# Preface

Thank you for purchasing this Canon product.

Please read this manual thoroughly before operating the printer in order to familiarize yourself with its capabilities, and to make the most of its many functions.

After reading this manual, store it in a safe place for future reference.

# How To Use This Manual

# Symbols Used in This Manual

The following symbols are used in this manual to indicate operational requirements or clarification.

IMPORTANT	Indicates operational requirements and restrictions. Be sure to read these items carefully in order to operate the printer correctly, and to avoid damage to the printer.
NOTE	Indicates a clarification of an operation, or contains additional explanations for a procedure. Reading these notes is highly recommended.

# **Buttons Used in This Manual**

The following button names are a few examples of how buttons to be pressed are expressed in this manual:

Buttons on Computer Operation Screen: [Button Name]

Example: [OK]

[Change]

# **Displays Used in This Manual**

Displays used in this manual may differ from those on your computer depending on the system environment.

The buttons which you should press are marked with a \_\_\_\_\_ as shown below. When multiple buttons can be pressed on the screen shot of computer operation screen, all buttons are marked. Select the button which suits your needs.

# **Before You Start**

This chapter describes the features of the Remote UI and the system environment in which the Remote UI can be used.

Features and Benefits of the Remote UI1-2
System Requirements

CHAPTER

# Features and Benefits of the Remote UI

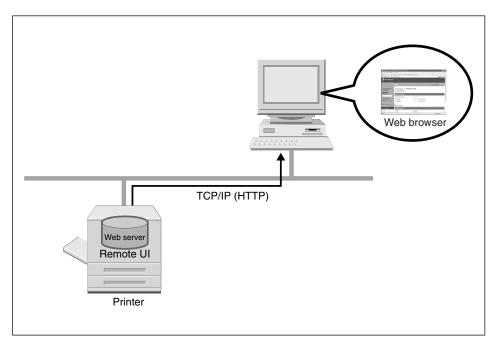

The Remote UI is software that allows you to manage the printer using a web browser. By accessing the printer from the web browser via a network, you can check the printer status or job history, and specify various settings. The Remote UI has the following features.

#### 🧷 NOTE

- Depending on the printer model or availability of the optional accessories for the printer, the display screen images and the options that can be controlled and specified vary. For more details, see "Chapter 3 Various Functions of the Remote UI".
- The screen shots used in this section are from Windows XP Professional with which LBP5100 is being used.

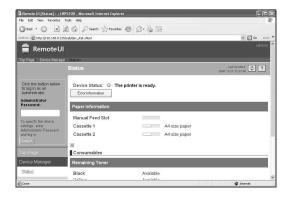

#### ■ Software other than a web browser is not required.

Because the software required for using the Remote UI (a web server) is preinstalled in the network board, you do not need to have software other than a web browser ready. Running the web browser and specifying the IP address display the Remote UI screen and allows you to use the Remote UI.

#### ■ You can check the printer status from a computer on the network.

The Remote UI allows you to access the printer via a network and display the current status, various information, and job history. You can manage the printer from a remote computer without moving to the printer.

# Before You Start

1

#### ■ You can specify or check various printer settings from a computer.

In the Remote UI, you can specify the network settings and check the printer status. The Administrator mode (The mode to which you need to enter the password to log in) allows only the administrator to perform the settings and operation related to the printer management.

# System Requirements

Operation of the Remote UI in the following system environment is guaranteed.

Web Browser	Netscape Navigator 4.7 or later Internet Explorer 4.01SP1 or later
Operating System	An operating system on which the above web browser can run
• Display	Resolution: 800 x 600 pixels or more Display colors: 256 or more

#### Ø NOTE

Software other than the above one, such as a web server, is not required. (A web server is preinstalled in the printer.)

# Using the Remote UI

# 2 CHAPTER

This chapter describes the procedure for starting the Remote UI and the screen layout.

Starting the Remote UI	2-2
Screen Layout of the Remote UI	2-4
Logging in as Administrator	2-6

# Starting the Remote UI

Start the Remote UI using a web browser.

#### NOTE

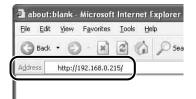

The screen shots used in this section are from Windows XP Professional with which LBP5100 is being used.

**1** Start the web browser.

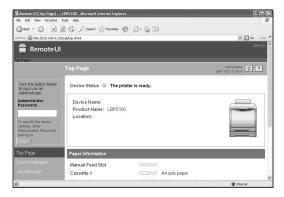

#### 2 Enter the following URL in [Address] or [Location], then press the [ENTER] key on your keyboard.

http://<the IP address of the printer>/

Input Example : http://192.168.0.215/

The screen of the Remote UI is displayed.

