image you want to download, hold the < shift > key and click the last image, and [checkbox icon] [checkbox icon] will be displayed. By clicking the [checkbox icon] button, the selected images will be checkmarked in a batch.
- For a list of viewer window functions, refer to [p.59](#).

Downloading Images with a Card Reader

For users with a third-party card reader, you can also download to your computer images stored in a memory card using the card reader. However, EU does not support image downloading using a card reader. For this reason, when downloading images using a card reader, use one of the following 3 procedures.

Downloading Images Using Digital Photo Professional

You can use DPP to download to your computer shot images from a memory card inserted in a third-party card reader connected to your computer.

For detailed instructions, refer to “Downloading Images Using Your Card Reader” in the “Digital Photo Professional Instruction Manual” (PDF electronic manual).

Downloading Images Using ImageBrowser

You can use ImageBrowser to download to your computer shot images from a memory card inserted in a third-party card reader connected to your computer.

For detailed instructions, refer to “Downloading Images Using Your Card Reader” in the “ImageBrowser Instruction Manual” (PDF electronic manual).

Downloading Images without Using Canon Software

To download images with a card reader without using Canon software such as DPP or ImageBrowser, copy to your computer the [DCIM] folder in the memory card.

For more details about folder structures and files in the memory card, refer to [p.56](#).

Quitting EU

1 Click the [Quit] button.

→ The window closes and EU quits.

2 Turn the camera's power switch to < OFF >.

3 Disconnect the cable from the camera and computer.

● Do not pull on the cable; hold the plug and pull out.

5 Click the [OK] button.

→ The Picture Style file is registered in the camera.

Registering Personal White Balance in the Camera

White balance files created by adjusting the white balance of a RAW image and saving the results can be registered in the camera as personal white balances.

To adjust the white balance and save the results, start up RAW Image Task from ImageBrowser.

For more information on RAW Image Task, refer to the “ImageBrowser Instruction Manual” (PDF electronic manual).

1 Click [Personal WB].

→ The [Personal white balance settings] dialog box appears.

2 Select the personal white balance to be registered and click the [Open] button.

→ The file selection window appears.

- A Picture Style file is an extended function of Picture Style. For more details on Picture Style files, refer to the Canon’s website.
- The Picture Style files that you can apply to the camera are files with the “.PF2” extension only.
- For details on using PSE, refer to the “Picture Style Editor Instruction Manual” (PDF electronic manual).

3 Open the folder containing the saved white balance file, select the file and then click the [Open] button.

- The white balance file is loaded.
- The white balance files that you can register to the camera are files with the “.WBD” extension.

4 Enter a title into the [Title] input field.

- You cannot enter the title on **40D**.

5 Click the [Apply to camera] button.

- The personal white balance is registered on the camera.
- This is registered as manual white balance on **40D**.
- To register another setting, repeat step 2 to step 5.

6 Click the [Close] button.

- The [Personal white balance settings] dialog box closes and the display returns to the [Shooting menu].

7 Select a registered personal white balance on the camera.

- Select a registered personal white balance (**1Ds Mk III** **1D Mk III**) or manual white balance (**40D**) as the white balance.
- For selecting personal white balance or manual white balance, refer to “Selecting the White Balance” (**1Ds Mk III** **1D Mk III**) or “Setting the White Balance” (**40D**) in the camera’s Instruction Manual provided with your camera.

Setting JPEG Quality and Applying to the Camera

You can set the JPEG image quality and apply it to the camera, in the same way as operating from the camera.

1 Click [JPEG quality].

- The [JPEG Quality] window appears.

2 Click the setting position.

- The settings are applied to the camera.
- Higher values give a lower compression ratio and higher image quality for any size.

3 Click [Return].

- The display returns to the [Shooting menu].

Remote Live View Shooting

You can control your camera remotely from EU and shoot still images from your computer screen.

Also, the shot image is saved directly on your computer and you can recheck it using the linked software Digital Photo Professional (hereinafter DPP).

This function is effective for shooting large numbers of shots with fixed-framing such as for studio shooting.

1 Connect your camera and computer, and then turn the camera's power switch to < ON >.

→ EU starts up.

- REBELT1i 500D cannot communicate with EU if the camera's mode dial is set to < P/A >. Set the mode dial to a mode other than < P/A >.

