About the Drivers and Software

MF Drivers	
Printer driver	You can print from an application using the machine by installing the printer driver on your computer. You can process print data at high speed by compressing the print data using the computer's processing capability.
Fax driver (fax model only)	If you install the fax driver on your computer, you can select "Print" from an application, select the Canon fax driver as a printer, and specify the output destination and options. The fax driver converts the data into an image that conforms to standard fax protocols so that the data can be printed or saved using the recipient's fax machine.
Scanner driver	You can use the machine as a scanner if you install the scanner driver on your computer.
Network Scan Utility	This software is required for using the scan functions via a network. This software is installed with the scanner driver.
MF Toolbox	MF Toolbox is a program which allows you to easily open an image scanned by the scanner in an application, attaching the scanned image to an e-mail, and storing the scanned image in a hard disk.
Additional Software Programs	
Presto! PageManager	This is the software for managing the scanned images.

6 Press [🛞] (Menu) to close the menu screen.

7 Restart the machine.

Turn OFF the machine and wait for at least 10 seconds before turning it ON again.

The method of installation is differ depending on the connection method or environment.

Connection method	Installation method			
USB connection	See "Installing the MF Drivers and MF Toolbox," on p. 5.			
Network	IPv4 environment	See "Installing the MF Drivers and MF Toolbox," on p. 5.		
Network connection	IPv6 environment*	See "Installing the MF Drivers Via the WSD Network," on p. 24.		

* You may not use the scan function in the IPv6 environment.

Installing the MF Drivers and MF Toolbox

* If you are operating in the IPv6 environment, you may not install the drivers or software following the procedures below.

Refer to "Installing the MF Drivers Via the WSD Network" (See p. 24) to install MF Drivers.

X You may not use the scan function in the IPv6 environment.

Install the software to use the machine.

🕛 IMPORTANT

• If you are using a 64-bit operating system

The MF driver and MF Toolbox for 64-bit operating systems may not be supplied depending on your country or region.

- User rights for logging on to Windows Log on as a user with administrative rights.
- When installing via USB connection Connect the USB cable after the software installation. Make sure that the power of the machine is turned ON when connecting the USB cable.
- When installing via network connection

Before starting the installation, check the following.

- The computer and machine are connected via the network.
- The power of the machine is turned ON.
- The IP addresses are properly set up.
- Installing the e-Manual

The e-Manual is not installed by selecting [Easy Installation].

To install the e-Manual, select [Custom Installation] on p. 12.

* If the User Manual CD-ROM is supplied with the machine, install the e-Manual from the User Manual CD-ROM.

Installing with [Easy Installation]

2 Click [Easy Installation].

To install the following software and manuals that cannot be installed with [Easy Installation], select [Custom Installation] (See p. 12).

- Presto! PageManager
- e-Manual
- * If the User Manual CD-ROM is supplied with the machine, install the e-Manual from the User Manual CD-ROM.

## Appendix

### **Confirming IP Address Settings**

### NOTE

- If the machine is not connected to the network properly The IP address will not be displayed.
- When the startup time setting is specified The IP address, subnet mask, and gateway address will be displayed when the specified time has elapsed. e-Manual -> "Specifying a Delay Before Establishing the Network Connection"
- When the machine is connected to a switching hub
   The machine may not be able to connect to a network even though your network settings are appropriate. In
   this case, the startup time of the machine needs to be set to a waiting state.
   e-Manual -> "Specifying a Delay Before Establishing the Network Connection"

### **Uninstalling the Software**

If you do not need the printer driver, fax driver, scanner driver, or MF Toolbox, you can uninstall them with the following procedure.

* If you install the MF drivers via the WSD network, see the "e-Manual" and uninstall the drivers.

## IMPORTANT

Confirm the following before uninstalling the software:

- You must be have administrative privileges on the computer
- You should have the installation software (in case you want to re-install the drivers)
- You have closed all applications on your computer

### To uninstall the printer/fax/scanner driver

From the [Start] menu, click [(All) Programs] -> [Canon] -> [MF5900 Series] (or [D1300 Series] or [iR 1133]) -> [Uninstall Drivers].

## 2 Click [Delete].

## **3** Click [Yes] to confirm the uninstallation.

## **4** Click [Exit] (or [Restart]).

MF Drivers Uninstaller		83
4	Uninstallation of MF Drivers is complete.	
	Click [Exit] to exit the wizard,	
		xit

### To uninstall the MF Toolbox

- From the [Start] menu, click [(All) Programs] -> [Canon] -> [MF Toolbox 4.9]
   -> [Toolbox Uninstall].
- 2 Click [Remove].

## **3** Click [Exit].