## 

- If you are not sure about the IP address of the printer, refer to the Network Status Print printed in "Chapter 2 Setting Up the Network Environment for Printing" in Network Guide or ask your network administrator.
- If the host name of the printer is registered in the DNS server, you can enter ["hostname"."domain name"] instead of the IP address.
   Example: http://my\_printer.xy\_dept.company.com/
- If the screen of the Remote UI is not displayed, make sure that the entered IP address or ["hostname"."domain name"] is correct. When the screen of the Remote UI is not displayed even if the entered address is correct, consult your network administrator.
- You cannot connect the computer to the printer via a proxy server. If you are using a proxy server, perform the following settings. (The setting varies depending on the network environment. Consult your network administrator.)
- On the settings for the proxy server of the web browser, add the IP address of the printer to [Exceptions] (Addresses that do not use the proxy server).
- · Configure the web browser so that you can use Cookie.
- If multiple Remote UIs are running simultaneously, the latest setting is effective. It is recommended that only one Remote UI should be running at a time.

#### Ø NOTE

Depending on the system environment, the screen of the Remote UI is not displayed even after performing the settings above. In this case, enter "http://<the IP address of the printer>/cab/top.shtml" in [Address] or [Location] to redisplay the screen.

# Screen Layout of the Remote UI

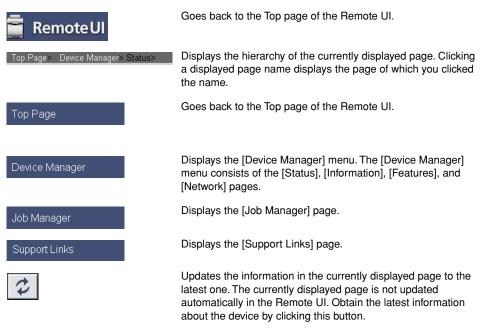

#### NOTE

The screen shots used in this section are from Windows XP Professional with which LBP5100 is being used.

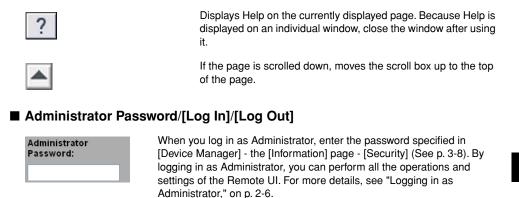

When you access to the Remote UI, the following screen is displayed.

#### Operation Buttons

2

You can log in as Administrator by entering the administrator password, then clicking this button. When you log in as Administrator, [Log In] changes to [Log Out].

Log Ou

When you are using the Remote UI as Administrator, you can log out by clicking this button. When you log out, [Log Out] changes to [Log In].

#### ■ Image of the Printer (Top Page only)

Displays an image of the printer. The displayed image varies depending on the availability of the paper source option.

# Logging in as Administrator

By logging in as Administrator, you can perform all the operations and settings of the Remote UI. When you log in to the Remote UI, you need to enter the password specified in [Security] (See p. 3-8) in the [Information] page in [Device Manager].

#### NOTE

- The password is not specified by default. Log in to the Remote UI without entering a password.
- The screen shots used in this section are from Windows XP Professional with which LBP5100 is being used.

## 1 Enter the password, then click [Log In].

# Various Functions of the Remote UI 3

This chapter describes the printer information that can be displayed and the options that can be specified in the Remote UI.

Displaying/Managing the Printer Status (Device Manager)	3-2
Display Procedure	.3-2
Displaying the Current Status ([Status] Page)	.3-3
Displaying/Changing the Printer Information ([Information] Page)	.3-7
Confirming the Availabilities of the Optional Accessories ([Features] Page)	.3-8
Displaying/Changing the Network Settings ([Network] Page)	3-10
Displaying the Print Log Page (Job Manager)	-12
Displaying/Changing the Links (Support Links)	-13
Display Procedure	3-13
Changing the Links	3-14

# Displaying/Managing the Printer Status (Device Manager)

By obtaining information from the printer, you can display the current printer status and printer information in the Remote UI. If you have logged in as Administrator, you can change the settings for the security or network etc. from the Remote UI. [Device Manager] consists of the following four pages.

#### ■ [Status] Page (See p. 3-3)

Displays the current printer status.

■ [Information] Page (See p. 3-7) Displays the device name and information about the installation site and security.

#### ■ [Features] Page (See p. 3-8)

Display the availability of the optional accessories and [Number of Total Printed Pages].