2 Click [Camera settings/Remote shooting].

→ The capture window appears.

3 Set the camera and click the [Tf] button.

Drive mode setting: Click ▼ while holding down the <control> key under the setting item and select settings from the menu*1 that appears 5D Mk II 7D 50D REBELT1i 500D

Mirror lockup menu display and setting: Click ▼ while holding down the <control> key under the setting item and select settings from the menu*1 that appears 7D

Double-click the setting item and select the setting

Click

- Mirror lockup settings are available when the camera mode is P, Tv, Av, M or B.
- During mirror lockup, the mirror lockup icon blinks.

- You can also use the functions of the [Shooting menu] (p.13).
 - The settings that cannot be set in the capture window can be set by operating the camera.
- The [Set-up menu] appears.

You can also shoot using the <space> bar on the keyboard.

- You cannot operate the camera when the [Remote Live View window] is displayed. Pressing the camera's < SET > button (Live View shooting button on **5D Mk II** **7D** **50D** **REBELT1i** **500D**) will also display the Live View image on the camera's LCD monitor, allowing you to view the image while controlling the camera.
- On **5D Mk II** **7D** **50D** **REBELT1i** **500D** , when the cursor is on the capture window's  button, the shooting mode will not change even if you operate the camera's Mode dial.
- You can shoot by operating the capture window, even if the [Remote Live View window] is not displayed.
- To perform exposure simulation (p.32) with [Remote Live View window] or enable display of histograms (p.65), set your camera's Custom Function [Live View exposure simulation] to [Enable]. On **5D Mk II** **7D** **50D** , set [Exposure simulation] in the menu to [Enable].
- On **5D Mk II** **7D** **50D** , you can also use mirror lockup with remote shooting. (You cannot take test shots after setting mirror lockup.)
- With **1Ds Mk III** **1D Mk III** , mirror lockup and silent single shooting cannot be performed in remote shooting.
- The [Test Shooting] window appears when you click the [Test shooting] button.
During flash shooting, you can take a test shot under the same conditions as an actual shot, and adjust the white balance based on the shot test image (p.33).
- You can save shot images to both your computer and a memory card (p.50).
- You can change the software that starts up automatically when remotely shot images are transferred to your computer from DPP to ImageBrowser or other software (p.50).
- For a list of the Remote Live View window functions, refer to p.65.
- For a list of the Zoom View Window functions, refer to p.66.

Remote Live View Window Functions

These pages explain the functions available in the Remote Live View window, including checking the camera settings and focusing while viewing your subject on the computer screen.

Focusing Manually

You can focus manually while viewing the enlarged image in the Remote Live View window.

- 1 Set the lens's focus mode switch to < AF >.
- 2 Drag  to the section you want to enlarge.

3 Click the [] button.

→ The section you selected in step 1 is displayed enlarged at 100% (actual pixel size) in the [Zoom View] window.

Zoom View window

- To move the display position in the [Zoom View] window, click on [], [], [], []. You can also move the display position by dragging the window.
- You can checkmark [Maintain Zoom View] to maintain display of the [Zoom View] window.
- You can also double-click the section you want to enlarge in step 1 to display an enlarged view at 100% (actual pixel size) in the [Zoom View] window.
- Double-click an image in the [Zoom View] window to return to the [Remote Live View window].
- You can checkmark [200%] to view the section enlarged to 200%.

4 Adjust the focus.

- [], []: Adjustment Large amount
 - [], []: Adjustment Medium amount
 - [], []: Adjustment Small amount
- The [Remote Live View window] changes in real time according to the focus position adjustment.

 You can also focus using a key operation on the keyboard.

Adjustment	Closer	Further away
Large amount	< I >	< O >
Medium amount	< K >	< L >
Small amount	< < >	< > >

Focusing Using AF

In Quick, Live and Face Detection Live AF modes, images can be focused automatically in the same way as on the camera itself.

Focusing Using Quick Mode

1 Select [Quick mode] from the list box.

- The AF points appear.
- You can switch between showing and hiding the AF points by clicking the [] button.

2 Select an AF point selection method from the list box.

- Selectable items differ depending on the camera settings.

3 Click the AF point in the position where you want to focus.

- If [Automatic selection] is selected in step 2, all the AF points are automatically selected.

4 Click the [ON] button.

- AF is executed.
- When focus is achieved, the camera makes a beeping sound and the AF point turns red.

! On 7D, cancel the AF point registration function on the camera if AF points have been registered. When the camera's AF points are registered, focusing with AF in the [Remote Live View window] may not be performed properly.

- Double-clicking an AF point also performs AF.
- To cancel AF operation, click the [OFF] button.

Focusing Using Face Detection Live Mode

📷 5D Mk II 7D 50D REBELT1i 500D

1 Select [Face Detection Live mode] from the list box.

- When a face is detected, an AF point appears.
- When there is a face other than the face detected in the scene, a new AF point appears if you move the cursor to the position of the other face. Clicking that position then selects the AF point.
- You can switch between showing and hiding the AF point by clicking the [] button.

2 Click the [ON] button.

- AF is executed.
- When focus is achieved, the camera makes a beeping sound and the AF point turns green.
- If focus is not achieved, the AF point turns red.
- If the camera cannot detect a face, the AF point is fixed to the center to focus.

Checking the Depth of Field and Exposure

You can check the depth of field and exposure in the Remote Live View window.

Click the [ON] button.

- The aperture value (exposure simulation) is set in the capture window (p.62).

White Balance with the Remote Live View Window

You can change the white balance of an image in the Remote Live View window and register the changed white balance in the camera.

1 Select the white balance to apply to the image.

→ The selected white balance is applied to the image displayed in real time and you can check it in the [Remote Live View window].

2 Checkmark [Apply to shot images].

→ The selected white balance is registered in the camera as a personal white balance and applied to images that will be taken.

White Balance for Flash Photography

When taking flash shots where the subject is illuminated instantaneously, you can take a test shot under the same conditions as an actual shot, and adjust the white balance in the [Test shooting] window based on the shot test image. Also, you can take a test shot even when flash is not used.

You can perform the same operation by clicking the [Test shooting] button in the Remote Live View window.

1 Click the [Other Functions] button and select [Test shooting] from the menu that appears.

→ The shot image is displayed in the [Test shooting] window.

2 Click the [] button.

→ The click white balance window appears.

Click white balance window

3 Click on a point that is to be the standard for white.

4 Click the [Apply to camera and execute test shooting] button.

- A shot will be taken again using the part of the image in step 3 clicked as the standard for white and the shot image is displayed in the [Test shooting] window.
- The test image will not be saved. To save the test image, click the [] button.
- To close the [Test shooting] window, click the [Close] button.

- You can perform the following operations in the [Test Shooting] window using keyboard controls.
 - Test shooting: <option> + <space>
 - 50% image display: <⌘> + <1>
 - 100% image display: <⌘> + <2>
 - 200% image display: <⌘> + <3>
 - Match image size to window: <⌘> + <3>
- On **5D Mk II** **7D**, you can link flash setting/test shooting/white balance adjustment by simultaneously displaying the [Flash function settings] window (p.45) and the [Test Shooting] window.
- For a list of the [Test shooting] window functions, refer to p.67.

Adjusting the Horizontal/Vertical Alignment of the Camera

You can display gridlines in the [Remote Live View window] in the same way as the camera's Live View function, and adjust the horizontal/vertical alignment of the camera.

- 1 Click the [▼] button, and select a grid display from the menu that appears.

- 2 Click the [] button.

→ Gridlines are displayed in the [Remote Live View window].

- 3 Move the camera to adjust the horizontal/vertical alignment.

● To remove the gridlines, click the [] button again.

Changing the Aspect Ratio

As with the camera's Live View function, it is possible to shoot with a feeling similar to film-type medium-format/large-format cameras such as 6 × 6 cm, 6 × 4.5 cm and 4 × 5 inches.

Aspect ratio information is also attached automatically with a shot image, and when viewing it with DPP, the image is displayed as an image trimmed based on the aspect ratio information.

Further, aspect ratio information is only attached with the shot image, and the image itself is not actually trimmed.

- 1 Click the [] button and select the aspect ratio.

→ In the [Remote Live View window], the vertical lines of the aspect ratio you selected is displayed.

2 Move the camera and compose your picture.

- To revert the aspect ratio to the normal condition, click the  button and select [Off].