#### ■ [Network] Page (See p. 3-10)

Displays the settings for the network. You can reset the print server or change the network settings.

#### 🖉 NOTE

The screen shots used in this section are from Windows XP Professional with which LBP5100 is being used.

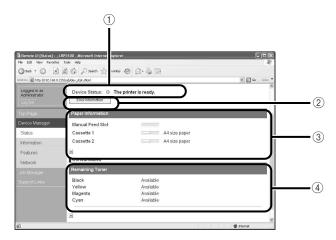

## **Display Procedure**

Select any one of [Status], [Information], [Features], or [Network] from the [Device Manager] menu.

# Displaying the Current Status ([Status] Page)

Displays the current printer status such as the amount of paper or toner remaining.

#### 1 [Device Status]

Displays the current printer status using the indicator and a status message. The colors of the indicator indicate the printer status as follows.

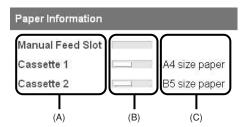

Color of Indicator	Device Status	Remedy	
(Green)	Normal (The printer is ready to print)		
O (Yellow)	Any remedy is required although this status does not affect the job (A Warning message is being displayed)	Click [Error	
O (Red)	Cannot print for any reason (An Error message is being displayed)	Information], then follow the displayed	
(Red and Blinking)	A problem has occurred and the printer does not operate properly (A service call is being displayed)	directions.	

② [Error Information]

When clicked, displays information about the error occurring in the printer.

③ [Paper Information]

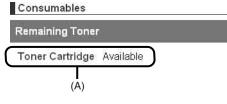

Displays information about the paper source.

- (A): The names of each paper source
- (B): The amount of paper remaining in each paper source
- (C): The sizes of paper in each paper source
- (4) [Consumables]

Displays information about the consumables.

#### For a black-and-white printer

(A): Status of the toner cartridge

#### For a color printer

Consumables

(A): The amount of toner remaining in each cartridge

Consumables	mables Display Status		Remedy
	<available></available>	The printer is ready to print	-
Toner Cartridge (Black-and-white printer)	<replacement Needed Soon&gt;</replacement 	The toner cartridge needs to be replaced soon	<ul> <li>You can continue to print.</li> <li>Have ready a new toner cartridge.</li> <li>It is recommended that you replace the toner cartridge before printing a large amount of data (See "User's Guide").</li> <li>When you are using LBP3300, <replacement needed="" soon=""> does not appear even if the toner cartridge needs to be replaced soon. The case where white streaks appear on printed paper in longitudinal direction, or printed paper comes out faint or uneven can be used to estimate when the toner cartridge will need to be replaced.</replacement></li> </ul>
	<check Cartridge&gt;</check 	A toner cartridge with print quality that cannot be guaranteed or a used toner cartridge that has reached its lifetime is installed.	-
	<install Cartridge&gt;</install 	The toner cartridge is not installed	Install the toner cartridge properly.

Consumables	Display	Status	Remedy
Toner Cartridge (Color printer)	<available></available>	The printer is ready to print	-
	<replacement Needed Soon&gt;</replacement 	The toner cartridge needs to be replaced soon	<ul> <li>You can continue to print.</li> <li>Have ready a new toner cartridge.</li> <li>It is recommended that you replace the toner cartridge before printing a large amount of data (See "User's Guide").</li> </ul>
		The toner cartridge has reached the end of its life	<ul> <li>When the black toner cartridge has reached the end of its life, the printer stops printing, and you cannot continue the job.</li> <li>When any of the toner cartridges (other than black) has reached the end of its life, you can print only in black and white.</li> <li>Replace the toner cartridge of the indicated color with a new one (See "User's Guide").</li> </ul>
	<check Cartridge&gt;</check 	Toner cartridges with print quality that cannot be guaranteed or used toner cartridges that have reached their lifetime are installed	Continuing to use these cartridges may cause a malfunction, so replacing these cartridges with new cartridges is recommended (See "User's Guide").
	<install Cartridge&gt;</install 	The toner cartridge is not installed	Install the toner cartridge properly.
		The toner cover is open	Close the toner cover firmly.

# Displaying/Changing the Printer Information ([Information] Page)

Displays information about the installation site, administrator, display language, etc. If you have logged in as Administrator, you can change the security settings, etc.

① [Device Information]

Displays the general information of the printer. You can display the page that allows you to change the device information by clicking [Change] on the upper right. You can change the device information only when you have logged in as Administrator.

2 [Language]

Displays the display language currently being used in the Remote UI. You can display the page that allows you to change the display language by clicking [Change] on the upper right. You can change the language only when you have logged in as Administrator.