Shooting by Operating the Camera

Even when remote shooting is set, you can still operate the camera and shoot – as when shooting with only the camera. Also, since the shot images are saved to your computer's hard disk, you can shoot large quantities without having to worry about the capacity of the memory card.

1 Display the capture window (p.24).

2 Press the camera's shutter button and take a shot.

→ The shot images are transferred to the computer, DPP starts up automatically, and the shot images are displayed.

- When setting the movie recording size, click [Live View/Movie func. set.], display the [Live View/Movie func. Set.] window before setting.

Select
Click

3 Click [Remote Live View shooting].

→ The [Remote Live View window] appears.

4 Focus (p.28, p.30).

5 Click the [[Live View]] button at the bottom left of the [Remote Live View window].

6 Click the [[Recording]] button and begin shooting.

→ At the bottom left of the [Remote Live View window], a [[Recording]] icon and the recording time are displayed.

- Click the [[Recording]] button again to end shooting.
- After you close the [Remote Live View window], the file names of the image data shot in movie mode (movie/still image) appear in a list.

Timer-controlled Shooting

Two types of timer shooting are available where the camera automatically takes shots at a specified time or a specified number.

Timer Shooting

You can automatically take a shot when the specified time elapses.

- 1 **Display the capture window (p.24).**
- 2 **Click the [] button.**
→ The [Timer shooting settings] dialog box appears.
- 3 **Enter a delay time and click the [Start] button.**
 - Enter a value between 0 seconds and 99 minutes and 59 seconds in one-second increments.
 - The shot is taken when the specified time elapses.

After specifying [Destination Folder] and [File Name], click the [Download] button in the window, and image data will be downloaded from the camera's memory card to your computer. Image data having a check mark removed from its file name are not downloaded. Afterward, when downloading image data to your computer from the camera's memory card, use the method described on p.6 to p.9 of this Instruction Manual to download.

 Also when operating the camera to shoot movies with Remote Live View shooting, click the [] button before shooting.

Interval Timer Shooting

You can automatically take shots by setting the interval between shots and the number of shots to be taken.

- 1 Display the capture window (p.24).
- 2 Click the [] button.
→ The [Timer shooting settings] dialog box appears.
- 3 Checkmark [Interval timer shooting].
- 4 Enter the shooting interval and the number of shots.
 - Enter a value between 5 seconds and 99 minutes and 59 seconds in one-second increments.
 - The minimum number of interval-timed shots is two. The number of shots you can take at timed intervals depends on the available space on your computer's hard disk.
- 5 Click the [Start] button.
→ The shots are taken at the specified intervals and for the specified number of shots.

 On certain types of computer, if you set a short interval between shots and there is insufficient time to transfer and save the images, it may not be possible to take shots at the specified interval. In this case, set a longer interval between shots and take the shots again.

 The shooting mode cannot be changed when the [Timer shooting settings] dialog box is displayed. Display the [Timer shooting settings] dialog box after setting the shooting mode.

Bulb Exposures

- 1 Display the capture window (p.24).
- 2 Double-click the shooting mode icon and select [BULB].

- Specify the following settings for cameras other than **1Ds Mk III** **1D Mk III** .
 - For cameras with < B > (bulb) on the Mode dial, set to < B > .
 - For cameras without < B > (bulb) on the Mode dial, set the Mode dial to < M > (manual), and select [BULB] in the capture window or set the camera's shutter speed to [BULB].

3 Set the desired aperture.

4 Click the [] button.

→ The [Timer shooting settings] dialog box appears.

5 Enter the exposure time and click the [Start] button.

- Enter a value between 5 seconds and 99 minutes and 59 seconds in one-second increments.

 You can start/end bulb exposure without setting an exposure time by clicking the [●] button.

Flash Shooting

From EU you can set the camera's flash functions, as well as EX-series Speedlite (sold separately) compatible with flash function setting, in order to perform flash shooting.

For more details on setting items, also refer to the Instruction Manual provided with your EX-series Speedlite and with your camera.

1 Prepare your camera and flash.

- When using an external flash, mount it on your camera.

2 Connect your camera and computer, and then start up EU (p.5).

3 Click [Camera settings/Remote shooting].

→ The capture window appears.

Troubleshooting

If EU is not operating correctly, refer to the items below.

Installation could not be completed correctly

- You cannot install software unless you are logged into an account with Administrator privileges. Log in again into an account with Administrator privileges.
For how to log in and how to specify Administrator settings, refer to the User's Manual for the Macintosh computer or for Mac OS X.

EU does not start up

- If EU does not start up after following the instructions as explained, the software Preferences file may be corrupted. Quit all software, disconnect the interface cable from your computer, delete the Preferences file that is corrupted from the [Preferences] folder, and restart EU.
Delete the Preferences file below from the hard disk drive where the system is saved ► [Users] folder ► Folder of the logged in user ► [Library] folder ► [Preferences] folder.

Preferences	Description
<code>com.canon.EOS Utility 2.plist</code>	EOS Utility Preferences file

EU and the camera are not communicating

- EU does not operate correctly on a computer if its system requirements does not meet. Use EU on a computer with compatible system requirements (p.2).
- Push the plug of the interface cable all the way into the socket. Loose connections can cause faults and malfunctions (p.5).
- Check that the camera's power switch is < ON > (p.5).
- EU and the camera may not communicate normally with a cable other than the EOS DIGITAL camera-dedicated Canon interface cable (p.5).
- Connect your camera and computer directly with the interface cable provided with your camera. Do not connect the camera via a hub; doing so may prevent EU and your camera from communicating normally.
- If you connect multiple USB devices (not including the mouse or keyboard) to your computer, the camera may not communicate normally. If the camera cannot communicate normally, disconnect USB devices other than the mouse or keyboard from your computer.
- Do not connect more than one camera to the same computer. Two or more cameras may not operate normally.
- Do not connect your camera with the computer while performing "Linked shooting" with WFT-E5A/B/C/D (sold separately). Your camera may not operate normally.
- If there is insufficient charge left in the camera battery, the camera cannot communicate with EU. Either replace with a fully charged battery or use the AC adaptor kit provided with your camera. Your computer does not supply power to the camera through the interface cable.

Communication between EU and the camera disconnected

- Operation of the auto power off function will automatically switch the camera off, disabling communication with EU, if you turn the auto power off function to [ON]. Remove the check mark from [Auto power off] in the [Basic Settings] window (p.48) of the preferences or set the auto power off function in the camera to [OFF].
- If you do not perform any operation while the camera and computer are connected, depending on the computer system, a confirmation message may appear on the screen asking whether you wish to continue communicating with the camera. If you do not perform an operation while this message appears, communication with your camera is discontinued and EU shuts down. In this case, turn the camera's power switch to < OFF >, then again to < ON > and start up EU.
- Do not put your computer to sleep while it is connected to the camera. If your computer goes into sleep mode, never disconnect the interface cable while your computer is still in sleep mode. Always wake your computer up while it is still connected to the camera. Depending on the type of computer, disconnecting the interface cable while your computer is in sleep mode could prevent the computer from waking up correctly. Refer to the computer User's Manual for more information on sleep mode.

Remotely shot images using EU are not displayed in DPP

- In Digital Photo Professional, select the [Tools] menu ► [Sync folder with EOS Utility].

Monitor Folder Function (Function for Use with the WFT-E2/E2A, E3/E3A, E4/E4A or E5A/B/C/D)

This is a function for checking your images with Digital Photo Professional (hereinafter DPP) in real time using the Wireless File Transmitter WFT-E2/E2A, E3/E3A, E4/E4A or E5A/B/C/D (sold separately).

For setting the WFT-E2/E2A, E3/E3A, E4/E4A or E5A/B/C/D refer to the Instruction Manual provided with each product.

1 Click [Monitor Folder].

→ The [Monitor Folder] dialog box appears.

2 Click the [Browse] button and specify the save destination folder for shot images.

• You can specify the save destination folder for the shot images set in the WFT-E2/E2A, E3/E3A, E4/E4A or E5A/B/C/D.

3 Click the [Change] button and specify the transfer destination folder.

4 Click the [] button.

→ Image transfer preparation is complete.

5 Take a shot.

→ If images are saved in the folder specified in step 2, they are transferred/saved in the folder specified in step 3.

→ DPP starts up and the images saved in the folder specified in step 3 are displayed.

⚠ You cannot specify the same folders in step 2 and step 3.