③ [Security]

Displays information about the security settings, such as the settings for the administrator password that the printer has and the access restrictions. You can display the page that allows you to change the security settings by clicking [Change] on the upper right. You can change the security settings only when you have logged in as Administrator. For more details, see "Chapter 3 Managing the Printer in the Network Environment" in Network Guide.

(4) [Display Log]

Displays the [Security Access Log] page that allows you to display, [Save], or [Clear] the obtained security access logs. You can also display the date and time that the print server obtained from the SNTP server, or update the date and time by obtaining them from the SNTP server. You can display the logs only when you have logged in as Administrator. For more details, see "Chapter 3 Managing the Printer in the Network Environment" in Network Guide.

# Confirming the Availabilities of the Optional Accessories ([Features] Page)

Displays information about the availabilities of the optional accessories and [Number of Total Printed Pages].

① The icons that indicate the printer information or printer status are displayed.

lcon	Meaning	
<b>A3</b>	Indicates that the printer is capable of printing A3 size paper.	
	Indicates that the printer is capable of color printing.	
	Indicates that the printer is capable of 2-sided printing.	

② Information about the maximum printing speed and the total number of printed pages is displayed.

# Displaying/Changing the Network Settings ([Network] Page)

Allows you to confirm the network settings. If you have logged in as Administrator, you can change the network settings or reset the print server.

#### 1 [Reset]

Resets the print server. After you change the settings for the network protocols, reset the print server by clicking this button to make the settings effective. You can reset the print server only when you have logged in as Administrator.

② [Show Parameter List]

Displays the [Parameter List] page of the printer. You can also initialize the network settings in the [Parameter List] page. You can initialize the network settings only when you have logged in as Administrator. For more details, see "Chapter 3 Managing the Printer in the Network Environment" in Network Guide.

#### 🕛 IMPORTANT

Make sure that the printer is not operating before initializing the network settings. If you initialize the print server while the printer is printing or receiving data, the received data may not be printed properly, or may result in paper jams or damage to the printer.

③ [Network Interface]

Displays information about the network interface.

(4) [Firmware]

Displays the name of the current network interface and its version.

(5) [Update Firmware]

Updates the firmware. You can update the firmware only when you have logged in as Administrator. For more details, see "Chapter 5 Appendix" in Network Guide.

#### IMPORTANT

- When you cannot update the firmware properly or want to know details on the procedure for updating the firmware, see the README file supplied with the firmware.
- Make sure that the printer is not operating before updating the firmware. Do not print during the firmware update. Otherwise, the firmware cannot be updated properly.
- 6 [Download Site]

Displays the page that allows you to download the firmware. You can download the firmware only when you have logged in as Administrator.

NOTE

The [Support Links] page (See p. 3-13) allows you to change the link that is displayed by clicking the [Download Site] button.

⑦ [General]

Displays the print server name (port name). You can change the print server name only when you have logged in as Administrator.

⑧ [Protocol]

Displays the network protocol settings. You can display the page that allows you to change the protocol settings by clicking [Change]. You can change the protocol settings only when you have logged in as Administrator. For more details, see "Chapter 2 Setting Up the Network Environment for Printing" in Network Guide.

#### **IMPORTANT**

After changing the network settings, click [Reset] in the [Network] page to reset the print server. If you do not reset the print server, the changed settings cannot be effective.

# Displaying the Print Log Page (Job Manager)

You can check the job history in [Job Manager]. Display the job history as follows.

#### 🥟 NOTE

The screen shots used in this section are from Windows XP Professional with which LBP5100 is being used.

## 1 Click [Job Manager].

	g] : ;LBP5100 - Microsoft Internet [	xplorer

#### NOTE

- Up to 32 jobs can be displayed. When the number of the jobs exceeds 32, the print logs are deleted starting from the oldest one.
- A job file name of up to 20 characters can be displayed in [Document Name]. If the number of letters exceeds 20, the letters after the limited number are not displayed, or some letters are not displayed properly. Also, depending on the application, the application name may be added to the beginning of the file name.
- If you turn the printer OFF, all the print logs will be deleted automatically.
- If you print via USB, [Local] is displayed in [Interface Name]. If you print via the network, nothing is displayed in the field.

# Displaying/Changing the Links (Support Links)

The links to the sites that provide information about the printer support are supplied in the Remote UI, and you can access the sites from the Remote UI as needed. If you have logged in as Administrator, you can change the links.

#### NOTE

The screen shots used in this section are from Windows XP Professional with which LBP5100 is being used.

# **Display Procedure**