📄 You can change the software that starts up in step 5, from DPP to ImageBrowser or other software (p.50).

Function for Use with the Accessories

If you have the Wireless File Transmitter WFT-E2/E2A, E3/E3A, E4/E4A or E5A/B/C/D (sold separately), you can start up the previously mentioned accessory software from EU. And you can also start up the Picture Style Editor (Picture Style file creating software).

For details on using each software, refer to the instruction manual for the software. For Picture Style files, refer to [p.17](#).

1 Connect your camera and computer, and then start up EU ([p.5](#)).

2 Click the [Accessories] tab.

→ The [Accessories] tab sheet appears.

3 Click the software you want to start up.

→ The clicked software starts up.

Folder Structure and File Names in the Memory Card

Images shot with the camera are saved in the memory card's [DCIM] folder with the following folder structure and file names. Refer to the following when copying images to your computer using a card reader.

File name	File type
****YYYY.JPG	JPEG image file
****YYYY.CR2	RAW image file
****YYYY.MOV	MOV movie file
****YYYY.THM	Thumbnail file
****YYYY.WAV	Audio file

- The camera specific character string set at the time of factory shipment or set in the camera appears in "****" of the file name.
- The "YYYY" in the file names represents a number between 0001 and 9999.

Contains a file allowing the camera to manage the images in the [DCIM] folder.

- The "xxx" in the folder names represents a number between 100 and 999.
- For the 1D series cameras, the folder structure is the same for CF cards and SD cards.
- When you perform DPOF settings on the camera, a [MISC] folder is created. The files that manage the DPOF settings are saved in the [MISC] folder.
- A thumbnail file is a file saved with the same file name as the movie and includes shooting information. When you play a movie with the camera, both the movie file and the thumbnail file are required.

When Adobe RGB is specified, the file names of images shot with your camera have an underscore "_" as the first character.

Uninstalling the Software

- Before starting the software uninstallation, quit all programs you are using.
- To uninstall the software, log into the account used when installation was performed.
- When you have moved the folders and the software to be deleted to the Trash, select the [Finder] menu ► [Empty Trash] and empty the Trash. You cannot reinstall the software until you have emptied the Trash.

1 Display the folder in which the software is saved.

- Open the [Canon Utilities] folder.

2 Drag the [EOS Utility] folder to the Trash.

3 Select the [Finder] menu on the desktop ► [Empty Trash].

→ EU is uninstalled.

4 Restart your computer.

You cannot retrieve data that you have emptied into the Trash and deleted, so be particularly careful when deleting data.

Fixing the Plug to the Camera

1Ds Mk III

1D Mk III

Fix the plug to the camera with the cable protector to prevent it from detaching during remote shooting.

1 Remove the cap.

2 Attach the cap on the fixing screw.

3 Connect the small plug of the cable into the terminal on your camera.

- Connect the plug with the mark facing the front of the camera.

4 Attach the cable protector and fix it with the fixing screw.

List of Viewer Window Functions (p.7)

The screenshot shows the EOS Utility viewer window with the following labeled functions:

- Switches the recording media**: Points to the top-left corner of the window.
- Recording media folder hierarchy**: Points to the left sidebar showing 'All' and '100EOS1D' folders.
- Movie icon**: Points to the top-left corner of the image grid.
- Bracketing icon**: Points to the top-left corner of the image grid.
- Images already transferred to computer icon**: Points to the top-right corner of the image grid.
- Selects the condition of the image**: Points to the top-right corner of the image grid.
- RAW + JPEG image icon**: Points to the top-left corner of the image grid.
- RAW image icon**: Points to the top-left corner of the image grid.
- Protect icon**: Points to the top-left corner of the image grid.
- Audio recording icon**: Points to the top-left corner of the image grid.
- Image display size**: Points to the 'Large' button at the bottom right of the image grid.
- Quits EU**: Points to the 'Quit' button at the bottom right of the window.
- Displays the quick preview window**: Points to the bottom-left corner of the window.
- Deletes the image**: Points to the trash icon at the bottom of the image grid.
- Check mark (p.7)**: Points to the checkmark icon at the bottom of the image grid.
- Downloads the images to the computer**: Points to the 'Download...' button at the bottom left of the image grid.
- Displays the main window**: Points to the 'Main Window...' button at the bottom right of the window.
- Displays the preferences window**: Points to the 'Preferences...' button at the bottom right of the window.

List of Capture Window Functions

● Displayed items differ depending on the model and settings of the camera connected.

*1 When using the battery, the charge level is displayed.

*2 Displayed only on **7D**.
Appears after flash charging is complete and the cursor is moved to the Shoot button.

*3 Each time you click the button, the shot image rotates 90 degrees.
To make this function available, checkmark [Rotate image] in the [Remote Shooting] window (p.50) in preferences.

*4 On **5D Mk II**, **7D**, **50D**, **REBEL1i**, **500D**, when the AF/MF selector button is set to [AF], AF/AE is performed when the cursor is moved to the Shoot button.

*5 Displayed only on **5D Mk II**, **7D**, **50D**, **REBEL1i**, **500D**. Even when it is set to [MF], "AF" appears in the shooting information for the shot image. Setting <A-DEP> as the camera's shooting mode disables this button.

*6 Click the aperture while holding down the <control> key, and you can decrease the aperture by pressing <O> on the keyboard, or increase the aperture by pressing <C>.

*7 You can select whether the shot images are saved only to the computer or both to the computer and to the memory card in the camera. In movie mode, shot movies are saved only to the camera's memory card.

List of Flash Function Settings Window Functions

5D Mk II

7D

The screenshot shows the 'Flash function settings' window with the following settings and labels:

- Flash firing:**
- Flash mode:** E TTL
- Flash metering:** Evaluative
- MULTI flash count:** 40 times
- Zoom/focal length:** 105 mm
- MULTI flash frequency:** 199 Hz
- Flash exposure compensation amount/Flash output level:** -3.0, -2.0, -1.0, 0.0, +1.0, +2.0, +3.0
- Wireless func.:** Enable
- Channel:** CH. 1
- Master flash ON/OFF:**
- Flash ratio:** A:B:C
- Flash exposure compensation amount/Flash output level* during wireless setting:**

A	1/128	1/64	1/32	1/16	1/8	1/4	1/2	1/1
B	1/128	1/64	1/32	1/16	1/8	1/4	1/2	1/1
C	1/128	1/64	1/32	1/16	1/8	1/4	1/2	1/1
- [Modeling flash] button:** Modeling flash
- [Save] button:** Save
- [Open] button:** Open...
- Close button:** Close

Additional controls at the top of the window include: MULTI flash count, 1st curtain sync, 2nd curtain sync, and Hi-speed sync.

* Displayed information differs depending on the settings. For more details on settings, also refer to the Instruction Manual provided with your EX-series Speedlite or camera.

List of Remote Live View Window Functions [\(p.24\)](#)

The screenshot shows the Remote Live View window interface. The main area displays a live view of a Canon camera. The interface is divided into several sections:

- Enlargement display frame:** The main view area showing the camera's live feed.
- WhiteBalance:** A panel on the right side containing:
 - Auto:** A dropdown menu for selecting white balance.
 - 5200 K:** A numerical input field for color temperature.
 - Click white balance:** A button to apply the selected white balance.
 - Apply to shot images:** A checked checkbox.
 - Test shooting:** A button to initiate a test shot.
- Focus:** A panel on the right side containing:
 - Quick mode:** A dropdown menu for selecting focus mode.
 - Manual selection:** A panel with ON/OFF buttons.
 - Lens drive:** A panel with navigation arrows and an infinity symbol.
 - Depth-of-field preview:** A panel with ON/OFF buttons.
- Controllers 1:** A vertical bar on the right side of the interface, containing a red bar icon used to show or hide the controllers.
- Controllers 2:** A horizontal bar at the bottom of the interface containing various icons for camera controls:
 - Starts/stops movie recording:** A red circle icon.
 - Shows/hides the AF points:** A camera icon with a grid overlay.
 - Rotates the image:** A circular arrow icon.
 - Shows/hides the gridlines:** A grid icon.
 - Sets the aspect ratio:** A square icon with a diagonal line.
 - Displays the Zoom View Window:** A magnifying glass icon.
 - Displays the capture window:** A camera icon with a red dot.
 - Shows/hides the histogram:** A histogram icon.
- Bottom Status Bar:** Contains a "Captured images are saved on the camera." message and a "Close" button.
